NOTES OF CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Crotons.

Crotons should not be shaded too heavily or the naturally brilliant coloring of the leaves will become more somber. Frequent syringing benefits the plants and keeps such insect pests as mealy bug, red spider and scale in check. Crotons, or codiaëums, as the botanists prefer to call them, succeed best in a warm, moist greenhouse. Propagation is easy. It can be done by ringing and mossing the tops, which if kept constantly moist will soon produce roots, after which the tops can be potted and kept fairly close until established. Crotons grow well in a compost of fibrous loam and leaf-mold. When they are likely to stay in pots a considerable time, some fine bone and old cow manure may be added with advantage. They appreciate watering with liquid manure when well established in pots and in active growth, but heavy doses must be avoided. Damping down will now be necessary, morning, noon and night, and the plants should be examined each day and watered only if they need it, for even whilst growing they should not get in a saturated condition.

Hydrangeas.

After the first week in July all pruning or stopping on stock planted out should be discontinued for the season, since if followed up any later it would make a sacrifice of bloom. Sturdy shoots, now starting as an undergrowth from the main stems, should not be removed, for these will develop into the finest flowering branches by next spring. All weak and straggling growth, however, must be cleanly cut away and the plants kept freed of these at all times. Nice little single-stemmed plants with one immense truss of bloom, may be had by next spring from cuttings struck now. These cuttings of course must not be stopped or cut back, but kept free of any side growth. Those that are growing under pot culture may need a repotting once or twice, as the difference in vigor between the individual plants would indicate, until they are in 6 or 7-inch pots. Keep all these pots well watered so they will make their required growth before the fall. When the cool weather sets in you can start in ripening them up.

Getting Carnations Planted.

Growers who have some of their houses ready would do well to plant them up. The housing of carnations can be done from now and up to the 15th of August. Be sure the houses are made thoroughly clean before starting to plant. To make the atmosphere more congenial both for the plants and help, give them a shading of some material that will come off easily. In

lifting the plants from the field give them some protection from the sun and drying winds. Select only the best and most shapely and make the hole large enough to hold all the roots nicely. When planted they should have a good soaking. This is better done at short intervals so that none have a chance to flag. Keep them sprayed two or three times a day and also keep the house or houses rather close for about three or four days.

Mignonette for Winter Flowering.

To ensure a good crop of mignonette for winter cutting the seed should be sown early. If sown now they will make strong plants by early winter. Where a house that is cool is available and a solid bed possible sow the seed there as they always give better spikes and more of them when planted in solid beds. Give them a very rich compost, say two loads fibrous loam, to one of well decayed cow manure. When the beds or benches are filled have the surface made nice and fine before the seed is sown. Make rows lengthwise and crosswise 12 inches apart and sow three or four seeds where the lines cross. See that the seed is covered lightly and then press down firmly. Keep moist until the seedlings appear when they should have enough of water to keep them growing. When the plants show their second pair of leaves, thin to two, and later you can leave only one.

Calanthes.

Keep a sharp lookout as to watering the calanthes, going over them twice a day to prevent any of them from becoming overdry. These orchids do not like as much spraying as either cattleyas or dendrobies. A spraying in the morning will be enough and they should have their foliage dry by night. When they are left wet over night spot will very likely develop. We sometimes run into quite a few nights during July and August which become rather cool. When this happens start a little fire. Calanthes want a temperature of not less than 70 degrees during the night. Give enough of ventilation to keep the air buoyant.

Keeping Weeds Down.

We are now at a season when all kinds of weeds both inside and outside soon start up and grow apace. Do not be neglectful in keeping the soil clear of these tramps of the vegetable kingdom. Weeds rob whatever crop you may be growing by taking up the plant food which should be left there for the crop. Keep all benches in the houses as well as the ground outside clear of weeds by frequent weeding and cultivation.

Mr. Farrell's next notes will be on the following: Callas; Gardenias; Geraniums; Rambler Roses; Planning for Next Winter; Solanums.

estate or the workings and product of some prosperous commercial establishment. On such occasions the hospitality extended is free-hearted and unstinted and these red-letter days in the life of the florist or gardener, made memorable by the courtesies and social pleasures enjoyed, the new friendships made and older ones more firmly cemented. The poet might well have said—"Angels (and florists) from friendship gather half their joys." In the horticultural avocations it is ever true that "souls by instinct to each other turn, demand alliance and in friendship burn." But these occasions have a value far beyond the entertainment and the comradeship. They are an education in themselves, teaching by example, which is the great school of mankind, and we cannot have too many of them.

Referring to our recent editorial note, **Bulb troubles** commenting on the reported advance in prices on bulbs for export by the Holland dealers, a subscriber in the middle west writes: "Perhaps the thrifty Dutchmen are trying to make up the money they lose in making good for the bulbs that failed last year. Florists here refused to order more unless they made compensation for the loss." From all evidence at hand we are satisfied that there was an unprecedented proportion of defective tulips shipped to this country last season, both for forcing purposes and for outdoor planting. Representatives of Holland dealers with whom we have talked are not disposed to deny this but attribute the trouble to the unfavorable growing and harvesting weather of the previous season and to the overheating of the bulbs in certain steamers in transit. We do know, however, of some stocks of such satisfactory quality that no complaint could reasonably be made. These were from growers of established reputation as a rule. American growers would do well to avoid buying from speculative concerns who own no bulb fields and whose only visible asset is their catalogue. Better still, place the orders with responsible American importing houses that are familiar with conditions abroad and know who are the reliable Holland firms.

Men who were active in the plant trade or in the Society of American Florists twenty-five years ago will recall the agitation for uniformity of shape and sizes in flower pots and the difficulties and controversies that were encountered before the desired standard was devised and adopted. Previous to that time every manufacturer had his own standard of dimensions but when the S. A. F. finally adopted and recommended its standard for universal use its advantages appealed so strongly to the growers that there was an immediate stampede of pot manufacturers to get in and comply to the letter with the requirements. As is well known, absolute uniformity was not attained although an immense advance was accomplished, and the situation since has been further confused by the fact that the official scales and drawings of the committee never came into the possession of the Society, were never recorded in its printed reports, and when requests have been made on the secretary's office for standard scales none could be supplied and those manufacturers having machinery adjusted to the original official standard have not been disposed to give out their measurements for the benefit of competitors. We hope to see the Society take up this matter in earnest at the Boston Convention and re-establish and perfect its standard scale so that same may be officially recorded and published broadcast for the benefit of the trade.

Entertainment and education

It becomes our pleasant privilege quite frequently to report the visit of the members of one or another club or other association, on invitation, to inspect and enjoy the beauties of some private

CLUBS AND SOCIETIES

AMERICAN SWEET PEA SOCIETY.

The annual meeting of the Sweet Pea Society at the Museum of Natural History, New York, on Saturday, June 27, was a well attended and most successful affair. The addresses by the officers, Prof. A. C. Beal's report on the Cornell Trial Grounds and the lecture on Sweet Peas—Past, Present and Future by Frank G. Cuthbertson were listened to with interest and the exhibition was by far the finest ever made in America.

Lester L. Morse of California was elected as the new president of the society. Vice-president A. M. Kirby, secretary H. A. Bunyard, treasurer A. T. Boddington, recording-secretary J. H. Pepper and the various committees were re-elected. The selection of the next meeting place was left for the executive committee.

In the evening there was a banquet to the judges and the officers at Hotel Endicott, attended by about twenty gentlemen. A. T. Boddington was toastmaster and the speeches were varied and interesting, bringing to a happy close a most successful meeting.

In the list of winners in the exhibition, which appears herewith, it will be noticed that the name of President Wm. Sim does not appear. This was due to no fault of Mr. Sim, but to the American Express Company which had Mr. Sim's shipments on the trucks at 7 a. m. Saturday ready to go to the hall and did not deliver them until 1.30 p. m., after the judging had been completed and the flowers were spoiled by their long exposure to the hot sun. This exhibit by Mr. Sim when arranged filled a table 300 feet long and contained over 20,000 flowers, being as large as the rest of the show all together. It filled fifty boxes and occupied fifteen people on Friday, picking and packing, and it is a shame that after such effort and expense it should come to grief through the neglect of local transportation employees.

Secretary Bunyard's Report.

Right at this spot, five years ago almost to a day, July 7, 1909, The American Sweet Pea Society was born. At that time I said, "The Sweet Pea Society should be a success, must be a success." I leave it to you that at least we are on our way, if we take the trouble to look over the exhibits now shown here in this building, perhaps the finest general exhibit of sweet peas ever shown in this country—if not in the world. Nearly sixty exhibitors and over 2000 vases of sweet peas besides table and other decorative features. We have with us today nearly all our charter members with perhaps one great exception, the gentleman who helped us to organize our society when we needed all the moral support that could be brought to bear. I allude to the late Prof. John Craig, who was indeed a gentleman and a scholar and who organized our trial grounds at Cornell University and which today are under the efficient guidance of Prof. A. C. Beal. The following bulletins have been issued, up to date; No. 319, "Winter-flowering

Sweet Peas;" No. 320, "Culture of the Sweet Pea;" and No. 342, "Classification of Garden Varieties of the Sweet Pea;" all of which have been sent to the horticultural press and to our members in good standing; today they are standard works.

In the commercial cut-flower market the Sweet Pea stands third as an all-around flower and has been a money maker for the growers, commission merchants and retail florists alike. You cannot gainsay that it is one of the most democratic and popular flowers of today. The seedsman, too, will tell you he sells more sweet pea seeds today in bulk and in value than any other flower seed. Therefore, the sweet pea is of importance to us all, then why not a society to advance this beautiful and ever increasing popular flower?

In the past ten years, advancement has been made by the sweet pea. From the Grandiflora type has evolved the Spencer type, the Winter-flowering Grandifloras and now the Winter-flowering Spencers. The American Sweet Pea Society has helped to advertise the sweet pea for us all and has helped to put it on the horticultural map.

I regret that the American Sweet Pea Society has not received from some quarters the support it deserved, but then, this is simply the history of all societies. I want to thank the horticultural press at this time, however, for their unqualified support and the gentlemen who are not only members, but who have given their time and financial support far beyond their obligations to the society.

We have today, all told, about 200 members in good standing and 14 life members. Our financial condition is healthy; no big surplus, but money enough to take care of all obligations. Apart from the exhibition, we do not owe a penny and this is so far financed that we shall more than come out even through guarantees, donations and prizes generously offered by the trade and others. We have no paid officers.

During the past six years, we have held nine exhibitions, six summer and three winter; two in New York under the auspices of the Horticultural Society of New York; two in Boston, under the auspices of the Massachusetts Horticultural Society; one in Philadelphia, under the auspices of the Pennsylvania Horticultural Society and the three winter exhibitions in co-operation with the S. A. F. & O. H. National and other flower shows, awarding during that time nearly \$10,000 in cash, cups, medals and other prizes in kind.

I hear someone say, "how about affiliation?" which also reminds me about a letter I received today from a member who resigned saying he could not afford to be continually paying out dues to so many societies. I wrote him that I was feeling the same way and suggest a blanket due covering all societies. If the S. A. F. & O. H. should say to us, as a mother society, "come and sit on our knee and tell us all your troubles and let us see if we cannot help you and your good work along," I think we would at least

meet her half way. 'Tis true, we have not received any help directly, though her members are always willing to help us financially and morally. I am grateful for all the support, also especially to the Horticultural Society of New York, the Massachusetts Horticultural Society and the Pennsylvania Horticultural Society, who have been more than generous and courteous in the past. The future too, is brighter today than ever for our youthful and useful society and in conclusion I might add the prophetic simile of Rev. W. T. Hutchins,

"The Sweet Pea has a keel that was meant to seek all shores; it has wings that were meant to fly across all continents; it has a standard which is friendly to all nations; it has a fragrance like the universal Gospel; yea, a sweet prophecy of welcome everywhere that has been abundantly fulfilled."

Prize Awards.

PRIVATE GARDENERS—SECTION A.

Peter Henderson & Co.'s prizes, for 12 vases, 12 varieties of Spencer Sweet Peas: 1st, Mrs. W. B. Leeds, Newport, R. I., gard. Wm. Gray; 2nd, Giraud Foster, Lenox, Mass., supt. Edwin Jenkins; 3rd, M. T. Cockeroff, Naugatuck, Conn., gard. Adam Paterson.

A. T. Boddington prizes, for collection 25 varieties: 1st, and challenge cup, Mrs. W. B. Leeds; 2nd, Adolph Lewisohn, Aidsley, N. Y., gard. J. Canning; 3rd, Mrs. Benj. Stern, Roslyn, N. Y., gard. W. D. Robertson.

The Stump & Walter Co.'s prizes, for six vases Spencer varieties: 1st, J. J. Downey, Portchester, N. Y., gard. Thos. Ryan; 2nd, Giraud Foster; 3rd, Mrs. Robt. Winthrop, Lenox, Mass.

H. A. Dreer prizes for Florence Nightingale: 1st, H. Darlington, Mamaroneck, N. Y., gard. P. W. Poppy; 2nd, J. W. Pepper, Jenkintown, Pa., gard. W. Robertson. Queen Alexandra Spencer: 1st, J. W. Pepper, White Spencer; 2nd, Giraud Foster; 3rd, J. W. Pepper.

Mount Desert Nurseries prize, best vase of one variety, arranged for effect: 1st, Mrs. W. B. Leeds; 2nd, H. W. Fischer, New Canaan, Conn., gard. R. Bottomley.

Watkins & Simpson prize, six vases Spencer: 1st, Paul M. Warburg, Hartsdale, N. Y., gard. Frank C. Luckenbacher.

Michell silver medal, for best vase Spencer varieties: M. T. Cockeroff.

Knight & Struck Company's prizes, vase containing 25 sprays, in variety, no two alike in shading: 1st, Mrs. W. B. Leeds; 2nd, J. J. Downey; 3rd, Giraud Foster.

Burnett Brothers' silver cup. For best three vases, distinct colors, Paul M. Warburg.

American Sweet Pea Society's prizes, for the best display for effect; first prize, The American Sweet Pea Society's Silver Medal and \$25.00; second prize, The American Sweet Pea Society's Bronze Medal and \$15.00. 1st and silver medal, A. A. Mason, Tuxedo, N. Y., gard. David S. Miller; 2nd, and bronze medal "Highlawn" Lenox, Mass., gard. Geo. Fouisham.

Table decoration: 1st, and Thos. F. Galvin cup, F. Berthuser, Graystone, Yonkers, N. Y.; 2nd, H. L. Pratt, Glen Cove, L. I., gard. H. Gaut.

PRIVATE GARDENERS AND AMATEURS—SECTION B.

W. Atlee Burpee cup, for 12 vases, 12 varieties: Paul M. Warburg.

W. Atlee Burpee prizes. For one variety Spencer introduced 1914: 1st, J. J. Downey; 2nd, Giraud Foster; 3rd, Mrs. Moses Taylor, Mt. Kisco, N. Y., gard. Alex. Thompson.

Sutton & Sons' cup, for best table of sweet peas, covering 12 square feet: "Highlawn" Lenox, Mass.

Weeber & Don prize, for vase of 100 sprays, arranged for effect, W. E. Reis, and Mr. Grunert.

AMATEURS—SECTION C.

Special prizes in these classes were offered by Peter Henderson & Co., A. T.

Boddington and John Lewis Childs, in addition to the regular society prizes, and all were awarded.

RETAIL FLORISTS—SECTION D.

New York Florists' Club Prizes for table decoration: 1st, Max. Schling, New York; 2nd, Alfred T. Bunyard, N. Y.

Mantel Decoration: 1st and silver medal, Max Schling; 2nd, and bronze medal, A. Kottmiller, New York.

Bridal Bouquet: 1st, Alfred T. Bunyard; 2nd, A. Kottmiller.

Hamper: 1st, Max Schling.
Corsage: 1st, Max Schling; 2nd, A. T. Bunyard.

The Florists' Exchange prize for boutonniere, A. T. Bunyard.

SCHOOL CHILDREN—SECTION E.

The F. E. Palmer vase, Saugus High School, Saugus, Mass.

Boddington Bronze Medal for Horticulture, Saugus High School.

Other prizes in this section were worthily awarded to a number of children.

OPEN AND MISCELLANEOUS CLASSES—SECTION F.

For the finest display (open to the Seed Trade only), to count; second prize, The American Sweet Pea Society's Silver Medal; third prize, The American Sweet Pea Society's Bronze Medal: 1st, and C. C. Morse & Co.'s cup, W. Atlee Burpee Co., Philadelphia, Pa.; 2nd and silver medal, Arthur T. Boddington, New York.

For the largest and most artistic arrangement of Sweet Peas, Gold Medal to Arthur T. Boddington and W. Atlee Burpee Co.

SPECIAL PRIZES BY THE HORTICULTURAL SOCIETY OF NEW YORK—SECTION G.

Spencer varieties only. The winning variety in each class is given.

Pure White. 1st, Mrs. Robt. Winthrop, with King White; 2nd, Mrs. W. B. Leeds; 3rd, Giraud Foster.

Crimson or Scarlet. 1st, Mrs. Robt. Winthrop, with Vermillion Brilliant; 2nd, Mrs. W. B. Leeds; 3rd, Mrs. Moses Taylor.

Rose or Carmine. 1st, Giraud Foster, with Geo. Herbert; 2nd, Mrs. Moses Taylor; 3rd, Paul M. Warburg.

Light Pink. 1st, Mrs. W. B. Leeds, with Elfrida Pierson; 2nd, Mrs. Robt. Winthrop; 3rd, Mrs. Moses Taylor.

Deep Pink. 1st, Mrs. W. B. Leeds, with Constance Oliver; 2nd, Mrs. Robt. Winthrop; 3rd, Mrs. Moses Taylor.

Blue. 1st, Mrs. W. B. Leeds, with Blue Jacket; 2nd, Giraud Foster; 3rd, Mrs. Robt. Winthrop.

Cerise. 1st, Daniel G. Reid, Irvington, N. Y., gard. Arthur Golding, with John Ingman; 2nd, J. D. Barron, Esq., Rye, N. Y., gard. J. Linane.

Cream or Cream Yellow. 1st, Giraud Foster, with Primrose Beauty; 2nd, Mrs. Robt. Winthrop; 3rd, Mrs. Moses Taylor.

Salmon or Orange. 1st, Mrs. Robt. Winthrop, with Edna Unwin; 2nd, Mrs. W. B. Leeds; 3rd, Giraud Foster.

Lavender or Mauve. 1st, Mrs. W. B. Leeds, with Edna Unwin; 2nd, Mrs. Robt. Winthrop; 3rd, Giraud Foster.

Violet or Purple. 1st, Giraud Foster, with Purple Prince; 2nd, Mrs. Robt. Winthrop; 3rd, J. M. Cooke, Tarrytown, N. Y.

Picotee-edged. 1st, A. A. Mason, with Elsie Herbert; 2nd, Mrs. A. Crane, Stamford, Conn.; 3rd, Mrs. W. B. Leeds.

Striped or Flaked Red or Rose. 1st, Mrs. W. B. Leeds, with American Spencer; 2nd, Giraud Foster; 3rd, Mrs. Robt. Winthrop.

Striped or Flaked Blue or Purple. 1st, Mrs. W. B. Leeds, with Loyalty; 2nd, Mrs. Moses Taylor; 3rd, Giraud Foster.

Bicolor other than Picotee-edged. 1st, Mrs. W. B. Leeds, with Mrs. Cuthbertson; 2nd, Mrs. Robt. Winthrop; 3rd, Mrs. Moses Taylor.

Any other color. 1st, Giraud Foster, with Senator Spencer; 2nd, Mrs. Robt. Winthrop; 3rd, Mrs. Moses Taylor.

F. R. Pierson Cup for exhibitor taking the most first prizes in this section, Mrs. W. B. Leeds.

Garden Magazine Achievement Medal for finest vase of Sweet Peas in Section G, Mrs. W. B. Leeds with Mrs. Cuthbertson.

SECTION H.

Michell Special Prizes for Geranium Helen Michell: 1st, J. W. Pepper; 2nd, Mrs. French Vanderbilt, Newport, R. I.; 3rd, H. A. Poth, St. Davids, Penn. Special award of \$10.00 to Henry Goldman.

The following varieties were exhibited for the Boddington Challenge Cup, 25 vases in 25 varieties:

Elfreda Pearson, Lady Evelyn Eyre, Charles Foster, Empress Eugenie, Martha Washington, Mrs. C. W. Bradmore, Prince George, Nubian, Queen of Norway, Dorothy Tennant, Wedgewood, Hercules, Thos. Cuthbertson, Blue Jacket, Clara Curtis, Maud Holmes, Helen Lewis, Loyalty, King White, Rosabelle, Etta Dyke, America, Thos. Stevenson, Orchid, John Ingman.

The Society's certificates of merit were awarded to the following:

Julius Roebers Co., Rutherford, N. J., for collection of orchids; Bobbink & Atkins, Rutherford, N. J., for delphiniums; John Lewis Childs, Floral Park, N. Y., for lilies and Japanese iris; Knight & Struck Co., for achimenes and iris.

William Sim, Cliftondale, Mass., was awarded the Society's Silver Medal for a collection of sweet peas.

AMERICAN ASSOCIATION OF NURSERYMEN.

The Convention of this Association at Cleveland of which we gave a partial account last week was a great success in point of numbers and enthusiasm and the splendid hospitality extended by the nurserymen and others of Cleveland and vicinity is a continual topic of praise and happy reminiscence.

HENRY B. CHASE

President-Elect American Association of Nurserymen.

cence on the part of the returning delegates. The program was carried out very fully and the business transacted was of the kind that the trade generally will derive much benefit from.

The election of officers for the coming year resulted in the choice of Henry B. Chase as president; E. S. Welch, Shenandoah, Ia., vice-president, Peter Youngers, Geneva, Neb. (re-elected) treasurer. The veteran secretary, John Hall of Rochester, N. Y., declined a re-election, but will hold over until a suitable successor is selected by the Executive Committee. The president-elect is president of the Chase Nursery Company, Chase, Ala., and has been an efficient worker in the ranks of the society. The selection of the next place of meeting was an engrossing event while it lasted. Invitations were numerous, San Francisco, Detroit, Atlanta, New Orleans, Atlantic City, Buffalo, St. Louis and several other cities putting in eager claims. The San Francisco boomers made a great appeal but when the votes were counted Detroit was the

winner on the basis that for the serious business of the society it would be a better location and those members who wish to see the Panama-Pacific show can do so at their own convenience.

MEDFORD HORTICULTURAL SOCIETY.

The Medford (Mass.) Horticultural Society held its annual June exhibition on Tuesday, the 23rd, and although the city has been suffering from drought yet excellent exhibits were staged. The various tables were artistically arranged by Mrs. D. J. Puffer and her aids comprising the exhibition committee. Individual exhibits also showed good taste in arrangement. Especially to be commended were the centrepieces for dinner table, there being quite a few entries, and not a poor one among them. The principal prize winners were Miss R. M. Arrington, Hon. Wilton B. Fay, Mrs. Harry Highly, Mrs. Helen McKay and Alfred Wilmot. Messrs. Cameron, Harvard Botanic Garden, Johnson of the Converse estate, Malden, and Stewart of the Lawrence estate, Medford, acted as judges.

The next exhibition will be held in the early part of September, and intending exhibitors may get all information by addressing Mrs. D. J. Puffer, chairman of the exhibition committee.

GEORGE F. STEWART.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular bi-monthly meeting of this society was held on Friday evening, June 26th. An invitation was received from Prof. A. G. Gulley, of the Connecticut Agricultural College, to meet at that place with the Pomological Society and the Vegetable Growers on July 22nd and 23rd, and it was unanimously voted to accept the invitation.

This was "hardy perennials" night and one of the finest collections was staged by Warren C. Mason, John F. Huss and W. W. Hunt, containing in the neighborhood of 161 varieties, and with a magnificent display of Canterbury Bells by Fred K. Wisner and of sweet peas by John C. Willard, it made a glorious sight. Messrs. Mason and Willard received a first-class certificate each, and Messrs. Huss, Wisner and Hunt received certificates of merit. Mr. Mason remarked on the peculiarities of some of the varieties in his collection, selecting certain specimens for their hardiness and fitness for filling in, etc. The meeting was well attended.

ALFRED DIXON, Sec'y.

ST. LOUIS FLORIST CLUB.

The twenty-eighth anniversary banquet of the St. Louis Florist Club took place at the Hotel Jefferson, Wednesday evening, June 24, at which 75 attended, including quite a number of ladies. It was one of the best social affairs ever given by the club. The hall was beautifully decorated with plants and the tables with Richmond roses. At the head table were seated President W. J. Pilcher and all ex-presidents present and W. J. Pilcher was selected as toastmaster. After a splendid menu had been served, President Pilcher talked on the affairs of the club and in turn called on ex-

presidents F. J. Fillmore, J. J. Beneke, Geo. B. Windler and R. J. Windler. Other members, too, were called upon for a few remarks. Everybody had a good time and the night will be long remembered by all.

The next regular meeting of the club will be held July 9, when nominations of officers will take place.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The annual Rose Show of the Nassau County Horticultural Society was held Tuesday, June 16, at the Nassau Country Club, by kind permission of the Governors. James Macdonald was manager; and James Duthie, Fred Kirkham and William Gray judges.

The principal prize winners in the rose section were:

Mrs. J. T. Pratt, gard. J. W. Everitt; H. S. Ladew, gard. Jos. Adler; Mrs. W. E. Kimball, gard. Jas. McCarthy; Mrs. H. L. Pratt, gard. Henry Gaut; Paul Dana, gard. Jas. Gladstone; Mrs. C. F. Cartledge, gard. W. Noonan; Mrs. J. C. Ayer, gard. Harry Jones; Mrs. F. S. Smithers, gard. V. Cleres. On perennials, annuals, sweet peas, peonies, delphinium, digitalis, etc., Mrs. H. L. Pratt, Mrs. B. Stern, gard. Herman Gold, Mrs. C. F. Cartledge, Mrs. J. C. Ayer, Mrs. W. V. Hester, gard. H. Boettcher, Paul Dana, H. S. Ladew and Mrs. W. E. Kimball were the winners. In the vegetable section the prizes went to Mrs. H. L. Pratt, Percy Chubb, gard. F. Honeyman, A. G. Hadenpyle, gard. F. Petrocchia, Paul Dana, Mrs. W. V. Hester, Mrs. F. S. Smithers, Mrs. C. D. Smithers, gard. Pierre Charbonand, H. C. Smith, gard. Alfred Walker. First prize for best table decoration was won by F. Honeyman with crimson sweet peas, spiraea and adiantum; second by Harry Jones, with Mrs. Aaron Ward roses and natural foliage. Cultural certificates were awarded to Mrs. H. L. Pratt and Mrs. C. F. Cartledge for collection of sweet peas and Mrs. C. D. Smithers for Romaine lettuce. HARRY JONES.

AMERICAN CARNATION SOCIETY.

Herman C. G. Schwarz, Central Park, N. Y., registers the new carnation described below:

Siren. Seedling cross with Enchantress. Color brilliant flesh pink. Size $3\frac{1}{2}$ to 4 inches. Ideal upright grower and easy rooter. Dark green foliage and no surplus grass. Produces flowers freely on long strong stems.

A. F. J. BAUR, Sec'y.

NEW YORK FLORISTS' CLUB.

President Duckham has appointed W. F. Sheridan, Wm. H. Siebrecht, A. L. Miller, Jos. A. Manda, Frank H. Traendly, John B. Nugent, Chas. B. Weathered, as the nominating committee to prepare a list of candidates for office for 1915. JOHN YOUNG, Sec'y.

CLUB AND SOCIETY NOTES.

Ernest Moore succeeds Robert Fields as secretary of the Kansas City Florists' Club. Mr. Fields will enter the electrical business.

The eighth annual outing of the Greek-American Florists' Association of New York will be held at Witzel's Point Grove, College Point, L. I., on Wednesday, July 8th.

The annual field day of the Essex County (N. J.) Florists' Club will be held at Brunner's Grove, Hilton, N. J., on August 6th. R. Yuill is chairman of the committee on arrangements.

The Gardeners' and Florists' Club of Baltimore will hold their annual outing at Beull's Park on Monday, July 20th. F. C. Bauer, C. H. Wagner, James Boone, John Nuth, James Glass, A. G. Fiedler and Wm. F. Ekas are the committee in charge.

THE NEWPORT SHOW.

The second annual summer exhibition under the joint auspices of the Newport Horticultural Society and Newport Garden Association was held June 24, 25 and 26 on a lot which is a part of the estate of Ex-Senator Wetmore. This lot, which is about four acres in extent, proved to be an ideal place and was laid out in garden effect, with beds of roses, antirrhinum, dianthus, petunias, violas and other things which were a part of the competing exhibits.

A variety of specimen evergreens, sweet peas in tubs and miniature aquatic ponds were also used in forming the garden scheme. A well-equipped bandstand was also a very pleasing feature. The exhibits requiring cover were provided for by several large tents which were well filled. The committee of arrangements included A. MacLellan, A. S. Meikle and Secretary Gray from the Society, with three members from the association. Much praise was heard of their work.

Bruce Butterson, A. L. Dorward and J. Robertson were the judges for the society, and Joseph Manda was the manager of the exhibition.

Besides about one hundred schedule classes being filled, many specials were staged, making the show easily the largest ever held in Newport.

Following is a list of the most important first awards:

Bed cantebury bells; Mrs. H. M. Brooks, gard. James Bond. Bed sweet william; James Bond. Bed stocks; Arthur Curtis James, gard. John Gratrix. Bed antirrhinum; Mrs. W. W. Sherman, gard. Andrew Ramsay. Bed bulbous plants; Mrs. French Vanderbilt, gard. Daniel Hay. Tub sweet peas; Mrs. W. G. Weld, gard. James Watt. Two beds violas; Andrew Ramsay. Display schizanthus; Vincent Astor, gard. James Boyd. Bed hydrangeas; Oscar Schultz. Trained retinospora; Hugh Meikle. Bed roses; E. Kempenaar. Display topiary plants; Bobbink & Atkins. Gloxinias; Mrs. T. M. Davis, gard. Victor May. Calceolarias; James Bond. Bed petunias; Andrew Ramsay. White roses; Mrs. W. B. Leeds, gard. W. Gray. Yellow carnations; August Belmont, gard. John Forbes. Jacqueminot roses; Miss Edith Wetmore. Group foliage plants; J. J. Van Allen, gard. Richard Gardner. Ferns; James Bond. Table plants; James Bond. Display orchids; Paul de Nave. Specimen kentia; James Boyd. Specimen phoenix; James Boyd. Specimen palm; Mrs. H. McK. Twombly, gard. Alexander Fraser. Specimen fern; James Bond. Group foliage and flowering plants for Hitchings & Co. silver cup; James Bond. Three orchids for Knight & Struck prize; Mrs. Stuart Duncan, gard. W. McGillivray. Six tuberous plants for Joseph Breck & Sons prize; James Watt. Twelve pots annuals for W. B. Scott prize; James Bond.

In the cut rose section, the following were the most successful competitors:

C. M. Bugholt, J. B. Urquhart, W. Gray, Arthur Leary, Victor May, C. Robertson, Hugh Williamson, W. MacKay and John Forbes. Sweet peas were shown in excellent quality by James Watt, Victor May, C. M. Bugholt, W. MacKay, F. P. Webber and Thomas Brook. Fruit was scarce but good. The firsts were G. Fraser, for black grapes, Victor May for white grapes, James McLeish, nectarines, Daniel Hay for three varieties of strawberries, and John Baumgartner for collection of strawberries. The most successful competitor in vegetables was J. B. Urquhart, he winning a silver cup offered by J. M. Thorburn & Co. for twelve distinct kinds, and also a prize offered by T. J. Grey & Co. for six kinds.

Alex. Fraser was the leader in centre-pieces, specials and fancy baskets. Among the many specials, the following were the most noteworthy: A collection of water lilies from H. A. Dreer; a miniature Japanese flower garden, by Hugh Williamson; fruited grape vines in tubs, by W. MacKay; display of miscellaneous plants and exhibit of cut roses from A. N. Pierson.

the roses being awarded the only silver medal given at the show; Calceolaria plants, by James Boyd; exhibit of orchids from Julius Roehrs Co.; collection of evergreens in tubs from Wilson's Nurseries; specimen tuberous begonias from James Watt; bay trees from Julius Roehrs Co.

On the evening of the second day of the show Mr. H. A. C. Taylor, for whom President MacKay, of the Horticultural Society, is gardener, gave a dinner at the Bellevue Hotel to the main workers at the show—visitors, officers of the society and members of the press—making thirty in all. After dinner had been thoroughly enjoyed President MacKay conducted a speech-making session which was led by Joseph Manda giving his ideas about the show. Others who followed in the same line were Bruce Butterson, A. K. McMahon, Alex. MacLellan, J. B. Urquhart, John Hay, C. H. Atkins, Leo Ostermeier, John E. Lager, H. T. Beers and F. H. Hammett. J. R.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Rose and Strawberry Exhibition.

This annual event took place on Saturday and Sunday, June 27 and 28, at Horticultural Hall, Boston, and was, as always, a popular attraction. Considering that the weather had been hot and dry, the showing of roses was excellent in quality and quantity, and the strawberries were particularly good. The large displays of peonies and herbaceous border flowers helped to give profusion and brilliancy to the general riot of color and altogether the picture was a gorgeous one.

Miss S. B. Fay was a leading rose exhibitor, her flowers being staged by M. H. Walsh. Other large prize winners in the rose classes were A. W. Preston, T. N. Cook, Wm. Whitman, A. F. Estabrook, Mrs. Frederick Ayer, Frederick Mason and Mrs. Albert Geiger, Jr. Jackson Dawson was given honorable mention for a group of seedling roses, one of which, a climber, named Mrs. Henry Sargent Dawson, was much admired. A similar award was given Miss Susan Mimis for a large display of the old York and Lancaster rose.

R. & J. Farquhar & Co. and the Mt. Desert Nurseries contributed huge banks of herbaceous bloom and each received a well-merited silver medal. Prize winners in the herbaceous flower section were Old Town Nurseries and Eastern Nurseries. T. C. Thurlow's Sons Co. were represented by a thousand or more peony blooms and received a gold medal for their work in popularizing this flower. Wm. Whitman was strong in sweet williams, larkspurs and campanulas and there were roses and hydrangeas from Miss Cornelia Warren, gladioli from Mrs. F. Ayer, streptocarpus and gloxinias from Mrs. J. L. Gardner, late peonies from A. H. Fewkes and Edelweis from Wm. Nicholson, the two last named receiving honorable mention.

Wilfrid Wheeler, Geo. F. Wheeler, Geo. V. Fletcher and E. S. Webster were the largest exhibitors in the strawberry section. Louis Graton, of Randolph, showed two seedling strawberries—"St. Martin" and "Meadow Sweet"—and won the prize for the best new strawberry not yet introduced. There was the usual large showing of fine vegetables from the crack market growers of Belmont, Arlington and Taunton.

Here are Three New 'Mums You Ought to Grow

ALICE SALOMON

Pure white. Larger than Chadwick, easy to grow. Ready to cut October 10 to October 25. Rooted Cuttings, \$7.00 per 100; 2½-in., \$9.00 per 100.

GOLDEN SALOMON

A sport of Alice Salomon. The same in every respect except in color, which is as its name implies, a golden yellow. Rooted cuttings, \$20.00 per 100; 2½-in., \$22.00 per 100.

CHIEFTAIN

A pink described by the E. G. Hill Co., as a Pink Bonaffon ready to cut about 10 days earlier than Enguehard. Rooted cuttings, \$12.00 per 100; 2½-in., \$14.00 per 100.

 We believe that the above 'mums are valuable additions to the lists of commercial varieties and recommend them as such.

NEW SINGLES Rooted Cuttings, \$8.00 per 100, 2½-inch, \$10.00 per 100

MENSA

This is the splendid white that attracted so much attention at the Fall Flower Shows and is considered the best single white in the market for cut flowers or plants.

PAULINE

This variety sported with us. It is a dark single bronze, very attractive and is a splendid grower. Order now of these and you will not be disappointed.

SUPREME QUALITY ROSE STOCK

BEST PLANTS THAT MONEY CAN BUY. Growers are always on the lookout for quality rose stock. They realize that the best at the start is the cheapest in the end. When buying plants it is always best to secure your stock from people that have a reputation for producing the best there is to be had. You cannot get any better stock than that which we are offering, for we always aim to give the purchaser the best that our long years of experience enable us to do.

GRAFTED ROSES

2½-in. Plants.

Pink Killarney, White Killarney, Milady, Killarney Queen, Mrs. Aaron Ward, Mrs. Taft (Bulgaria or Antoine Rivoire), Richmond, Mrs. Geo. Shawyer, at \$12.00 per 100; \$100.00 per 1000.
Mrs. Chas. Russell, grafted, 2½-in., at \$15.00 per 100; \$120.00 per 1000.
Killarney Brilliant, grafted, 2½-in., at \$30.00 per 100; \$250.00 per 1000; 3½-in., \$35.00 per 100; \$300.00 per 1000.

2½-in. Plants.

Richmond, 2½-in., \$90.00 per 1000; 3½-in., \$120.00 per 1000. Richmond and Milady are extra strong plants.

3½-in. Grafted.

Milady, Mrs. Geo. Shawyer, Bulgaria, Killarney Queen, Pink Killarney, Aaron Ward, \$15.00 per 100; \$135.00 per 1000.

150 Russell and 100 small Hadley at \$15.00 per 100.

OWN ROOT ROSES

2½-in. Plants.

Killarney, Mrs. Taft, (Bulgaria or Antoine Rivoire) Wards, Milady, at \$6.00 per 100; \$55.00 per 1000.
Sunburst, \$7.50 per 100; \$70 per 1000.

3½-in. Plants.

Pink Killarney, Mrs. Ward, Mrs. Geo. Shawyer, Milady at \$8.50 per 100; \$75.00 per 1000.
Richmond at \$7 per 100; \$65.00 per 1000.
Bulgaria, 3½-in., \$7.50 per 100.
Sunburst, \$9.00 per 100.

Cecil Brunner, \$8.00 per 100; \$75.00 per 1000.

Beauties, 3-inch, \$6.00 per 100; \$55.00 per 1000. Ready to ship. All first class stock. 2-in. Beauties all sold.

Orders will be taken for cut back benched plants, when these are on hand, for White Killarney, Mrs. Ward, Double Pink Killarney and Melody, at \$5.00 per 100; \$40.00 per 1000. Beauties at \$6.00 per 100; \$55.00 per 1000.

These prices are in cash or net 30 days in to days.

POEHLMANN BROS. CO., BOX 127, Morton Grove, Ill.

NEW BEDFORD HORTICULTURAL SOCIETY.

The rose show held by the New Bedford Horticultural Society on Wednesday, June 24, was a great success and was largely attended. The committee had rather gloomy forebodings of a failure when they found Miss Sarah B. Fay and M. H. Walsh of Woods Hole, could not send their usual fine display owing to a very backward season, and local growers told sorrowful tales of roses past and gone or not yet in flower, but when everything was in readiness for judging it became evident that many littles make a mickle, and the hall was filled to overflowing. Without the magnificent specimens from the above mentioned growers the wonderful possibilities of the rose were not as strongly emphasized as in previous years, but the splendid display of varied types by amateur growers showed plainly the adaptability of the rose for cottage gardens, and likewise gave flower lovers a fine chance for selection of varieties suitable for home culture. Note books and pencils were being worked overtime and clearly emphasized the fact that the Hybrid Tea has aroused great enthusiasm in this section. While there were some excellent exhibits of Hybrid Perpetuals, the general trend was toward the teas and their hybrids. Some of the newer climbing roses were shown in all their daintiness, conspicuous among them being Silver Moon, Dr. Van Fleet, Christine Wright and W. C. Egan. Among the teas and hybrid teas favoritism seemed to place Konigin Corola in first place with La Tosca, Lady Hillingdon, Mrs. A. R. Waddell, Farbenkönigin, White Maman Cochet,

J. J. L. Mock, Mabel Drew, Melanie Souper and The Daily Mail as close rivals.

Among the professional growers, H. E. Converse (D. F. Roy, Supt.) captured all the premiums, consisting of three cups, while Galen Stone (A. R. Griffin, Supt.) received a special award of merit for general exhibit of specimen blooms. James Garthly, gardener for the Rogers' estate, had his usual fine display tastefully arranged, and Wm. Keith, gardener for T. M. Stetson, filled a large table with an excellent group of plants and roses.

Among the amateurs, Miss Alice Stackpole of Mattapoisett, was the principal exhibitor and prize winner, having no less than sixteen firsts to her credit. Other winners in this class were H. B. Parlow, J. C. Forbes, F. G. Tripp, Hugh Beveridge, J. A. Nolet and W. F. Turner.

WM. F. TURNER.

A NATURAL ROCK GARDEN.

Our cover shows a rock garden entirely of Nature's handiwork on the estate of Mrs. B. B. Tuttle in Middlebury, Conn. When the picture was taken a few weeks ago, the mountain laurel or Kalmia latifolia was making a grand display. The scene is an old cart path winding through woods, flanked on both sides and as far as the eye can reach, with these flowers—a sight, once seen, never to be forgotten. At every turn a new and more beautiful picture is seen as the path winds its way among rocks and boulders of gigantic size, here and there dotted with tufts of ferns and mosses and out of the crevices and almost inaccessible places these lovely laurels blossom forth.

What an example of landscape gardening Dame Nature has set here! Where is the landscape architect who can produce anything to equal it?

M. J. POPE.

At the Sweet Pea Exhibition of the Lenna Horticultural Society last week, the winning exhibit in the class for twelve vases of fifty sprays each, comprised the following named varieties: Elfreda Pearson, Blue Jacket, Florence Nightingale, King White, Geo. Herbert, Blanche Ferry Spencer, Orchid, Irish Belle, Mrs. Hugh Dickson, Margaret Madison, Thos. Stevenson and White Spencer.

HYDRANGEAS-OTAKSA

Extra large plants in barrels for July and August Flowering.

We make a specialty of hydrangeas for late blooming, and have the finest lot of large specimen plants that we have ever seen. Plants are perfect in shape, from 4 to 5 ft. in diameter, 3½ to 4 ft. high, and are covered with blooms fine, beautiful, symmetrical plants, ranging from one hundred to two hundred blooms per barrel.

They have been kept backward, and are now just beginning to show color, and will bloom from now on through August. These plants are of exceptionally fine quality and are exceptionally good value. We have a very large stock of these plants in barrels, and can supply them in carload lots, at \$7.50, \$10.00, and \$15.00 each. We can supply a more limited stock of smaller plants in tubs at \$2.00 each.

WINTER-FLOWERING ROSES

We have a fine stock of winter flowering roses, especially of the new rose, Killarney Brilliant. We can supply extra fine stock of this valuable variety, extra strong plants out of 4 inch pots, ready for immediate planting; also other standard sorts, such as Lady Hillington, Killarney Queen, Pink Killarney, Richmond, American Beauty, Mrs. Charles Russell, Mignon, or Sweetheart, etc. Write us for prices, stating varieties and number of each wanted.

FERNS

Nephrolepis elegantissima (Tarrytown Fern); Magnificat; Muscosa, 3½-inch,\$0.25 each

Nephrolepis elegantissima; Harrisii; Bostoniensis, 6 inch 50 each
Nephrolepis elegantissima, 8 inch, 1.00 "

The KENILWORTH GIANT PANSY

seeds are all grown by myself and are offered in the following minutes and separate colors:

KENILWORTH STRAIN—The flowers are of perfect form and substance; many of the immense flowers are from 3½ to 4 inches; it is a striking collection of beautiful colors and markings, rich with shades of red, brown, bronze, mahogany and many others too numerous to mention.

KENILWORTH SHOW—An extra fine strain of large flowers; the immense flowers are of circular form and great substance; a beautiful collection of colors and markings.

KENILWORTH CUT FLOWER MIXTURE—Is a distinct class by itself surpassing all other strains as a cut flower or for exhibition purposes, for inside or outside growing; the large flowers are carried erect above the foliage on heavy stems, 7 or 8 inches long, in the most graceful manner, and stand the hot, dry weather well.

MASTERPIECE—A remarkable type; the curled, wavy petals giving the flower a double appearance, its large flowers of great substance, on long, strong stems.

ORCHID FLOWERED, Mixed—A dwarf free bloomer with a range of delicate colors that do not exist in any other pansies, a remarkable combination of light rose, shell pink, bluish mauve, fawn, light brown, orange and chamois.

NEW SEED NOW READY.

1000 seeds, 25c; 5000, \$1.00; ¼-oz., \$1.25;
1 oz., \$5.00.

Rainbow is a mixture of the most beautiful, gorgeous colors; blotched, striped, veined, margined, etc. With every \$1.00 worth of pansy seeds I will send 1000 of Rainbow free and with other amounts in like proportion.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION.

Concluding Notes on Annual Convention at Washington, D. C.

Lester L. Morse, of San Francisco, whose portrait appears herewith, was elected to the presidency of the American Seed Trade Association, which closed its three-day convention in Washington on Thursday of last week. Other officers elected were William Lupton, of Mattituck, New York, first vice-president; E. C. Duncan, Philadelphia, Pa., second vice-president, and C. E. Kendel, Cleveland, Ohio, secretary-treasurer. The final session was an executive one and considerable business was transacted. In addition to the election a report was rendered by the committee on experiment stations of which L. L. Olds was chairman. In the afternoon the members and their wives visited the Arlington National Cemetery.

Perhaps the most important subject brought before the convention was that of postal rates. Chairman W. F. Therkindson, of the committee on postal laws, who has given considerable attention to this matter, in bringing it before the meeting, said that seeds are now being shipped in large quantities by parcel post and that it was evident that no two catalogues could have approximately the same price on any one article with the difference in parcel post rates as they prevail in the dif-

ferent zones. Among the interesting lectures during the convention were those of Dr. W. W. Tracy, superintendent of the testing grounds of the Department of Agriculture; Edgar Brown and Prof. F. W. Hillman, the latter head of the seed laboratory of the Department of Agriculture; Max Fisher, and Charles C. MacKenzie, of Brandon, Manitoba. Dr. Tracy speaking on "Seedsmen's Trial Grounds—Their Actual and Possible Value," urged the seedsmen to make a more thorough study of the trial grounds. He said he had in hundreds of cases selected five to ten ideal plants of a desired type, carefully saved their seed of each separately, and planted samples in trials and very rarely had the product of the first or second choice plant prove equal to that of some other one. He said that it was considered a waste of care and energy to try to develop stock from even the most superlative plant until it has been tested out in trial plantings. He urged continued study of these features. Mr. Brown, in speaking on the selling of seeds at retail, said that the seed business is an important factor in our agricultural system but that in so far as it is maintained on a strictly merchandising basis, it is not fulfilling the function

reasonably to be expected of it. When a farmer goes to one of the dealers to buy seeds that are to be the basis of his crop, Mr. Brown declared, he expects the same grade of information about the seeds he is buying as the dealers expect from an architect about a building of their own. Continuing he said the seed business of the future is going to rest, first, on accurate information furnished the purchaser, and second, on efficiency in handling. Mr. Mackenzie, who traveled 2100 miles to be present at the convention, spoke on "Printer's Ink Advertising Farm Journals" outlining the scope of the advertising business from the inside. The address of Mr. Fisher on the subject of overhead expenses and their relation to business was given considerable attention by the delegates who were urged by him to always keep in mind such considerations as a great many men are liable to forget, the overhead cost, despite the fact that it is an almost threadbare subject in modern industrial life.

Among the entertainments provided was the banquet given in the large ball room of the Raleigh Hotel at which Representative Mann was the principal speaker. The tables were profusely decorated with American

HOW.

Beauty roses and other flowers. F. E. Bolgiano, of Washington, D. C., chairman of the entertainment committee presided. Several brief speeches were made by various delegates and a very pleasant evening was spent despite the heat which prevailed during the entire convention. A visit to Mount Vernon, by boat, and to the Arlington testing and experimental farm, Lee's Mansion at Arlington, as well as the National Cemetery, were enjoyed by all. The extreme heat and the severe thunder showers which occurred each day of the convention, however, failed to mar the pleasures of the trip and the delegates left the city well pleased with their stay here.

The meetings were held in the Banquet Hall of The Raleigh, a very handsome room, but the acoustics of the hall were so bad that their effectiveness was largely lost through inability to hear what the speakers were saying. The hotel management is open to criticism for not using methods to ameliorate the insufferable heat. Not an electric fan was in operation even on the night of the banquet, with the room brilliantly lighted and, of course,

LESTER L. MORSE.

Elected President by the American Seed Trade Association, at Washington, D. C., and by the American Sweet Pea Society, at New York City.

adding several degrees to an already super-heated atmosphere. However, despite this handicap, the banquet was a pronounced success.

Toastmaster Bolgiano had the unique success of inducing Congressman Mann of Chicago, the Republican leader of the House of Representatives, to attend the banquet and make a short address. The Congressman avoided controversial subjects, and his remarks were general in character, but he did tell the seedsmen he wanted to be their friend, and his course in seed legislation has proved it. This brings up the question of why certain interests in the trade should oppose him and antagonize whatever he favors. Were he not a broadminded man the entire American seed trade might be the sufferer, but he evidently understands that this opposition is mainly personal, tempered with political ambition.

On Tuesday, at 2 P. M., a reception and luncheon was held in the parlors

BODDINGTON'S QUALITY FLOWER SEEDS

SELECTED SEEDS SUCCESSFULLY SOWN SECURE SURE, SAFE AND SERVICEABLE SATISFACTION

IT has been, is, and always will be our policy and intention to disseminate only the very choicest strains of flowering seeds (or any other varieties of seed), giving special attention to the class known as **Florists' Seeds**, and intending customers need have no hesitation in buying or fear of disappointment when they bloom. No expense has been spared to secure the finest types as to habit of plant, form of flower, color and breeding of our Quality strains of *Primula*, *Cineraria*, *Cyclamen*, *Calceolaria*, etc.

ASPARAGUS

PLUMOSUS NANUS. True greenhouse grown. 50 cts. per 100 seeds; \$1.00 for 250 seeds; \$3.50 per 1000 seeds.

PLUMOSUS NANUS. California grown. 50 cts. per 100 seeds; 75 cts. for 250 seeds; \$2.50 per 1000 seeds.

SPRENGERI. 25 cts. for 250 seeds; 75 cts. per 1000 seeds; \$3.00 for 5000 seeds.

CALCEOLARIA HYBRIDA

BODDINGTON'S PERFECTION. The herbaceous *Calceolaria* is an easily cultivated plant. So long as frost is excluded from the plants in Winter they are perfectly safe, and to attempt to hasten growth at any time is a failure. July is the best month for sowing the seed. The great advance made in the habit of the strains offered is remarkable, whilst in the colors there is a marked improvement. Saved by England's most famous specialists. Monster flowers of rich and varied colors, including spotted, laced, blotched and self-colored varieties. ½ pkt., 60 cts.; pkt., \$1.00.

Boddington's Matchless CINERARIAS

BODDINGTON'S MATCHLESS CINERARIA. A combination of the three most famous English strains, which we can recommend to those wishing to grow the best. Tall, ½ trade pkt., 60 cts.; trade pkt., \$1.00. Dwarf, ½ trade pkt., 60 cts.; trade pkt., \$1.00.

CINERARIA STELLATA (Star-flowering *Cineraria*). Tall growing, 4 to 5 feet; excellent as a single specimen for table decoration, or for grouping with splendid effect in corridors and conservatories. ½ trade pkt., 60 cts.; trade pkt., \$1.00.

CANDYTUFT (Iberis) H. A.

BODDINGTON'S GIANT HYACINTH-FLOWERED. Large, pure white, spiral spikes. The finest variety for growing under glass. Trade pkt., 35 cts.; oz., \$2.00.

MIGNONETTE H. A.

BODDINGTON'S MAJESTY. The finest of all the fancy varieties of Mignonette; an improvement on Allen's Defiance. Seed saved from select spikes under glass. Trade pkt., 60 cts.; ½ oz., \$1.00; oz., \$1.50.

BODDINGTON'S POT MYOSOTIS

Forget-Me-Nots are delightful subjects for flowering indoors at Christmas time, and as they are everywhere welcome, the practice of growing plants in pots is rapidly increasing. Sown in July and potted on, the strain we offer produces fine, free-growing specimen plants. Trade pkt., 50 cts.; 3 pkts. for \$1.25.

SCHIZANTHUS (Butterfly Flower) H. A. 1½ ft.

Elegant, free-flowering, hardy annuals for the garden in Summer or for pot culture in the greenhouse during Winter.

GRANDIFLORUS BODDINGTONII. Boddington's Select Hybrids. The strain is superior to any of the *Schizanthus* in cultivation, the flowers are better shaped and the colors are more varied. In habit the plants are very bushy, and the flowers are invaluable for cutting; as a pot plant for conservatory decoration, they are unequalled. Trade pkt., 75 cts.

WISETONENSIS. The colors are varied, ranging from white with yellow center to pink with brown center. Most useful as a Winter plant, and should be given a place in every greenhouse. Trade pkt., 50 cts.

Boddington's Matchless GIANT PRIMULAS

PRIMULA SINENSIS

Boddington's Matchless Giant Primulas, Mixed. This selection includes all the finest Giant Single Primulas of the plain-leaved class. ½ trade pkt., 60 cts.; trade pkt., \$1.00. Boddington's Matchless Giant Pure White; Boddington's Matchless Giant Blush White; Boddington's Matchless Giant Orange King, a delightful novelty, almost orange; Boddington's Matchless Giant Rose; Boddington's Matchless Giant Scarlet; Boddington's Matchless Giant Royal Blue.

Each, ½ trade pkt., 60 cts.; trade pkt., \$1.00. Collection of the above 6 varieties, ½ trade pkt., each, for \$3.50.

The Duchess. The large, pure white flower, with its unique zone of bright, rosy carmine, surrounding a clear yellow eye, is simply unapproachable in its beauty. ½ trade pkt., 60 cts.; trade pkt., \$1.00.

Sutton's Coral Pink. The name describes it; habit dwarf and compact; flowers thrown well above foliage. Pkt., \$1.00.

PRIMULA OBCONICA GIGANTEA

Primula obconica gigantea Kermesina. Beautiful, deep crimson.

Primula obconica gigantea alba. The pure white flowers greatly enhance the beauty of the existing lilac, rose and crimson shades.

Primula obconica gigantea lilacina. Beautiful lilac.

Primula obconica gigantea rosea. Lovely rose.

Primula obconica gigantea grandiflora. Mixed varieties, pure white to deep crimson.

Each of above, ½ pkt., 30 cts.; pkt., 50 cts.

PRIMULA floribunda grandiflora (Buttercup). Small yellow flowers, borne in great profusion; fine for pots. Pkt., 50 cts. **Forbesii** (Baby Primrose). Pkt., 25 cts.

PRIMULA KEWENSIS (Giant Buttercup). This plant is a strong grower, with bright green leaves and numerous erect flower-scapes, 10 to 18 inches in height, producing flowers in whorls at intervals along their whole length. The flowers are fragrant, bright yellow in color, with a slender tube and spreading limb nearly an inch in diameter. As a Winter-flowering decorative plant it is an acquisition; very floriferous when in a small state. ½ trade pkt., 60 cts.; pkt., \$1.00.

PRIMULA FIMBRIATA, GIANT QUEEN ALEXANDRA. G. P. The largest white *Primula Sinensis*, blooms measuring 2½ inches across. Petals very solid and erect. Robust foliage with red stems. ½ pkt., 60 cts.; trade pkt., \$1.00.

PRIMULA, NEW HYBRID QUEEN OF ROSES. A lovely new hybrid of *P. obconica* and *P. stellata*, producing shapely heads of large and beautiful, bright rose-colored flowers, remaining decorative for a long time. 1 foot. Trade pkt., \$1.00; ½ pkt., 60 cts.

PRIMULA MALACOIDES. H. H. P. (The Giant Baby Primrose.) The plants branch very freely. The flowers, which are ¾ inch wide, are of a pretty light lilac, and are borne in whorls on long stems. If grown in a greenhouse, can be had in bloom in four months after sowing. Trade pkt., 50 cts.; 3 pkts. for \$1.25.

PRIMULA MALACOIDES ALBA. The white prototype of the foregoing variety, and a great acquisition; very chaste and beautiful as a plant or cut flower. Trade pkt., 50 cts.; 3 pkts. for \$1.25.

ARTHUR T. BODDINGTON, Seedsman 342 West 14th St. New York City

of The Raleigh in honor of the visiting ladies. At 4 P. M. the entire convention was treated to an automobile ride in Washington's sight-seeing cars. Wednesday morning more papers were read and while they cannot be discussed individually at this time, the subjects considered were most interesting and very ably treated. In the meantime the ladies enjoyed an automobile ride in touring cars through the fine residential district of Washington, northwest, and beautiful Rock Creek Park.

We are fearful that the proof that Washington is a fine summer resort was not forthcoming, and the very general impression of its warmth in summer was pretty well confirmed. However, it is but just to say that the extreme heat of the week was quite general both east and west. It is but fitting and proper to say a word in praise of the committee of Washington and Alexandria seedsmen who framed and carried out literally the program of entertainment which was so cordially appreciated by the members of the convention and their ladies. Not for many years have the seedsmen been so well entertained and particularly the ladies. For this the gentlemen of the Washington seed trade deserve the warmest thanks. When all members of a committee have co-operated so loyally in carrying through a program it may seem invidious to name any without mentioning the names of all, but we just can't help mentioning F. W. Bolgiano who as chairman was indefatigable in his efforts to see that no one was overlooked and that everybody had a good time. He was on the job early and late and made many warm friends. Here's honor and thanks to him and all of the gentlemen of his committee.

CALIFORNIA NOTES.

Howard M. Earl of W. Atlee Burpee & Co., has returned from his transcontinental trip and is again in har-

ness at the head of affairs. In a brief interview we glean the following items of interest to the seed trade.

Alfred Putz, son of Otto Putz, the noted seedsman of Erfurt, Germany, and that fine second son of Burpee's manager, Douglas Earl, are at Floradale, California, working under Mr. Lonsdale.

In California crops are good, excepting sweet peas, and these will turn off about 25 per cent to 65 per cent according to location. There is a possible shortage of 25 per cent on Red Wethersfield onion. In spite of the army worm there ought to be a satisfactory crop of lettuce. The army worm was kept in subjection by the use of paris green. Endive, White Curled is a good crop, and it is surprising to note the increased demand for Broad-Leaved Batavian (Escarolle) which is shown by the large area devoted to this vegetable. California growers are planning now to give the Eastern seedsmen a very good time on their visit to the Coast in 1915. Land devoted to sweet peas that has been plowed up on account of the ravages of the aphid has to a great extent been sown to seed of commercial beans. Few seedsmen in California this year—they are probably waiting for 1915! Messrs. Sutton and Tufnail were plainly astonished at the area devoted to seed growing in California.

Notes.

Austin L. Rogers, the culinary pea grower, and his wife were visitors at Fordhook Farms the 26th.

New York, N. Y.—The branch store of J. F. Noll & Co. at the Hudson Terminal Bldg. has been closed.

George W. Kerr, accompanied by one of the trial-ground assistants, Walter Histand, took to New York between six and eight thousand sweet pea blooms with which to make up the Burpee sweet pea exhibit at the show.

Despite the dry weather, crops in southern New Jersey are looking well and there will be an exceedingly large crop of Sparks' Earliana tomato for the market. Prices for early fruits last week ruled as high as \$3.00 per crate.

The Wholesale Grass Seed Dealers' Association held their sixth annual meeting at Washington, D. C., during the convention of the American Seed Trade Association. Officers were elected as follows:

President, A. E. Reynolds (re-elected) Crawfordsville, Ind.; Vice-President, W. G. Scarlett, Baltimore, Md.; Secretary-Treasurer, W. R. Jossman, of Caughey-Swift Co., Detroit, Mich.

"Frank Cuthbertson, sweet pea expert with C. C. Morse & Co., California, arrived in Philadelphia last Friday afternoon and motored to Fordhook, with Howard M. Earl of W. Atlee Burpee & Co., where he spent the night and during the late afternoon inspected the sweet pea trials. Mr. Cuthbertson left for New York, Saturday morning, where he was to be one of the judges at the American Sweet Pea Society, and sails this week on the Aquitania, and after attending the sweet pea show in London and spending some little time with his father, W. Cuthbertson (of Dobbie & Co., Edinburgh, Scotland), goes to the Continent and returns to California early in September.

CHICAGO NOTES.

A. Lange always has the Egyptian nelumbiums as a special offering in the summer and this year the lilies seem even more brilliant than ever.

Joseph Patjau, Peter and Louis Duterinke, who came to this country from Belgium a few years ago, are leaving this week for a visit to their old home. They will return in the fall.

M. S. Crozer, of Cedar Rapids, Ia., says that his sales are footing up better than ever in June. The new retail store, recently opened in the downtown district is doing nicely. His father, J. G. Crozer, founder of the business, who is disabled with paralysis, is reporter as fairly comfortable.

At Morton Grove, Poehlmann Bros. are trying the two new begonias, Melior, introduced by Peterson of Cincinnati and Florence Davenport by A. M. Davenport of Watertown, Mass. Mr. Anderson, in charge of the plant department, says that while he likes the deeper color in the flower of Melior his customers are divided in their preferences, so the stock of Cincinnati and Lorraine is evenly divided. The house which contains the stock of large palms valued at \$50,000, has been improved with a cement floor and, by placing the heating pipes on the sides, room has been made for the tallest palms. Beds of fancy-leaved caladiums, tuberous rooted begonias and hydrangeas were noted as supplying the color always needed in plants for retail stores. Another house contains 40,000 young cyclamen plants in 3-in. pots now ready for sale.

PHILADELPHIA NOTES.

A. E. Brown, treasurer of W. Atlee Burpee & Co, sailed on the S. S. Minneapolis, June 27th, for London, on an extended vacation.

Gude Brothers, of Washington, and Samuel S. Pennock made a visit recently to the rose garden at Hartford, Conn., and were greatly pleased and enlightened. They also took in the Pierson place at Cromwell, one of the most remarkable commercial places in the country. Mr. Pennock was so impressed with what he had seen that he sent two of his managers, Messrs. Jones and Liggett, on the same pilgrimage the week following, and they were equally astonished and delighted.

I am not going to say anything severe to Arthur Niessen for writing that circular all by himself and signing the committee of seven's name to it, because, as John Donald McKay once remarked: "I don't want to contaminate my own interests."

"God made the Irish.
He sure made them mad.
For their fights are all merry,
And their songs are all sad."

I think there is a little Irish in both the Scot and the German in this connection.

Visitors—Mr. and Mrs. Vesey and Mrs. Woods, Fort Wayne, Ind.; P. Joseph Lynch, New Castle, Ind.; B. W. Delaney, representing J. Chas. McCullough, Cincinnati, O.; W. G. Grenell and grandson Wm. Grenell, Pierrepont Manor, N. Y.

WASHINGTON NOTES.

J. Harper Hetherington has gone to Philadelphia, where he will spend a part of his five weeks' vacation. The balance of the time he will spend in Atlantic City.

Frank P. Gaul, manager of the local store of S. S. Pennock-Meehan Company, has so far recovered from his recent illness to be able to be at his place of business at least for several hours each day.

Louis Hohman and Walter Hawley, clerks of the store of Gude Bros. Co., have started for Boston, where they will spend several weeks, after which time they will visit the northern part of New York. Mr. Hohman is at present suffering from a severe case of oak poisoning, obtained while chasing a young crow out of the cornfield which surrounds his home. He has been incapacitated for work for some days.

Albert Schnell, manager of the Washington Florists' Exchange, reported to the police last week that someone unknown had removed \$965 from the safe in the office of the Exchange, the door of the safe having been left open. The police are also looking for the owners of a miscellaneous collection of tools left by some unknown persons in the rear room of the store of F. H. Kramer. The back door had been forced and the two cash registers in the front of the store taken to the rear where they were hacked open but found to be empty. The thieves found nothing of value in the store and after having smoked a few cigars they took their departure.

Mr. and Mrs. William F. Gude will entertain the members of the Florists' Club of Washington, D. C., and their ladies at a lawn party at their home, 3800 New Hampshire avenue, Northwest, on Tuesday evening, July 7. A feature of the evening will be the lecture of Richard Vincent, Jr., of White Marsh, Md., on "A Trip Through Scotland—The Land of Burns," illustrated with lantern slides. A vaudeville program will also be presented. The regular monthly meeting of the club will be held at this time and a report will be rendered by the special committees having in charge the trip to the convention at Boston and of the flower show which is to be held here early in October. A large delegation of florists and the ladies from the Florists' and Gardeners' Club of Baltimore, Md., will also be present.

RECEPTION TO DR. GALLOWAY.

A large number of officials and employees of the Department of Agriculture gathered at the National Museum, Washington, D. C., last week at a farewell reception tendered to Dr. Beverly T. Galloway, assistant secretary of the department, who leaves here shortly to become dean of the agricultural college of Cornell University, Ithaca, N. Y. The affair was an entirely informal one and was under the direction of Henry S. Graves, chief forester; Logan W. Page, of the Division of Roads, and C. S. Marvin, chief of the Weather Bureau. The regrets of his associates were expressed in a number of short speeches and Dr. W. A. Taylor, chief of

the Bureau of Plant Industry, who is to succeed him as assistant secretary, complimented Dr. Galloway in the highest of terms, accrediting to his efforts much of the marked progress made during his administration. Dr. Galloway has been connected with the Department of Agriculture for twenty-seven years, having started as assistant pathologist in the section of mycology. He was made chief of the Bureau of Plant Industry upon its formation in 1900, retaining that position until last year, when he was made assistant secretary. Dr. Galloway is an honorary member of the Florists' Club of Washington, whose members wish him every success in his new undertaking.

DURING RECESS.

N. Y. & N. J. Association of Plant Growers.

The New York & New Jersey Association of Plant Growers, held its 8th annual outing on June 23, 24 and 25, 1914, at the Hotel Kittatinny, Delaware Water Gap, Pa. The first day was spent in wandering through the premises, and in the evening dancing was provided. In the morning of the second day prize bowling took place, at which Mrs. Wm. H. Siebrecht, Jr., took the first prize and Miss Lillian Zeller second prize. Daniel Schultheis took first in the gentlemen's bowling frames and Julius Roehrs captured second. In the afternoon of the second day, the party enjoyed a trolley ride through Stroudsburg and to Portland. In the evening another dance was enjoyed. The morning of the third day was spent motoring through the mountains to the Buckwood Inn. It was one of the most successful outings held by the association. Forty-nine adults and three children attended. The outing committee was Julius Roehrs, chairman. Anton Schultheis, Wm. H. Siebrecht, Jr.

KNOXVILLE, TENN. NOTES.

Addison J. McNutt is about through cutting America gladiolus, which have been very fine and the demand has been very great.

A. H. Dailey is doing general improving and repair work at his greenhouses getting ready for the coming season. He reports the bedding plant trade as very heavy, but now finished.

Roses and carnations have been very scarce, and it has been rather hard to get enough to go around for the last ten days. Chas. L. Baum is getting lumber on the ground to build a two-story shed, which will be used as a carpenter shop and a soil and planting shed, and will be a great improvement.

Since our last report we have had one good rain, about three inches, but the ground is again very dry and the

weather very hot, and out-of-door stock is suffering. The Howell Nursery Company reports stock looking better since the rain, although the drought has done a great deal of damage and at least 50 per cent of young shrubbery was lost. Prospects are very promising for fall business.

On June 26, the picnic committee of Knoxville Florists' Society, namely, A. J. McNutt, Louis Giger, Karl P. Baum and Dr. Sam Boyd selected the grounds for the first annual picnic, which will take place on July 9. They found a desirable place having a nice spring grove, and on a river where fishing, bathing and pearl hunting cannot be beaten. The place is known as Clinch River Station, on the K. C. G. & L. Ry., 42 miles north of Knoxville. All stores have a display card in their windows announcing that on July 9, they will be closed, and all mail sent out carries a little notice blank bearing the same announcement.

A. J. McNUTT, Sec.

"SOME" MARATHON.

The following amusing account of a twenty-five mile hike by the victor, Edward Swayne, a well-known florist of Chester County, Pa., will interest his many friends in all parts of the country, especially his old chum, Edwin Lonsdale of Lompoc, California. Mr. Swayne is 61 years old, his opponent, Mr. Sproat, 37.

G. C. W.

"My Marathon from Pottstown to West Chester, June 17th, terminated in my favor by a large margin. It is 25 miles of rough, stony, hilly road. I finished in 4 hours, 30 minutes, and Mr. Sproat in 6 hours, 30 minutes. I covered the first 19 miles in 3 hours, 8 minutes, and having nobody to hurry me as I did not see Mr. Sproat after 7 miles, I walked the balance of the way. Sproat is quite a walker. He covered the first 3 miles in 35 minutes with very little running, as it was about all up hill. His strides in walking is about 3 ft., 4 in. I made a careful study of his stride and style from the rear during that time and made up my mind he would eat out of my hand whenever I asked him to, which I did at 6 miles. He was quite tame then, his stride coming down to mine, about 3 ft. I went very easily for 15 or 16 miles, with-

The third annual flower show at Stockbridge, Mass., held at the Casino on June 25 and 26, was a brilliant and very successful affair. There were roses, peonies, aquilegias, irises, campanulas and garden bloom of all classes in great variety and profusion. The floral arrangements by the society ladies were exquisite.

Flower Market Reports

BOSTON Promptly with the incoming of July the bottom dropped out of the flower market without the interposition of any gradual decline. Up till that time the sale of lily of the valley, roses and other June specialties was fully up to the average. Roses of super-quality can still be sold at respectable figures but the small short-stemmed stuff cannot be disposed of at any price. Carnations are at the bottom of the ladder and dealers find it impossible to get an offer for much of the stock received. Lilies are stiffer in price due to shortening supply. Gardenias and peonies are finished up and gladioli are just beginning to appear. There are plenty of good cattleyas but they are very hard to sell even at prices absurdly low for such goods. Pond lilies are an item in many of the store windows.

The past week was quite a busy one for the trade. Of course, there was not enough good white roses just at the moment wanted or lily of the valley or some other item, but everything pulled through quite satisfactorily at the end. There were sufficient carnations, sweet peas, lilies and roses, the latter in all varieties, including some very choice Shawyer, Hillingdon and a fine lot of Beauties in all grades. There was also a good supply of outdoor sweet peas which cleaned up daily, as well as other stock. At the time of mailing this—June 30—the market has gradually filled up on roses of all kinds, an over-supply of carnations and a heavy supply of Easter lilies and candidums and the buyers are practically having their own way.

The scarcity of good stock is the chief feature of the market at this time. June ends with a marked shortage of roses, a condition that has prevailed to an extent during the month and which has had its influence on the sales of the time of weddings and commencements. Roses quoted throughout the year as fancy are not to be had with most growers and the next grade has been slipped into its place and gladly accepted by purchasers. American Beauties have had a different experience, but now they, too, are shortening up. Carnations do not differ materially from the usual summer order, being shy on good ones and plentifully represented by sleepy ones. The last of the peonies will be moved this week and dealers have found that, with the exception of those shipments that went in during the extreme hot weather, they came out of cold storage in far better condition than had been anticipated and the season as a whole will not be so poor after all. Plenty of Easter lilies and lily of the valley are seen but the supply of miscellaneous stock is small.

As far as the relation of supply and demand is concerned business is pretty fair. The supply is just sufficient to make the market easy while the demand for flowers readily takes up the larger part of those offered. But neither supply of stock

nor call for the same are very large and the aggregate business is not very great. Receipts of lilies and gladioli are increasing and right now they are the most important factors in the week's market. The cooler weather has proven beneficial to the roses; white are enjoying the best call. Excellent American Beauties are offered. Carnation receipts are very small. Pond lilies are fine but do not seem very popular with the buyers. The Sweet Pea season is about at an end. Lily of the valley rather scarce. Some excellent peonies offered sell well.

NEW YORK For the latter part of last week and the early part of this week business continued satisfactory but today, July 1st, summer conditions prevail with a vengeance. Stock, probably on account of the cool weather, is of much better quality than is usually the case at this season of the year. Beauty roses are very plentiful, selling in large lots at \$8 per hundred for the best. Now that the ocean travel abroad has lessened up the demand for steamer orders has ceased, the last important sailing being the Aquitania today.

Trade conditions have been rather quiet, but normal for the season and an indication of what may be expected for the rest of the summer. Most of the wholesale places are running with reduced forces, the vacation season being now in full swing, and will continue so for the next two months. Roses are very, very plentiful—all the growers having an unusually full cut at present. The quality is also above the average and it is a pity that the demand does not correspond. The mortality records of this city show some fifty per cent. fewer deaths than usual for June—which is a gratifying state of affairs and creditable to civic conditions. Very few of the flower men grumble at this, and we never heard but one florist in all our experience say with a heartfelt sigh: "Thank God! There's always somebody dying." Carnations are gradually getting poorer in quality and there are but few choice flowers now arriving. Orchids are very good and meet with fair demand, the mainstay at present being Cattleya gigas, with a few C. Mendeli and some spray

Flower Market Reports

(Continued from page 21)

varieties. Sweet peas have suffered from the warm weather and are generally rather short stemmed and a little soft. The gladiolus crop so far has been rather backward, the flowers not opening as quickly as was expected. Asters are gradually improving, there being now a larger supply of the long-stemmed, although the main receipts are still under grade. *Centaurea imperialis* is one of the choice items among the novelties and is greatly appreciated for boutonnières. It has an absurdly big button, but the Niesens showed us a wrinkle for avoiding the difficulty. A strip of paper two-by-four, rolled around the front of the flower forming a pencil shape; then insert from back of button hole and pull off the paper. Works like a charm.

The market is in very poor shape now. The hot and dry weather has affected nearly all the stock coming in. Prices remain as quoted last week. The shortage causes no trouble to the retailer, as business has gone into summer dullness.

As is usual at this time of the year, stock is of little value, although it is being received in large quantities and the retailers are holding their purchases down to actual necessities. Prices are virtually made by the buyers and the growers and wholesalers are more than glad as a rule to get whatever they can for the stock. Roses and carnations are small and make a sorry showing in the ice boxes. Some hydrangea blooms are being received, but there is practically no movement of them. Orchids are in no demand whatever, nor is snapdragon and many other flowers. In brief, the market is dead and but little in the way of a revival is expected before the coming of cool weather. There seems to be one continuous round of severe electrical storms and on Sunday they were accompanied by a heavy wind and hail. This hurt outdoor stock to no little extent and curtailed the supply, this to the benefit of those who conduct greenhouses. During the entire time the heat and the attending humidity has been almost unbearable.

CARNATION ALICE.

Every day sees a number of visitors at the greenhouses of Peter Fisher, Ellis, Mass., to get a look at his sensational new carnation Alice, and there is only one result in every instance, for seeing is believing. We have had occasion to mention favorably this carnation frequently in our notes on club meetings and other occasions during the past season. The benches are at the present time a mass of bud and bloom, and Mr. Fisher assures us that it is equally superior in its early blooming character in the fall. Compared with Pink Delight the color is purer in tone than in that popular variety and, alongside of Enchantress Supreme—well, the latter is not in it for a moment. Mr. Fisher has 40,000 of Alice in the field.

Mr. and Mrs. Wm. Kleinheinz of Ogontz, Pa., sail on the S. S. Oceanic from New York on July 4. Paris will be their first stop.

BOSTON CONVENTION NOTES.

A most enthusiastic meeting of the local governing board of the 1914 Boston S. A. F. Convention was held in the Parker House, Boston, on Tuesday, June 23. It was called by Vice-President Patrick Welch to talk over local matters with Chas. E. Critchell of Cincinnati, the chairman of the National Sports Committee, and National Secretary John Young. There was a full attendance with the exception of J. K. M. L. Farquhar and W. J. Stewart, who were in Maine and unable to be present for that reason.

Plans were formulated looking to the entertainment of the many visiting members during the convention, and it may be said that Boston will be prepared to provide one of the most entertaining and enjoyable programs ever offered the members of the S. A. F.

After the meeting and luncheon, Mr. Welch took a party comprising Messrs. Critchell, Young, Shea, Allan Peirce, and others, in his auto to Nantasket Beach and other resorts, with a view to selecting the grounds where the annual outing and sports may be pulled off.

The committee on the outdoor convention garden to be held in August during the Boston 1914 S. A. F. Convention, has been working energetically setting out the large shipments sent by many of the leading growers for this event.

Already the interest of the horticultural lovers of Boston, whose number is legion, has been attracted. The newspapers are giving considerable space to write-ups and interested sight-seers are beginning to be attracted to the garden. In early July, Fenway Park, the home of the Boston American baseball team, will be opened and the 20,000 to 30,000 people who daily attend these games will, owing to their adjacent and convenient location, supply hundreds of sight-seers to the progress of the garden.

From environment and accessibility the garden should have the greatest attendance of any affair of its kind ever attempted, and it is regretted that more of the distant growers could not have appreciated this. It, however, is still not too late. A few very desirable plots may be obtained and with the excellent care that will be accorded any planting, the exhibit should be at its best during August when not only all visiting members of the S. A. F., but many thousands of the public will have the opportunity of seeing what the earnest workers in floriculture and horticulture are accomplishing.

PERSONAL.

P. Welch and family, of Boston, have gone to their summer cottage at Old Orchard Beach, Me.

H. Huebner of Groton, Mass., will sail from Boston for Europe on the Cincinnati of the Hamburg-American line, July 7.

Harry Bayersdorfer and Mrs. Bayersdorfer are expected to arrive from their European trip on the Vaterland, Saturday, July 4.

Alfred T. Bunyard, of New York City has returned from a visit to England, where his parents celebrated their golden wedding.

R. M. Ward, who is on an extended foreign tour, writes from Melbourne, Australia, and says he is having a glorious pleasure trip. It is now winter there but mild. Mr. Ward says that the seed stores, and the florists too, are behind the times as compared with American establishments, but it is a good and growing country and ready for modern enterprise. He leaves soon for New Guinea and thence to Manila, China and Japan.

CINCINNATI NOTES.

John Weiland and John Didier of Evanston, Ill., are the guests of Mr. and Mrs. P. J. Olinger.

Miss Cora Pherson returns from a two weeks' stay in New Orleans the latter part of this week.

C. E. Critchell upon his return from Boston spoke very enthusiastically and very favorably of the convention plans and preparations as well as of the hospitality of the Boston florists.

Don't forget the Florists' Club outing at the Lagoon next Thursday, July 9. Those who have not received tickets may get them at the wholesale houses or from the committee.

The Cook Co. Florists' Association held its regular meeting at The Tavern, Chicago, June 16. The subject of a summer outing was discussed at length and the favorite picnic was abandoned for a boat ride. A committee with Paul Klingsporn as chairman, was appointed with full power to act. The transportation committee reported on the Gregory Tours, to the Panama Exposition, in 1915 and the charge of \$152, for round trip, and seven days at a first class hotel, seemed to strike favorably. John Zech was appointed to investigate. The meeting was then turned over to the Bowling League and Wm. Lorman, sec'y, announced the scores for the year and awarded the prizes.

Why HORTICULTURE has stood the test as a profitable Advertising medium for the trade.

Because It is read by the men of standing and influence in the Horticultural field, every one of whom is a prospective buyer.

Why HORTICULTURE is so widely read.

Because Its contents are distinctly representative of American Horticulture and are thus indispensable to the Florist, Nurseryman, Seedsman and Gardener.

An Admirer of HORTICULTURE in the Central West writes; "It has won on its merits. It is our most prized weekly visitor."

And Now How HORTICULTURE has managed to elbow its way in between its older rivals and why the best trade advertisers find it an indispensable auxiliary.

It's No Secret That the men who read HORTICULTURE are the sort of men that advertisers like to talk to and if you have anything to advertise you can't afford to get along without them.

In writing to Advertisers kindly mention Horticulture

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "Care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

FOR SALE

FOR SALE

Lot of land, 248 feet by 106 feet, with 3 iron construction greenhouses, 175 x 20 feet each, potting shed, some frames in fine condition. Located on three streets, trolley passing the front, in a town of 40,000 inhabitants, close to New York. OBITUARY.

Charles Frueh.

Charles Frueh, senior member of the firm of Charles Frueh & Sons, died of heart failure on June 18, at his home in Saginaw, Mich., aged 66 years. He was a native of Dierheim, Germany. His widow, two sons and three daughters survive him.

John S. Parks.

John S. Parks, descendant of an old Long Island family, died Sunday, June 21, at his home, in Patchogue, N. Y., aged 70 years. He was born in the old Parks homestead, at 90 Broadway, Flushing. Upon the death of his father, in 1882, he took over his wheelwright business, which he conducted until 1894, when he moved to Patchogue. Since living in Patchogue he had been engaged in the florist business. He leaves a widow, a brother and a sister.

Isaac Kennedy.

Isaac Kennedy, late of Cleveland, O., and formerly in the employ of John Burton, Chestnut Hill, Phila., died on June 17 at his home in West Park, O., after a long illness. Mr. Kennedy was for some time secretary of the Cleveland Florists' Club and his brother W. J. Kennedy is now president of the Gardeners' and Florists' Club of Boston. He was recognized as a grower of exceptional ability, especially in roses under glass. He was always popular and many friends in Philadelphia and elsewhere will regret his passing away.

Joseph Wolniewicz.

Joseph Wolniewicz passed away June 26, at his home, 1214 School street, Chicago, after an illness of eight months. For business purposes he dropped all but the first part of his surname and was doing a retail business at his home and a wholesale one at his new modern houses near Milwaukee and Belmont avenues under the name of Joseph Wall. Born in Poland, 57 years ago, he served his time in the army and when 25 came to Chicago, where he has lived ever since. Mr. Wall leaves a widow, three sons, of whom Julius F. and William will continue the business, and four daughters.

Robert Rust.

Recent papers from Arbroath, Scotland, contain extended announcements of the death in that city of Robert Rust, father of W. C. Rust of Jamaica Plain, Mass., for several years the well-known gardener of the Weld estate. The late Mr. Rust was 68 years old and for many years had been superintendent of the beautiful Western Cemetery in Arbroath, and was well known over a wide section of Scotland for his ability in his calling. In 1895 he was appointed superintendent of Western Cemetery and year after year under his management the cemetery increased in beauty until it came to be recognized as one of the most picturesque burial places in Scotland. His remains were interred amid the beautiful surroundings his own hands and artistic talent had helped to fashion.

A writer in the Arbroath Guide pays the following tender tribute to the deceased:

"Not all of us can leave behind so clearly

Guaranteed under the Insecticide Act, 1910 Series No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, Insects on Rose-bushes, Carnations, etc., without injury to plants and without odor. Used according to directions our standard insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

½ Pint...25c; Pint...40c; Quart...75c

½ Gal., \$1.25; Gal., \$2.00; 5 Gal. Can., \$9

10 Gal. Can., \$17.00

Dilute with water 30 to 50 parts.

27 & 29 OCEAN ST.,

BEVERLY, MASS.

with a record of work well done as has Mr. Robert Rust, the late custodian of our burial grounds. Since the days of John Nicoll, who planned and laid out our first 'New Cemetery,' it was an unbroken tradition of work in this connection, carefully and with love accomplished, to which Mr. Rust fell heir, to which now, also, his successor succeeds. In Mr. Rust's hands these traditions were more than successfully maintained; and now that he also sleeps in the beautiful 'garden enclosed,' which he has tended so long and so faithfully, his works—in this as in other things faithfully accomplished—do follow him to his rest."

MASSACHUSETTS AGRICULTURAL COLLEGE.

The Department of Floriculture, in conjunction with the Library, has just published a library leaflet on "Books for the Amateur Flower Gardener." In the very near future a second leaflet will be published by the Department on "Books for the Professional Grower" which will include works of a more technical nature and of greater value to professional men.

In the Summer School (June 29 to July 28) a course in floriculture will be given covering the subject of the growing of flowers in the home and in the garden. This course is designed to familiarize students with the subjects of containers, potting soils, fertilizers, insecticides, and with the preparation and planting of flower beds, and the propagation and culture of plants suitable for the window garden. A study of the varieties and culture of tender annuals and perennials will also be made. The work will be supplemented by discussions on the planning of formal flower gardens and informal borders.

PINO-LYPTOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS, TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$2.75 per 112 lbs.; \$12.50 per 560 lbs.

Stumpp & Walter Co.
30-32 Barclay Street, NEW YORK

IMP. SOAP SPRAY

Is a scientifically prepared compound that is highly efficient for ALL insect pests. Why bother with several sprays when this will answer every purpose throughout the year?

LOOK FOR THE IVY LEAF TRADE MARK.

Ask your dealer or write

EASTERN CHEMICAL CO., BOSTON

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men;
in packages for retail trade.

Bag of 100 lbs. \$3.50.

Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street
NEW YORK, N.Y.

The Recognized Standard Insecticide

For green, black, white fly, red spider, thrips, mealy bug and soft scale. Can be used on tender plants.

\$1.00 per quart—\$2.50 per gallon.

FUNGINE

For mildew, rust and other blights. It is perfectly safe to apply to fruits and vegetables, as it is non-poisonous. An infallible remedy for rose mildew, carnation and chrysanthemum rust.

75c. per quart—\$2.00 per gallon.

VERMINE

For eel, cut and wire worms working in the soil. It can be applied to all vegetation.

\$1.00 per quart—\$3.00 per gallon.

SCALINE

For San Jose, Oyster Shell and all scale on trees and hardy stock. An effective remedy for red spider on evergreens.

75c. per quart—\$1.50 per gallon.

All the above products are readily soluble in water at proportions directed on cans and are used as spraying materials.

NIKOTIANA

A 12% nicotine solution for fumigating and vaporizing.

\$1.50 per quart—\$4.50 per gallon.

WHEN YOU BUY—GET A KROESCHELL
THE BOILER OF GENUINE EFFICIENCY

Expressions from Men Who Know Boilers

The Leading Grower in Vermont.

I have had the Kroeschell
Boiler six years; it is heating
17,000 square feet of glass. No
other but a Plate Boiler for
me.

(Signed) H. M. TOTMAN,
Randolph, Vermont.

The Quality Place of Boston

Regarding the Kroeschell, it
is the best we have ever had
and satisfactory beyond our
expectations. It heats up
especially quick and has saved
us considerably already in the
price of fuel. When we are
in need of another boiler we
will give the Kroeschell the
first consideration.

**In Writing Advertisers Kindly Mention
HORTICULTURE**

This simple little Chinese puzzle has to do with the load of the roof exerted on the rafter at a certain point.

No this is not a kite, but a diagram of the capers the wind cuts up when it starts pushing on the roof.

How We Make Sure Our Roofs Are Safe and Sure

IT'S easy enough to say that if a piece of iron, of a certain size and strength, will support a load of so many pounds, that one twice the size, would support twice the load. That's good enough as far as it goes—but it doesn't go far enough when it comes to greenhouse construction. It doesn't, because every

foot in width that you add to a house, you shift the load. It may increase the load by three, at some points, and decrease it by a half, at others. You absolutely must know to a pound—almost to an ounce—just

- (1) How much the weight of the frame itself will be;
- (2) How much the wind pressure will be;
- (3) How much the snow pressure of an estimated given amount will be;
- (4) How and where the pressure will be shifted from one member to another.
- (5) How much margin should be figured in for a "safety factor" or the allowing of a surplus of strength for extraordinary conditions of snow and blow.
- (6) You must know not only the weight and pressure exerted on the entire structure, but exactly what the weight and strain will be at any point.

These are things that can't be figured out on the back of an envelope "while you wait."

It takes days, sometimes even weeks, to do it. But we never materially increase the width of our houses or make any radical change in our construction, without first having our engineering department figure out stress and strain diagrams, like these shown here. These particular ones were worked out to prove to ourselves that we could safely build a house 83 feet wide and use only two columns.

These diagrams proved beyond all doubt that it was a safe and sure proposition; but also showed to us that it was possible to greatly simplify our first construction diagram, making the house more desirable

in every way and reducing its cost considerable. It took our engineering department over two weeks, working steadily, to reach these conclusions. How then, any ordinary mechanical draughtsman can be depended on to figure safe on the engineering problems involved in big greenhouse building, is more than we can understand. Or how even a skilled engineer can handle it without the aid of information and data, only such as can possibly be found in the possession of a greenhouse concern of years and years of experience like Lord & Burnham.

When you want to build a safe and sure house, be it big or little, let's talk it over together. Say when and where and we'll be there.

Lord & Burnham Co.

Here are Three New 'Mums You Ought to Grow

ALICE SALOMON

Pure white. Larger than Chadwick, easy to grow. Ready to cut October 10 to October 25. Rooted Cuttings, \$7.00 per 100; 2½-in., \$9.00 per 100.

GOLDEN SALOMON

A sport of Alice Salomon. The same in every respect except in color, which is as its name implies, a golden yellow. Rooted cuttings, \$20.00 per 100; 2½-in., \$22.00 per 100.

CHIEFTAIN

A pink described by the E. G. Hill Co., as a Pink Bonnaillon ready to cut about 10 days earlier than Enguehard. Rooted cuttings, \$12.00 per 100; 2½-in., \$14.00 per 100.

We believe that the above 'mums are valuable additions to the lists of commercial varieties and recommend them as such

NEW SINGLES Rooted Cuttings, \$8.00 per 100, 2½-inch, \$10.00 per 100

MENSA

This is the splendid white that attracted so much attention at the Fall Flower Shows and is considered the best single white in the market for cut flowers or plants.

PAULINE

This variety sported with us. It is a dark single bronze, very attractive and is a splendid grower. Order now of these and you will not be disappointed.

SUPREME QUALITY ROSE STOCK

BEST PLANTS THAT MONEY CAN BUY. Growers are always on the lookout for quality rose stock. They realize that the best at the start is the cheapest in the end. When buying plants it is always best to secure your stock from people that have a reputation for producing the best there is to be had. You cannot get any better stock than that which we are offering, for we always aim to give the purchaser the best that our long years of experience enable us to do.

GRAFTED ROSES

2½-in. Plants.

Pink Killarney, White Killarney, Milady, Killarney Queen, Mrs. Aaron Ward, Mrs. Taft (Bulgaria or Antoine Rivoire), Richmond, Mrs. Geo. Shawyer, at \$12.00 per 100; \$100.00 per 1000.

Mrs. Chas. Russell, grafted, 2½-in., at \$15.00 per 100; \$120.00 per 1000.

Killarney Brilliant, grafted, 2½-in., at \$30.00 per 100; \$250.00 per 1000; 3½-in., \$35.00 per 100; \$300.00 per 1000.

2½-in. Plants.

Richmond, 2½-in., \$90.00 per 1000; 3½-in., \$120.00 per 1000. Richmond and Milady are extra strong plants.

3½-in. Grafted.

Milady, Mrs. Geo. Shawyer, Bulgaria, Killarney Queen, Pink Killarney, Aaron Ward, \$15.00 per 100; \$135.00 per 1000.

150 Russell and 100 small Hadley at \$15.00 per 100.

OWN ROOT ROSES

2½-in. Plants.

Killarney, Mrs. Taft, (Bulgaria or Antoine Rivoire) Wards, Milady, at \$6.00 per 100; \$55.00 per 1000.

Sunburst, \$7.50 per 100; \$70 per 1000.

3½-in. Plants.

Pink Killarney, Mrs. Ward, Mrs. Geo. Shawyer, Milady at \$8.50 per 100; \$75.00 per 1000.

Richmond at \$7 per 100; \$65.00 per 1000.

Bulgaria, 3½-in., \$7.50 per 100. Sunburst, \$9.00 per 100.

Cecil Brunner, \$8.00 per 100; \$75.00 per 1000.

Beauties, 3-inch, \$6.00 per 100; \$55.00 per 1000. Ready to ship. All first class stock. 2-in. Beauties all sold.

Orders will be taken for cut back benched plants, when these are on hand, for White Killarney, Mrs. Ward, Double Pink Killarney and Melody, at \$5.00 per 100; \$40.00 per 1000. Beauties at \$6.00 per 100; \$55.00 per 1000.

These prices are in effect now; 3¢ for cash in 10 days.

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, \$2.00 per 100; 7 to 9 in. circumference, \$3.00 per 100; 9 to 11 in. circumference, \$6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, \$2.50 per 100, \$22.50 per 1000; Single Mixed colors, \$2.25 per 100, \$20.00 per 1000; Double Separate colors, \$4.50 per 100, \$40.00 per 1000; Double Mixed colors, \$4.00 per 100, \$35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, \$4.00 per 100, \$35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, \$9.00 per doz.; 24 in. high, 12 to 14 buds, \$12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, \$35.00 per dozen.

DUTCHMAN'S PIPE—Aristolochia Sipho, tops 4 ft. long, a grand vine for shade and cold exposure, \$3.50 per dozen, \$25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, \$1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft. high, at \$1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, \$12.00 per 100.

NOTES OF CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Callas

To flower well during the early winter callas should be started now. Any that are soft and flabby, or show spots of mouldy decay and perhaps have already started a thin, spindly bit of growth should be discarded. New roots are cheap enough and most growers use none but fresh roots every year. Shake off all the old soil and pot up into 6 or 7 inch pots. Give them a compost of three parts of fibrous loam to one of well decomposed cow manure and a good dash of bone meal. After the bulbs are potted they should be stood outdoors in a frame on coal ashes. Callas, although mighty thirsty when doing their best, are not aquatic plants and overwatering is possible and harmful, too, so care should be exercised in watering at this stage as they make roots rather slowly and are very likely to receive too much water. Too dry or too much soaked—one is as bad as the other. The most spotless and most substantial blooms on strongest stalks are grown in a temperature of 58 to 60 degrees.

Care of Gardenias

Gardenias that were benched early in June will now be advancing very rapidly and must have every encouragement to promote a quick and sturdy growth. On all favorable opportunities give them ventilation without allowing direct or cold drafts to strike them. A little fire heat should be given, just enough to slightly warm the pipes and you will be able to keep a chink of air on all the time. Examine the beds each day so there will be neither dry spots nor places showing a saturated condition both of which are very detrimental. Damping down will now be necessary two or three times a day. While the gardenia delights in a high temperature, great care should be taken on all suitable occasions, to secure a gentle circulation of fresh air. Give them a dusting of very fine bone first over the surface, and then a light mulch of well rotted cow manure. A good syringing of water helps to keep down insect pest.

Geraniums

The regular winter-blooming geraniums, being grown in pots should have the strong leading shoots pinched as they show any tendency to "run away"; also keep all flower spikes picked off. They like a freely ventilated house. In a musty, ill-ventilated one they will develop bacteria. Dead, decaying leaves and weeds should be removed and the plants frequently spread out while growing. They should not be allowed to get potbound between shifts and if they show starvation in their blooming pots, a dusting of fine bone or other fertilizer on the surface or weak nitrate of soda water, will tone them up. Avoid the use of liquid manures. These only pro-

mote a soft growth at the expense of flowers. Give the plants an occasional spraying overhead. It will be quite a number of weeks before it will be safe to start the propagation of geraniums. The plants, however, can be looked over in the field and any rogues marked. Many florists plant beds of geraniums about the approaches to their greenhouses. It must be remembered that geraniums must have full sun all the time.

Rambler Roses

Ramblers that were started from dormant plants in April and have made a long, stout growth can, at the end of this month, be put outside. Do not set them on any material that they can root into or they will keep on growing, which you do not want. To nicely ripen the canes they have made, set them on boards, but surround the pots with leaves or litter, or some material to keep the sun from drying them out continuously, for the pots are very full of roots. Don't shift them either; reserve that until you begin to start them into growth next January, when they need something for their new active roots. Keep them watered for a long time yet, as the buds they are now making are what will give the trusses of bloom for next Easter. A drying out now not only interferes with a nice, uniform setting of future flowering growth all along the canes, but it tends to ripen off the wood altogether too soon. It will be time to gradually let up in watering when the progress of ripening has started to show itself.

Planning For Next Winter

The proper time for making a fresh start in the growing of plant stock for the coming season is just now. For the carnations use the best houses you have; they need all the sun and light during the winter months if you expect them to grow into money. Sweet peas, snapdragons, stocks, pansies and lilies all form excellent material to follow chrysanthemums or take the place of carnations if any of them fail to do well. Bulb stock for cutting, such as tulips and narcissi are of great importance to most of us. Poinsettias, if you can keep the house they are in at 60 degrees and over next November are another standby. And so is mignonette, which can be grown in the house in which are Princess of Wales violets.

Solanums

Plants in the field, from now and up to the first week in September, will be making their growth. Keep the ground well cultivated every week. Go over the plants and pinch them back regularly and where the weather continues dry they will be better for some water so as not to become stunted.

Mr. Farrell's next notes will be on the following: Chrysanthemums; Nephrolepis; Orchids; Cold Storage Lilies; Sweet Peas; Repairing Boilers and Piping.

Greenhouse plants taxable

We regret to learn that the Ohio florists have lost their long struggle against the taxation of their growing crops, in their final appeal. Plants in greenhouses, removable for transplanting or for sale and delivery, whether in pots or benches, are declared to be personal property and taxable. The seven-years' fight in the courts under the lead of the Springfield Florists' Club has been conducted at no small expense to the florists and nurserymen of Ohio but, had they won, the result would have been of great pecuniary value to the florists of the entire country. As it is, we may expect to see other States where florists' stock has hitherto escaped, soon fall in line, with Ohio's decision as a

precedent. To the average intelligence the justice of exempting the farmer's crops in the field while taxing the florists' crops in the glass is far from plain. Should there be a further appeal and the case come before the Supreme Court would it not be well for the S. A. F., as representing growers in all the States, to extend such assistance and support as is in its power?

"Clean-up" day

An annual clean-up day has come to be quite the fashion in many towns of late. From the standpoint of the local florist, seedsmen, or nurseryman, this innovation should be industriously advocated and incited and can be made a lever to induce every man, woman and child in the town to strive to do something for the tidying-up and beautifying of their surroundings, which is equivalent to doing something for horticulture. Many willing hands make light work and one great point in favor of the movement is that when once the spirit of cleanliness and order is awakened and the appreciation is aroused for attractive surroundings, every day will, in a measure, be a clean-up day. We read of one New England village where "they had such a grand clean-up day that the rubbish filled up a big hollow near Postoffice Square, and they are going to grade it and plant rosebushes." Who can estimate the cumulative effect of such a campaign industriously followed up? If there is a florist, seedsmen or nurseryman in that town and he doesn't see in this a sure opening for a "bigger, better, busier" business for himself then he deserves to be left to trail behind his more discerning and enterprising rivals. As an institution of permanent value and constantly increasing profit to every one engaged in floral industry, "Clean-up day" holds a potentiality far beyond any "mothers' day," "fathers' day" or other similar proposition.

Angles of view and angles of method

Our news notes mention the tearing down of a large range of greenhouses for the alleged reason that the policies of the present administration at Washington have made the business unprofitable. But in other columns we record, as in every issue since HORTICULTURE came into existence, a list of many new structures, rebuilding, enlarging, and similar activities present or projected, among the greenhouse people. As in most of the affairs of life, one's convictions on this subject are no doubt largely influenced by the view point "angle." There never was a time when some person didn't feel sure that the country was going "to the demmition bow-wows." So far as the future growth and prosperity of commercial horticulture is concerned HORTICULTURE takes no stock in these grouches and forebodings which are heard from time to time. Greenhouse property is a prime investment and will so continue, provided, however, that the business is conducted intelligently on up-to-date methods. But, conducted on the lines of twenty-five years ago "it can't be done"—which is still another "angle."

"New times demand new measures and new men;
 The world advances and in time outgrows
 The laws that in our fathers' day were best;
 And, doubtless, after us some purer scheme
 Will be shaped out by wiser men than we,
 Made wiser by the steady growth of truth.
 The time is ripe, and rotten ripe, for change;
 Then let it come: I have no dread of what
 Is called for by the instinct of mankind.
 Nor think I that God's world would fall apart
 Because we tear a parchment more or less.
 Truth is eternal, but her effluence,
 With endless change, is fitted to the hour;
 Her mirror is turned forward, to reflect
 The promise of the future, not the past."

—James Russell Lowell.

Dendrobium Falconeri

DENDROBIUM FALCONERI

Dendrobium Falconeri has been known to science since 1817, so there is nothing new about it, but as it is one of those orchids which are somewhat difficult to cultivate for many years in succession, it may be interesting to some to know under what conditions the plant illustrated grows and flowers here.

As will be noticed by the picture, this dendrobe is of a straggling habit, throwing out numerous side branches, which in time produce aerial roots from their base. The main stems of the plant are fastened to the sticks inserted in the pan for this purpose and to these the aerial roots will cling for support.

The sticks used in this case are branches of the liquidambar or sweet gum tree cut while in a growing state: they will last a number of years and on account of their peculiar cork-like eruptions of the bark are well suited for the purpose, although not exactly necessary.

This plant grows in full sun all the year round in a house with a southern exposure where the night temperature in winter is kept at 56 to 58 degrees, with an increase of 10 to 15 degrees during the day with sun heat or 5 degrees in cloudy weather. The plant is syringed two or three times on bright days during summer.

The flowers of this beautiful dendrobe are remarkably large in comparison to the thin knotty pseudo-bulbs, deliciously fragrant and of exquisite coloring. The sepals and petals are white, tipped with purple, the lip is of the same color with the addition of a large, deep maroon blotch bordered with orange yellow in the center. The plant blooms in May or June and lasts about a week in good condition.

M. J. Ope

Naugatuck, Conn.

Euphorbia corollata

EUPHORBIA COROLLATA

Of the genus *Euphorbia*, comprising over 500 species, the hardy herbaceous section is the least known. We readily recall among the many representatives of the cactus-like milkworts, conspicuous specimens of *Euphorbia Caput-Medusae*, *E. mammillaria*, *E. mauritanica* or *E. imbricata* in succulent plant collections of the botanical gardens of Europe. We find ourselves thoroughly familiar with the winter-flowering tropical *Euphorbia splendens* distinguished by bare, dark, thorny stems, small leaves near the top and clusters of bright red blossoms and perhaps also the species *Euphorbia atropurpurea* and *E. fulgens*. As a matter of fact there is no lack of general appreciation of the effective value of the annual *Euphorbia variegata*, the so-called Snow of the Mountain, and frequently too *E. heterophylla*. But to the majority of our horticulturists *Euphorbia cyparissias* and *E. polychroma*, two very handsome yellow-flowering perennial border species, remain still undiscovered. I believe it is time for us now to avail ourselves of the possibilities they offer for effective use. The same may be said of the creeping kinds, *Euphorbia capitulata* and *E. Myrsinites*, two mountain species from the Mediterranean Sea: both being very attractive rock-garden plants, in flower during May.

The herbaceous milkwort, however, which in my opinion merits our foremost attention is our native species *Euphorbia corollata*. The "Flowering Spurge," as this herb is called, attains a height of from 2 to 3 feet, bearing its terminal umbels of white blossoms gracefully on long thin stalks. The clump depicted by our illustration, a reproduction of a photo taken last season at the Dreer Nurseries in Riverton, N. J., gives an idea of the natural habit of growth of this plant when left without the support of staking. *Euphorbia corollata* is a very handsome midsummer-flowering perennial of which we have by no means an over-abundance at our disposal. It is well adapted for the mixed border and may also be used to best advantage for natural plantations or wild flower gardens. According to my observation, drought does not seem to affect it seriously: on the contrary, a high and rather dry situation appears to be required for perfect development.

Richard Fother

Glenside, Pa.

CLUBS AND SOCIETIES

AMERICAN ASSOCIATION OF NURSERYMEN.

If any doubt had previously taken possession of a single nurseryman regarding the success or non-success of the Cleveland convention of the American Association of Nurserymen, such a question would have been quickly settled if he could have stood in the rotunda of the Hollenden Hotel on the morning of June 24th. Never in the history of nurserymen's conventions was a more representative and enthusiastic aggregation of "the sons of the soil" assembled as that which was at the Sixth City.

"Business first" was in the atmosphere, and when President J. B. Pilkington, of Portland, Oregon, sounded the call to order, several hundred members responded. We have already given a brief resume of some of the business that was transacted after the opening invocation by "Father" Harrison, of York, Neb., and the address of the president and officers' reports. If any of the papers read were more valuable than others, then we would name that by Prof. E. R. Lake, U. S. Pomologist, Dept. of Agriculture, on "How to Secure a Uniform and Correct System of Nomenclature in Nurserymen's Catalogs"; and the other, "Fitting Trees to Climate and Soil," by Henry Hicks, Westbury, L. I., N. Y.

Cropping out of the action last year at the Portland Convention, regarding uniform horticultural laws, a tentative bill was presented and a special committee was named to confer with the joint committee appointed last year to consider said bill and report back to this convention. This committee recommended that the tentative bill be referred to the joint committee and further recommended that that body redraft the bill, incorporating these features as far as possible and take measures to secure its adoption by the Association of Economic Entomologists and any other interested bodies. It is felt that the ultimate adoption of this bill will not only strengthen and foster the interests of nurserymen, but also of fruit growers and all allied horticultural interests.

As stated in our notes last week, Secretary John Hall asked the Association to accept his resignation, which was reluctantly accepted and complimentary resolutions passed. Subsequently, after prolonged discussion, the selection of secretary was placed in the hands of the executive committee, and the present secretary consented to continue till his successor is appointed. It is generally believed that after the executive committee have held a conference with him, no change will take place. It would be very difficult for the Association to replace Mr. Hall. The date of 1915 meeting is to be determined by referendum conducted by the secretary.

PITTSBURGH FLORISTS' & GARDENERS' CLUB.

An interesting little meeting at the Fort Pitt Hotel on the night of July

7th, marked the close of the business sessions of the Pittsburgh Florists' and Gardeners' Club until September. It was the sense of the club that at the September meeting the secretary should present a list of the delinquent members and amounts delinquent for the action of the club in open meeting. There were quite a number of exhibits, and the president appointed as judging committee Messrs. Jno. W. Jones and Robert Lilley, who awarded to T. J. Malcomson, gardener for A. R. Peacock, a cultural certificate for two baskets of achimenes. Jno. Costoff, gardener for Wm. Flinn, brought double hollylocks.

G. Wessenaer of Sewickley brought *Asclepias tuberosa* and there was considerable talk among the members as to why this pleasing flower was not taken into cultivation in this vicinity and grown more largely for market. H. C. Knauff of North Side, Pittsburgh, showed roses Conrad Ferdinand Meyer, Alister Stella Gray and Gloire de Dijon. Mr. Knauff said that with a little protection he had no trouble in bringing the latter through our winters, and he was very much pleased with its flowering. The president displayed some interesting centaureas and rudbeckia.

The matter of attending the convention of the Society of American Florists at Boston in August was brought up, and especially the going by way of Baltimore and via the Merchants & Miners Transportation Co.'s Steamship Line. Apparently not a large number of florists from Pittsburgh will attend the convention in Boston, but those who are going spoke favorably of the steamboat trip, and were advised to get in touch as promptly as possible with Robert Hunter, Agent Merchants & Miners Transportation Co., Bessemer Building, Pittsburgh, and make their reservations of state-rooms, or they will be too late. It is not necessary to make the round trip by steamboat; any so desiring can return from Boston by rail.

In accordance with the usual custom there will be no club meeting until the first Tuesday in September.

H. P. JOSLIN, Sec'y.

AMERICAN GLADIOLUS SOCIETY.

Preliminary schedule of prizes for the annual exhibition of gladiolus blooms to be held at Boston, Mass., August 18-19-20, 1914.

OPEN CLASS

Vaughan's Seed Store—\$10.00 for best 25 spikes Gladiolus Mrs. Francis King; Vaughan silver medal, best 25 spikes Chicago White; \$5.00 for best 25 blooms Vaughan's new *Primulinus* Sunbeam.

E. E. Stewart—\$5.00, 12 spikes Black Beauty; \$5.00, 12 spikes Golden Queen; \$5.00, 12 spikes Lucille; \$5.00, 12 spikes Michigan.

W. E. Fryer—\$5.00, 6 spikes Mrs. W. E. Fryer.

T. A. Havemeyer—\$10.00, 6 spikes White; \$10.00, 6 spikes Pink or shades of Pink; \$10.00, 6 spikes Yellow; \$10.00, 6 spikes Blue or Lavender; \$10.00, 6 spikes Red or shades of Red; \$10.00, 6 spikes any other color.

W. Atlee Burpee & Co.—\$10.00, collection, ten varieties, 6 spikes each.

H. W. Koerner—\$5.00, 12 spikes American Wonder; \$5.00, 12 spikes Twilight Chief; \$5.00, 12 spikes American Giant.

Jacob Thomann & Sons—\$5.00, 25 spikes any white variety.

Montague Chamberlain—\$10.00, White seedling, 3 spikes; \$10.00, Yellow seedling, 3 spikes; \$10.00, Pink seedling, 3 spikes.

Matthew Crawford—50 bulbs of White Lady, for best red variety never before exhibited.

A. H. Austin Co.—\$5.00, gladiolus corsage bouquet. Other flowers or green may be used.

Bidwell & Forbes—Silver medal for best vase 25 spikes Niagara; do. for Panama.

AMATEUR OR GARDENERS' CLASS

John Lewis Childs—\$10.00, first prize, \$5.00, second, for ten vases Gladiolus Childs named varieties.

H. W. Koerner—\$5.00, 12 spikes American Wonder; \$5.00, 12 spikes Twilight Chief; \$5.00, 12 spikes American Giant.

Knight & Struck Co.—\$3.00, first prize, \$2.00, second, for 3 spikes Mrs. Frank Pendleton; \$3.00, first, \$2.00, second, for 3 spikes Badenia.

"The Modern Gladiolus Grower"—Silver cup valued at \$15, for largest and best display of mixed and named varieties, to contain at least six named varieties, correctly labeled, 3 spikes each.

Jacob Thomann & Sons—\$5.00, 3 spikes of any white variety.

L. Merton Gage—\$5.00, vase of 10 varieties, one spike each.

G. D. Black—60 bulbs Golden King, vase of yellow varieties.

American Gladiolus Society—Silver medal and bronze medal, best exhibit of at least fifteen varieties, 3 spikes each, correctly labeled.

L. MERTON GAGE, Sec.

FLORISTS' CLUB OF PHILADELPHIA.

The July meeting of the Philadelphia Club was taken up mainly with a discussion of the various routes to the convention in August. Sentiment was very much divided but it was finally decided to go by Reading R. R. and Metropolitan steamship line. This did not meet the views of the transportation committee, so they resigned, and Leo Niessen was appointed chairman of a new transportation committee with power to add. The picnic committee reported a surplus of \$58 from the Schuetzen Park outing. This was passed to a special fund for the benefit of next year's picnic.

CLUB AND SOCIETY NOTES.

The Chicago Flower Growers' Association held their annual election, Monday, July 6th. The old officers were re-elected and Rudolph Ellsworth added to the board of directors.

The annual meeting of the Cincinnati Florists' Society will be held on Monday, July 13th, at the club rooms. The annual election of officers for the ensuing year will be held.

A special Rose Night was held by the New London Horticultural Society on Wednesday, July 1. The tables were crowded with flowers from the local gardens and a large display was sent by A. N. Pierson, Inc., Cromwell. The speaker was Alex Cumming, Jr., who gave a most interesting talk on the different varieties and treatment of them. The attendance was all anybody could expect as the night turned out wet, but it showed the enthusiasm of the flower lovers. The next meeting is Sweet Pea Night. H. L.

CONVENTION CITY NOTES.

Intending visitors to the Boston S. A. F. Convention are advised that there are three hotels in Boston bearing somewhat similar names and care should be exercised in making reservations, as otherwise there are liable to be misunderstandings.

"The Copley-Plaza" (headquarters) is located at the corner of St. James and Dartmouth streets; "The Copley Square" is 49 Huntington avenue; "The Plaza" is on Columbus avenue, near Dartmouth.

These hotels are all in the same neighborhood, near the Convention Hall.

PATRICK WELCH,
Chairman Hotel Committee.

Our cover illustration depicts a view in Boston Public Garden, a famous spot which, no doubt, all the Convention visitors will want to see. This is the first of quite a series of views of horticultural interest in and around Boston which we shall present from now on until Convention time. We should be glad, however, if everyone who reads these lines could come in person on this important occasion and see for themselves the instructive examples of advanced horticultural art which these pictures so inadequately portray. There is no section of our great country so rich in horticultural achievement as the territory surrounding the metropolis of New England.

GERANIUM HELEN MICHELL.

The accompanying picture shows a 4-inch pot plant of this promising new zonal pelargonium, grown by Wm. Robertson, gard. to Mr. J. W. Pepper, Jenkinstown, Pa.

As recorded in our notes of the American Sweet Pea Society's exhibition last week, Mr. Robertson was the

winner of the first prize offered by H. F. Michell Co., for exhibit of this geranium, \$50 in gold. The plant which won first prize had 16 flower trusses on it, a remarkable number for a plant in 4-inch pot. This novelty is well thought of wherever it has been shown.

PANAMA-PACIFIC HORTICULTURAL EXHIBITS.

William Plumb, who has been industriously canvassing the growers in the eastern section of the country, reports a gratifying interest displayed in this great event and has assurances of support and fine contributions by many leading concerns. But the time is now short and there are many who, with best of intentions, yet are dilatory in signing up for their space, being in most cases too busy, thus far, to attend to it. Now that the slack time has come, the first duty of all is to get in communication with Mr. Plumb and have these preliminaries duly attended to. Communications addressed to him at 53 W. 28 street, New York, will reach him promptly.

The State of Massachusetts through Secretary Wilfred Wheeler of the State Board of Agriculture has secured for its out door horticultural exhibit one of the most eligible locations in the Panama-Pacific grounds, comprising an area of over 21,000 sq. ft. R. & J. Farquhar & Co., of Boston, will be among the large individual exhibitors from the extreme east.

A GERANIUM TEST.

We note in the Missouri Botanical Garden Bulletin for June the interesting statement that there are being tested out during the present summer in the garden trial beds no less than 367 recently purchased varieties of geraniums. A complete list of these varieties is given. It is hoped that in this large number of varieties some will prove to be valuable additions to the, at present, small list of varieties generally planted.

SYRACUSE ROSE SHOW.

The recent Rose Show held in Syracuse breaks all previous records for attendance, interest and merit of exhibit. Imagine over two hundred varieties of the queen of flowers skillfully staged. They made the spacious hall a bower of beauty and fragrance. Mr. Robert Pyle, Vice-President of the American Rose Society gave a beautifully illustrated address the first night of the show on "Famous Rose Gardens I Have Visited." Two successive years Mr. Pyle has delivered the annual address and acted as judge. This society has in four years grown to have an active membership of nearly three hundred. James M. Gilbert took first honors in winning the silver medal offered by the American Rose Society for the best exhibit. Every village of any considerable size, except one, within thirty miles of Syracuse, has members in this organization. Through the inspiration of this society hundreds of new rose gardens have sprung up, and many already in existence have been greatly enlarged and improved. Among the direct results of the work of the year Syracuse is to have a Municipal Rose Garden, and Syracuse University is planning for a rose garden which will probably be located in front of the Carnegie University Library Building.—Extract from *Northern Christian Advocate*.

A CORRECTION.

We are apprised that an error crept into our list of prize awards by the Sweet Pea Society, in our issue of last week. The American Sweet Pea Society offered a gold medal for the largest and most meritorious exhibit and this medal was awarded to W. Atlee Burpee & Co. The gold medal awarded to A. T. Boddington was a special, as an appreciation of his artistic arrangement.

Red Bank, N. J.—Edgar A. Slote of Middletown has been appointed director in charge of the horticultural department of the Monmouth county fair. Mr. Slote has selected five experienced flower growers outside of New Jersey to act as judges. These are W. H. Waite, superintendent of the Grey-stone estate at Yonkers; John F. Johnston, Pratt estate at Glen Cove; Thomas W. Logan, Crosswicks farms, Jenkintown, Pa.; Alexander McKenzie, Cragston estate, Highland Falls, N. Y.; and George Middletown, Rockwood Hall, Tarrytown, N. Y. These will also act as judges in the exhibits of vegetables made by professional gardeners. A new feature in the vegetable department this year will be an open class for collections of twelve varieties of vegetables, arranged for effect, and occupying a space of 3x6 feet.

THE REASON FOR CHEAP GARDENERS.

Editor of HORTICULTURE:

Dear Sir:—While Mr. Watson has been breaking a lance with the secretary of the N. A. G. respecting the merits and demerits of the aims and objects of that organization, some of the younger school have been looking on and, like the young rooster, would like to try a hand a-crowing now that the old ones are through, or apparently so. So we beg to be allowed to set forth our views as one who is working in the ranks of assistant gardeners and therefore able to bear the trend of feeling in that direction. The desire of most persons who enter gardening is to get to the top, and that as soon as possible. So should it be; but there is one very important factor which many seem to overlook. "Will I be competent to hold a job and can I give results that would reflect credit upon the profession to which I belong?" is a thought that occurs to a very small percentage. The fact that a man has worked as assistant for fifteen years, or that he is thirty years old next birthday, does not make him a competent gardener any more than because he can run a greenhouse satisfactory he can also manage an estate. Another thing that is responsible for inefficiency among gardeners is that as soon as a young man enters the business he wants a job in the "houses" so as to be steady, and no attention whatever is paid to the outdoor branches of the work once he has started to pull weeds out of the benches and scrub the walks. Furthermore, there are some in our ranks who have had a limited experience in more than one branch of the art, and who do think they are fully equipped for the many duties that devolve upon the real gardener.

A short time ago we read in a well known trade paper an advertisement something like this:

"WANTED Situation as Head Gardener or Superintendent on gentleman's country estate. Life experience in all branches of horticulture. First-class references. Age 23."

Comment is needless, but this serves to show that some who enter the profession think it can be learned in a very short time. Fifteen years seems a long time to put in before one becomes a competent gardener, but many of our best men put in all that and some more before they got out on their own hook, and they undoubtedly did a good deal of private study on subjects which are side issues so far as gardening itself is concerned, but which, nevertheless, are indispensable in the management of a country estate. The moral of all this is that there are too many "neglected opportunities" amongst the raw material from which the estate manager is recruited or should be recruited. After many of us have neglected our opportunities we become restless and dissatisfied and determine to start out for ourselves. A place turns up, and there are others like us who feel the same way, but there is the determination to have the job at even \$5.00, so on goes the price-cutting until the poor fellow has succeeded in persuading himself that he has at last made his mark and the employer deluded into believing that

he has engaged the services of a competent man at low water rates.

The fact that such methods are resorted to needs only the evidence of the men who hold such low priced jobs and who, as Mr. Smith says, are only too well paid. These same men when they were assistants would have refused a place which would have afforded them a wide and useful field of experience if the wages were not at least \$5 per month more than they had in the previous place. So again we have to admit that as assistants we prefer wages to knowledge and experience. In Europe it is quite the custom to sacrifice wages to get to a place that has a reputation; in fact, to the British journeyman gardener, wages are a secondary consideration. Hence the success of the British gardener.

In conclusion we want to say to Mr. Watson that we believe that the cause of low wages is incompetent gardeners, who have only themselves to blame for their incompetence. We believe, however, that there is some good old stuff among the boys yet, and, like many of our bosses, we only want a little encouragement and credit where it is due, to help us along, and we are prepared to listen, too—at least some of us.

AN ASSISTANT

"THE HAPPY GARDENER."

Reply to Alexander MacLellan's poem.

George Watson strolled across his store,
Among implements and seeds galore,
Took from the rack a garden spade
Said he, "The lad who man's this tool,
No slave is he to Union rule,
He graduates from nature's school,
He's happy, healthy and well-paid."

A Newport bard, who read G's prose,
Strayed where the ocean ebbs and flows
Twice daily at command of time
The rolling waves leapt to inspire,
And filled his poetic soul with fire,
As on the beach he tuned his lyre,
And there set George's prose to rhyme.

He told how gardeners held the keys,
To all the flowers and shrub trees,
That with our craft, naught was amiss;
That gardening was a work of love
And quoted George, this fact to prove,
To better things. Why should we move?
Our calling was a perfect bliss.

Oh! lustrious poet, cease thy muse,
Go look around, and don't confuse
Thy poetic picture's not the stuff,
Come take from us those wondrous keys
And look all parts beyond our seas,
Stop inexperienced gardeners, please,
From our shores; here we've enough.

Why waste thy sympathy on wealth
Who trots the globe, for joy or health,
While oft the gardener is dismissed,
Perhaps the brother's old and gray,
As to seed-stores he winds his way,
Behold! this picture of dismay,
Oh! poet, say not, our calling's blest.

DAVID S. MILLER.

Tuxedo, N. Y.

Avon, Mass.—Embert F. Oliver florist, has just won a suit in the court at Brockton against a local heating concern for failure of the apparatus in his greenhouses to furnish adequate heat according to their guarantee. The place froze up twice during the cold spell last winter but the defendants repeatedly refused to make any reparation, hence the suit. The jury awarded Mr. Oliver \$1496.22 to cover value of frozen plants and cost of putting the heating outfit in proper condition.

HARDY MAGNOLIAS.

Extract from Bulletin No. 58 of the Arnold Arboretum.

Magnolia glauca of the Atlantic coast region from Massachusetts to Florida blooms in early June. No small tree is a more delightful inhabitant of the garden, where it is an object of beauty throughout the year with its bright green branches in winter and its beautiful leaves which are dark green and very lustrous above and silvery white below, and which remain on the branches at the north without change of color until the beginning of winter and in the south till early spring. The small, creamy white, cup-shaped flowers continue to open during many weeks, and especially in the evening fill the air with their delicate pungent odor; they are followed by the cone-shaped fruits which are common to all *Magnolias* and are showy when the scarlet seeds hang from them on slender threads. Every one with a garden who makes the acquaintance of this plant wants to grow it; it is easily raised from seed, and at the end of three or four years' seedling plants are of saleable size. In spite of the demand for it, which would increase if plants could be had, it is almost impossible to find this *Magnolia* in American nurseries. *Magnolia Thompsoniana* is also in good bloom. This is a hybrid raised in England many years ago between *M. glauca* and the American Umbrella-tree, *M. tripetala*. It has leaves like the leaves of *M. glauca*, which it also resembles in the perfume of the cup-shaped pure white flowers intermediate in size between those of its parents. Unlike many hybrids which are usually harder and more vigorous than their parents, *M. Thompsoniana* is less hardy than either *M. glauca* or *M. tripetala*, and sometimes has been killed to the ground in severe winters. The latest of the *Magnolias* is *M. macrophylla*. This handsome tree is interesting for it has larger leaves and larger flowers than any other plant of the northern hemisphere beyond the tropics. A native of the south from North Carolina to Louisiana, it is perfectly hardy here; it is best planted, however, in sheltered positions as the leaves are easily torn and disfigured by the wind.

On the Administration Building is a fine plant of the Japanese climbing *Hydrangea* (*H. petiolaris*). In the country this plant is usually seen climbing up the trunks and spreading over the branches of trees, but it has been found capable of attaching its stems firmly to brick-work and therefore to be useful in covering walls and buildings. The bright green foliage makes a handsome contrast with the broad heads of flowers which are surrounded by a row of neutral ray flowers of medium size. Two early flowering shrubby *Hydrangeas* are *H. Bretschneideri* from northern China and its variety *setchuensis* from western China. The former is an old inhabitant of the Arboretum and is a tall, free-flowering shrub well worth a place in all collections. The variety which is less well known appears to be perfectly hardy and equally free-flowering.

HYDRANGEA OTAKSA

EXTRA LARGE SPECIMENS FOR JULY AND AUGUST FLOWERING

We have some of the largest, finest, and most perfect specimens of hydrangeas in half barrels that we have ever seen. Plants are just coming into bloom, and are beautiful symmetrical specimens covered with bloom, each plant having from one hundred to two hundred flowers. We have over three hundred of these fine plants in shape for immediate shipment, and every plant is a perfect specimen. There is nothing so magnificent for summer decoration as these large hydrangeas. They are very showy.

\$7.50, \$10.00 and \$15.00 each according to size and number of blooms.

WINTER-FLOWERING ROSES

If you have not secured all the stock that you can use for planting for winter-flowering, we still have a very fine stock of the following varieties, which we can offer in perfect condition, ready for immediate shipment. Stock is gilt-edged in every way extra strong, heavy plants from 1-inch pots. If you can use any, we will be glad to quote low rates. Write us the number you can use, and we will quote by return mail.

KILLARNEY Brilliant, Killarney Queen, Pink Killar-

ney, American Beauty, Lady Hillington, Richmond, Mrs. Chas. Russell, Mme. Cecile Brunner, or Mignon, or Sweetheart.

FERNS

There is nothing better for summer use than the fine varieties of NEPHROLEPIS. We offer a nice stock of the following varieties, well established plants ready for immediate shipment.

Nephrolepis elegantissima (The Tarrytown Fern), 3½ inch, 25c each; 6-inch, 50c each; 8-inch, \$1.00 each.

Nephrolepis magnifica, 3½ inch, 25c each.

Nephrolepis muscosa, 3½ inch, 25c each; 5-inch, \$1.00 each.

Nephrolepis Harrisii, 6-inch, 50c each; 12-inch very large plants, \$5.00 each.

Nephrolepis Bostonensis, 6-inch, 50c each; 12-inch very large plants, \$5.00 each.

Pteris Wimsetti multiceps—a fine hardy fern 3½ inch, 15c each.

Small Ferns for Fern Pans. A fine assortment, 2½-inch, \$1.00 per 100.

"WAR ON CATERPILLARS."

Editor HORTICULTURE:

In your issue of June 20, on page 898, there is an article on "War on Caterpillars." What I wish to know very much is, what preparation or method they used. If it is possible for you to state this in your next issue of HORTICULTURE, I would greatly appreciate it and also if plant vermin, such as San Jose scale, etc., are injurious to the body if taken in through the food. Hoping that you will be able to oblige me with such information, I am, and will be greatly indebted to you,

New York City. J. W.

The caterpillars particularly referred to in the article in question were the "tent caterpillars" mainly. The method of destroying them in June is to collect the webs in which the caterpillars congregate and burn them. Early in the spring, before the caterpillars are hatched out the rings of eggs are collected and burned. In many places the school children are paid a bounty, so much per hundred rings, and the number collected and destroyed is astonishing, to say the least.

For the brown tail moth, which makes its web nest in the fall the usual method is to collect the nests in the winter, when after the leaves have fallen they are very conspicuous, resembling cotton bolls at a distance. For the gypsy moth, creosoting the egg masses during the winter is commonly practiced. Finally, for all caterpillars, spraying the infested trees with arsenate of lead while the caterpillars are young is a well known and very efficient means of control.

We have never heard of San Jose scale hurting anyone when eaten on fruit. Probably most of us have unwittingly eaten lots of them.

MUSHROOM COVERING.

To the Editor of HORTICULTURE.

I should esteem it a favor if some grower could inform me, if after covering a mushroom bed with straw, I should leave it on the bed till the crop is finished or do I take it off before the mushrooms appear.

Yours truly,

A SUBSCRIBER.

If "Subscriber" has a crop of mushrooms due to come in now, it is the very worst time of the year to attempt it. As to the removal or retention of the straw covering, much depends on its kind and its depth. If long rough straw or heavily put on it should be removed as soon as the first growths appear. If it was very finely cut up and is not more than an inch or so in thickness, the mushrooms will find their way through it nicely and it may be left on.

NOTEWORTHY CARNATIONS.

Among the carnation growers sending blooms to Boston, G. Thommen, manager for Backer & Co., Billerica, Mass., has no superior in the quality and quantity of product, as is well known to the local trade. Mr. Thommen was cutting fine flowers last October, and the same plants are still a serried forest of buds and bloom on straight stems three to four feet tall—a most remarkable sight, the only noticeable difference as compared with the winter crop being that the July flowers are not quite so large. The color is extra good and keeping qualities excellent. The record for the season on such varieties as White Perfection, White Wonder, Winsor, Ben ora, etc., has been fifteen to seventeen flowers per plant. At the time of our visit, Mr. Thommen was throwing out several benches of this splendid plant to make room for the young stock and it did seem wicked to tear them out. The roots were equally as indicative as the tops as to their sturdy vigor.

In reply to a query, Mr. Thommen said that the three cardinal points in successful carnation culture are absolute banishment of all insect pests from the start, constant cultivation of the soil and the proper food intelligently given. We have a new advertiser of sheep manure in this issue, in which some of Mr. Thommen's views on this material as carnation food are given. It is worth reading, and the plants at Billerica are convincing proof of what it can accomplish.

The KENILWORTH GIANT PANSY

seeds are all good, self and are offered in the following mixtures and separate colors:

KENILWORTH STRAIN—The flowers are of perfect form and substance; many of the immense flowers are from 3½ to 4 inches; it is a striking collection of beautiful colors and markings, rich with shades of red, brown, bronze, mahogany and many others too numerous to mention.

KENILWORTH SHOW—An extra fine strain of large flowers; the immense flowers are of circular form and great substance; a beautiful collection of colors and markings.

KENILWORTH CUT FLOWER MIXTURE—Is a distinct class by itself, surpassing all other strains as a cut flower or for exhibition purposes, for inside or outside growing; the large flowers are carried erect above the foliage on heavy stems, 7 or 8 inches long, in the most graceful manner, and stand the hot, dry weather well.

MASTERPIECE—A remarkable type; the curled, wavy petals giving the flower a double appearance, its large flowers of great substance, on long, strong stems.

ORCHID FLOWERED, Mixed—A dwarf free bloomer with a range of delicate colors that do not exist in any other pansies, a remarkable combination of light rose, shell pink, blush mauve, fawn, light brown, orange and chamois.

NEW SEED NOW READY.

1000 seeds, 25c; 5000, \$1.00; ¼-oz., \$1.25; 1 oz., \$5.00.

Rainbow is a mixture of the most beautiful, gorgeous colors; blushed, striped, veined, mottled, etc. With every \$1.00 worth of pansy seeds I will send 1000 of Rainbow free and with other amounts in like proportion.

OUT OF THE GINGER JAR.

(This preserve is of the Aunt Maggie brand—tang enough to make it interesting; but not so sharp as to hurt anybody's feelings.)

Wattie Dunlap was reading from the Scriptures: "And I said in my haste, all men are liars." Wattie paused, and looked over his spectacles at his congregation; said he: "That's from the Holy Book, and King Davit was one of the wisest of them all. But my friends, I just want to say this: if King Davit was living now and knew this congregation as well as I do he would not have to say it in haste—he could do it at his leisure." We are afraid there are very few Wattie Dunlaps around these days to expound the ten commandments as they ought to be expounded—so that they would apply not only to some of us but to all of us.

These days we have enough and to spare of the yellow journal Billy Sunday kind of guff and buffoonery but not near enough of the stern penetrating admonition that a Wattie Dunlap had the courage to hand to his flock.

John James Ingalls said the Decalogue had no place in modern politics. He might have gone further and said that the ten commandments have no place in politics or business or society or any other phase of modern life. The only god many seem to know is the god of Business Success. And when they reach that god they are very much surprised indeed to find that he is no god at all but a bunch of dry withered husks with no happiness or balm or success hidden within.

The great florists, nurserymen,

seedsmen and gardeners of the past generations, as you can gather from their writings and the histories of their strivings, were after a much Holier Grail than mere business success. They wanted also to walk in truth and honesty and to leave the world more beautiful than it was before or at least more comfortable. The man who is honest merely because honesty is the best policy has got but a poor grip of the meaning of the eighth commandment.

And right here we want to say that the standard of truth and honesty in the horticultural profession, as compared with other professions is very high indeed—even at the present day. We may deplore the influx of a new materialistic and immoral element within the past ten or fifteen years, but it is as nothing to what prevails in other businesses and we are proud to attest that the main body remains sound and true to principle.

But if one were to go by the actions of the legislatures of nearly every state in this union, one would think the horticulturists were all villains of the deepest dye. Wattie Dunlap was excusable because of the grim humor

but a legislative enactment is different from a pulpit exordium. Let us have no more persecution of the horticultural business.

BRITISH HORTICULTURE.

American vs. British Advertising.

"American florists are as original in their advertising as they are enterprising in their trading methods," says a writer in the "Nurseryman and Seedsman." "I was not surprised to find many of the big advertising houses using considerable space in the June magazines to announce their autumn bulb sales. In most instances handsome illustrations lend effect to the flamboyant language of the announcement, and in every instance the price list is the least conspicuous part of the announcement. Wherein the American advertiser differs from most of our British advertisers, who regard the description of the article and the price of it the essential features of a properly drawn advertisement."

Rhododendron Display.

The interior of the Royal Horticultural Society's hall, London, has lately been filled with a gorgeous array of rhododendrons from the nurseries of John Waterer Sons and Crisp, Bagshot, 20,000 blooms were displayed. The firm has also held its annual display in a mammoth marquee at the Royal Botanic gardens, Regent's Park.

The Anglo-American Exposition

The grounds at this exposition are now presenting a charming appearance. Every effort has been made to make this an attractive feature to the many thousands of visitors who will flock there this season. Soon after the opening in May a very fine show of tulips was made. Some excellent groups of rhododendrons have also been arranged. Indoor roses have lent their fragrance and charm. Kelway & Sons, have added a blaze of color with their peonies. During the exposition a series of horticultural conferences will take place. Some of the British and American experts will take part. E. G. Hill, Richmond, Ind., will deal with "The Position of the Rose in America," and W. Atlee Burpee has undertaken to speak on the development of the Sweet Pea in America.

W. H. ADSETT.

FIRES.

East St. Louis, Ill.—Strinmesch Seed Co., July 2. Loss \$10,000.

Philadelphia—A disastrous fire occurred in the warehouses of the Philadelphia Seed Co. on the 6th inst. This company deals mostly in grass and clover seeds and poultry supplies. It has occupied the building at 103-5 Arch street for several years. A. C. Neal is president; J. C. Rupp, secretary, of the company. No lives were lost although there were a number of narrow escapes. The fire is said to have started by spontaneous combustion in a bin of alfalfa. Three alarms were struck and much damage was done to adjoining properties before the fire was got under control.

A good shading for glass is frequently called for. Many growers use whitewash, which comes off too easily. Others use lead and oil, which sticks too hard. Kalsomine is recommended as a happy medium. It will withstand heavy rain, but will gradually come off so that by fall very little is left to be removed.

BODDINGTON'S QUALITY FLOWER SEEDS

SELECTED SEEDS SUCCESSFULLY SOWN SECURE SURE, SAFE AND SERVICEABLE SATISFACTION

It has been, is, and always will be our policy and intention to disseminate only the very choicest strains of flowering seeds (or any other varieties of seeds), giving special attention to the class known as Florists' Seeds, and intending customers need have no hesitation in buying or fear of disappointment when they bloom. No expense has been spared to secure the finest types as to habit of plant, form of flower, color and breeding of our Quality strains of Primula, Cineraria, Cyclamen, Calceolaria, etc.

ASPARAGUS

PLUMOSUS NANUS. True greenhouse grown. 50 cts. per 100 seeds; \$1.00 for 250 seeds; \$3.50 per 1000 seeds.

PLUMOSUS NANUS. California grown. 50 cts. per 100 seeds; 75 cts. for 250 seeds; \$2.50 per 1000 seeds.

SPRENGERI. 25 cts. for 250 seeds; 75 cts. per 1000 seeds; \$3.00 for 5000 seeds.

CALCEOLARIA HYBRIDA

BODDINGTON'S PERFECTION. The herbaceous Calceolaria is an easily cultivated plant. So long as frost is excluded from the plants in Winter they are perfectly safe, and to attempt to hasten growth at any time is a failure. July is the best month for sowing the seed. The great advance made in the habit of the strains offered is remarkable, whilst in the colors there is a marked improvement. Saved by England's most famous specialists. Monster flowers of rich and varied colors, including spotted, laced, blotched and self-colored varieties. ½ pkt., 60 cts.; pkt., \$1.00.

Boddington's Matchless CINERARIAS

BODDINGTON'S MATCHLESS CINERARIA. A combination of the three most famous English strains, which we can recommend to those wishing to grow the best. Tall, ½ trade pkt., 60 cts.; trade pkt., \$1.00. Dwarf, ½ trade pkt., 60 cts.; trade pkt., \$1.00. CINERARIA STELLATA (Star-flowering Cineraria). Tall growing, 4 to 5 feet; excellent as a single specimen for table decoration, or for grouping with splendid effect in corridors and conservatories. ½ trade pkt., 60 cts.; trade pkt., \$1.00.

CANDYTUFT (Iberis) H. A.

BODDINGTON'S GIANT HYACINTH-FLOWERED. Large, pure white, spiral spikes. The finest variety for growing under glass. Trade pkt., 35 cts.; oz., \$2.00.

MIGNONETTE H. A.

BODDINGTON'S MAJESTY. The finest of all the fancy varieties of Mignonette; an improvement on Allen's Defiance. Seed saved from select spikes under glass. Trade pkt., 60 cts.; ¼ oz., \$1.00; oz., \$7.50.

BODDINGTON'S POT MYOSOTIS

Forget-Me-Nots are delightful subjects for flowering indoors at Christmas time, and as they are everywhere welcome, the practice of growing plants in pots is rapidly increasing. Sown in July and potted on, the strain we offer produces fine, free-growing specimen plants. Trade pkt., 50 cts.; 3 pkts. for \$1.25.

SCHIZANTHUS (Butterfly Flower) H. A. 1½ ft.

Elegant, free-flowering, hardy annuals for the garden in Summer or for pot culture in the greenhouse during Winter.

GRANDIFLORUS BODDINGTONII. Boddington's Select Hybrids. The strain is superior to any of the Schizanthus in cultivation, the flowers are better shaped and the colors are more varied. In habit the plants are very bushy, and the flowers are invaluable for cutting; as a pot plant for conservatory decoration, they are unequalled. Trade pkt., 75 cts.

WISETONENSIS. The colors are varied, ranging from white with yellow center to pink with brown center. Most useful as a Winter plant, and should be given a place in every greenhouse. Trade pkt., 50 cts.

Boddington's Matchless GIANT PRIMULAS

PRIMULA SINENSIS

Boddington's Matchless Giant Primulas, Mixed. This selection includes all the finest Giant Single Primulas of the plain-leaved class. ½ trade pkt., 60 cts.; trade pkt., \$1.00. Boddington's Matchless Giant Pure White; Boddington's Matchless Giant Blush White; Boddington's Matchless Giant Orange King, a delightful novelty, almost orange; Boddington's Matchless Giant Rose; Boddington's Matchless Giant Scarlet; Boddington's Matchless Giant Royal Blue.

Each, ½ trade pkt., 60 cts.; trade pkt., \$1.00. Collection of the above 6 varieties, ½ trade pkt., each, for \$3.50.

The Duchess. The large, pure white flower, with its unique zone of bright, rosy carmine, surrounding a clear yellow eye, is simply unapproachable in its beauty. ½ trade pkt., 60 cts.; trade pkt., \$1.00.

Sutton's Coral Pink. The name describes it; habit dwarf and compact; flowers thrown well above foliage. Pkt., \$1.00.

PRIMULA OBCONICA GIGANTEA

Primula obconica gigantea Kermesina. Beautiful, deep crimson.
Primula obconica gigantea alba. The pure white flowers greatly enhance the beauty of the existing lilac, rose and crimson shades.
Primula obconica gigantea lilacina. Beautiful lilac.
Primula obconica gigantea rosea. Lovely rose.
Primula obconica gigantea grandiflora. Mixed varieties, pure white to deep crimson.

Each of above, ½ pkt., 30 cts.; pkt., 50 cts.

PRIMULA floribunda grandiflora (Buttercup). Small yellow flowers, borne in great profusion; fine for pots. Pkt., 50 cts. Forbesii (Baby Primrose). Pkt., 25 cts.

PRIMULA KEWENSIS (Giant Buttercup). This plant is a strong grower, with bright green leaves and numerous erect flower-scapes, 10 to 18 inches in height, producing flowers in whorls at intervals along their whole length. The flowers are fragrant, bright yellow in color, with a slender tube and spreading limb nearly an inch in diameter. As a Winter-flowering decorative plant it is an acquisition; very floriferous when in a small state. ½ trade pkt., 60 cts.; pkt., \$1.00.

PRIMULA FIMBRIATA, GIANT QUEEN ALEXANDRA. G. P. The largest white Primula Sinensis, blooms measuring 2½ inches across. Petals very solid and erect. Robust foliage with red stems. ½ pkt., 60 cts.; trade pkt., \$1.00.

PRIMULA, NEW HYBRID QUEEN OF ROSES. A lovely new hybrid of P. obconica and P. stellata, producing shapely heads of large and beautiful, bright rose-colored flowers, remaining decorative for a long time. 1 foot. Trade pkt., \$1.00; ½ pkt., 60 cts.

PRIMULA MALACOIDES. H. H. P. (The Giant Baby Primrose.) The plants branch very freely. The flowers, which are ¾ inch wide, are of a pretty light lilac, and are borne in whorls on long stems. If grown in a greenhouse, can be had in bloom in four months after sowing. Trade pkt., 50 cts.; 3 pkts. for \$1.25.

PRIMULA MALACOIDES ALBA. The white prototype of the foregoing variety, and a great acquisition; very chaste and beautiful as a plant or cut flower. Trade pkt., 50 cts.; 3 pkts. for \$1.25.

SEED TRADE

The Pea Outlook.

Crop news is now the most important item of seed trade notes, yet it is a very uncertain and more or less unreliable factor. Crops are for the most part at a stage where no forecast at this date is of any particular value. Among leading items, peas are probably the nearest to a state of development giving promise of ultimate results. As a whole conditions are only fairly good. There have been several frosts in Montana and Idaho which have caused more or less damage, the extent of which cannot be ascertained at once, and perhaps not until after harvest. In Canada conditions are described by one of the leading Canadian growers as "not any too good." About the same description would apply to Michigan and Wisconsin. The above applies to seed peas, but the canners are not having any bumper crops this year. No seed peas being grown in Delaware, Maryland, Ohio or Indiana, we may dismiss them all with the statement that the pack of canned peas has been light, ranging from 40 to 60 per cent. of what was expected from the acreage planted. In Wisconsin and New York, early peas (Alaska) are running about three-fourths of an average, but "sweet" or "late" peas are expected to give better results. It is about the same in Michigan, and in all three states the quality is said to be excellent—a larger percentage of fancy stock than usual. This is a highly gratifying fact, as the market never has been congested on fancy canned peas, and we may add seldom on any fancy canned goods. Summarizing the general situation, it may be said that on the basis of present estimates, the total pack of canned peas will be smaller than last year, and of better quality, while the crop of seed peas will be relatively smaller on a greatly reduced acreage, but doubtless sufficient to go around. It is too early for any reliable forecast of beans or corn, while we have had no occasion to re-

visit our estimates of the general situation on small seeds as published two weeks ago.

New York in 1915.

A rumor reached us that New York City has been selected as the place for holding the 1915 convention of the National Canners' Association and Allied Industries, and that exhibits of the Canning Machinery and Supplies Association are to be staged at the Grand Central Palace. While our information is not official, we believe it to be correct.

Agricultural Department's Seed Imports.

The United States Government each year distributes by order of Congress, enormous quantities of seeds throughout the United States free of cost.

The orders given are sometimes very large, as may be judged from the fact that Messrs. Kelway and Son, Wholesale Seed Growers and Merchants of Langport, Somerset (who have for some years been amongst the successful competitors for a portion of this order), have this year received from the United States Government from Washington, an order for flower seeds and vegetable seeds alone totalling in weight nearly 44 tons.

This is probably one of the largest orders for flower and vegetable seeds ever received by one firm from one customer, as it is not composed, even in part, of agricultural seeds or of large seeds such as peas and beans. Many hundreds of acres must have been under cultivation for the production of the weight in question. How large an area such an enormous quantity of seeds would sow seems almost past human computation.

Of the four other European firms who (in addition to the Langport firm) are this year favored by the United States Government with their order for seeds, one is English, two French and one Dutch.—*Horticultural Trade Journal, London.*

Notes.

Kansas City, Mo.—The Rudy-Patrick Seed Company has leased from the

Western Grocer Company the building at Ninth and Santa Fe streets, containing about 80,000 sq. ft.

Schenectady, N. Y.—The Empire Seed Company has leased the large new store at No. 144 Clinton street, four doors north of State street, and will about the 15th of next month open a large wholesale and retail seed and poultry supply house, catering to the needs of poultrymen, farmers and gardeners. Harry J. Fuller, secretary of the Schenectady Poultry Fanciers' Association, will be general salesman of the poultry department. Harry N. Stevens, with 20 years' experience in the seed business with T. Low Barhydt and later with Charles W. Witbeck, will be connected with the new concern, as will also C. D. Filkins, an experienced seedsman.

John W. Coy, who has been visiting this country in the interests of Charles Sharpe & Co., Ltd., Sleaford, England, sailed for home on the Mauretania, July 7.

PHILADELPHIA NOTES.

H. Bayersdorfer arrived home from his European trip on the 4th inst. on the Vaterland. His son, who is associated with him in business, will make the outward voyage on the same steamer, dated to sail on the 7th inst.

Ernest H. Hoehl, who ran the old Bunting place in West Philadelphia for a number of years, is now representing S. S. Skidelsky & Co., and is at present making a special drive on seeds of new winter-flowering sweet peas.

Charles Sim, landscape gardener and contractor, Rosemont, sailed from New York on the Allan Line via Nova Scotia for Glasgow on the 7th inst. He has chosen this route in order to get the benefit of a full fourteen days on the water. He will return in about two months.

At this writing, July 7, William Westcott is reported to be resting easily. He went under an operation at St. Timothy's Hospital, Roxboro, on Thursday last and has been a source of grave anxiety to his friends since. His brother John responds hopefully over the 'phone this afternoon.

Gus Doemling sailed on the Vaterland, July 7. Mr. Doemling has blossomed out as one of Philadelphia's most successful rose growers in the past decade. His range of glass is in Delaware County, seven miles outside the city. He made a great hit last winter with Mrs. Charles Russell.

Cards are out for the wedding of C. Percy Barnard of Northbrook and Jane H. Wickersham, Unionville, for July 15th. Both contracting parties are prominent citizens of Chester Co., Pa., and well known in Philadelphia. The groom is a florist-grower of more than local renown, and his hosts of friends rejoice with him on this happy occasion.

B. Eschner of the M. Rice Co. arrived home from his European trip, June 18, on the S. S. Vaterland. He was accompanied on his trip by Mrs. Eschner. They visited Madeira, Algiers, and took the European points from the southern side, including the International Flower Show at Hamburg. Incidentally, contracts were made for all the latest novelties in the florists' supply line.

Mr. and Mrs. H. H. Battles and daughter, Miss Grace Battles, returned from a three-months' European tour on June 26. They visited many metropolitan centers—combining recreation with acquisition of valuable knowledge and experience. They sailed on the Olympic which is the last word of the White Star Line and came back on the Aquitania which is the final gasp of the Cunard. Mrs. Battles was the youngest of the family all the time, and comes home greatly benefited in health.

A new venture in the retail cut flower and plant business starts here Sept. 1st. Two young men from New York City—Messrs. Verona (of Trepel's and Steinhoff's son of the well-known florist of that name) have signed a contract for a term of years with Snellenburg's—one of the biggest and best of this city's department stores—to run a flower department in connection with the general business of the company and plans are now

well under way for a first-class proposition here, such as Mr. Trepel has made so successful in Manhattan. Good luck to them. We greatly need that sort of enterprise here.

Visitors: J. J. Gammage, London, Ontario; Messrs. Verona, New York, and Steinhoff, West Hoboken, N. J.; Alexander Canning, Center Square, Pa.; Mr. and Mrs. William. Weinhoeber, Chicago, Ills.; W. B. Currie, of Currie Bros. Co., Milwaukee, Wis.

WASHINGTON NOTES.

Mr. Redmond, with the S. S. Pen-nock-Meehan Company, is reported as spending a very pleasant vacation at Colonial Beach.

Work has been begun on the erection of a 400-foot rose house at the Mount Olivet plant of the Gude Bros. Company. This house will probably be devoted to American Beauty roses.

Frederick D. Burch, rose grower in charge of several houses operated by Gude Bros., was married on June 30, to Miss Effie J. Adams of this city. James Carroll, American Beauty grower at the Anacostia houses, also took unto himself a bride on the same day. Both of the young couples have the hearty congratulations of their many friends in this city.

Hardly had the report of the theft of \$965 from the safe of the Washington Florists' Exchange been placed on the police records than it was found that the money had been mysteriously replaced. The money was found missing on a Friday morning, the safe having been left open the night before, but when the door was opened again on the following Sunday, it was intact.

Florists who have automobiles for personal or delivery purposes are facing an additional tax of from \$5 to \$7.50 per annum thereon according to the size of each car, a bill providing for such tax having been introduced into the House of Representatives. Owners of automobiles already pay a personal tax and license tax and they believe that they are more than doing their share. Practically all of the florists here operate machines, many having several, and as they believe the tax unjust, they will probably do all that they can to defeat the measure.

ST. LOUIS NOTES.

W. C. Smith and Mrs. Smith are off for a two weeks' vacation trip at Ha, Ha, Tonka, Mo.

The Steinmesch Seed Co., on the east side of the river, was damaged to the extent of \$10,000 by fire on July 2.

Dr. George T. Moore and Prof. Duggar, of Shaw's Garden, will spend most of the summer at Wood's Hole, Mass., in the Marine Laboratory.

John Barnard, who, a month ago, left the O'Leary Floral Co. with \$220 belonging to the company, has been arrested and is charged with embezzlement.

Mr. and Mrs. John Kalish, of the Kalish Bros. Floral Co., with their mother, left last week for a northern summer trip which will consume three weeks.

CHICAGO NOTES.

The 12 year old son of John Zeek was severely bitten by a vicious dog belonging to a neighbor. It is hoped no serious results will follow.

The Foley Greenhouse Mfg. Co. are very busy at present. Among their most recent orders is one from the Iowa State College, Ames, Iowa, for a large palm house with two wings with curved eaves, and ten growing houses, all to be of steel construction; also houses for Chapin Bros., Lincoln, Neb.

The usual summer quiet has settled on the Chicago flower stores. In the greenhouses the work of repairing benches and making necessary changes is or should be well under way. At Frank Oechslin's and other plant growing establishments the bedding trade is over and all energies are directed toward getting the cyclamen, poinsettias, begonias and primulas in condition for next winter's blooming.

NEW CORPORATIONS.

Pine Bluff, Tenn.—The Bluff City Seed & Floral Company have surrendered their charter.

Ogden, Utah.—Ogden Wholesale Floral Company, capital stock, \$2,500. Incorporators E. C. Rich, E. R. Dumke, J. Bamberger, P. Healy and J. R. Dumke.

Personal

Frank Danzer and Harry Breitmeyer of Detroit sailed for Europe July 6th.

Peter Duff, superintendent of Bright-hurst, Orange, N. J., sailed for Scotland on July 4.

A. R. Tischinger, florist, Govans-town, Md., and Miss Mabel Skillman, were married June 25th.

Mrs. E. A. Williams, Pittsburgh, Pa., sailed on the Aquitania July 1st for an extended European trip.

H. W. Betts, Richmond, Mass., sailed from Boston on the Warren Line steamer Sagamore last week.

H. Huebner, Groton, Mass., sailed from Boston on the Cincinnati of the Hamburg-American line, July 7.

Edward Reid and family, of Philadelphia, will sail for Europe July 16th on the Lusitania for a ten weeks' vacation.

Cards have been received from John Meisem, of Elmhurst, N. Y., showing that he is having a glorious time in Europe.

A Leuthy, Roslindale, Mass., is scheduled to sail from New York on his customary European trip, Wednesday, July 15.

Chas. J. Bolgiano, Baltimore, Md., has been elected a member of the Chamber of Commerce of the United States of America.

A. A. McDonald, superintendent of the Duke estate, Somerville, N. J., will sail for Europe July 14th, and will be gone about two months.

The Cumberland Town Council of Pawtucket, R. I., have appointed Neil Ward of Lonsdale tree warden, to succeed Walter Sword of Valley Falls.

Fred B. Barrington served as a judge at the flower show of the Cape Ann Scientific and Literary Association at Gloucester, Mass., last week.

Wilbur N. Baumann, son of Camille E. Baumann, florist of St. George avenue, Rahway, N. J., and Miss Evelyn K. Harriman were married at the bride's home in Rahway on June 16.

Albert L. Warner, one of the oldest active florists in the state will celebrate his 80th birthday this month at his home in Pawtucket, R. I. Mr. Warner, whose specialty now is Asparagus plumosus has done a lucrative florist business at his present location for many years and is hale and hearty still.

Enclosed please find my subscription for HORTICULTURE for this year. I enjoy reading it and congratulate you on the way you have pushed it along to its present high standard. "Keep it going."

Yours very truly,

Peter Duff.

Orange, N. J.

During Recess

New York Florists' Club.

The annual outing of the New York Florists' Club was held on Wednesday, July 1. The party numbered 275, and the sail to Glen Island was much enjoyed. A number of members usually prominent on this occasion were absent, due, probably, to the fact of the outing following so closely on the excursion of the Plant Growers' Association. The occasion was somewhat marred by rain in the afternoon, but the various games, races, etc., were all carried through with the exception of the baseball game. The committee in charge worked valiantly to secure for everyone a good time.

Among the prominent guests present were R. Vincent, Jr., and Mrs. Vincent.

Greek-American Picnic.

The annual picnic of the Greek-American Florists of New York took place on Wednesday, July 8, at Witzel's Point Grove, via the steamer Isabel. It was a fine crowd and they had a fine time.

Cook County Florists.

The Cook County, Ill., Florists' Club will give an excursion and basket picnic to Michigan City on the Roosevelt, Sunday, July 12th. A good attendance and fine time is anticipated.

St. Louis Growers.

The County Growers' Association had a splendid time at their outing June 30th and it will be an annual affair from now on.

Flower Market Reports

Trade lags badly since
BOSTON July 1. There is neither local nor shipping demand worth mentioning but the latter should very soon waken up. Roses are in abundant supply, the best sellers being Killarney Brilliant, Double White Killarney and Cardinal. There is plenty of lily of the valley but long-florum lilies are scarcer than for some time past and the price has advanced. Gladioli are still of the indoor stock. Some outdoor sweet peas are seen but the indoor product is the better, so far. Asters are not yet in sight, but are about due.

Very little change in
BUFFALO market conditions, although it may be said that things are not altogether at a standstill. The week end saw a fairly good cleaning up except on roses of poor quality and Beauties did not take well. There is a heavy supply of lilies which do not run to advantage on account of the outdoor candidum lily. Other outdoor stock such as Canterbury bells, delphinium, Shasta daisies, coreopsis, etc., has been plentiful. Early store closing and vacations are in order and a few weeks of dullness is certain to prevail.

Cool weather the past
CHICAGO week has improved the rose stock in a marked degree. Killarney is coming in of a quality considered fair for this season of the year. Most of the stock, however, is of the shortest length stem. Good long-stemmed stock is very scarce. Sunburst, which is one of the most satisfactory summer varieties, may be had in all desirable lengths. Some very fine Russells are noted; these are mostly snapped up by local buyers catering to a select trade, the price—6 to 20c.—being prohibitive to the cheaper trade. Shawyer is now seen in increasing quantities, most of it cut from young early-planted stock, in length from 6 to 20 in., selling readily at 3 to 10c. Bulgarie and Milady can be had in various lengths and of fine quality. Carnations are still coming into the market in considerable quantities but very few blooms are of even fair quality. Asters are more in evidence but most of the stock offered is short-stemmed as yet. Beauties are still in heavy crop and the quality is excellent. Lilies are about equal to demand; these command 8 to 10c. for the best grade. The crop of June brides having been harvested there is a decided drop in demand for lily of the valley. There is an abundance of out-door grown stock of every description which finds favor with many dealers. Few sweet peas are seen and these are very short stemmed.

The market is the
CINCINNATI usual July market. The supply is not any too large for the rather ordinary

ASTERS

Not as good as they will be in a short time, but excellent quality for the early cuts considering weather conditions—purples, whites and pinks.

Per 100; \$1.00, \$1.50, \$2.00

Few Extra Long at \$3 per 100

EVERYTHING IN RIBBONS. We carry one of the largest and most varied stocks of Ribbons pertaining to the florist business of any house in the country. If you have not received one of our new catalogues, advise us and we will mail you one at once.

but active demand. Practically all the receipts sell and some of them realize pretty fair prices. There is a good demand from out of town. The supply of roses has increased somewhat but the largest part consists of short stock of fair quality. American Beauties are in a large supply, most of them choice blooms. Carnations sell nicely; and all good gladioli sell at sight. Lilies, too, have a good market.

Stock is shortening
NEW YORK up in quantity and the situation has changed somewhat since last week's report. Lilies are again in good demand at a better price and lily of the valley is selling quite well. Roses are very plentiful in a way, the bulk of the receipts being small new crop buds which are considered well sold at 35 to 50 cents per 100. Asters have made their appearance and bring \$2.00 per 100. Outside gladioli are in and the market price of this flower is cut to one half, in consequence. Orchids are doing much better than they were.

Fourth of July
PHILADELPHIA week is never a very good week for the flower business. The customers are mostly all going out of town and the shopkeepers fight shy of buying anything except hand to mouth. But compared with other years last week's volume of business was all that could be expected and shows up favorably. Prices ruled low, of course, all along the line. Roses are plentiful and except on the northern-grown, receipts are only of medium quality. Carnations are gradually running down both as to quantity and quality. Per contra asters are improving both in quantity and quality. Pretty soon this flower will be showing grade enough to cut some figure in the market. Gladioli is more in evidence, but as yet they are mostly outdoor cut from points south. Locals should have been in by now, and may be expected in force any day. Cattleyas, gardenias, lily of the valley, lilies and other standard stocks remain in normal supply and demand with no marked features.

Flower Market Reports

(Continued from page 53)

worthy of mention. Water lilies of the newer, large flowering varieties are in evidence and meet with ready sale.

Plenty of ordinary **ST. LOUIS** stock is coming in these hot days, but anything real fancy is out of the question. The retail business is so dull that not much of any is needed and only funeral work is keeping the trade from forgetting they are in business. About the only good stock in sight are long Beauties, lilies, lily of the valley, Shasta daisies and gladioli. Roses cut from young stock are coming in, but very short in stem; so are carnations and sweet peas.

Asters made their first appearance of the season last week and met with some little sale. The changeable weather has shortened up the supply of roses to no little extent and while there are large quantities of carnations this flower is poor in quality. There was a better demand for orchids last week and lily of the valley sold well. The supply of sweet peas was insufficient to meet the demand. The call for roses is confined mostly to the \$2 to \$4 per hundred grades and more particularly for Mrs. Taft and Radiance, these clearing up well while white and pink Killarneys go begging. The heavy storms of a week ago have continued and much damage is being done by the rain washing up outdoor plants. This has caused the shortening of the supply of outdoor sweet peas and has materially hurt the asters which are beginning to show promise. These features bring forth no sighs of regret from the growers under glass, but the penalty is a severe one to those directly interested.

NEWS NOTES.

Chatsworth, Ill.—Wm. Edwards has purchased the Chatsworth greenhouses.

Norwood, Pa.—Frank Hunter has purchased the greenhouse establishment of Macaw Bros.

Antigo, Wis.—The King Greenhouses have been purchased by Joe Frisch, formerly of Merrill, Wis.

Columbus, O.—Bernhardt Buehler has sold his greenhouses to Frank Hardesty and Howard Sharey.

Parkersburg, W. Va.—The greenhouses of Gustav Obermyer were badly damaged by a hailstorm on June 21st.

South Lyon, Mich.—A hailstorm on June 27th caused damage of \$400 to the greenhouse range of Walter E. Hastings.

Secaucus, N. J.—Carl A. Woerner has sold his establishment, 220 Clark-son street, Flatbush, Brooklyn, N. Y., and purchased a larger range here.

Early closing will be the rule until September, by the wholesale flower dealers of New York City, most of them locking up daily at 3 P. M.

Kansas City, Mo.—The Rudy-Patrick Seed Company has leased from the Western Grocer Company the building at Ninth and Santa Fe streets, containing about 80,000 sq. ft.

OBITUARY.

Joseph Bradbury.

Joseph Bradbury, ninety-three years old, died Sunday, June 28, at his home, 531 Irvington avenue, South Orange, N. J. Mr. Bradbury was one of the oldest residents of South Orange. His death was due to the infirmities of advanced age after a lingering illness. For many years Mr. Bradbury was engaged in the florist business. He is survived by six daughters and one son.

W. H. Humfeld.

William Henry Humfeld died at his home in Kansas City, Mo., on June 25, aged 59 years. He leaves a widow and five daughters.

TEXAS TO HAVE AN ARBORETUM.

A movement looking to the conservation of native Texas flora, and so far as the way is clear, to the establishment of a Texas Botanical Garden and Arboretum in Austin, is meeting with much encouragement.

Committees have been appointed by the Texas Nurserymen's Association, State Horticultural Society, State Florists' Association, State Experimental Stations, A. & M. College, Texas State University and State Agricultural Department. These committees are to be called to meet at College Station, Texas, during the Farmers' Congress, July 28, 6 to 9 P. M. in Mess Hall at a banquet, programs to be published. F. T. Ramsey is chairman. This order was issued by the executive committee of the Texas Nurserymen's Association, June 6, and signed by J. S. Kerr, president; Will B. Munson, vice-president, and J. M. Ramsey, secretary-treasurer.

BUSINESS POINTERS.

Hard luck seldom overtakes the man who never looks around to see if it is coming.

The question of whether or not there is room at the top need not trouble you until you get there.

If there is anything that will stunt a man's business and mental growth, it is patting himself on the back too much.

If you do not know exactly what it costs you to do business, you may be sure that it is costing you more than you think.

If the ideas which you carry into effect in the conduct of business are half-baked, it is reasonably certain that "your cake will be dough."—*South-ern Merchant.*

PUBLICATIONS RECEIVED.

Report of Commissioners, Rockford Park District, Rockford, Ill., 1913. This superbly illustrated publication shows that the public of Rockford, the children especially, are being well provided for in their park and playground equipment. The statement of assets and liabilities shows assets of \$274,316.54, being \$71,894.60 in excess of bonds and all other liabilities. Paul B. Riis is superintendent.

The Ninth Annual Report of the Board of Park Commissioners of the City of Racine, Wis., is a handsome publication with maps and many fine illustrations of park and playground views on heavy coated paper. The cover is adorned with a river view in natural colors. The Racine park system has been established ten years and is being developed in a most enterprising manner. A. A. Fisk is superintendent.

Public Parks Board, Winnipeg, Canada. The Annual Report for 1913 is one of the most interesting reports that have come to our notice. We venture to say that very few of our readers realize that the city of Winnipeg spends over a quarter of a million dollars annually on its public parks. Yet that is what this report shows. The book is embellished with a number of large folding views and several full page pictures of great beauty. G. Champion is the superintendent.

The 31st Annual Report of the Park Commissioners of Minneapolis, Minn., has been received from Superintendent Wirth. It is, as for several years past, a most elaborate publication, evidencing the thoroughness with which everything is done when Theodore Wirth has anything to say about it, and the splendid support accorded by the city and the officials to the policies laid down by that indefatigable worker. The cover page is embossed in colors and the pictorial features of the publication are very elaborate. Maps and diagrams of layout and plantings, in fine detail add much instructive value. The value of land and improvements of the Minneapolis Park System is computed at \$7,144,725.78. Total disbursements for the year 1913 were \$726,184.04.

The Cincinnati Cut Flower Exchange have finished their summer house cleaning and repainting and re-decorating. The place looks neat and very attractive in its coat of white and green.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

HAMMOND'S GRAPE DUST

**For Use Against
Mildew and Blights**

GRAPE DUST is a readily diffusible, light-weight powder, Fungicide, for destroying Mildew and preventing Blights; also for destroying the Aphid and Black Fly. It is packed in 5 and 10 pound packages; also in 25 pound bags, 100 pound kegs, and barrels of 225 pounds, net. Kept in stock and sold by the leading Seedsmen in America. Dust by use of bellows.

EXPERIENCE OF FLORISTS AND GARDENERS MILDW ON ROSES, CARNATIONS, ETC. IT IS SIMPLE AND EASILY APPLIED

Mr. B. Hammond.

Dear Sir: Replying to your inquiries regarding "Grape Dust," would say that we use it solely on Roses, Carnations and Chrysanthemums. As a fungicide we have not found anything to equal it; it is simple and easily applied. We close down the ventilators and fill the house with dust blown through the bellows; when the dust has settled down we ventilate again, putting on a little air as required. We have been using your "Grape Dust" with good results for the last fourteen years.

Staatsburg, N. Y., May 25, 1908.

Yours truly, JAMES BLAIR.

I find your "Grape Dust" the most efficacious remedy for "Mildew" on roses that I have tried, and cheerfully recommend it to the trade.

Yours truly, CHAS. P. ANDERSON.
The John Henderson Co., Rose Growers.

Flushing, N. Y., Aug. 1889.

The "Grape Dust" is sudden death to Mildew in greenhouses.
E. A. BRAINERD, Florist, 7 Main Street.

ROBERT SIMPSON, Rose Grower.

Clifton, N. J., Oct. 11th, 1907.

Dear Mr. Hammond: In reply to your inquiry regarding my experience with "Grape Dust," would say that I am glad to be able to say a good word for the article in question, because I have found it so generally satisfactory when used for Mildew on roses. I do not know anything about its constituents, nor do I care so long as it does the work and is as economical as anything else on the market. During the summer when the steam pipes cannot be brought into use to check Mildew, and dusting over the foliage has to be resorted to, we prefer to use Grape Dust rather than Sulphur, because it is much lighter and finer in texture; a given number of pounds will cover more than twice the number of plants; will cover them more thoroughly, and can be put on with a bellows in about one-fourth the time that would be required for Sulphur. The fact that I have used it continuously for ten or twelve years should prove to you that I consider it the best article on the market for the purpose for which it is used.

With best wishes, I am yours very truly,

ROBERT SIMPSON.

Poughkeepsie, N. Y., Jan. 25th, 1912.

Benjamin Hammond, Esq.

Dear Sir: Please send me 25 lbs. "Grape Dust" as soon as possible. I find it is the only thing for Mildew on Roses. We have used it successfully for many years past.

Very truly, CONRAD C. GINDRA.

First used in California in 1890 at Menlo Park, San Mateo County.

HAMMOND'S SLUG SHOT WORKS, BEACON, (Fishkill on Hudson) N. Y.

THE VALUE OF TRADE JOURNALS.

The merchant or manufacturer who assumes to "get on" without the trade journals directly or collaterally bearing on his particular specialty, is seriously handicapped in the stress of competitive strife. Wilfully, though perhaps not wittingly, he deprives himself of sources of information and material for progress and profit, lack of which must inevitably leave him in the lurch. And don't commit the folly of balking at the preponderance of advertising pages. The information these contain is never less and often far more valuable than is found in the reading matter.—*Boston Herald.*

**IMP.
SOAP SPRAY**

Is a scientifically prepared compound that is highly efficient for ALL insect pests. Why bother with several sprays when this will answer every purpose throughout the year?

SOUTH AMERICAN SHEEP AND GOAT MANURE

WHAT HAVE WE HERE?

It looks like sheep manure!

It smells like sheep manure!

It feels like sheep manure!

and by gum, it is the real, pure old fashioned sheep manure, pure and straight all over, the same we used to be able to get years and years ago when sheep were plenty in this country of ours. This stuff comes from South America, where they have nothing else but sheep and goats and it is the Simon pure article, just as the Ba-Ba dropped it, but finely ground for convenience.

This manure is not acid and is safe to use on the most tender plants. It is just the thing for "Mums," for young roses, carnations, cyclamens, terns and a thousand other things.

We absolutely guarantee this manure to be nothing but pure sheep and goat manure, free from anything else whatever. Send for a sample,

Look at it—

Smell of it—

Feel of it

Make a test of it for acidity and see what a fine article of manure water you can get with it.

Price and Terms on application.

SANDERSON FERTILIZER & CHEMICAL COMPANY

Sole Importers and Distributors for New England

NEW HAVEN, CONNECTICUT

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men;

in packages for retail trade.

Bag of 100 lbs. \$3.50.

Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street
NEW YORK, N.Y.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt.

Sacks, at:

\$2.75 per 112 lbs.; \$12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

The Recognized Standard Insecticide

For green, black, white fly, red spider, thrips, mealy bug and soft scale. Can be used on tender plants.

\$1.00 per quart—\$2.50 per gallon.

FUNGINE

For mildew, rust and other blights. It is perfectly safe to apply to fruits and vegetables, as it is non-poisonous. An infallible remedy for rose mildew, carnation and chrysanthemum rust.

75c. per quart—\$2.00 per gallon.

VERMINE

For eel, cut and wire worms working in the soil. It can be applied to all vegetation.

\$1.00 per quart—\$3.00 per gallon.

SCALINE

For San Jose, Oyster Shell and all scale on trees and hardy stock. An effective remedy for red spider on evergreens.

75c. per quart—\$1.50 per gallon.

All the above products are readily soluble in water at proportions directed on cans and are used as spraying materials.

These houses are to be used for educational work and are called the Plant Propagation Laboratories of the Iowa State College. There are being built in connection with these some very fine service build-
ings.

NEWS NOTES.

The Lord & Burnham Company are erecting a factory at Welland, Ont., the main building being 200 by 225 feet.

Newburgh, N. Y.—The greenhouses of Wesley Wait, which have been operated by the Newburgh Floral Company are being dismantled and torn down. The proprietor says poor business conditions are the reason and he is said to lay the responsibility therefor on President Wilson's administration! Dr. Wait's greenhouses covered about four acres. They were erected about twenty-four years ago. During the big storm last winter the greenhouses were badly damaged, as a result of which suit to recover damages has been instituted against the Postal Telegraph Co. Dr. Wait alleges that the poles of the Postal Co. falling against his greenhouses caused the damage.

Are supplied in 3 different Iron Frame Types; also in the Semi Iron or Pipe Frame styles, so we can offer you a strong, practical Sunny House at the price you can afford to pay.

Write us today—just tell us what you want and we will do the rest.

KING CONSTRUCTION CO.

28 King's Road, North Tonawanda, N.Y.

All the Sunlight All Day Houses

IF YOU ONLY KNEW what a good leave the **METROPOLITAN PATENT-ED** is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the cave is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

METROPOLITAN MATERIAL CO.
Patented Greenhouses—Heating Engineers
Hotbed Sash, Glass, etc.
1392-1414 Metropolitan Ave., BROOKLYN, N. Y.

Dreer's Peerless Glazing Points For Greenhouses

Drive easy and true, because both bevels are on the same side. Can't twist and break the glass in driving. Galvanized and will not rust. No rights or lets.

The Peerless Glazing Point is patented. No others like it. Order from your dealer, or direct from us.

WHEN YOU BUY—GET A KROESCHELL
THE BOILER OF GENUINE EFFICIENCY

Expressions from Men Who Know Boilers

Cast Iron Boilers Crack.

I want to thank you for your promptness in shipping the boiler I ordered of you on January 13th. I had a breakdown, one of a battery of two cast iron boilers cracked so it was impossible to use same, so I got you on the telephone at 8:30 a. m., January 13th, and ordered one of your hot water boilers. Same was put in my boiler room in the afternoon of January 15th, after which we built foundation and connected up. Since that time the boiler has taken care of same glass as the two cast iron boilers had done, easier and better in every way.

(Signed)
ANDREW BATHER,
Clinton, Iowa.

Mastic is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

One Man's Hindsight Is Another Man's Foresight

SOME of us, have the rather expensive habit of seeing things *afterwards*. Of course it is better to see them afterwards than to go on blindly and not see them at all. Hindsight has its place. But Foresight is the thing that *fills the big place*. It is the sort of thing that reduces business costs on every hand, *now*, and makes possible the continued reduction *in the future*.

If you and I had one thousandth part of the money growers have wasted working at a disadvantage, because of wrongly laid out ranges; or that has been spent in big lumps to tear down and rebuild poorly constructed houses—we could be taking a cruise together this very minute with our families and friends, in our private yachts.

The man that has but his own limited individual problems from which to gain his experience, is apt to pay for some of his experience dearly. But when you come to a concern like Hitchings, who have built hundreds of houses and get the benefit of their experience without a cent of extra cost, it does seem rather odd the way some growers first plan out their houses and then call us in to build them "their way" and insist on their being "their way." Not that we

think we know it all; but why should you spend your time and cultivate worries over things that we have been all through and already successfully solved?

There was a time when houses were smaller, and competition less keen, when the growers could handle the business situation well. But that time, *so the large grower tells us*, is past. With the bigger house, demanded by bigger business, many very serious problems arise that must absolutely be based on facts and figures. Otherwise results are apt to be far from satisfactory. A mistake that costs you \$100 a year amounts to \$1000 in ten years, or actually \$1330 when you figure the interest at 6% on the accumulated amount each year.

Of course there's no use going to a concern for advice, if that concern has not been in business long enough to have stored up sufficient experience to make their advice worth while.

Off hand, it would seem that not less than a quarter of a century's experience is really dependable, when it comes to the greenhouse question. This being so, then you can depend on depending on Hitchings.

And we go anywhere for business—or to talk business.

Interior of the Show House we Erected for Louis Dupuy at Whitestone, L. I.

Here are Three New 'Mums You Ought to Grow

ALICE SALOMON

Pure white. Larger than Chadwick, easy to grow. Ready to cut October 10 to October 25. Rooted Cuttings, \$7.00 per 100; 2½-in., \$9.00 per 100.

GOLDEN SALOMON

A sport of Alice Salomon. The same in every respect except in color, which is as its name implies, a golden yellow. Rooted cuttings, \$20.00 per 100; 2½-in., \$22.00 per 100.

CHIEFTAIN

A pink described by the E. G. Hill Co., as a Pink Bonafon ready to cut about 10 days earlier than Enguehard. Rooted cuttings, \$12.00 per 100; 2½-in., \$14.00 per 100.

 We believe that the above 'mums are valuable additions to the lists of commercial varieties and recommend them as such

NEW SINGLES Rooted Cuttings, \$8.00 per 100, 2½-inch, \$10.00 per 100

MENSA

This is the splendid white that attracted so much attention at the Fall Flower Shows and is considered the best single white in the market for cut flowers or plants.

PAULINE

This variety sported with us. It is a dark single bronze, very attractive and is a splendid grower. Order now of these and you will not be disappointed.

SUPREME QUALITY ROSE STOCK

BEST PLANTS THAT MONEY CAN BUY. Growers are always on the lookout for quality rose stock. They realize that the best at the start is the cheapest in the end. When buying plants it is always best to secure your stock from people that have a reputation for producing the best there is to be had. You cannot get any better stock than that which we are offering, for we always aim to give the purchaser the best that our long years of experience enable us to do.

GRAFTED ROSES

2½-in. Plants.

Pink Killarney, White Killarney, Milady, Killarney Queen, Mrs. Aaron Ward, Mrs. Taft (Bulgaria or Antoine Rivoire), Richmond, Mrs. Geo. Shawyer, at \$12.00 per 100; \$100.00 per 1000.
Mrs. Chas. Russell, grafted, 2½-in., at \$15.00 per 100; \$120.00 per 1000.
Killarney Brilliant, grafted, 2½-in., at \$30.00 per 100; \$250.00 per 1000; 3½-in., \$35.00 per 100; \$300.00 per 1000.

2½-in. Plants.

Richmond, 2½-in., \$90.00 per 1000; 3½-in., \$120.00 per 1000. Richmond and Milady are extra strong plants.

3½-in. Grafted.

Milady, Mrs. Geo. Shawyer, Bulgaria, Killarney Queen, Pink Killarney, Aaron Ward, \$15.00 per 100; \$135.00 per 1000.

150 Russell and 100 small Hadley at \$15.00 per 100.

OWN ROOT ROSES

2½-in. Plants.

Killarney, Mrs. Taft, (Bulgaria or Antoine Rivoire) Wards, Milady, at \$6.00 per 100; \$55.00 per 1000.
Sunburst, \$7.50 per 100; \$70 per 1000.

3½-in. Plants.

Pink Killarney, Mrs. Ward, Mrs. Geo. Shawyer, Milady at \$8.50 per 100; \$75.00 per 1000.
Richmond at \$7 per 100; \$65.00 per 1000.
Bulgaria, 3½-in., \$7.50 per 100.
Sunburst, \$9.00 per 100.

Cecil Brunner, \$8.00 per 100; \$75.00 per 1000.

Beauties, 3-inch, \$6.00 per 100; \$55.00 per 1000. Ready to ship. All first class stock. 2-in. Beauties all sold.

Orders will be taken for cut back benched plants, when these are on hand, for White Killarney, Mrs. Ward, Double Pink Killarney and Melody, at \$5.00 per 100; \$40.00 per 1000. Beauties at \$6.00 per 100; \$55.00 per 1000.

These prices are in effect now; 3¢ for cash in 10 days.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Chrysanthemums

Chrysanthemums like plenty of moisture at the roots, so see that they get it, but allowing them to dry out once in a while. Do not let the beds become overgrown with weeds but go over them with the hand cultivator once a week. Ventilate freely from this out. Keep all the shoots neatly tied up. Do not fail to give a good syringing twice a day, which not only helps the plants, but tends to keep down the temperature these hot days. Keep them clean of fly by fumigating often.

Care of Nephrolepis

Ferns that were planted out in benches should now be making an abundance of strong runners. When these have made a fair amount of roots they can be potted off into small pots. In a compost of new soil three parts, leaf mold two parts, sand one part, they will make roots very fast. Stand them on a bench that has some screened coal ashes, which will help to keep the roots cool. See that all are kept well watered. These ferns want just enough shade to break the strong rays of the sun. They will never do well when the air is kept too dry, so give them a light spray, twice a day, with plenty of damping down. As these plants make growth shift into larger pots and give a richer compost.

Cypripediums

Cypripediums are now in active growth and, as the roots fill the pots and pans nicely, a little weak liquid manure once a week should be applied. It is better not to use it too strong just now. A little later, as the roots become more matted, the strength can be increased a little. Avoid the use of all chemicals. A moist atmosphere during all seasons is essential to their well being. In wet weather admit air freely, otherwise the fleshy leaves are very liable to rot. Dense shading is also detrimental; just a slight coating during the hot summer months, so as to keep the foliage from scorching is sufficient. Watch the plants so they do not suffer for water but do not keep them in a wet state all the time as the compost will become sour. Ventilate freely on every favorable opportunity but avoid cold drafts. Keep the plants free from thrips by sponging occasionally with a weak solution of tobacco water, and give the house a

light fumigating once or twice every fortnight to keep off the pests.

Planting Cold Storage Lilies

When these flowers are wanted early—say from Thanksgiving until Christmas, no time should be lost in getting them potted. Do not let the bulbs remain lying around for even a short time, as they are bound to lose their vitality. They will require 5 and 6-inch pots according to their size. Give them a good compost, also plenty of drainage as they will need lots of water later on. The best place for them while they are making roots is in a cool cellar. Before they are placed here see that the compost is in a nice moist state. Cover the pots with some moss to hold the moisture until they show top growth, when they can be removed to a cold frame with some sashes over them, but leaving plenty of air on until they have made good roots, when they can be placed in a warm house.

Sweet Peas

For early flowering sweet pea seed should be sown by the end of this month. To do well they should have at least 8 inches of soil, but where you have a solid bed plant them here and you will never regret it. Whether in bench or solid bed give them a rich compost. They will grow very well in fibrous loam two parts, well rotted cow manure one part, and a little bone meal. If the space on the benches is not ready, sow in 4 or 5-inch pots and then plant out in four or five weeks. Do not let these plants dry out too much or become pot-bound, or they will not do well. When they are planted out in the house keep on plenty of ventilation both day and night, and on all fair days give them a good syringing. Just as soon as they show any signs of climbing give them supports.

Repairing Boilers and Piping

In another six or eight weeks we will need some fire heat in most of our houses. Do not neglect to see that boilers and piping are in first-class order before firing time arrives. After cleaning out the boilers give the inside a spraying with crude oil to keep them from scaling off. Where there are any leaky valves or joints see that they are made tight.

Mr. Farrell's next notes will be on the following: Care of Carnations; Easter Lilies; Freesia bulbs; Pansies; Poinsettias; Sowing Coreopsis.

SECRETARY'S HEADQUARTERS NOW IN BOSTON

Secretary John Young, of the S. A. F., is now in Boston, with headquarters at the Parker House until convention time. Space-reservations for the trade exhibition at Mechanics Building or other business connected with the convention will be given prompt attention by Secretary Young at the above address.

The big event

The big event of the year in horticultural interest—the thirtieth annual convention of the Society of American Florists and Ornamental Horticulturists—is now near at hand, only four weeks distant. Notwithstanding the full rates which must now be paid for rail-

road transportation as compared with the former round-trip concessions, it is expected by those best qualified to judge that this Boston meeting will be one of the most largely attended, if not the largest, in the society's history. The rapid increase in the membership roll within recent years, the unmistakable widening out of the field of the Society's activities and the comparatively dense population devoted to various departments of horticultural work within convenient distance of the convention city gives assurance that even from inside a 300-mile radius a record-breaking number may reasonably be counted upon, while the well-known attractions of Boston and contiguous coast resorts may be expected to draw a normal attendance from remote territory.

What Boston offers

There is no ambition on the part of the Boston fraternity to outdo or to overdo in the matter of entertainment, but no pains will be spared in the effort to make every convention visitor feel at home and, when they go away, to feel that their visit to Boston has been not only enjoyable but educational and profitable in a business way. Opportunity will be afforded for visits to gardens of great renown and commercial establishments which have set the pace for the entire country in one or another specialty. The trade exhibition, which in late years has come to be the great source of information for the trade as to the practical advancement made in all departments during the year, will be right up to standard in extent and quality, for Secretary Young states that most of the available exhibition space in the spacious Mechanics' Building has already been disposed of. The Convention Garden will be an unique exposition of outdoor floral art and garden novelties, such as but few convention cities will have the facilities for duplicating. With all these attractions already provided and with many matters of vital importance to be considered by the Society in the three days allotted in part to business, the local managers have realized the wisdom of moderation in all plans for entertainment simply. We hope to be able to present in next week's issue the complete program for the convention, together with full details of local entertainment preparations.

The poets' license

Our columns bear testimony from time to time to the poetical talents of some of our contributors. Tennyson says,

"Vex not the poets' mind;
 For thou canst not fathom it."

No, not for the world would we presume to tamper with these "well-chosen words in well-ordered lines" and so the savage "blue pencil" is securely chained whenever our horticultural bards are moved to break out in rhyme. Nobody knows the quantity of midnight oil burned as their fervid lines are fitted and built into rippling stanzas. When a man is building poetry we assure you he has no time for mischief. We tried it ourself once and ever since have sympathized with the verse artist. So, walk right up to the desk with your poems, gentlemen, and fear not.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Boilers

During the rush of planting, emptying and refilling the benches, it is a nice recreation for the men to tackle the boilers on a hot day and put them into shape for the coming winter. If the boilers have not been cleaned as yet, see that they are well cleaned and then oiled to keep them from rusting too much. It is surprising how much longer boilers will last if they are cared for during the time they are idle, for when they are in use, and are used right they do not wear as much as when they are standing neglected in the cellar, allowed to rust and rust. Any ordinary oil can be used for the purpose. Common fish oil is as good as any where it is to be had. While the work of cleaning is in progress it is best to look the boilers over carefully, and make note of any new parts that may be necessary. If any of the pipes are burned through have new pipes made at once. It will be a while coming, and when it does come it will be where you can get it on a minute's notice. After it comes better try and set all the pipes together to see if they will fit well, for sometimes they have some expert plumber make these pipes, and when you come to put them together they will all but fit.

Notes on Planting

These have been mentioned quite often, and it will hardly be necessary to go into them in detail. See that the benches are well cleaned of all old soil, and then washed out, thoroughly whitewashed with hot lime, to which a little copper sulphate has been added. Clean out under the benches so that there is no dirt for insects to hide in. We generally—always in fact—do this twice, right after the benches are emptied, and then about two weeks after planting. Iron scrapers are especially made for this purpose, and are not used for anything else. The waste matter is scraped out into the walks, and then wheeled out of the house.

Tying

When it comes to Beauties we would not advise tying these at once. They will do far better if they are allowed to lie around a little, for then they will break from the bottom far more freely than they would otherwise. They must not be allowed to lie this way too long, however, for that would prove injurious to the future of the plant. Great care should be taken in tying Beauties the first time. The buds that will produce the best bot-

tom will already be started, and if the plants are tied so that these buds will be hidden they will come out very weak as a rule, and will never make up the plant that they would if they were tied right. Do not tie them too loose to the wires, for they will slip around when they are being syringed and will be more of a nuisance than anything. It is not well to tie them too tightly either, for then they will be choking as soon as the growth that they will make strengthens a little bit. We find that if we put the string around the wire three times, instead of twice, it will help wonderfully in holding the shoots in their places. We use good string for this, too, the white string used in grocery stores, instead of the common jute that is used later on. We do not like raffia at all, although some growers claim it is cheaper than string. We find that we can get more work done in the same time with string. With Teas no tying will be necessary for a while, as the plants are better off in hot weather if left untied, instead of being bunched up to stakes.

Ventilation

The past week has been a very trying one for growers with summer flowering roses to look after. The warm foggy weather which prevailed here in the East was very bad and to ventilate properly was no job for an amateur. When it happens that way, try to keep the houses as cool as possible without letting any of the fog in by opening out the ventilators too much. Then dust the plants with a mixture of one part of lime and two parts sulphur. Do not put this on too thick, but just enough to show that the plants have had something put on. This will help prevent mildew and then as soon as the good weather comes again, this dust can be washed off by syringing.

Damping Down

Although we never advocate damping down in the rose houses, yet when it happens that a bad week like the last comes in the summer, it will be necessary to damp down, and try to keep the houses as cool as possible to prevent bad wilting, and perhaps burning of the tender leaves. All feed should be left out during these dark days and should not be applied again until the weather sets for good and clear. One day and a half will generally harden the plants to the sun again, and as soon as this happens leave out the damping down again, for a rose house is no place for such a practice, even though it is necessary in the growing of nearly everything else.

The Special Convention Number of Horticulture

WILL BE ISSUED ON AUGUST 15

This will be an issue of exceptional interest and will be widely circulated and widely read. Its value as an advertising medium for all floral and horticultural material cannot be over estimated. S. A. F. trade is always worth a special effort at Convention time. Send your order in early and it will have our best attention.

CLUBS AND SOCIETIES

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

There was a fine attendance at the meeting of the W. & F. Society, at Greenwich, Conn., on Friday eve., July 10. The Summer Show committee made their final report showing a gratifying cash balance, and together with W. J. Sealy under whose able management the exhibit was staged, received the thanks of the society. Prizes for the Fall show will be offered for outdoor and indoor grown flowers, fruits and vegetables; dinner table decorations and other floral decorative work. The exhibition will be held in Germania Hall, New Rochelle, N. Y., November 4, 5, and 6.

The annual outing will be held August 11, at Edwards' Rye Beach Hotel. Athletic sports of all kinds will be provided including football, base ball, tug of war, etc.; races and other games and pastimes will be provided for the ladies and little folks. Regarding lunch, everybody may suit themselves, there will be an excellent shore dinner provided, however, at \$1.50 a person. Those requiring tickets for the dinner will kindly notify W. J. Sealey, Portchester, N. Y., at an early date, so that ample provision may be made, and "half-portions" avoided. Games will start promptly at 10.30 A. M.

The exhibition tables were well filled. A grand specimen of the new geranium "Helen Michell" in a 4-inch pot from Alex Marshall was awarded a C. C. The same exhibitor was highly commended for a vase of climbing rose American Pillar and a cattleya hybrid; James Stuart was highly commended for a fine display of hollyhocks. A vote of thanks was awarded to the other exhibitors as follows: *Lilium auratum* from F. Lagerstem; *Achillea Perry's* White from A. Bieschke; Japan iris from John McAllister; *Lathyrus latifolius* from E. Johnson; rose Blush Rambler from A. Whitelaw; *Allamanda Shotti* from P. W. Popp. Carter & Co., Inc. offer prizes for 25 fruits of their "Sunrise" tomato at the fall show. The schedule of the fall show which will be issued soon will be very complete and good prizes of cash, also gold, silver and bronze medals, cut glass and silverware articles offered.

NEW BEDFORD (MASS.) HORTICULTURAL SOCIETY.

The regular monthly meeting of the New Bedford Horticultural Society was held in Library Hall, Monday evening, July 6.

Although it was novelty night very few new things appeared on the tables. One novelty, the Daily Mail rose, was severely criticized by some and strongly defended by others. All agreed that the color was exceptional, but some complained of weak necks. The display consisted principally of climbing roses with A. J. Fish holding first place. This grower is evidently following Heinz lead with his "57 varieties of pickles" for he has 55 varieties of climbing rose. At our recent rose show he staged 13 vases of large-flowered climbers and 10 entirely different kinds at this meeting.

WM. F. TURNER.

AMERICAN ROSE SOCIETY.

The annual change of officers in the American Rose Society dates from the first of July. At the last annual meeting Wallace R. Pierson was re-elected president, Robert Pyle, vice-president, Harry O. May, treasurer, Benjamin Hammond, secretary, and Messrs. August F. Poehlmann, J. H. Dunlop, Frank R. Pierson, S. S. Pennock, Robert Simpson were re-elected as executive committee, the only change being that of Louis J. Reuter of Westerly, R. I., taking the place of Eber Holmes of Montrose, Mass. The affiliated Rose Society of Syracuse received a silver medal and two bronze medals. At their recent rose show James M. Gilbert won the silver medal and J. A. Frank Neal and Miss Leta Gallup won the bronze medals.

The American Rose Society will have a full meeting at the Convention in Boston in August, and various matters of decided interest to every rose grower will be brought up. The Hubbard medal will be awarded during the Boston Convention, the winner being M. H. Walsh of Woods Hole, Mass., for the rose Excelsa, and John Cook of Baltimore, Md., received a silver medal for the rose Radiance, awarded at the Hartford Gardens.

In traveling over the country the past few weeks it appears that Rambler roses were never so prominently seen in all manner of places as during the present season, indicating that the use of roses for home decoration has increased wonderfully within recent years.

BENJAMIN HAMMOND, Sec'y.

ST. LOUIS FLORIST CLUB.

The Florist Club held a very interesting meeting on Thursday afternoon, July 9, with the largest attendance of the year. The trustees reported final settlement of the late banquet and also reported everything in readiness for the annual picnic. The club appropriated the usual amount for expenses. R. J. Windler, state vice-president of the S. A. F., reported that the fare to the Boston convention will be \$35 for the round trip from here to Chicago, thence to Boston on the "President's special" with the Chicago Florists' Club. The following members were nominated for the different offices: President, Jules Bourdet; vice-president, W. S. Wells; secretary, J. J. Beneke; treasurer, William C. Smith; trustees, William C. Young, Gust. Grossarts and W. A. Rowe. Other nominations can be made at the next meeting when the election will be held.

Quite a lengthy discussion arose as to holding of the meetings at night to which the out-of-town members greatly objected. The matter will be further discussed at the next meeting.

During the afternoon the trustees handed out cigars and all spent a pleasant few hours. The next meeting takes place August 13th.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The Sweet Pea Show, held at Horticultural Hall, Boston, on July 11 and 12 attracted a large crowd of admirers. In the general classes for sweet peas the prizes were awarded mostly to Mrs. W. B. Leeds, Charles Pfaff, Miss Fanny Foster and Mrs. Lester Leland. For the best decoration of sweet peas Penn the Florist was 1st and Boston Cut Flower Co., 2nd. There was quite a list of amateur classes which were creditably filled. R. & J. Farquhar & Co. made a grand display of herbaceous garden bloom which won for them a silver medal. Mrs. J. M. Sears was awarded a certificate of merit for a collection of superb delphiniums, and Mrs. Lester Leland a cultural certificate for achimenes. In addition to the foregoing there were displays of hardy flowers from Old Town Nurseries, Eastern Nurseries, Miss Cornelia Warren and others, H. T. roses from A. W. Preston, *Lilium Hansonii* and delphiniums from Wm. Whitman, Japan iris from T. C. Thurlow's Sons Co., gladioli from Mrs. Frederick Ayer, etc.

THE SEA TRIP FROM BALTIMORE TO BOSTON.

Richard Vincent, Jr., writes as follows concerning this interesting convention trip:

My Dear Sir—I think that the promise of a large party per ship from Baltimore to Boston will be fulfilled. We have a number booked from Baltimore and Washington is looming up with Gude in the lead. Our friends from Pittsburgh will be well represented, so altogether we expect to fill the ship. We leave Baltimore Friday evening, Aug. 14, at 6 P. M., and next morning, 6 A. M. at Newport News, from whence we will take the trolley to Old Point, taking lunch at the Hotel Chamberline, crossing later on to Ocean View, possibly Cape Henry and Virginia Beach, getting on our steamer again at Norfolk at 6 P. M., and arriving in Boston Monday morning, August 17. This is expected to be one of the best outings our people have ever had; at least, that is my aim.

NEWPORT SUMMER SHOW.

The Newport Horticultural Society and the Newport Garden Club are making active preparations for a joint show on August 13, 14 and 15 at Belcourt which is one of the estates of Mrs. O. H. P. Belmont. The location of this place is between Bellevue avenue and Ledge road near the famous Bailey's Beach. Most of the exhibits will be arranged about the lawn, but the more tender things such as greenhouse plants will be staged in the large court of the spacious mansion of Belcourt.

The schedule of exhibits, which will be ready soon, includes a large variety of horticultural products, with premiums which should bring out good competition from far and near. The committee of arrangements from the Horticultural Society also gives promise of a successful exhibition, as its member-

HOTEL NOTTINGHAM COPLEY SQUARE BOSTON

European Plan

Rates, \$1.00 a Day and up

Opposite Public Library, facing Trinity Church and convenient to Theatres and Shopping District

Three minutes' walk to the Mechanics Building; two minutes from N. Y., N. H. & H. R. R., Back Bay Station, and N. Y. C. & H. R. R.; B. & A. R. R., Trinity Place Station. All trains stop at these stations, and baggage can be checked to and from all stations. Electric cars pass the door for all railroad stations, steamboat landings, the suburbs, and direct to the Convention Garden. Make your reservations early.

FRANCIS HOWE, Proprietor.

ship includes President McKay, Secretary Gray, Oscar Schultz, A. S. Meikle, A. MacLellan, James Bond and J. B. Urquhart, along with live members of the Garden Club. The Garden Club is composed mostly of owners of the large Newport estates and who are enthusiastic in the advancement of horticulture.

J. R.

CLUB AND SOCIETY NOTES.

At the meeting last Monday evening, the choice of the Cincinnati Florists' Society for officers for the ensuing year was—President, Jas. Allen; vice-president, Max Rudolph; secretary, Alex Ostendarp; treasurer, Chas. H. Hoffmeister; Director, J. A. Peterson. On the first ballot James Allen and Ed. Schumann were tied, the latter then withdrew in the former's favor.

The monthly meeting of the New London Horticultural Society was held on the 9th inst. and was devoted to sweet peas of which there was a good display. Alfred Flowers gave a paper on the culture of sweet peas outside. The sweet peas are not so early around here this year as they have been other years, but those sown inside and planted out are doing fine.

H. L.

The Albany Florists' Club held their July meeting Thursday evening, July 2, at the home of Fred Goldring, a former president, at Font Grove. The club voted to hold its annual clam-bake at Newtonville on Saturday, Aug. 15. Fred A. Danker was named treasurer of the bake committee and R. D. Griffin chairman of the committee to secure carryalls. The club accepted the invitation of President Fred Henker to hold the next meeting at his place near Newtonville on Aug. 6.

Dates for the sixth annual fall flower show of the Pasadena Horticultural Association have been set. The event will be held October 22, 23 and 24. The place for holding the show has not been definitely settled on by the flower show committee. In all probability the display will be held in a big tent at the southeast corner of Colorado street and Los Robles avenue. Heretofore the fall shows have always been held at the Maryland hotel amphitheatre.

A HEDGE SCREEN OF MESAMBRYANTHEMUM.

A hedge composed of these tiny star-shaped pink blossoms, 20 feet in height and 1155 feet long, will extend for two city blocks on either side of the main entrance to the grounds of the Panama-Pacific International Exposition.

The manner of building this hedge is very ingenious. The plants are grown in boxes containing only two inches of soil, across the top of which wire screening is fixed to hold plants and soil in place. When the plants have reached a sufficient growth, the boxes are tilted upright, so that the roots are fixed in an absolutely vertical soil. A sort of wall is then builded of the boxes, much as though they were huge bricks or stones. The effect

is of a vertical cliff or hedge of living green and pink. The photograph shows the framework to which the boxes are secured, and the manner of constructing the hedge, but gives little idea of its beauty.

This wall of flowers will be broken at intervals by pilasters, with pedestal and capitals in architectural dimensions, which will also be covered with the same screen of living plants. A pipe running along the top of the framework will supply water to the plants in such a manner that they will have the appearance of being gemmed with dewdrops. Donald McLaren, acting director of exposition landscaping, is designer of this hedge.

Owing to the fact that the new hotel will be in course of construction this fall, it was decided at the meeting of the executive committee last night to hold the show at some other place. The schedule has been adopted by the committee and will be ready for the

public July 10. New classes have been added and no trouble will be spared in making the coming show the largest and most successful that has ever been held in Southern California. Chrysanthemums and dahlias will undoubtedly be the center of attraction.

HARDY DECIDUOUS RHODODENDRONS.

Extract from Bulletin No. 58 of the Arnold Arboretum.

Six of the species of Rhododendrons with deciduous leaves (Azalea) of eastern North America are well established in the Arboretum, and no group of plants perfectly suited to our climate surpasses them in beauty. The first of these plants to bloom, *R. vaseyi*, opens its small pink flowers early in May before the leaves appear. This azalea is an inhabitant of a few of the high valleys of the Blue Ridge in North and South Carolina and had been entirely overlooked until some thirty years ago. It is a plant of loose irregular habit, sometimes growing to the height of fifteen or eighteen feet, although in cultivation it begins to flower when less than a foot high. It is perfectly hardy, and the pure perfect pink of its flowers is hardly equalled by that of the flowers of any other plant. There is a form of this azalea with white flowers. It grows best in rather moist soil in the neighborhood of water, and single individuals generally look better than the large masses sometimes seen in public parks.

Not much later two other pink-flowered species are in bloom, *R. canescens* and *R. nudiflorum*; the former is a more northern and the latter a more southern species, although the two often grow in the same locality. Both produce pale rose or pink flowers of various shades which appear before the leaves or just as they begin to unfold, and their general appearance is very similar. These plants grow singly or in great masses on treeless hillsides or in open woods. *R. canescens* is very abundant in some parts of Worcester County, Massachusetts, and the bundles of branches covered with pink flowers which excursionists on the northern railroads bring into Boston in May are of this species. These two Azaleas take kindly to cultivation and thrive in good soil in either shady or open situations.

The next of these Azaleas to flower is the yellow Azalea of the Appalachian Mountain slopes, *R. calendulaceum*. The beauty of the brilliant flowers is heightened by contrast with the dark green leaves which are well grown before the flowers open; these vary from bright yellow to orange or shades of red and are not surpassed in brilliancy by those of any other Azalea now in cultivation. *R. calendulaceum* is a slow-growing but long-lived plant, and in time will reach a height of eight or ten feet. There is a large mass of these plants in the Arboretum, showing the variations in the color of the flowers and a number of individuals are scattered in border-plantations along the different roads. The flowers of the yellow Azalea are soon followed by those of another inhabitant of the glades of the Appalachian Mountains from Pennsylvania to Georgia, *R. arborescens*. This is a tall shrub with large, pure white, very fragrant flowers, the beauty of which is increased by the bright scarlet color of the long filaments of the stamens and of the style. The pale leaves of this plant are fully grown before the flowers open. The last of these Azaleas to bloom (*R. viscosum*) will not be in flower for several weeks. It is a com-

mon inhabitant of low wet ground in the eastern part of the country, and is popularly known as the Swamp Honey-suckle. The small white flowers continue to open during many weeks and their fragrance, which is greater than that of the other Azaleas, makes known their presence especially in the evening, from a long distance.

Seedlings of two other American species have been raised at the Arboretum, but it is too soon to judge of their value as garden plants. They are *R. austrinum*, with slender pale pink flowers appearing before the leaves, a native of the valley of the Apalachicola river in Western Florida, and *R. candidum*, from Southern Georgia, with white or pale pink flowers appearing after the leaves. There is another Azalea to introduce into the gardens. This a native of central Georgia where, in some localities, it is very abundant in open woods. Discovered by Michaux, the French botanist, more than a century ago and confounded by him and all later authors with *R. calendulaceum*, it has been called the variety *flammeum* of that species. From *R. calendulaceum*, however, this plant, which should be called *R. flammecum*, differs in its winter-buds, in the size and shape of the flowers and in the fact that the flowers open before the leaves. The flowers on different plants vary from yellow to deep orange and to scarlet; and the flowers of no other Azalea compare in brilliancy with some of the deep-colored forms of this Georgia plant, which it is reasonable to hope may prove hardy here as several plants from the same general region are well established in the Arboretum. The beautiful, white-flowered Azalea (*R. occidentale*) from the borders of streams on the western slopes of the Cascade and Sierra Nevada Mountains of the west has not yet proved hardy here probably because just the right place has not been found for it.

These native Azaleas are handsomer, hardier, and in every way more satisfactory than the so-called Ghent Azaleas which are hybrids of some of our species with the Caucasian yellow-flowered Azalea (*R. flavum* or *Azalea pontica*). This plant is not hardy here, and its influence on the Ghent hybrids has been unfortunate so far as this country is concerned. Many of these hybrids are beautiful flowering plants; some are quite hardy but most of them show evidence of a poor constitution; they grow slowly and suffer in severe winters, and none of them have the vigor of their American parents. These Ghent hybrids are raised by grafting in great quantities in European nurseries and many of them come to this country. It is impossible, however, to obtain the native plants in large quantities. Occasionally plants collected from the woods are offered for sale, but these collected plants are always less desirable than nursery-raised seedlings which are rarely to be found; and the American nurseryman who will take up the raising of seedling American Azaleas on a large scale will confer a benefit on American gardens.

Leonard Barron tells us that *Lilium myriophyllum* does splendidly at Garden City, N. Y., where the soil is decidedly unfavorable for lily growing

Mignonette BODDINGTON'S MAJESTY

THE finest of all the Fancy Varieties of Mignonette for Winter forcing; seed saved from select spikes under glass. We have received many testimonials with regard to the excellence of this variety.

Trade Packet 60 cts., 1/8 ounce
\$1.00, ounce \$7.50.

HYDRANGEA OTAKSA

EXTRA LARGE SPECIMENS FOR JULY AND AUGUST FLOWERING

We have some of the largest, finest, and most perfect specimens of hydrangeas in half barrels that we have ever seen. Plants are just coming into bloom, and are beautiful symmetrical specimens covered with bloom, each plant having from one hundred to two hundred flowers. We have over three hundred of these fine plants in shape for immediate shipment, and every plant is a perfect specimen. There is nothing so magnificent for summer decoration as these large hydrangeas. They are very showy.

\$7.50, \$10.00 and \$15.00 each—according to size and number of blooms.

WINTER-FLOWERING ROSES

If you have not secured all the stock that you can use for planting for winter-flowering, we still have a very fine stock of the following varieties, which we can offer in perfect condition, ready for immediate shipment. Stock is gilt-edged in every way—extra strong, heavy plants from 4-inch pots. If you can use any, we will be glad to quote low rates. Write us the number you can use, and we will quote by return mail.

KILLARNEY Brilliant, Killarney Queen, Pink Killar-

ney, American Beauty, Lady Hillingdon, Richmond, Mrs. Chas. Russell, Mme. Cecile Brunner, or Mignon, or Sweetheart.

FERNS

There is nothing better for summer use than the fine varieties of NEPHROLEPIS. We offer a nice stock of the following varieties, well established plants ready for immediate shipment.

Nephrolepis elegantissima (The Tarrytown Fern), 3½ inch, 25c. each; 6-inch, 50c. each; 8-inch, \$1.00 each.

Nephrolepis magnifica, 3½ inch, 25c. each.

Nephrolepis muscosa, 3½-inch, 25c. each; 5-inch, 50c. each.

Nephrolepis Harrisii, 6-inch, 50c. each; 12-inch—very large plants, \$5.00 each.

Nephrolepis Bostoniensis, 6-inch, 50c. each; 12-inch—very large plants, \$5.00 each.

Pteris Wimsettii multiceps—a fine hardy fern—3½-inch, 15c. each.

Small Ferns for Fern Pans. A fine assortment. 2½-inch, \$4.00 per 100.

CHEAP GARDENERS AND WHY.

Dear Editor:

In reading the essay on The Reason for Cheap Gardeners, written by an assistant, one can't help but realize that the author seems to think that even after fifteen years' experience an assistant isn't necessarily competent. Would that man ever be competent? We realize that in all branches of work there are men who never prove themselves a credit to their avocation. Where is the man who has spent a life time at gardening that can sit back and say—I know it all? There is the monotony that dulls and deadens and to start something is the only relief.

Surely after serving a fifteen years' apprenticeship an assistant must be worthy enough to strike out for himself. The only way to test the matter is to make a beginning; to start. An extract from Stevenson that may fire our worthy friend with a little more ambition is this: "For God's sake give me the young man with brains enough to make a fool of himself." He wanted to see in the world young men with brains enough to start something, to make an essay of their powers. Most of our great men have made false starts and have been derided for their pains but in every case they have had sense enough to see their mistakes and profit by them. Rather than blame the assistants for the existing conditions why not look the matter straight in the face and lay the blame in its proper quarters—namely, your competent gardeners and your so-called Horticultural Societies.

We hear men shout, "have the interest of your profession at heart." They seem to lose sight of the fact that for an employer to have the interest of any thing at heart, he must also have the interest of his employees somewhere in that neighborhood. Who but your discredited assistant is to carry on the work of your competent gardeners of the present day after they have added their little page to history? For some of our so-called horticultural societies a more fitting name would be a monthly smoker. On visiting a few of them the fact is forced upon one that they are little more than a mere meeting-place for the exchange of the latest stories and the same are not always pertaining to gardening. On most occasions there are a few exhibits. Mr. so-and-so is awarded a culture certificate for such a plant. On being asked to tell the members what he has done to raise the plant to that stage of

perfection, he will give you a heart breaker like this: "Oh I don't know that I have given it any special treatment, watered when it needed it, gave it a bit of fertilizer now and again, etc." A lot of encouragement to the assistant who has been looking after that plant with all the care and attention he possessed, very often in his own time, with the hope of getting something worth looking at. If your present day gardeners have gained success in this slipshod manner what is to hinder the assistant from accomplishing the same ends? Arnold Bennett spoke wisely when he said "You cannot gain anything by merely thinking about it, for after the necessary period of consideration, of incubation, as it were, a start must be made."

ANOTHER ASSISTANT.

THE GARDENER AND COMPETITION.

Friend Millar, as it seems to me,
You fearing competition—
Will find yourself on Union scheme,
Up-building class partitions.

In gardening, that would never pay,
Just proving an obstruction;
Nature points out a better way
Which needs no introduction.

The facts are fairly brought to view
By our new friend "Assistant."
That merit wins; forever true
If only we're persistent.

Let's not compete with men below.
In either rank or station;
To those above us, let's bestow—
Aid to up-build the nation.

Each man a place, each in his place—
Respecting one another;
For poverty is no disgrace.
And each man is our brother.

ALEXANDER MACLELLAN.

July 11, 1914.

C. S. HARRISON'S PEONY MANUAL.

C. S. Harrison of York, Nebraska, has a new finely illustrated and up-to-date edition of his Peony Manual ready for the press. We have seen some samples of the illustrations and they are excellent. The two previous editions of the Manual—5,000 copies—are now exhausted. Mr. Harrison informs us that the old price—25 cents in stamps with 50 per cent off by the 100 to the trade will be adhered to.

NEW YORK CITY

PRINCESS. 20—The New Upright Pansy

This strain is entirely distinct from all others. It is absolutely compact, upright growing, and extremely weather-proof, enduring many storms without damage to its flower. The flowers are mostly blotched and frilled like the Masterpiece, of good form and heavy velvety texture, on heavy stems carried well above the foliage. Attractive by the brilliancy of its colors.

500 seeds, 25c; 1000, 50c; 1/4 oz., \$2.50; 1 oz., \$10.00.

- 33 Bronze—Brown and copper shades mixed.
- 36 Fancy Rich colors, mostly margined.
- 38 Mme. Perret—Red and wine shades.
- 40 Zebra—Fine striped mixture.
- 42 Adonis—Light blue, white center.
- 44 Black—Almost coal black.
- 46 Black with bronze center.
- 48 Lord Beaconsfield—Purple shaded white.
- 50 Bronze—Beautiful bronze.
- 52 Bronze with yellow center.
- 54 Velvet Brown with yellow center.
- 56 Havana Brown.
- 58 Havana Brown with yellow center.
- 60 Cardinal—Curled, bright red, dark blotch.
- 62 Cecily—Steel blue, margined white.
- 64 Goliath—Large curled yellow blotched.
- 66 Hero—Curled, deep blue shaded white.

The KENILWORTH Giant Pansy

seeds are all grown by myself and are offered in the following mixtures and separate colors.

- 22 **KENILWORTH STRAIN**—The flower of perfect form and substance; many of the immense flowers are fringed with blotches; it is a striking collection of beautiful colors and markings, rich with shades of red, brown, bronze, mahogany and many others too numerous to mention. Light, Medium or Dark Mixtures.
- 24 **KENILWORTH SHOW**—An extra fine strain of large flowers; the immense flowers are of circular form and great substance; a beautiful collection of colors and markings.
- 26 **KENILWORTH CUT FLOWER MIXTURE**—Is a distinct class by itself, surpassing all other strains as a cut flower or for exhibition purposes, for inside or outside growing; the large flowers are carried erect above the foliage on heavy stems, 7 or 8 inches long, in the most graceful manner, and stand the hot, dry weather well.
- 28 **MASTERPIECE**—A remarkable type; the curled, wavy petals giving the flower a double appearance, large flowers of great substance, on long, strong stem.
- 30 **GIANT THREE AND FIVE BLOTCHED PANSIES**—A superb mixture. Flowers large and of circular form and of great substance. The display of coloring is unsurpassed. A combination of almost every shade of rich velvety colors, reds are particularly conspicuous; the petals being distinctly marked with three or five large dark blotches.

NEW SEED NOW READY.

All sorts and mixtures, except the new Pansy Princess, are \$5.00 per oz., \$1.25 per 1/4-oz.; 5000 seeds, \$1.00; trade packet of 1000 seeds, 25 cents; any 5 pkts., \$1.00. Please order by number.

- | | |
|---|---|
| 68—Emp. William—Ultramarine blue, violet eye. | 118—Psyche—Curled white, five blotches. |

Chas. Frost
Kenilworth,
N. J.

PHILADELPHIA NOTES.

Philadelphia was represented in the Lancaster County Florists' Club picnic at Mt. Gretna on the 16th inst., by Messrs. Pennock, Liggett, Watson, Meehan, Connor and others. It is some compliment to a provincial club when it can show virility and class enough to attract the presence of metropolitans at its gatherings. A lot of work goes before that condition is reached, and it also speaks eloquently of the personnel of the officers, both past and present.

We had two distinguished visitors in our midst last week, John K. M. L. Farquhar of Boston, ex-president of the S. A. F.; and Thomas Roland of Nahant, Mass., one of the champion growers of this generation. Mr. Farquhar came to see the Burpee sweet pea trials at Fordhook. Mr. Roland came to see his old friend Robert Craig and his great plant growing establishments at Philadelphia and Norwood. Both gentlemen had a busy two days and were whirled around by train and auto in the most approved, modern and express style. On Friday evening the party of eight were the guests of Louis Boss, a famous Philadelphia lawyer, at the

magnificent new building of the Manufacturers' Club. When great men came to town in the past the Union League used to be the *Ultima Thule*. But it takes a back seat now to the Manufacturers', the last word in clubdom. Howard M. Earl and George W. Kerr did the honors for Mr. Burpee who is at present in Europe. John Westcott and others were on hand to represent the general horticultural interests of the city. We all tried to show the visitors how glad we were to see them and our only regret is that they could not stay with us a little longer.

Visitors—Albert Merwarth, Easton, Pa.; George M. Bassett, Hammononton, N. J.; Frank Yeatman and Jos. Way, Kennett Square, Pa.; P. De Muth, Conellsville, Pa.

OBITUARY.

Benjamin Durfee.

Benjamin Durfee of Washington, D. C., died July 12 at the summer home of his niece, Miss Lillian A. Dexter, on Great Neck, Marion, Mass., aged 67 years. He had been ill for some time as the result of a shock.

Mr. Durfee was statistical clerk of the U. S. Senate for many years. In addition to his official position, he conducted an extensive florist establishment in Washington, and during the early years of the Society of American Florists was an active and influential member of that body, serving on the executive committee in 1893-'94-'95. He leaves a widow and three daughters and a sister, Mrs. Susan G. Dexter of New Bedford, Mass.

Boddington's Gigantic Pansies

Can be produced only from the giant strains. Our **CHALLENGE PANSY** seed contains only the giant self-colors, the giant striped and variegated and the giant blotched, etc., all carefully mixed in proportion. You could not buy better seed if you paid \$100 per ounce. Our Challenge Pansy seed during the past season gave unprecedented satisfaction and every order booked last year was duplicated and increased this year. All the testimonials received mentioned specially the big grade of flowers, color, form and size of the individual blossoms. This year, by adding improved types, intending customers can absolutely rely on a duplication of this season's success with increased satisfaction. Our "mark" for this strain is "Challenge," and it is all the word denotes.

Pansy—Boddington's "Challenge"—All Giants

This mixture contains all the finest Giant strains of the leading Pansy Specialists in the world, the Giant self colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion the finest that money can buy the finest your money can buy. A florist who has grown it said: "Why don't you call it Defiance?"

1/2 trade pkt. 25 cts., trade pkt. 50 cts., 1/8 oz. 75 cts.,
1/4 oz. \$1.50, 1/2 oz., \$2.75, oz. \$5.00.

1914 NOVELTY PANSY SIM'S GOLD MEDAL MIXTURE

Was awarded the First Prize and Gold Medal at the International Horticultural Exhibition, held at the Grand Central Palace, New York City, April, 1913. This splendid mixture is the result of years of painstaking selecting on the part of Mr. William Sim (renowned for Sweet Peas), Cliffondale, Mass., and we are offering seed from the originator for the first time. Trade pkt. 75 cts., 3 pkts. for \$2.00, 1/8 oz. \$3.50.

Boddington's Quality "English" Pansy

A superb strain of highly-colored flowers in great variety and immense size.

Our Mr. Bunyard, while visiting the Royal International Exhibition in London, was much impressed with these blooms, and strongly recommends this mixture to florists.

Trade pkt. (500 seeds), \$1.00; 1/2 trade pkt. (250 seeds), 50c.

PUBLICATION RECEIVED.

Commercial Sweet Pea Culture, by A. C. Zvolanek, Lompoc, Cal.—This 50-page pamphlet is likely to be in large request and it is the last word on modern sweet pea culture "by the originator of every winter-flowering

sweet pea in commerce." How to grow sweet peas successfully in greenhouse and outdoors, how to pick, keep and ship the flowers, are topics fully covered. A complete history of the origin and development of the new race is given and a number of portraits of new sorts are included.

Conshohocken, Pa.—Willis J. Baldwin has purchased the business of Winfield S. Harry, and rented the store and greenhouses, which he will continue to operate. W. S. Harry has been in the business for 50 years—not only as a florist, but has also done a large seed business.

SEED TRADE

Those Foreign Seed Purchases.

The widely disseminated news of the 44-ton purchase from Kelway & Son, Langport, England, by the U. S. Department of Agriculture for free distribution, has been the occasion of considerable comment and the expression of varying views by the trade and by the newspapers and magazines throughout this country. We clip the following from the Albany Journal as showing that the explanation given for the Department's course is regarded as lacking frankness and needed detail:

"Naturally curious to know why the Government of the United States so greatly favors foreign producers of seeds, this newspaper addressed a letter to Secretary Houston of the Department of Agriculture, quoting the essential facts from the above article and making this request:

"Will you kindly inform us whether it is necessary to favor foreign firms, whether it is impossible to purchase these seeds in the United States; or otherwise, why the purchases are made abroad?"

In reply to that communication Acting Secretary Galloway says:

"In placing its orders, the Department has always followed the policy of favoring American growers so far as is consistent with good business practice. Many kinds of vegetable and flower seeds are produced almost exclusively in Europe, and where such seeds are involved our purchases are made with a view to serving the best interests of the Department."

Answer to the question whether, these seeds, that is, the forty-four tons bought from Kelway & Son, and the unspecified quantities purchased from other European firms, could not be purchased in the United States, is omitted.

Only the information is vouchsafed that, many kinds of such seeds are produced almost exclusively in Europe; that American growers are favored so far as is consistent with good business practice, and that when seeds produced almost exclusively in Europe, are involved, purchases are made with a view to serving the best interests of the department.

There might be difference of opinion as to the quality of the good business practice with which the favoring of American producers is consistent only to a point beyond which 88,000 pounds of seeds--and other quantities not made publicly known thus far--remain to be purchased in foreign countries. There will be those who will contend that the purchase of every pound

of seed in the United States would be the best business practice.

That purchases are made, when certain kinds of seeds are involved, with a view to serving the best interests of the Department, is vague information.

The acting secretary could have answered the questions directly, plainly and fully, with half the words that he used to give a partly evasive reply. But perhaps the view is taken in Secretary Houston's department that the public is not entitled to be informed exactly why foreign producers are so largely favored when seeds are bought for free distribution in the United States."

Forcing Bulbs in Fiber.

A. T. Boddington of New York is encouraging his customers to grow bulbs in the house in fiber instead of soil. With this end in view he has offered in his catalogue special collections for this purpose and prizes--five in all--from \$10 down to \$2 for photographs of bulbs grown and flowered in fiber. The winning photographs in last season's contest show some very successful entries and they will appear in the 1914 Fall Garden Guide, published about September 1.

Washington, D. C.—Placards illus-
trated with the figure of a woman in
airy costume holding a horn-of-plenty
from which coins are dropping, done in
colors, and bearing the words "Tues-
day Opportunity," are being distributed
among the stores by the Washington
Star in a campaign to extend Monday's
bargains into the following day. Near-
ly all the florists are using these pla-
cards in their windows, featuring some
one variety of flowers, plants or jar-
dinieres, and are finding that these are
bringing results. Of course the cam-
paign is being given considerable pub-
licity in the columns of this newspaper
and the placards are also being re-
printed therein.

During Recess

Knoxville (Tenn.) Florists' Society.

The first annual picnic of the Knoxville Florists' Society, which was held at Clinch River Station, 42 miles north of Knoxville, on July 9th, was a grand success. All the florists, their families, employees and invited guests were present. Two special cars were attached to the regular train. The en-

1st; W. R. Ryno 2d; C. W. Crouch, 3d. Target shooting for ladies, prizes donated by Reed & Keller, New York and Rice Company, Philadelphia, won by Mrs. K. P. Baum, 1st, Miss Margaret Todd, 2d. Longest jump for children, prizes donated by Kuhlmanns, Knoxville and D. A. Rosenthal, Knoxville, won by Nadine Angus, 1st, and Martha Howell, 2d. Shooting contest, prize donated by Hope Bros, Knoxville, won by John McMillan. Ladies' pot-break-

tire forenoon was taken up by the different contests which were as follows:

Three-legged race, prize donated by A. L. Randall Co., Chicago, won by Herbert Johnson and Lum Reeder. Tailing the donkey, for ladies, prizes donated by H. Bayersdorfer & Co., Philadelphia, Pa., won by Mrs. A. H. Bailey, 1st; Miss Lola Harrison, 2d. Driving contest, prize donated by Poehlmann

ing contest, prize donated by Wertheimer Bros., New York, won by Mrs. K. P. Baum.

After dinner was over, everyone put on their bathing suits and made for the river, where there was enough boats for all who cared to go rowing and pearl hunting, and several small pearls were found. The day was wound up with a watermelon-eating

PLANTSMEN

TARRYTOWN ON HUDSON, - N. Y.

Member of Florists' Telegraph Delivery

is not alone for the members, but all florists and their families. No charge is made; the Florists' Club pays all expenses. It is to be hoped that all florists will close up half a day and give their employees a half holiday. The wholesalers always do and some of the retailers. Let's hope they all do this year.

Florists' Club of Washington.

The July meeting was held in connection with a garden party at the home of Mr. and Mrs. W. F. Gude. In all more than three hundred people were present, including a party of florists from Baltimore. The grounds were brilliantly lighted and in a number of arbors refreshments were served, while another summer house was utilized as a stage.

The program started with music by the Kallipolis Grotto Band. This was followed by a lecture on "A Trip Through Scotland—The Land of Burns," by Richard Vincent, Jr., of White Marsh, Md. He also spoke of the late William R. Smith and of the memorial that it is proposed to erect in his memory. Mr. Vincent's account of his trip through "The Land of Burns" was a most interesting one and was well illustrated by lantern slides. After the lecture Charles A. Stevens, who acted as master of ceremonies, announced that the Florists' Glee Club

would furnish the next numbers and a group of young men then took the stage. The entire sketch consisted of "hits" on the persons present, and all of the more prominent guests came in for their share of the raillery. When the program had been completed the young folks availed themselves of an opportunity for dancing in the spacious parlors. It was a late hour before the guests bade their host and hostess good-night.

Cincinnati Florists.

The Florists' Society Outing at the Lagoon was a well attended and successful affair. The winners of the races and contests were as follows:

Girls' Foot Race, 10 years; 1st, Agnes Deller; 2nd, Katherine Murphy. Misses' Foot Race, 16 years; 1st, Helen Fitch; 2nd, Miss Carmichael. Ladies' Foot Race; 1st, Mrs. Story; 2nd, Miss Miller. Boys' Foot Race, 7 years; 1st, F. Dellar, Jr.; 2nd, C. E. Critchell, Jr. Boys' Foot Race 10 years; 1st, C. Stoechel; 2nd, C. Meyers. Boys' Foot Race, 16 years; 1st, S. Allen; 2nd, A. Stefan. Men's Foot Race; 1st, Nick Weber, Jr.; 2nd, Ben George, Jr. Tug of War, won by Growers, Wm. Murphy (Capt.). Ladies' Base Ball Throwing; 1st, Mrs. Story; 2nd, Miss Ross. Half Mile Run; 1st, A. Riedel; 2nd, Chas. Windram; 3rd, Harry Mechstroch. Boat Race; 1st, Chas. Windram; 2nd, Gus Crow.

Some very fine moving pictures of the affairs are being shown at Keith's this week.

Cook County (Ill.) Florists' Association.

The Cook Co. Florists' Association substituted a boat ride to Michigan City, Ind., on Sunday, for the usual summer picnic in the suburbs. The day was very warm and the lake breezes tempted nearly one hundred to make the trip. Nothing marred the day, unless possibly that the great crowd which the large boat carried, prevented members of the club from visiting with each other.

Motored From New York to Washington.

A happy party consisting of J. K. Allen, New York City, A. V. D. Snyder, Ridgewood, N. J., Wm. Thurston, Paterson, N. J., and J. H. Van Moter took an auto trip last week as far as Washington, stopping at Philadelphia, Baltimore and Atlantic City. The trip consumed five days and the excursionists consumed everything within reach in the line of feed.

Newark Florists.

The Essex County (N. J.) Florists' Club will have an outing on August 5 at Hilton, N. Y. This young organization already has a membership of 65 with Ed. Jacobi as president.

The annual picnic of the Kentucky Society of Florists took place at Stower's Grove, Tuesday, July 14.

CHICAGO NOTES.

D. F. Simonds, proprietor of The Ogden Floral Co., has just returned from a fishing trip in northern Wisconsin. He says all that he caught was a cold.

Everett D. Peacock has the contract for the landscape work, including sewage, etc., on the eight acres of Portage Park, to be improved this year. Work began last week and Chicago will soon have one more beauty spot in its small park system.

Vacations are the chief order of business among employees now and mid-summer trade is at its usual slow pace. The friendly checker board is a familiar sight at the wholesalers', but the retail store man is without that consolation. There is, however a large variety of material with which to make his windows attractive and plenty of passers-by to make note of it.

The new rose Ophelia, brought from England by E. G. Hill two years ago, is now being cut by F. J. Benthey at his place at Newcastle, Ind., and sold here by Zech & Mann. It is just now of a very delicate pink, deeper in the center, after the order of Bulgarie, and although so far only comparatively short stems can be cut, the rose shows great promise. With the deeper shade and longer stems that will come with the advanced season and the good keeping qualities already shown there is no doubt as to the future popularity of Ophelia.

The thousands of visitors now pouring into the country recently taken over by the state of Illinois for a park, are beginning to realize the wisdom of securing Starved Rock, as its chief attraction is called, from commercialized destruction. Starved Rock, upon whose level top, 150 feet above the Illinois river, the last of the Illini tribe of Indians met their fate, is a natural fortress, formerly called Fort St. Louis. It was discovered by Marquette and Joliet in 1673 and fortified by Tonti

Flower Market Reports

BOSTON

There is very little activity thus far in the summer shipping trade, although the time has come for it to materialize. The worst handicap on the wholesale market at present is the glut of small roses which are considered well sold at 35 cents a hundred. Carnations are poor generally and sell very low although the receipts of asters are still very light. Cattleyas are moved with difficulty at unheard-of low figures.

BUFFALO

This market passed through a very quiet week and things have not improved much over last report. The supply of roses is still heavy and the flowers come in in open condition. Sales are very slow and high prices are out of the question. The Mock rose has met with good sales and it carries for shipping much better than other varieties at this time. Carnations are poorer each day though a few good whites and Enchantress are still had. Some gladioli in the varieties Pink Beauty and America have sold well.

CHICAGO

Asters are appearing in large numbers each week and will soon make themselves an important part of the summer offerings. Stems are shorter than usual and unless there is sufficient rain very soon, aster growers will lose their crop. Outdoor gladioli are now out-numbering the greenhouse grown with the trio of favorites still the bulk of the stock. Quality is excellent and the stock as a whole looks much better than later when the collections of off-colored gladioli always make their appearance. Roses are far more plentiful than can be used to advantage and short ones sell more by the jar than by count. Mrs. Russell at Poehlmann's is the queen of the new roses to date. With stems three feet long it is not hard to sell all in sight for 20c. each. Ophelia adds another new rose and mention is made on another page. Beauties continue in good crop, but demand is slow. Shipping trade is limited, but a fair proportion of the best stock is used up in this way and the rest is needed for local sales. Carnations are mostly small and do not count heavily in total sales. Miscellaneous summer stock includes a large variety of cheap flowers, sold at any price.

CINCINNATI

The supply in the market this week is heavier than at the time of the last report while the demand has been about the same as before. Only the best stock is taken up by the buyers. Quite a bit of it finds its way to the ash barrel. Roses are the biggest losers in this respect. The Killarneys open so quickly that they are very nearly unsalable except in limited amounts at lowest prices. Other roses fare better but can be had only in limited quantities. American Beauties are in good supply and prove good property. A few more good gladioli are now coming in. These find a ready sale, while the poorer grades hardly have a call. The cut of lilies is large and fully able to take care of all calls. The first asters have made their appearance. Lily of the valley are conspicuous for their absence.

GLADIOLI

Large, well flowered spikes, stock grown especially for the flower trade, plenty of American and King, also a good assortment of other colors. We can take care of any sized orders as we are receiving large deliveries.

\$5.00 per 100, \$40.00 per 1000. In lots of 200 or more, our selection as to variety, \$3.00 per 100.

VALLEY, Special \$4.00 per 100. Extra \$3.00 per 100.

CATTLEYS, \$6.00 per doz., a few extra large at \$7.50 per doz.

EVERYTHING IN RIBBONS. We carry one of the largest and most varied stocks in the country. If you have not received one of our new catalogues, advise us and we will mail you one at once.

During July and August we close at 5 P. M.

New green galax and leucothoe are in the market.

NEW YORK The flower market shows very small improvement this week.

There is a tremendous influx of small roses from young stock which it does not pay the growers to pack and transport nor the wholesalers to offer for sale. Very few carnations are in sight. There are big receipts of lilies, both longiflorum and rubrum. Gladioli are rapidly increasing. Cattleyas seem less abundant but there is little outlet for them at present. A fair number of asters are received. Asparagus plumosus from the south is still being received from southern growers. Asparagus Sprengeri has seemingly lost its hold on the market and is reported as practically unsalable.

PHILADELPHIA "About as usual for the season"

is the remark we hear in regard to business conditions. Buying and selling is at a low ebb but not abnormally so. Asters are coming in good and are more plentiful; but so far not quite enough of high-grade

stock for the demand. The gladiolus crop which has been rather backward is now much more in evidence, and there is ready demand. These are not only very showy but they are also good shippers and keepers. America is the leader so far. Roses are holding their own fairly well but the decline in carnations is very rapid. The sweet pea situation is not as brilliant as it was. The quality is none too good and the quantity is also curtailed. The best stock at present is coming from northern points. These are longer stemmed and have better substance than the locals. Plenty of lilies but no oversupply. The snapdragon is still to be seen but they are outdoor stock—short and do not ship well.

ST. LOUIS The cut flower market has not changed any from last week. The stock coming in clearly shows the effect of the great heat of the past six weeks with only a little shower or two. The water supply of some of our county growers is running low and the stock in the fields suffers greatly. There are

Flower Market Reports

(Continued from page 85)

plenty of roses and carnations coming in, but comparatively little that could be called fancy. Asters and peas are somewhat scarce. Good gladioli, lily of the valley and lilies have an excellent demand. Some extra good Shasta daisies are on sale each morning. Prices on all stock is low.

As usual at this time of the year, business is quiet.

The growers, however, are a little busier trying to get their stock in the pink of perfection. There is also some little remodeling going on to bring the houses into shape for the coming year. Gladioli are much more plentiful and meeting with a fair sale. Good roses sell well but are not in great supply. Asters at \$1 and \$2, are proving a welcome addition to the market's offering. Shipments of Eastern-grown American Beauties are being received and these are moving quite well, medium grades bringing \$2, with the better qualities selling at up to \$3 per dozen. Orchids are none too plentiful although the demand for these is but fitful and those that are to be had are sold at \$6 per dozen. Killarney roses from the north are also in better demand.

PERSONAL.

Otto Heineken, New York, sails for Europe on the Imperator, July 18.

A. Leuthy, of Roslindale, Mass., sailed from New York on the France, July 15, for Havre.

Mrs. Leonard Barron of Garden City, N. Y., sailed on the steamship New York, for England, on Friday, July 17.

Peter Reinberg was one of a party of Chicago school board officials sailing from New York last Saturday on the Lusitania.

W. C. Langbridge of Cambridge, N. Y., is enjoying the lake breezes in his new bungalow at Cleverdale, Lake George, N. Y.

Prof. R. R. Root, Urbana, Ill., and Prof. H. B. Dornier of the same place sailed on the Arabic from Boston for Europe on July 14.

Edward Thorne, head grower at the Westboro State Hospital, Westboro, Mass., for the last twenty-two years, has resigned and will enter into business for himself.

Frank Barnard, gardener at Smith College has accepted a position with the A. N. Pierson Company of Cromwell, Conn. Mr. Barnard was with the St. George Nursery Company in West London 18 years, and has been at Smith College several years. He has had charge of the greenhouses and has assisted in the practical work of the classes in horticulture.

W. C. Ward of E. Milton, Mass., is back and into the harness again after a year's vacation, six months of which were spent on the Gulf coast of Florida, and four months in the pine woods of Maine, where he has a summer camp. On the return trip he made a stop at Brunswick, Me., to visit Thomas Pegler, formerly of Boston, whom he found in improved health and with an encouraging condition of business.

New York City.—The United Cut Flower Company, organized by a number of the Greek florists, will open a wholesale cut flower establishment about August 1, at 111 West 28th street.

NEW YORK FLOWER SHOW, 1915.

The preliminary schedule of the International Flower Show to be held in the New Grand Central Palace, March 17 to 23, 1915, under the auspices of the Horticultural Society of New York and the New York Florists' Club, has been issued.

The prize list is divided into twenty-four sections which we shall now but briefly mention as complete copies may be had upon request from Secretary John Young, 53 West 28th street by all who are interested.

Section A is devoted to plants in flower by private growers. It includes all flowering plants such as azaleas, amaryllis, begonias, bougainvilleas, cinerarias, cyclamen, ericas, hydrangeas, lilacs, etc., in numbers as specified, the grand class being 1st prize \$150 and second prize \$100 for group arranged for effect, covering 200 sq. ft.

Section B is quite similar, but for commercial growers only, with the addition of a class for collection of acacias, 1st prize \$200, 2nd prize \$100; collection of hydrangeas, 1st prize \$100, 2nd, \$50; and collection of rhododendrons, 1st, \$100; 2nd, \$50. Section C covers palms and foliage plants for private growers and Section D for commercial growers in various sized groups, bays, boxes, and conifers being included under Section D. Sec. E is a bay tree class for private growers and Sec. F ferns for private growers. Sec. G is for ferns by commercial growers.

Section H and I are devoted to bulbous plants by private and commercial growers respectively and there is a special class for display arranged as a Dutch garden, by dealers and seedsmen, 1st prize \$200, 2nd prize \$100. Section J for private growers and Section K for private growers are devoted to orchid specimens and groups and are quite lengthy, liberal provision being made in each case for groups arranged for effect. Sections L and M are for tables of cut orchids arranged for effect, private and commercial, respectively, large prizes in each instance.

Section N and O are for roses in pots and tubs, private and commercial respectively. In the private classes, 1st prize \$100 and 2nd prize \$50 are offered for display, all classes, covering 100 sq. ft. In the commercial section the premier class is for artistic display arranged as a rose garden, 500 sq. ft., 1st prize \$300, 2nd prize \$200, and a silver medal is offered for best new rose not in commerce.

Sections P and Q are lengthy and include classes for cut roses, private and commercial, respectively. In the latter there is a 1st prize of \$100, and 2nd prize of \$75 for 100 blooms of American Beauty; also 1st and 2nd, \$75 and \$50, respectively, for 100

blooms of Killarney Queen. For display of cut roses covering 200 sq. ft. there are 1st, 2nd and 3rd prizes, \$200, \$150 and \$100, respectively.

Sections R and S are for carnations by private and commercial growers, respectively, open to all varieties, seedlings and sports. A silver medal is offered for 50 blooms of new variety not in commerce.

Section T is for vase of carnations, by private growers, artistically arranged with any accessories, and for display of carnations by commercial growers, arranged for effect, the latter carrying 1st, 2nd and 3rd prizes, \$200, \$100 and \$50.

Section U is for sweet peas by private growers, including a dinner table decoration. Sec. V. is for sweet peas by commercial growers, the display covering 100 sq. ft., carrying 1st and 2nd prizes of \$75 and \$50.

Miscellaneous cut flowers are provided in Section W for private growers and X for commercial growers. Section Y is for violets by commercial growers. Section Z is for table decorations by private growers and by hotels, the latter for a \$100 silver cup offered by the Horticultural Society of New York.

The Horticultural Society of New York offers its gold, silver and bronze medals for exhibits of unusual merit; the exhibits to be judged and the awards to be made by the Society.

The Flower Show Committee is composed of the following gentlemen:

F. R. Pierson, chairman; T. A. Havemeyer, vice-chairman; John Young, secretary, 53 West 28th street, New York; Frederic R. Newbold, treasurer; F. R. Pierson, Wm. H. Duckham, F. R. Newbold, C. H. Totty, T. A. Havemeyer, Frank H. Traendly, George V. Nash, Julius Roehrs, Prof. N. L. Britton, W. H. Siebrecht, Sr., James N. Stuart, W. R. Pierson, Jos. A. Manda, F. L. Atkins, M. C. Ebel, John Young.

Complete schedule, which will include all cut flower classes, will be issued later.

NEWS NOTES.

Auburn, N. Y.—A new firm, Eastwood & Tincknell, has rented the old Dunning greenhouses in South Division street.

Sherborn, Mass.—This neighborhood was visited by a very severe hail storm on July 12 which ruined gardens and farm crops, tore the foliage of the trees to shreds, and broke much glass. The greenhouse of J. Dudley Clark was wrecked and 3,000 chickens were killed in the yard on the Clark estate.

Other losers by the storm were Messrs. Cheney of Southboro, who lost five acres of tomatoes; Geo. Severy of South Framingham, Simpson of Saxtonville.

FERTILIZER EXPERIMENTS

At the Floricultural Experiment Station,
University of Illinois, Urbana, Ill., W. M. Man-
dile, in Charge of Fertilizer Ex-
periment

(Continued from page 91)

2. The Effect of Topping Back Carnations on the Total Production and Time of Maximum Production.

The carnations (Rosette and White Perfection) on account of delay in erection of the new greenhouses were set in later than usual, Aug. 12. They were topped back at this time. On Sept. 12, one-half of the house (360 plants) was topped back while the crop of short-stemmed flowers was left on the other half. The results of these two methods of culture are as follows:

(1) The new growth on the topped sections began producing flowers nearly equal in number to the production from the sections not topped about the twenty-fifth of November. Previous to this time 761 flowers from Rosette had been secured from the sections not topped, in excess of those from the topped section. At \$1.00 per 100, the profit per 1000 sq. ft. of bench space would amount to \$42.20. From the White Perfection sections 1172 flowers were picked in excess of those from the topped plants. At the same rate these would net a profit of \$65.20 per 1000 sq. ft. of bench space.

(2) It might be worth while to top back in order to produce a larger crop or to control the time of the large crop later, and this has been considered in the data. The data show that up to the present time the usual variation does not exceed 5 flowers weekly. In each variety the untopped sections have fallen below the topped sections in production, for one week, to a noticeable extent, about 30 flowers. Otherwise the production still runs parallel. Each set of plants came in to maximum crop at the same time and the production dropped similarly with each. There are indications, however, that the later crop will not fall at the same time. Further study of this interesting phase of carnation growing will be made as the season progresses. A suggestion has been made to me that these results would be secured only with a variety of the "tree" type which has no great tendency to stool out even when topped back. Probably a larger production would follow in after weeks a topping back of this type of plant.

3. The Relationship Between Cloudy Weather and Splitting in Carnations.

A record has been kept of the weekly production of flowers in the carnation house. By comparison with the weekly amounts of sunshine as recorded by the Agricultural Experiment Station (Agronomy Department) a method is found of determining whether any parallel increase in percentage of flowers with split calyces and in hours of cloudy weather, exists. The year is not yet far enough advanced to allow very considerable data to be on hand, but the results so far indicate that a period of cloudy weather does have the effect of producing a larger percentage of splits, during the following weeks. During the last three months of 1913, a period

NIKOTEEN 30 Per Cent Strength For Spraying APHIS PUNK For Fumigating

ASK YOUR DEALER FOR IT.

Guaranteed under the Insecticide Act of 1910, U. S. No. 46.

NICOTINE MFG. CO. ST. LOUIS, MO.

of bright weather extending from October 13 till November 10 was followed by a period of cloudy weather from that date till December 8. The percentage of splits during the period of Oct. 27 till Dec. 1 averaged less than five, while during the following five weeks the percentage averaged more nearly 25.

In the report last March, figures were given to show that commercial fertilizers applied in moderate quantities did not cause splitting. It is evident that location of the true cause of splitting will remove it from the list of things to be feared when any change of cultural methods is contemplated by the grower.

4. Effects of Overfeeding Carnations.

Variation in the application of large amounts of different kinds of fertilizer to carnations has brought very interesting results. On Dec. 3 dried blood, ammonium sulphate, potassium sulphate a soluble phosphate (disodium phosphate) and for comparison and because commercial sulphate of potash contains 20 per cent of it, common salt at the rate of something over 25 lbs. per 100 sq. ft. of bench space were applied to the varieties White Perfection and White Enchantress, a single chemical being applied to a section. The results were quite different with the different chemicals. Those plants treated with dried blood, potassium sulphate, or sodium sulphate showed no signs of injury, and even now, when a further application of 5 lbs. each has been made, no effect is seen excepting in a softness of the flower, a drooping of the stems, and a general retardation of growth, very similar in all cases. In the case of those plants to which salt was applied, plasmolysis occurred within three days, the plants falling over on account of weakness at or near the crown. The general appearance of the foliage did not change excepting that the chlorophyll gradually and uniformly disappeared and by this time most of the plants are dead. Where sulphate of ammonia was applied, injury which rapidly became very marked was noticed within two weeks after application, but the appearance of the foliage indicated a distinct toxic effect characteristic of this fertilizer. Instead of a falling over at the crown, the first sign of injury was a browning of the tips of the sepals. Later this extended down the juncture between the sepals, causing them to part, and resulting in the formation of a split flower. Flowers fully open and half to full grown buds showed a characteristic weakness just above that node second or third below the flower, where the color disappeared, the cells collapsed, causing the stem to bend over sharply at this point. The leaves exhibited a characteristic white spotting due to the collapse of the chlorophyll bearing cells beneath the epidermis at these places, while

the remainder of the leaf retained its normal green color. Injury is more marked where lime has been applied, and is worse in the White Enchantress than White Perfection.

These details are given here because it does not seem possible to detect injury to the carnation before overfeeding is rather serious and because, the symptoms being specific, it at least is possible by watching these symptoms to avoid a repetition of over-feeding by the particular fertilizer which caused the trouble.

The comparative solubility of these fertilizers is approximately:

Ammonium sulphate, 71 parts to 100 of water.

Salt, 36 parts to 100 of water.

Potassium sulphate, 9 parts to 100 of water.

Sodium phosphate, 7 parts to 100 of water.

And phosphate, 4 parts to 100 of water.

The degree of injury evidently bears a relation to the solubility, as is seen, but in addition ammonium sulphate, and as described in the report last year sulphate of potash in the later stages must have a definite toxic action peculiar to themselves. The apparent benefit this year from the large amounts of acid phosphate applied to the varieties Rosette and White Per-

SOUTH AMERICAN SHEEP AND GOAT MANURE

WHAT HAVE WE HERE?

It looks like sheep manure!
It smells like sheep manure!
It feels like sheep manure!

and by gum, it is the real, pure old fashioned sheep manure, pure and straight all over, the same we used to be able to get years and years ago when sheep were plenty in this country of ours. This stuff comes from South America, where they have nothing else but sheep and goats and it is the Simon pure article, just as the Ba-Ba dropped it, but finely ground for convenience.

This manure is not acid and is safe to use on the most tender plants. It is just the thing for "Mums," for young roses, carnations, cyclamens, terns and a thousand other things.

We absolutely guarantee this manure to be nothing but pure sheep and goat manure, free from anything else whatever. Send for a sample,

Look at it—
Smell of it—
Feel of it

Make a test of it for acidity and see what a fine article of manure water you can get with it.

Price and Terms on application.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$2.75 per 112 lbs.; \$12.50 per 560 lbs.

Stumpp & Walter Co.
30-32 Barclay Street, NEW YORK

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. \$3.50.

Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street
NEW YORK, N.Y.

The Recognized Standard Insecticide

For green, black, white fly, red spider, thrips, mealy bug and soft scale. Can be used on tender plants.

\$1.00 per quart—\$2.50 per gallon.

FUNGINE

For mildew, rust and other blights. It is perfectly safe to apply to fruits and vegetables, as it is non-poisonous. An infallible remedy for rose mildew, carnation and chrysanthemum rust.

75c. per quart—\$2.00 per gallon.

VERMINE

For eel, cut and wire worms working in the soil. It can be applied to all vegetation.

\$1.00 per quart—\$3.00 per gallon.

SCALINE

For San Jose, Oyster Shell and all scale on trees and hardy stock. An effective remedy for red spider on evergreens.

75c. per quart—\$1.50 per gallon.

All the above products are readily soluble in water at proportions directed on cans and are used as spraying materials.

LONG ISLAND CITY, N. Y.**FERTILIZER EXPERIMENTS.**

(Continued from page 2)

fection, and White Enchantress and White Perfection last year lead to the belief that its solubility in water is not sufficient to cause injury to the plants.

Physical conditions of the soil may be a factor in the injury. Acid phosphate and sodium phosphate in large quantities give a pulverulent, quickly drying soil of excellent texture, while dried blood in large amounts causes the soil to retain large quantities of water. It does not dry readily and so is not watered so often, and yet the tenacity with which the organic matter in the dried blood retains the water prevents as large a proportion of it being used by the plant. This in turn prevents the proper aeration of the roots that is an essential benefit derived from the alternate wetting and drying of the soil.

The effects of overfeeding are not so apparent with carnations as with roses. In addition to the need for applying quantities of fertilizer not in excess of that needed to the rose, it is necessary to take into consideration also the period of growth of the plant when making application of fertilizer to roses, a precaution that so far has not been found necessary with carnations. The necessity of observing this precaution is well illustrated by the experience gained with application of fertilizer to roses during the present season, an experience that came near resulting in a complete loss of the plants.

The roses (young stock) were set in the benches on August 4, at which time five pounds of sulphate of ammonia per 100 square feet and varying quantities of acid phosphate with a little potassium sulphate were added to the soil, together with a small amount of well rotted manure. A good crop of flowers was obtained on November 30, a like application of sulphate of ammonia and acid phosphate was made to the sections. The roses were off crop at this time. A good many older leaves were dropped because the fertilizer was cultivated in too deep, and the root system disturbed. However, the flowers produced until the first of the year were good. At this time, the new foliage which appeared to replace the flowers removed showed marked signs of injury from overfeeding, the symptoms being weak growth and lack of chlorophyll in the leaves. The injury was worse on the own root plants than the grafted, and more marked on the side of the bench from which water was applied. It is clear that the condition of the plant is a factor to be reckoned with most carefully in the application of fertilizer. The excellent condition of those plants which have received no fertilizer would indicate, indeed, that no or little fertilizer is needed in the

earlier part of the season, although past experiments have shown that the soil used at the Experiment Station, although rich, will not suffice to keep a rose in best condition throughout the season. The whole question of the time of application of fertilizers from these two standpoints is one requiring further study before definite conclusions may be drawn.

In an article appearing in the American Florist of July 19, 1913, calculations were given from the results of analyses of liquid manure, showing its strength to be equivalent to about 6 oz. of ammonium sulphate per 50 gals. of water, and mention made that a strength of 1 lb. per 50 gals. was often recommended. Thirty-two grafted plants each of Killarney and Richmond roses have been so fertilized during the winter. One-half of them received weekly a solution of the strength of 4 lbs. per 50 gals. of water, while to the others a solution one-fourth as concentrated was applied. The soil was not drenched, but well covered with the liquid. No injury has been noted to these plants, although during the protracted cloudy weather of November and December last, the foliage lost some color, as was the case with all the roses regardless of the treatment.

Side posts and gusset plates as used in Thos. Roland's house at Revere, Mass.

Where cross ties are used to stiffen the house against lengthwise strain; the posts are double reinforced. The side posts were riveted side.

The Very Serious Question of Side Posts

HERE are two posts. In some ways alike, but differing. One is our regular standard flat guaranteed wrought iron one, with its double gusset plate joining it to the steel rafter.

The other is the same post and gusset plate, only it has angle irons bolted to each side to stiffen it wherever cross ties are anchored to it, to prevent the lengthwise swaying of the house.

There are three good rugged reasons for making these posts the

way we make them. There are also some exceedingly interesting and decidedly vital points about criss cross bracing that's worth your while to know about. All these things are fully told in this week's page Ad. in Florists' Exchange. Take the trouble to look it up. If you don't take the Exchange, drop us a card and we will gladly send you a proof of the Ad.

If you are ready to talk building say when and where and we'll be there.

HORTICULTURE

Curt. Providence Journal

Roses at Roger Williams Park, Providence, R. I.

Published Every Saturday at 11 Hamilton Place, Boston, Mass.
Subscription, \$1.00.

Here are Three New 'Mums You Ought to Grow

ALICE SALOMON

Pure white. Larger than Chadwick, easy to grow. Ready to cut October 10 to October 25. Rooted Cuttings, \$7.00 per 100; 2½-in., \$9.00 per 100.

GOLDEN SALOMON

A sport of Alice Salomon. The same in every respect except in color, which is as its name implies, a golden yellow. Rooted cuttings, \$20.00 per 100; 2½-in., \$22.00 per 100.

CHIEFTAIN

A pink described by the E. G. Hill Co., as a Pink Bonnaillon ready to cut about 10 days earlier than Enguehard. Rooted cuttings, \$12.00 per 100; 2½-in., \$14.00 per 100.

 We believe that the above 'mums are valuable additions to the lists of commercial varieties and recommend them as such.

NEW SINGLES Rooted Cuttings, \$8.00 per 100, 2½-inch, \$10.00 per 100

MENSA

This is the splendid white that attracted so much attention at the Fall Flower Shows and is considered the best single white in the market for cut flowers or plants.

PAULINE

This variety sported with us. It is a dark single bronze, very attractive and is a splendid grower. Order now of these and you will not be disappointed.

SUPREME QUALITY ROSE STOCK

BEST PLANTS THAT MONEY CAN BUY. Growers are always on the lookout for quality rose stock. They realize that the best at the start is the cheapest in the end. When buying plants it is always best to secure your stock from people that have a reputation for producing the best there is to be had. You cannot get any better stock than that which we are offering, for we always aim to give the purchaser the best that our long years of experience enable us to do.

GRAFTED ROSES

2½-in. Plants.
Pink Killarney, White Killarney, Milady, Killarney Queen, Mrs. Aaron Ward, Mrs. Taft (Bulgaria or Antoine Rivoire), Richmond, Mrs. Geo. Shawyer, at \$12.00 per 100; \$100.00 per 1000.
Mrs. Chas. Russell, grafted, 2½-in., at \$15.00 per 100; \$120.00 per 1000.
Killarney Brilliant, grafted, 2½-in., at \$30.00 per 100; \$250.00 per 1000; 3½-in., \$35.00 per 100; \$300.00 per 1000.

2½-in. Plants.
Richmond, 2½-in., \$90.00 per 1000; 3½-in., \$120.00 per 1000. Richmond and Milady are extra strong plants.

3½-in. Grafted.
Milady, Mrs. Geo. Shawyer, Bulgaria, Killarney Queen, Pink Killarney, Aaron Ward, \$15.00 per 100; \$135.00 per 1000.

150 Russell and 100 small Hadley at \$15.00 per 100.

OWN ROOT ROSES

2½-in. Plants.
Killarney, Mrs. Taft, (Bulgaria or Antoine Rivoire) Ward6, Milady, at \$6.00 per 100; \$55.00 per 1000.
Sunburst, \$7.50 per 100; \$70 per 1000.
3½-in. Plants.
Pink Killarney, Mrs. Ward, Mrs. Geo. Shawyer, Milady at \$8.50 per 100; \$75.00 per 1000.
Richmond at \$7 per 100; \$65.00 per 1000.
Bulgaria, 3½-in., \$7.50 per 100.
Sunburst, \$9.00 per 100.

Cecil Brunner, \$8.00 per 100; \$75.00 per 1000.

Beauties, 3-inch, \$6.00 per 100; \$55.00 per 1000. Ready to ship. All first class stock. 2-in. Beauties all sold.

Orders will be taken for cut back benched plants, when these are on hand, for White Killarney, Mrs. Ward, Double Pink Killarney and Melody, at \$5.00 per 100; \$40.00 per 1000. Beauties at \$6.00 per 100; \$55.00 per 1000.

The prices are in effect now 30 days in to date.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Carnations

All early planted houses will take up a good deal of attention from this out. Be very careful about watering. I think the best plan is to just water around each plant until they begin to make roots through the soil, when the whole bed should be watered. The carnation certainly does love plenty of fresh air so see that the ventilators are wide open on all possible occasions. During bright weather give them a good syringing. Keep the soil between the plants well worked; this will let the sun and air into the soil. Go over the plants regularly and pinch off shoots that are going to make a flower. This pinching can go on for some little time yet.

Lilies

Much of the plant growers' attention now centers in the stock to be had in readiness for next Easter. Without question, lilies hold the foremost place. The bulbs generally used for early forcing will do well in 5-inch pots singly, or larger ones to a 6-inch pot. For winter flowering the bulbs cannot be potted and started any too soon; in fact, you should get them just as soon as they can be procured. There is a good demand for lilies all through the winter and a few dozens a week are acceptable to every country florist who has design orders to fill. Easter comes April 4th, a week earlier than last Easter. In potting, the top of the bulb ought to be just level with the surface of the soil. The potting soil should be rich, but without green manure. Cover from four to six inches with coal ashes. They are left outside until they have made roots. About the middle of December they may be brought in and placed on benches in a temperature of not over 50 degrees.

Freesia Bulbs

Bulbs dried off last year and kept in good shape will make very good stock to plant. Do not fail to give them a good rich compost—say, three parts fibrous loam and one of well decayed cow manure. After they are planted place the pans or flats in a frame, where they can have the protection of sashes during heavy rains. They can stay here until the end of August, when they can be brought in and grown on. To bring these bulbs in early they will require a temperature of about 60 degrees during the night. When they have filled their flats with roots they will want great quantities of water at the roots, with light syringing overhead once a day.

Pansies

Pansies are being more appreciated each year as winter flowers. They will never equal the violet in popu-

larity but are worthy of more attention than they have yet received and are quite a profitable crop. Their requirements are a cool house with winter temperature minimum of 40 to 42 degrees and a rich soil. If wanted for winter blooming they should be sown at once. Unless many thousands of plants are to be raised, a cold frame is the best place in which to sow the seed. Make the soil light and moderately rich, and pulverize it well. Sow the seed broadcast, cover lightly and keep well watered and germination will take place in eight or ten days. Once the seed is up, avoid coddling and remove the sashes. When large enough prick out into other cold frames about four inches apart each way. There are many choice strains of large-flowering pansies on the market. Many are selections from or improvements on Trimardeau which remains one of the best all-round varieties in commerce today. Do not purchase cheap seed, but buy the best as it is the cheaper in the end.

Poinsettias

You will have use for plenty of dishes and pans filled with these for Christmas trade. Don't break them off the wooded stem but use the knife, and let one or two eyes of the soft wood remain on the plants to give more cuttings again; these small cuttings make fine stock for small pans. Use fairly coarse sand, with good drainage for the cuttings. As they bleed much when cut, dip the bottoms in powdered charcoal as soon as made. Throw the cuttings into a wooden pail or tub of fresh water for a couple of hours before placing them in the sand, then soak the sand well. The cutting bench should be in a warm house, or in a small frame with a sash, inside the house. This will insure a closer and warmer atmosphere. Do not, however, keep entirely closed, or many will rot. Keep sun and wind away from the cuttings at all times. Pot as soon as the roots are an inch long. Use a light, sandy compost at first; later it can be heavier and it should be made moderately rich for the final potting. Keep shaded and moist until they take hold of the compost after which they should have full sun.

Sowing Coreopsis

To have good strong plants for next summer's flowering sowing should now be made without delay. The seed can be sown in some vacant frame, where they can have a little attention in the way of watering. When they have formed two or three leaves they can be transplanted into other frames and grown on. They can stay in these frames until next April, when they can be planted out in the open.

The presidency

We understand that already two candidates are to be entered in the race for the office of president of the Society of American Florists by their friends. There may be others also, but the two gentlemen prominently mentioned now are both well worthy of the honor, having been earnest, self-sacrificing workers in the Society and in all movements for the advancement of floriculture. So, it is gratifying to know that whoever may win out, the Society will in either event have a good and efficient chief officer. While rivalries which invite personalities and caustic discussion are always to be deplored, yet from the standpoint of the Society's membership roll and for other obvious reasons a contest for offices carried on without aspersion or heated contention is healthy and far preferable to "cut-and-dried" or prearranged unanimous elections. The Boston Convention will be a lively affair, and, we sincerely hope, a good-natured one.

About anonymous writers

Mr. Ebel, in his remarks in this week's issue on the gardener's progress, mildly rebukes the assistant gardeners for concealing their identity behind a nom de plume in their communications to HORTICULTURE. It is generally known, we think, that HORTICULTURE does not believe in anonymous signatures and is quite in accord with the views of the late Peter Henderson who said that if a man wrote anything worth printing he should not be ashamed to sign his own name to it. But, there are obvious reasons which may at times justify one employed as an assistant in any profession in withholding his identity when discussing matters which might be construed as affecting his relations with his superior in position, and so long as the views expressed are respectful and devoid of personal detraction we have thought best to make allowances in this particular instance, considering the circumstances.

Education lacking

The Southern Merchant, one of the brightest of our exchange publications, says, "The more you know about how and where goods are made the better you can sell them and, what is sometimes just as important, the better you can buy them." The writer probably did not have the flower business in mind when he wrote, but his remark is quite applicable to that industry. We often think how little concern there is, nowadays, among the people who buy flowers for retailing, as to how the goods are produced and where. There was a time when most city florists were more or less experienced plantmen and flower growers but anyone visiting the city flower markets now, during the busy hours, would have some difficulty in finding one experienced grower among the throngs of buyers and, in fact, would not be much more successful in a similar quest among the salesmen. The material is handled simply as so much merchandise without regard to its origin or its position in the world of flowers. Perhaps it is unavoidable that the florist trade should take this course but we cannot resist the conviction that it would be a decided advantage to any salesman in a flower store if he knew more than is commonly the case "about how and where the goods are made."

Simply "traders"

The retail florist, from the very nature of his business, is brought into a very close personal relationship with his customers, much more so than is the case with most tradesmen. It is greatly to his interest to promote and develop this friendly affinity—in fact, in suburban communities especially it is one of the strongest factors in working up a dependable and profitable business support. Here is where a well-grounded knowledge of plant lore and the ability to properly answer the myriad questions that are sure to be asked and give advice on cultural points based on practical experience counts for much. The public generally expect the florist to know about these things and a confession of ignorance or a misleading or evasive answer on his part will do him incalculable harm in the estimation of a cultured customer. As we have taken occasion to say many times heretofore, one of the most effective appeals a florist can make to the community in which his lot is cast is to encourage and support enthusiastically every movement for local improvement, proclaiming by advice and example the gospel of beauty as exemplified in homes adorned inside and out with plants and flowers and a town similarly beautified in its streets and public places. Florists of the class who are simply traders and who aspire to no accomplishment save that of profitable buying and selling may perhaps attain that ambition but they are not likely to ever get any further.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Weeds

This is the time of the year when the weeds which have been allowed to grow undisturbed since spring, will be in their full glory, and if they are not cut down before very many days, there will be an excellent crop of seeds to blow into the greenhouse soil, and all the cultivated plots around the greenhouses. It will take but little time to cut these all down with a scythe and burn them when they are dry enough. It pays to keep the place free from all weeds, for the seed will be bound to get into the garden, or somewhere, where it will take time and money to remove them. The weeds especially delight in growing in old soil that has been wheeled out of the houses and not disposed of. If these are allowed to go to seed the old soil will be full of them, and then when the soil is spread on the field or garden there will be an excellent crop of weeds to contend with. Cut all the weeds down, and if they are through blossoming, better burn them. Should they not be in blossom as yet, they will make excellent humus, and it would be a shame to burn them. Turn them under while they are green.

Lawns Around the Greenhouses

There is nothing more pleasing than a nice short-cut lawn around the greenhouse, and it is surprising how little trouble it is to make one, and then to keep it made after it starts to grow. With plenty of old grass around, old sod, etc., it will be difficult to start a lawn that will be free from weeds. There is only one way to do this, and that is to keep all the ground plowed up for one season, destroying all the vegetation that appears. It is well to plow the ground once in a while, and harrow it again and again, so that at the end of the season, not only will all the weeds, old sod and grass of all sorts be dead, but the ground will be in an excellent shape to receive the grass seed. Manure or old greenhouse soil can be mixed in when it is being plowed and harrowed, and then there will be no trouble to keep a lawn after it gets established, for the soil will be in good shape, well broken and loose for quite a depth.

Signs

You seldom see a factory without a sign on it as to the name of the firm and the articles manufactured, and we think all florists should have signs over their greenhouses with their name, and their specialty. The returns on the investment might not come in at once, but in time the sign would not only pay for itself, but would

earn good dividends. Just to illustrate, a man of means passed a greenhouse place in his car for several years without ever knowing who owned the greenhouses, and what he grew. He bought flowers in the city, and was real surprised when once he learned that he could buy better flowers right on his way home. A year's trade with this man would have paid for the sign that the florist might have had. Keep advertising, and advertising will keep you.

Syringing

Do not neglect to syringe your plants as often as is possible. It has a limit, too, but as a rule the plants are not syringed enough. By syringing we do not mean just taking the hose and sprinkling the water all over the house, wetting the plants and the walls. We would call that "sprinkling." When syringing, it should be done thoroughly, taking care to syringe well into all the corners, and around all the braces, and where the hose meets between the faucets. Always try to get as little water on the benches as possible, and always syringe from the back of the benches to the front so as to throw as much water into the walks, and when syringing the front rows syringe so as to keep the water right in front without throwing it on the back rows too much. This is not so very important in the summer when the benches will dry out anyhow, but it affords a good chance to get into good practice for the winter, for it is easy to see where the water falls, now when the plants are small. Use plenty of pressure, but not enough to tear all the leaves to pieces.

The Pots

There never was a better time than the hot days of summer to get all the pots washed and into shape for the coming season when they will be needed again. Pot washers can be bought reasonably, and they will certainly save a lot of time. A handy man on the place will make one very easily, and a small electric motor will not cost much to run it. Where neither pot washer or motor are to be had, the good old-fashioned way of washing by hand will do. At any rate it is best to wash all the pots clean, and never use a dirty pot. We would never wear soiled clothes, or change into soiled clothes. Plants are much the same way. They have to be kept clean to do at all well. Wash the pots now and see that they are washed clean. It is very important to remove all green scum and dirt, leaving the pot fresh and sweet, as good as new.

The Special Convention Number of Horticulture

WILL BE ISSUED ON AUGUST 15

This will be an issue of exceptional interest and will be widely circulated and widely read. Its value as an advertising medium for all floral and horticultural material cannot be over estimated. S. A. F. trade is always worth a special effort at Convention time. Send your order in early and it will have our best attention.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

Incorporated by Act of Congress, March 4, 1901

Program of the Thirtieth Annual Meeting and Exhibition to be held in Mechanics Building, Boston, Massachusetts, August 18, 19, 20, 1914

The 1914 Button admits members to the hall and meetings. Please register at once in the Secretary's office upon arrival at the Convention Hall.

Officers.

President, Theo. Wirth, Minneapolis, Minn.

Vice President, Patrick Welch, Boston, Mass.

Secretary, John Young, 53 West 28th street, New York City.

Treasurer, Wm. F. Kasting, Buffalo, New York.

Executive Board.

For one year—Chas. H. Totty, Madison, N. J.; John A. Evans, Richmond, Ind.

For two years—Thomas Roland, Nahant, Mass.; Aug. F. Poehlmann, Morton Grove, Ill.

For three years—J. J. Hess, Omaha, Neb.; J. A. Peterson, Cincinnati, Ohio.

Ex-officio—J. K. M. L. Farquhar, Boston, Mass.

Washington representative—Wm. F. Gude.

National Flower Show Committee.

W. P. Craig, Philadelphia, Pa., term expires Dec. 31, 1914.

W. N. Rudd, Morgan Park, Ill., term expires Dec. 31, 1915.

Thomas Roland, Nahant, Mass., term expires Dec. 31, 1916.

Chas. H. Totty, Madison, N. J., term expires Dec. 31, 1917.

George Asmus, Chairman, Chicago, Ill., term expires Dec. 31, 1918.

Adolph Farenwald, Roslyn, Pa., term expires Dec. 31, 1919.

State Vice-Presidents.

Alabama, W. B. Paterson, Jr., Montgomery; California (North) Daniel MacRorie, San Francisco; California (South) Edwin Lonsdale, Lompoc, Colorado, John Edward Johnson, Colorado Springs; Connecticut, John F. Huss, 1103 Asylum street, Hartford; District of Columbia, Elmer C. Mayberry, Washington; Florida, C. D. Mills, Jacksonville; Georgia, A. C. Oelschig, Savannah; Idaho, J. W. C. Deake, Twin Falls; Illinois (North) W. J. Keimel, Elmhurst; Illinois (South) J. F. Ammann, Edwardsville; Indiana, (North) J. S. Stuart, Anderson; Indiana, (South) Jos. H. Hill, Richmond; Iowa, Roy F. Wilcox, Council Bluffs; Kansas, Chas. P. Mueller, Wichita; Kentucky, George E. Schultz, Louisville; Louisiana, Harry Papworth, New Orleans; Maine, A. E. Thatcher, Bar Harbor; Maryland, George Morrison, Carroll P. O., Baltimore; Massachusetts, (East)

Wm. R. Nicholson, Framingham; Massachusetts (West) Alfred J. Loveless, Lenox; Michigan, (East) Frank Danzer, Detroit; Michigan (West) Henry Smith, Grand Rapids; Minnesota, C. F. Rice, Minneapolis; Mississippi, S. W. Crowell, Roseacres; Missouri, (East) Robert J. Windler, St. Louis; Missouri, (West) W. L. Rock, Kansas City; Montana, J. C. Ring, Helena; Nebraska, Irwin F. Frey, Lincoln; New Hampshire, George E. Buxton, Nashua; New Jersey, Joseph A. Manda, West Orange; New York, (East) J. H. Pepper, New York; New York, (West) S. A. Anderson, Buffalo; North Carolina, Wm. Rehder, Wilmington; Ohio, (North) H. P. Knoble, Cleveland; Ohio, (South) C. E. Critchell, Cincinnati; Oklahoma, George Stiles, Oklahoma City; Oregon, E. T. Mische, Portland; Pennsylvania, (East) Fred Hahman, Philadelphia; Pennsylvania (West) W. A. Clarke, Pittsburgh; Rhode Island, Fred C. Green, Providence; South Carolina, C. A. Moss, Spartanburg; South Dakota, W. F. March, Mitchell; Tennessee, C. L. Baum, Knoxville; Texas, Henry F. Greve, Dallas; Utah, A. J. Alt, Salt Lake City; Virginia, F. A. Whelan, Mt. Vernon; Washington, J. W. Duncan, Spokane; West Virginia, S. A. Gregg, Charleston; Wisconsin, F. H. Holton, Milwaukee.

Canada—Alberta, A. M. Terrill, Calgary; Manitoba, H. E. Philpott, Winnipeg; Ontario, H. Dilleuth, East Ontario; Quebec, George A. Robinson, Montreal.

1914 Convention Advisory Committee.

Patrick Welch, Boston, Mass.; Thomas Roland, Nahant, Mass.; J. K. M. L. Farquhar, Boston, Mass.

Other Officers.

Botanist—Prof. J. F. Cowell, Buffalo Botanic Gardens, Buffalo, N. Y.

Pathologist—Prof. E. M. Freeman, Plant Pathologist, University Farm, Minneapolis, Minn.

Entomologist—Prof. W. E. Britton, State Entomologist, New Haven, Conn. Chairman, Committee on Sports—Chas. E. Critchell, Cincinnati, Ohio.

Superintendent of Trade Exhibition—John Young, 53 West 28th street, New York.

Superintendent of Convention Garden—James B. Shea, Dept. of Parks, Boston, Mass.

Sergeant-at-Arms — George Cruikshank.

Tariff and Legislative Committee.

Wm. F. Gude, Chairman, 1214 F. street, N. W., Washington, D. C.; Jas. McHutchison, 17 Murray street, New York City; W. F. Kasting, 383-387 Ellicott street., Buffalo, N. Y.; R. M. Ward, 71 Murray street, New York City; Julius Roehrs, Rutherford, N. J.; A. L. Miller, Brooklyn, N. Y.

Committee on School Gardens.

Benjamin Hammond, Chairman, Beacon, N. Y.; Irwin Bertermann, 241 Massachusetts Ave., Indianapolis, Ind.; Gust. X. Amrhn, Supt. of Parks, New Haven, Conn.; Michael Barker, 440 So. Dearborn street, Chicago, Ill.; Leonard Barron, Garden City, N. Y.

Judges for the Trade Exhibition.

Sections A, B, and F—M. A. Patten, Tewksbury, Mass.; Wm. Sim, Cliftondale, Mass.; John R. Fotheringham, Tarrytown, N. Y.

Sections E and G—Thomas F. Galvin, Boston, Mass.; Wm. F. Kasting, Buffalo, N. Y.; Olaf J. Olson, St. Paul, Minn.

Sections C and D—Wm. H. Siebrecht, Sr., Chappaqua, N. Y.; Jos. A. Manda, West Orange, N. J.; Frank H. Traendly, New York.

Judges of the Convention Garden.

Robert Cameron, Cambridge, Mass.; J. F. Huss, Hartford, Conn.; Harry A. Bunyard, New York; Gustav X. Amrhn, Supt. of Parks, New Haven, Conn.; John N. Champion, New Haven, Conn.

Past Presidents.

*1884 John Thorpe, 1885 John Thorpe, 1886 John Thorpe, 1887 Robert Craig, 1888 E. G. Hill, 1889 John N. May, *1890 J. M. Jordan, 1891 M. H. Norton, 1892 Jas. Dean, *1893 Wm. R. Smith, *1894 J. T. Anthony, 1895 Edwin Lonsdale, *1896 Wm. Scott, 1897 Adam Graham, 1898 W. F. Gude, 1899 W. N. Rudd, *1900 E. M. Wood, 1901 Patrick O'Mara, 1902 John Burton, 1903 John Burton, 1904 Philip Breitmeyer, 1905 J. C. Vaughan, 1906 Wm. F. Kasting, 1907 Wm. J. Stewart, 1908 F. H. Traendly, 1909 J. A. Valentine, 1910 F. R. Pierson, 1911 George Asmus, 1912 Richard Vincent, Jr., 1913 J. K. M. L. Farquhar. *Deceased.

The Secretary's office will be near

the main entrance inside the Convention Hall.

New Members. Those desiring to become members should apply at the Secretary's office. It will facilitate the secretary's work, if members will remit now for the 1914 assessment.

Life Members' Buttons. Life Members' buttons will be sent to those entitled upon receipt of seventy-five cents.

PROGRAM.

**Tuesday, August Eighteenth.
First Day.**

OPENING SESSION.

2 P. M., Opening Exercises in Paul Revere Hall, Mechanics Building.

Address of Welcome, by Hon. James M. Curley, Mayor of Boston. Response by Frank R. Pierson, Tarrytown, N. Y.

President Wirth's Address; Report of Secretary; Report of Treasurer; Reports of State Vice-Presidents; Consideration of Invitations for Meeting Place for 1915.

EVENING.

8 P. M., Reception to President Wirth—Copley Plaza Hotel. Music. Dancing, Refreshments; strictly informal.

Balloting for next Meeting Place.

**Wednesday, August Nineteenth.
Second Day.**

MORNING.

9 A. M., Meeting of The Florists' Telegraph Delivery.

9 A. M., Meeting of The American Sweet Pea Society.

10 A. M., Annual Meeting of the Ladies' Society of American Florists.

10 A. M., Session S. A. F. & O. H. Report of the National Flower Show Committee, George Asmus, Chairman. Discussion.

Nomination of Officers for 1915; Report of the Judges of Trade Exhibition and the Convention Garden; Report of Committee on President's Address; Discussion.

Affiliation—Special Report of Board of Directors.

At the morning session of Friday, Aug. 22, of the Minneapolis Convention, the following recommendation of the Board of Directors was adopted:

"That the fee for members of any regular florists' clubs who wish to join the S. A. F. & O. H. as a body, will be reduced to Three Dollars for the first year, and the annual dues thereafter to be Two Dollars per year for each member thereof. These dues must be paid to the S. A. F. & O. H. by the treasurer of each club and not by the members individually, and we further recommend that our constitution and by-laws be amended to comply with this recommendation."

At the meeting of the Board of Directors, held in Boston, March 17-18, 1914, the matter of affiliation was again very thoroughly discussed by the full Board, with the result that the recommendation was considered to be rather indefinite. It was therefore voted that a special committee of three be appointed to work out a definite plan of affiliation, the same to be presented as an amendment to the constitution and by-laws. The Committee, consisting of Messrs. George Asmus, chairman, Wm. F. Kasting and J. J. Hess, ultimately submitted the following amendment, which has been approved and is now recommended for adoption by the Board of Directors in place of the recommendation offered at Minneapolis:

Amendment to Paragraph (b) of Section 2 of Article II.

1. That clubs, societies or kindred organizations of professional florists, gardeners and horticulturists, having a paid-up membership of one hundred or more members in the S. A. F. & O. H., shall be entitled to one representative on the Board of Directors of the S. A. F. & O. H.

AN OLD WELL HEAD.

Our illustration shows how an old well head on one of the beautiful private estates near Boston has been utilized as a garden feature. In June

and July rambler roses are used in its adornment and these are succeeded in fall by Clematis paniculata which garlands it with exquisite effect.

2. Such representative shall be the president of such organization and must be a member of the S. A. F. & O. H.

3. Any elective officer or appointed director of the S. A. F. & O. H. shall not be eligible as a representative of such organization.

4. When the president of any such organization is already a director, the vice-president shall be eligible for the office.

5. Any organization applying for representation shall submit to the secretary of the S. A. F. & O. H. a complete list of its membership. It shall be the secretary's duty to confirm same and submit it to the president for final confirmation. Such list shall be in the hands of the secretary by December first of each year. Announcement of such director shall be made by the president-elect on January first of each year.

AFTERNOON.

2 P. M., Essay—"What Should the Society of American Florists Do for the Private Gardener?" by Arthur E. Thatcher. Discussion.

2 P. M., Bowling Contest, Ladies' S. A. F., at the New Boston Alleys, 167 Washington street.

**Thursday, August Twentieth.
Third Day.**

MORNING.

9 A. M., Automobile Ride for the La-

dies, starting from the Copley Plaza Hotel, to the North Shore.

9 A. M., Meeting of the Florists' Hall Association; Meeting of the American Carnation Society.

10 A. M., Meeting of the American Gladiolus Society; Meeting of the American Rose Society.

11 A. M. to 12 M., Polls Open for the Election of Officers.

AFTERNOON.

2 P. M., Question Box: Essay—"Adaptation of Plants to Soil," by Prof. Geo. E. Stone, Amherst, Mass.

2 P. M., Annual Bowling Tournament, S. A. F. & O. H., at New Boston Alleys, 167 Washington street.

EVENING.

8.45 P. M., The Ladies' Society of American Florists will entertain at the Copley Plaza Hotel.

Friday, August Twenty-First.

Guests of the Allied Horticultural Interests of Boston.

Full particulars of this day of entertainment will appear later. There will probably be a sea excursion and a dinner at one of the beach resorts.

BORAX AS A LARVICIDE

As a result of experiments, the specialists of the Department of Agriculture have discovered that a small amount of ordinary borax sprinkled daily on manure will effectively prevent the breeding of the typhoid or house fly. Similarly, the same substance applied to garbage, refuse, open toilets, damp floors and crevices in stables, cellars or markets, will prevent fly eggs from hatching. Borax will not kill the adult fly nor prevent it from laying eggs, but its thorough use will prevent any further breeding.

The investigation, which included experiments with many substances, was undertaken to discover some means of preventing the breeding of flies in horse manure without lessening the value of this manure as a fertilizer for use by the farmer. While the "Swat the fly campaign," traps and other devices for reducing the number of typhoid-carrying flies are of value, they are of less importance than the prevention of the breeding. It was realized, however, that no measure for preventing the breeding of flies would come into common use unless it was such that the farmer could use it on his manure pile without destroying its usefulness for growing plants, and without introducing into the soil any substance that would interfere with his crops.

As a result of experiments carried on at the Arlington Farm, in Virginia and New Orleans, La., the investigators found that 0.62 of a pound of borax, or 0.75 of a pound of calcined colemanite (crude calcium borate) would kill the maggots and prevent practically all of the flies ordinarily breeding in 8 bushels of horse manure from developing. In the case of garbage cans or refuse piles, 2 ounces of borax or calcined colemanite, costing from 5 cents a pound upward according to the quantity which is purchased, will effectually prevent flies from breeding.

While it can be safely stated that no injurious action has followed the application of manure treated with borax at the rate of .62 pounds for 8 bushels or even larger amounts in the case of some plants, nevertheless borax-treated manure has not been studied in connection with the growth of all crops, nor has its cumulative effect been de-

termined. It is therefore recommended that not more than 15 tons of the borax-treated manure should be applied per acre to the field. As truck growers use considerably more than this amount, it is suggested that all cars containing borax-treated manure be so marked, and that public health officials stipulate in their directions for this treatment that not over .62 (62/100) of a pound for 8 bushels of manure be used, as it has been shown that larger amounts of borax will injure most plants.

In view of this discovery, there now seems little excuse for any horse owner or resident of a city allowing typhoid flies to breed in his stable or garbage can and it is believed that this information will greatly help the health authorities in their campaign against the typhoid fly. The details of the experiments with borax and other larvicides will be found in U. S. Department of Agriculture Bulletin, No. 118.

AGRICULTURAL DEPARTMENT WORK.

While the office of Foreign Seed and Plant Introduction concerns itself with plants introduced from abroad, the office of Horticultural and Pomological

HOUSE OF NEW CARNATION ALICE.

Photographed July 4, 1914.

FIELD OF 40,000 CARNATION ALICE.

Photographed July 4, 1914

Investigations is mainly interested in the fruits, vegetables and flowers now grown on a commercial scale in this country. The office maintains a voluminous correspondence with growers, shippers, and individuals throughout the country who desire information on any of the following topics:

Adaptability of fruit varieties to environment.

Methods of fruit culture.

Problems of orchard management.

Harvesting, handling, packing, shipping and storage of fruit.

Precooling of fruit and vegetables, and shipment under refrigeration or ventilation.

Chemical phases of fruit-ripening and the manufacture of concentrated fruit juices and by-products.

Identification and description of fruit varieties.

Nut culture (pecans, walnuts, chestnuts, almonds, hickories).

Improvement of citrus and deciduous fruits through bud selection, by crossing and by hybridizing.

Methods of growing, harvesting, handling, shipping, storing and marketing of vegetable and truck crops or crops grown under glass.

Commercial potato culture and the improvement of seed potatoes by breeding and selection.

Growing, harvesting, curing, threshing, and by-products of peanuts and the improvement of commercial varieties.

Commercial production of flower and garden seed.

School garden work.

Landscape gardening and the use of trees, shrubs, and flowers on streets and lawns and in parks.

Improvement of flower varieties.

This office is working to determine the exact behavior of fruit varieties under different environments and the geographical range of successful culture of different kinds and varieties of fruit; it also furnishes information as to the cultural conditions and methods best suited to the growing of different fruits.

The improvement of handling and marketing conditions and the practical solution of the problems of transportation and storage with which growers and dealers are concerned comprise a large portion of the work of the office.

BRITISH HORTICULTURE.

The Holland Park Show.

In brilliant weather the Royal Horticultural Society held its summer show at Holland House, Kensington, on May 30th and the two following days. As usual at this fixture orchids made a brilliant display, some fine specimens being staged by Sir George Holford, Sir Jeremiah Colman, two leading amateur growers; and by the trade growers, Sanders & Son, Charlesworth & Co., Stuart Low & Co., Mansell & Thatcher, and others. Roses were a strong section. Amongst the novelties was the new White Rambler, raised by Rev. J. H. Pemberton. The chief rosarians were well represented. Carnations also made a gay array, these being contributed by H. Burnett, A. F. Dutton, Engelmann, Stuart Low & Co., Cutbush & Son, Douglas, Young & Co., etc. Sweet peas were seen to perfection from Dobbie & Co., Sutton & Sons, King & Sons, Hobbies, Ltd., and others. Interest was aroused in the fruit trees laden with attractive produce shown by Veitch & Son. The Coronation cup, for the best exhibit was won by Wallace & Co., Colchester, Essex, for a water garden and Japanese iris. The Clay challenge cup for a new rose possessing the true old rose scent went to W. Paul & Son, for Queen of Fragrance.

Manuring Experiments With Sweet Peas.

At a recent meeting of the Scottish Horticultural Association in Edinburgh, Robert Fife, of Dobbie and Co., gave an account of the results of manurial experiments with sweet peas in 1913. With nitrogenous manure alone the result was only slightly better than with no manure, but the leaves were of a darker green and the nodules were but sparingly developed on the roots; with superphosphate of lime the leaves were large, dark green, and the plants were of strong growth, with an abundance of nodules on the roots. With sulphate of potash the leaves were small and dark green, the plants were of moderate growth, with a plentiful development of nodules on the roots. The best result was obtained with nitrogen, phosphate, and potash in combination. In the last mentioned trial the addition of magnesia or sulphate of iron made no appreciable difference.

A New Gardening Monthly.

The gardening publications on this side have now received an addition in the shape of a monthly, under the title of "My Garden, Illustrated." The new-comer is a creditable specimen of the printer's art, the color work being particularly good. It should appeal to a wide circle.

W. H. ADSETT.

TO REPEL THE ARMY WORM.

Letters, telephone messages, and individual callers have been soliciting aid from the U. S. Department of Agriculture to stop the advance of the hordes of army worms that threaten their fields of wheat, oats, corn, timothy, blue grass, and other grasses. There seems to be a general outbreak of this pest throughout the North, east of the Rocky Mountains. These worms are emerging from eggs laid

HARTFORD PARK GARDENS.

PERENNIAL GARDENS, ELIZABETH PARK, HARTFORD, CONN.

Hartford, Conn., has one of the finest park gardens in this country. It was laid out and planted under the direction of Theodore Wirth, now superintendent of Minneapolis' Park System, but at that time filling a similar position in Hartford. Under his successor, George W. Parker and his assistant

Alex. Cumming, Jr., it has been well cared for and a few weeks ago was the Mecca for the members of the American Rose Society who visited it especially to inspect the rose garden, which we illustrated at that time. The accompanying picture shows a portion of the hardy perennial section at Elizabeth Park.

by moths that apparently swarmed up from the Southwest. Great numbers of these moths have been noticed in the vicinity of Washington during the past month, hundreds of their broken wings having been seen near the Union Station. Lawns in the capital are being overrun by this pest.

How Worms May Be Destroyed.

If the worms have not yet attacked a field the most practical way to keep them out is to plow furrows in front of them, throwing the furrows in the directions toward which they are traveling. The worms will fall into the furrow and when this is full they may be killed either by dragging a log back and forth in the furrow or by destroying the worms in holes previously dug at intervals of 20 feet in the bottom of the furrow. Kerosene poured on them in the holes will destroy them.

If the worms are already in the field the following mixture which will attract the worms and destroy them should be spread about:

- 1 pound of paris green (poisonous),
- 50 pounds of wheat bran,
- Juice of one-half dozen oranges.

Bring this mixture to a stiff dough by the use of dilute molasses and scatter it amongst the worms. Care should be taken to keep this dough from children or domestic animals. Clean cultivation, rotation of crops, cleaning up of fence corners, close pasturage, and the burning over of waste grass land in the spring or fall, are good measures to prevent a recurrence of the army worm.

What to do for Lawns.

For small areas like lawns and pri-

vate grounds, the poison bait mentioned above may be used. Equally efficient is the application of a spray of one pound arsenate of lead dissolved in 25 gallons of water. If the powdered arsenate of lead is more easily obtainable, one pound of this may be mixed with 8 pounds of flour and dusted on the grass where the worms are feeding. It must be remembered that arsenate of lead is a deadly poison to men and animals, as well as to army worms.

NEWPORT SHOW.

The premium list of the mid-summer exhibition of the Newport Garden Club and Newport Horticultural Society to be held at "Belcourt", August 13-15, has been issued. The combined prize lists of the two organizations is a tempting one for any one having the goods to show. The affair comes off at one of the finest of the noted Newport private estates at the height of the gay season and will be viewed by the elite of the country who make their summer sojourn at the famed watering place. There will be the possibilities of big business for those who put up worthy exhibits, and for those who appreciate fine garden and greenhouse products there will be plenty to admire in the finished productions of the skillful gardeners who preside over the magnificent private estates which Newport boasts. Intending exhibitors can procure copies of the premium list from the secretary of the Committee of Arrangements, William Gray, Bellevue Ave., Newport, R. I.

Mr. and Mrs. J. H. Troy and son of New York, are in California on their way to the British Northwest.

EVOLUTION OF A FLORIST ESTABLISHMENT.

The accompanying pictures show a rejuvenated florist stand near Narberth, Pa., about eight miles from City Hall, Philadelphia. The place is located on one of the thoroughfares between Philadelphia and its suburbs, on the main line of the Pennsylvania Railroad, and has enormous traffic passing its doors. The place was kept for many years by florists. When it was at its prime as a florist establishment, it was in charge of Mr. Kreuger, who has since given up growing florists' stock, and located in Reading Terminal, Phila. But as the place was very old, it finally decayed, and could not be resurrected as a greenhouse establishment without rebuilding every square foot of glass. So when the present owner took hold of it, he de-

cided to turn it into a nursery, as the locality seemed favorable for that enterprise. The home grounds, as shown in these pictures, amount to two and one-half acres, with three additional acres rented from adjoining property owners on three sides. A general line of nursery stock is grown. The owner does not attempt to grow all he sells, largely using the grounds as a warehouse and transplants to this nursery trees from wholesale establishments where land is cheaper, and shade trees and evergreens can be grown for less money than they can in this high-priced section. Evergreens appear to be in most demand; shade trees, vines, and shrubbery next; and herbaceous plants in comparatively small demand.

Picture No. 1 shows a section of the drive, bordered with a low hedge and climbing roses on cedar poles. In the background is seen the original office, and the out-buildings. No. 2 shows the 12-foot privet hedge on the northwest side of the drive, and climbing roses trained on cedar poles. No. 3 shows the new office building just completed at a cost of about seventeen hundred dollars. It contains two rooms, toilet, and closets, and is heated by a hot air furnace. It also has a deep cellar for the storage of bulbs and roots. The front hedge is of golden privet, and is quite effective. This nursery has been named "The Garden." The owner is A. E. Wohlert, landscape gardener, Narberth, Pa.

MASSACHUSETTS AGRICULTURAL COLLEGE.

The Department of Floriculture of the Massachusetts Agricultural College is to have a booth at the S. A. F. Convention in Boston. Professor A. H. Nehrling, head of the Department, will be in charge and he will be glad to give information on any point concerning the work of the College, its courses and equipment. Illustrated pamphlets may be obtained at the booth telling of the work of the Department of Floriculture. The Department was established in 1906 and has the proud distinction of being the first of its kind in this country. By many, especially from the standpoint of the eastern grower, it is considered the best equipped institution for floricultural work. In recent years the Department has been strengthened by additional equipment for instructional work both in the class room and laboratory.

NEWS NOTES.

Flushing, Mich.—Mrs. Henry Welfare's greenhouses have been purchased by H. A. Moss.

Princeton, N. J.—The firm of Stockton & Howe has dissolved partnership, Mr. Howe retiring from the business.

Conshohocken, Pa.—Willis S. Baldwin has purchased the business and leased the greenhouses of Winfield S. Harry.

East Weymouth, Mass.—The greenhouse property at 261 Middle street, owned by Mrs. Lizzie Hanson, has been sold to E. Edward Buchey of Woburn.

"Horticulture has given satisfaction to me."

West Va.

Respectfully,

Y.

CATALOGUE RECEIVED.

Charles Frost, Kenilworth, N. J.—The Kenilworth Strain of Giant Pansy Seed. As remarked in our notes a few weeks ago. Mr. Frost has been carefully working up his giant pansy strain for many years and his seed beds bear witness to the splendid types he has developed and fixed. The catalogue just received lists them—and anyone interested in pansies will find it very interesting. The new "upright" pansy Princess is a leading item.

ROBERT CRAIG AND P. WELCH.

On the sands at Old Orchard, Me.

PHILADELPHIA NOTES.

In Barnegat Bay, "the fish are running fine and there are no mosquitos." When a man tells us that two and two makes six, we listen to him with much admiration. And do we plunge in headlong and invest? We do not.

John Burton reports a pleasant auto trip with the "old guard" of Montgomery county. Six cars went to Tuckerton and Beach Haven on the 18th and returned to Philadelphia on the 19th inst. Incidentally the party gave a passing call to Commodore Westcott and his good lady at Waretown, where they spent a pleasant half hour.

"Overbrook Gardens" is now a thing of the past. Edward A. Stroud has moved that proposition to his more elaborate place at Strafford. Henceforth the business will be carried on under the name of the "Strafford Flower Farms." Mr Stroud evidently means to go in more strongly for retail business than he has been doing in the past. Joseph Russell will be manager under the new arrangement. "The Main Line Floral Guide," an eight-page periodical, is the organ, and is a rather original idea. Far more effective than an ordinary catalogue, and yet in the long run costs very little more. The only trouble is it makes the boys think and sweat to get it out—and of all things that is what we all hate to do.

Visitors—R. T. Brown, Cottage Gardens Co., Queens, N. Y.; Wm. Mangen, So. Bethlehem, Pa.; Henry Fischer, Raspeburg, Md.; Wm. Plumb, superintendent of Floriculture, San Francisco; Edward McCallum and wife, Pittsburgh, Pa.

MILE HIGH QUALITY

CYCLAMEN, LORRAINE BEGONIAS and PRIMULA OBCONICAS are our leading specialties, and our cool nights enable us to send out stock that is sturdy and strong. All the stock offered below is of Mile High Quality. All will be shipped in paper pots which make a light package that will take second class express rate and will travel safely any distance. Today, for example, we shipped to such widely separated states as Texas, Utah, South Dakota, Wisconsin and Maryland. Just send the order, we will get them to you in good condition. Set that empty bench to earning money.

CYCLAMEN in Red, Pink, Salmon, White and White with Pink Eye

3 inch at 8c.

4 inch at 20c.

LORRAINE BEGONIAS—Sturdy and Strong.

2½ inch at 15c.

3 inch at 25c.

PRIMULA OBCONICA

2 inch at 4c.

2½ inch at 5c.

These are surprisingly free from objectionable colors. Remember that all stock offered is ready to shift up into larger sizes. If you buy in lots of a thousand or more, ask for special prices.

THE GARDENER'S PROGRESS.

Editor HORTICULTURE:

Summed up, the contention of "Another Assistant," in your issue of July 18, is that after fifteen years' experience a gardener should be qualified to assume the full responsibilities of his profession. Few will disagree with him on that point and I believe that "An Assistant" who wrote in the previous issue will concur that if a man has had the opportunity of fifteen years of thorough training and is then incompetent, his competency as a gardener is never likely to prove of much. I infer from "An Assistant's" remarks that he had in mind a class of so-called assistants which exists within the profession, just as does the class of so-called gardeners, and that his grievance is directed against this class and not towards assistants that possess the ability that is manifested by the contributors in the arguments they present.

Assistants are no more to blame for the existing unfavorable condition than these gardeners who profess to be competent but who are no more so than the assistants who menace the profession by seeking to assume the charge of an establishment with no more knowledge of gardening than what was acquired through two or three years' service in greenhouses, and who will bid for a head gardener's position at a salary so low that no able gardener can compete; and whose action invariably results in another score against the profession by some inconsiderate estate owner who knows so little about horticulture himself that he cannot distinguish between a competent and an incompetent gardener when it comes to selecting one.

This is the age of young men, and opportunity awaits the assistants who are thoroughly proficient in their profession, which must include executive ability as well as ability to produce; and such young man should not permit themselves to be held in the background, for if they do how is the good in them to be uncovered? We have an illustration right at hand in your two correspondents. Their articles have elicited favorable comment, but they conceal their identity behind nom-de-plumes. Able men are continuously sought and there is no telling what their signatures, disclosing the authors, might have brought to them.

What "Another Assistant" states regarding the horticultural societies is unfortunately true to a considerable extent; but there is a growing tendency to make the meetings of local societies more educational and many of them now manage to have an essay or lecture at each meeting. Assistants are also being recognized; for one of these societies has inaugurated a plan to award a prize for exhibits made at each monthly meeting by assistant gardeners, and this is likely to be followed by other societies as the practice comes to their notice. The co-operative movement between various societies will bring about more serious consideration of the problems which confront the profession of gardening than has heretofore been given to them.

As an answer to the question—"If your present day gardener has gained success in this slipshod manner, what

is to hinder the assistant from accomplishing the same end?"—let it be said that the day of the "rule of thumb" methods is a thing of the past. Efficiency now counts with those engaged in gardening just as it does with those engaged in any other vocation. If it has accomplished nothing more, the recent controversy on the gardeners' problems has been fruitful in stirring up discussion among those most vitally interested—the gardeners themselves. We should have more of it and HORTICULTURE is to be commended for the space it is giving up to it.

M. C. EBEL, Secretary.
National Ass'n of Gardeners.

ABILITY THE JUST TEST IN GARDENING.

My worthy friend, from Newport I
Sings once again with inspired lay,
For uplift leaves us this solution—
"My children, you must all obey."
But this is not dame Natures way;
Since dawn of time, she's pointed aye,
Steadfastly to evolution.

Fast come the college graduates
To superintend the large estates
While we sit by, like headless buttons
They climbed not merit's rugged frame;
No reference bears their ex-boss' name;
They stand upon their college fame;
Not private flunkies, minus buttons.

Against such menace, what do we?
To all our great profession's free;
Admit it, make a true confession
Put on your kilts, I'll don my knickers
And stroll with you along the breakers,
There we'll agree to oust the fakers.
Injurious to the profession.

Let gardeners all united stand,
And haste the day in this fair land,
When we shall be forever free.
Why should it be, that wealth can tramp
On freedom, and men's character stamp?
Can wealth extinguish life's great lamp—
God's divine props to liberty?

EDWARD S. M.

July 20th, 1914.

A LILY FEAST.

A field of 50,000 lilies in bloom is certainly a rare sight outside of Japan. Yet that was the treat extended to the members of the Horticultural Club of Boston and a few other invited guests by R. and J. Farquhar & Co., on Thursday, July 16, when a party of about thirty gentlemen gathered around the hospitable board at the Parker House as guests of Messrs. Farquhar and were thence conveyed to Roslindale, where the aforesaid field of *Lilium myriophyllum* is now in full bloom and then to the extensive nurseries and greenhouses of the firm at Dedham.

Lilium myriophyllum we have illustrated and described before, on several occasions. Its wonderful fecundity is evidenced in the fact that Messrs. Farquhar have in the short space of time since receiving the first bulbs and seeds succeeded in producing 50,000 blooming bulbs. A most significant fact is that this exuberance is all displayed in the New England soil and climate—surely a supreme test for such a plant. Here is a bulb with unlimited commercial possibilities for forcing or for the garden and we do not have to look to Japan, Holland or any other foreign source for our supply. Among the guests were Robert Craig of Philadelphia and Judge C. W. Hoitt of Nashua, N. H., both of whom made spirited addresses at the symposium. It was learned that Messrs. Farquhar will add another very large house to their Dedham range this season.

Mignonette

BODDINGTON'S MAJESTY

THE finest of all the Fancy Varieties of Mignonette for Winter forcing; seed saved from select spikes under glass. We have received many testimonials with regard to the excellence of this variety.

Trade Packet 60 cts., 1/8 ounce
\$1.00, ounce \$7.50.

"These Prices are for the Trade Only."

HYDRANGEA OTAKSA

We have some of the largest, finest, and most perfect specimens of hydrangeas in half-barrels that we have ever seen. Plants are just coming into bloom, and are beautiful symmetrical specimens covered with bloom, each plant having from one hundred to two hundred flowers. We have over three hundred of these fine plants in shape for immediate shipment, and every plant is a perfect specimen. There is nothing so magnificent for summer decoration as these large hydrangeas. They are very showy.

\$7.50, \$10.00 and \$15.00 each—according to size and number of blooms.

WINTER-FLOWERING ROSES

If you have not secured all the stock that you can use for planting for winter-flowering, we still have a very fine stock of the following varieties, which we can offer in perfect condition, ready for immediate shipment. Stock is gilt-edged in every way—extra strong, heavy plants from 4-inch pots. If you can use any, we will be glad to quote low rates. Write us the number you can use, and we will quote by return mail.

EXTRA LARGE SPECIMENS FOR JULY AND AUGUST FLOWERING

ney, American Beauty, Lady Hillingdon, Richmond, Mrs. Chas. Russell, Mme. Cecile Brunner, or Mignon, or Sweetheart.

FERNS

There is nothing better for summer use than the fine varieties of NEPHROLEPIS. We offer a nice stock of the following varieties, well established plants ready for immediate shipment.

Nephrolepis elegantissima (The Tarrytown Fern), 3½-inch, 25c. each; 6-inch, 50c. each; 8-inch, \$1.00 each.

Nephrolepis magnifica, 3½-inch, 25c. each.

Nephrolepis muscosa, 3½-inch, 25c. each; 5-inch, 50c. each.

Nephrolepis Harrisii, 6-inch, 50c. each; 12-inch—very large plants, \$5.00 each.

Nephrolepis Bostoniensis, 6-inch, 50c. each; 12-inch—very large plants, \$5.00 each.

Pteris Wimsettii multiceps—fine hardy fern—3½-inch, 15c. each.

Small Ferns for Fern Pans. A fine assortment. 2½-inch, \$4.00 per 100.

A BIG PEONY DEAL.

T. C. Thurlow's Sons of West Newbury, Mass., have recently purchased of E. J. Shaylor of Weston, Mass., his entire collection of peonies with the exception of his own seedlings which he reserves. To these he will now give his whole attention and expects to produce some new varieties which will equal any that have ever been put on the market. Mr. Shaylor has spent a great deal of money in procuring the very best varieties in Europe and in this country and was awarded a gold medal by the Massachusetts Horticultural Society two years ago for his well directed efforts, the excellence of his exhibits and his valuable services in the interest of correct nomenclature.

The Peony lovers of Massachusetts are indeed fortunate in retaining the collection so near Boston, as, combined with the peonies which the Thurlows already have, this, no doubt, makes the finest collection of really meritorious peonies in this country. It is interesting to recall that the late T. C. Thurlow, father of the present owners, sold out his collection of peonies to the Chicago Carnation Co. fifteen years ago. This sale, and the publicity attending it, gave commercial peony growing more impetus than probably any other one thing. The Thurlows were this year recognized as the pioneer peony growers of America by receiving from the Massachusetts Horticultural Society their gold medal for popularizing the peony.

E. J. Shaylor commenced growing seedlings in 1900. His standard was set high, for unless a seedling showed up well in comparison with European specimens, he discarded it. The field of improvement as he saw it lay in producing something a degree higher than anything already in his collection. His seeds were selected only from a very few of the choicest varieties obtainable, such as Lady Duff and Mme. Jules Dessert, both of which are good seeders.

The only seedling yet shown by Mr. Shaylor before the Massachusetts Horticultural Society was awarded a first-class certificate (Miss Georgianna Shaylor). Mary Woodbury Shaylor and others may possibly be exhibited next season. There are probably ten thousand seedlings in his collection at the present time.

CRATAEGUS PYRACANTHA.

A shrub which is hard to find among the nurseries in large stock is the *Crataegus pyracantha*, Evergreen Thorn, which is a native of southeastern Europe. It is a handsome shrub attaining a height of from 10 to 20 feet in its native home, but seldom reaching over 6 feet in the northern states. It is highly prized for its brilliant scarlet fruits which stay on the plant until early spring, retaining their color throughout the winter, and making a handsome effect among the dark shining green leaves. The type has proven hardy in protected situations in eastern Massachusetts.

The variety *Lalandi* is much used in England for covering walls, and one wall, that at Belvoir Castle, some 200 feet long, was covered to a height of ten feet by this shrub, which through its habit of producing long slender branches, makes a good climber. The variety is said to be much harder than the type, and can be procured from several of the nurseries.

Both the type and its varieties may be propagated by cuttings of the mature wood taken in late fall. These should be kept growing, after having rooted, in a warm greenhouse. Tongue grafting on cotoneaster or any common *crataegus* is also successful. A slower and more tedious process is by layering in summer, but usually the quicker methods are preferred. Seeds of the type may be sown in late fall just before the ground freezes, which will germinate the first year, but will need protection from the sun the first summer.

As an ornamental plant for landscape work the type ranks equally with *Ilex crenata* and other broad-leaved evergreen shrubs for beauty, grace of habit, and color effect. Its thick mass of branches, which sweep the ground and which are covered with sharp thorns make an impenetrable barrier, although its use as a hedge is not recommended.

PRINCESS. 20—The New Upright Pansy

This strain is entirely distinct from all others. It is absolutely compact, upright growing and extremely weather-proof, enduring many storms without damage to its flower. The flowers are mostly blotched and frilled like the Masterpiece, of good form and heavy velvety texture, on heavy stems carried well above the foliage. Attractive by the brilliancy of its colors.

500 seeds 25c. 1000, 50c. 1/4 oz. \$2.50 1 oz. \$10.00

- 34—Bronze—Brown and copper shades mixed.
- 36—Fancy—Rich colors, mostly margined.
- 38—Mme. Perret—Red and wine shades
- 40—Zebra—Fine striped mixture
- 42—Adonis—Light blue white center.
- 44—Black—Almost coal black
- 46—Black with bronze center
- 48—Lord Beaconsfield—Purple shaded white
- 50—Bronze—Beautiful Bronze
- 52—Bronze with yellow center.
- 54—Velvet Brown with yellow center
- 56—Havana Brown.
- 58—Havana Brown with yellow center.
- 60—Cardinal—Curled, bright red, dark blotch.
- 62—Cecily—Steel blue, margined white
- 64—Goliath—Large curled yellow blotched
- 66—Hero—Curled deep blue shaded white

The KENILWORTH Giant Pansy

seeds are all grown by myself and are offered in the following mixtures and separate colors:

- 22—**KENILWORTH STRAIN** The flowers are of perfect form and substance; many of the immense flowers are from 3½ to 4 inches; it is a striking collection of beautiful colors and markings, rich with shades of red, brown, bronze, mahogany and many others too numerous to mention. Light, Medium or Dark Mixtures.
- 24—**KENILWORTH SHOW** An extraordinary strain of large flowers; the immense flowers are of circular form and great substance; a beautiful collection of colors and markings.
- 26—**KENILWORTH CUT FLOWER MIXTURE**—Is a distinct class by itself, surpassing all other strains as a cut flower or for exhibition purposes, for inside or outside growing; the large flowers are carried erect above the foliage on heavy stems, 7 or 8 inches long, in the most graceful manner, and stand the hot, dry weather well.
- 28—**MASTERPIECE**—A remarkable type; the curled, wavy petals giving the flower a double appearance, large flowers of great substance, on long, strong stem.
- 30—**GIANT THREE AND FIVE BLOTCHED PANSIES**—A superb mixture. Flowers large and of circular form and of great substance. The display of coloring is unsurpassed. A combination of almost every shade of rich velvety colors, reds are particularly conspicuous; the petals being distinctly marked with three or five large dark blotches.

NEW SEED NOW READY.

All sorts and mixtures, except the new Pansy Princess, are \$5.00 per oz., \$1.25 per 1/4-oz.; 5000 seeds, \$100; trade packet of 1000 seeds, 25 cents; any 5 pkts., \$1.00. Please order by number.

- 68—Emp. William—Ultramarine blue velvet eye
- 70—Eros—Velvety brown, yellow margin
- 72—Emp. Franz Joseph—White blotched blue
- 74—Emp. Frederick—Maroon with gold edge
- 76—Fairy Queen—Azure blue white edge
- 78—Freya—Purple violet, white edge
- 80—Gold-Edge—Velvety brown, gold edge
- 84—Superba—Orchid tints of red and wine
- 86—Sunlight—Yellow with brown blotches
- 88—Andromeda—Curled apple blossom
- 90—Colossea Venosa—Light veined shades
- 92—Almond Blossom—Delicate rose
- 94—Aurora—Terra cotta shades.
- 96—Mammoth—Greenish yellow shades
- 97—The above 7 named Orchid mixed
- 98—Indigo Blue—Deep velvety blue
- 100—Light Blue shades
- 102—Minerva—Red ground, violet blotched
- 104—Meteor—Bright red brown
- 106—Pres. McKinley—Yellow, dark blotched
- 108—Mahogany with white margin
- 110—Mahogany with yellow margin
- 112—Mourning Clock—Black with white edge
- 114—Purple—Large rich deep color
- 116—Peacock—Blue rose face white edge
- 118—Psyche Curled white, five blotches
- 120—Pres. Carnot—White, five blue blotches
- 126—Red—A collection of rich red shades.
- 128—Red Riding Hood—Curled and blotched
- 130—Rosy Morn—Purple crimson, white edge
- 132—Striped on lilac ground
- 134—Striped on bronze ground
- 136—Victoria—Blood red, violet blotches
- 138—White, Large satiny white
- 140—White with violet blotch
- 142—Yellow, Large golden yellow.
- 144—Yellow with dark blotch
- 146—34 to 144 mixed in equal proportions

For fuller description send for catalogue

RAINBOW is a mixture of the most beautiful, gorgeous colors; blotched, striped, veined, margined, etc. With every \$1.00 worth of pansy seed I will send, free, 1000 seeds of Rainbow, and with other amounts in like proportion.

Obituary

Isaac Boyd.

Isaac Boyd, contractor and landscape gardener, who had planned and had charge of the work of beautifying the gardens of many residences on the Main Line, was buried Sunday, July 12, in St. Paul's Lutheran Church Cemetery, in Ardmore. He died Thursday, at his home on Holland avenue, Ardmore, Pa.

William Meier.

William Meier, fifty-four years old, a gardener of Jefferson county, Ky., succumbed to cancer of the stomach on July 10 at his home, on the Durrett lane, off the Preston street road, near Louisville. He was stricken ill two months ago. He was a native of Jefferson county, being a son of the late Henry Meier, a gardener.

His widow, five sons and two daughters survive him.

Andrew Harth.

Andrew Harth, a florist of Millburn, N. J., died July 12, after a long illness, in his sixtieth year. He had been in poor health for more than a year, suffering from neuritis. Born in Germany, he came to the United States in 1876 and settled in Brooklyn, from which place he moved to Millburn

twenty-two years ago, locating on the premises now occupied by the family. A widow, two sons, John Harth of Bay-side, Long Island, and Joseph of Millburn and two daughters, Misses Carrie and Angeline Harth, of Millburn, survive.

Mrs. Frank Beu.

Mrs. Margaret Beu, wife of Frank Beu, Chicago, passed away July 17, following an operation for cancer at the General American Hospital. No one—not even Mrs. Beu herself knew that their was anything serious ailing her and she was, as she has been for years, actively engaged in the florists' business till the last. Mrs. Beu was born in Germany, August 13, 1869, and came to Philadelphia with her parents when a young woman, when she afterwards married Frank Beu and moved to Chicago. For sixteen years they have been in business and have a residence and greenhouses at 4435 N. Crawford Ave., where a fine new store and flat are now under construction. One son,

Carl, associated with his father in business, survives. The funeral was held at Montrose chapel and interment took place in Montrose Cemetery, July 21.

LEAF SPOT ON NASTURTIUMS.

Dr. George E. Stone of Amherst, Mass., writes to a correspondent of HORTICULTURE, as follows—in reply to an inquiry about a new leaf blight which has occurred on nasturtium foliage:

"In regard to the nasturtium trouble, I would say that we find this to be a bacterial leaf spot caused by *Pseudomonas* sp. This is new to us, therefore we can recommend nothing in the way of remedial measures. It may prove serious, but more likely its occurrence in the future will be sporadic as was the case with the bacterial leaf spot of the geranium and also delphinium."

Dr. Stone would be pleased to hear from any others who have encountered similar trouble.

More Red Devil Cutters Used Annually Than All Others Combined

Boddington's Gigantic Pansies

Can be produced only from the giant strains. Our **CHALLENGE PANSY** seed contains only the giant self-colors, the giant striped and variegated and the giant blotched, etc., all carefully mixed in proportion. You could not buy better seed if you paid \$100 per ounce. Our Challenge Pansy seed during the past season gave unprecedented satisfaction, and every order booked last year was duplicated and increased this year. All the testimonials received mentioned specially the high grade of flowers—color, form and size of the individual blossoms. This year, by adding improved types, intending customers can absolutely rely on a duplication of this season's success with increased satisfaction. Our "mark" for this strain is "Challenge," and it is all the word denotes.

Pansy—Boddington's "Challenge"—All Giants

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said: "Why don't you call it Defiance?"

ROSES IN ROGER WILLIAMS PARK.

Roger Williams Park in Providence, R. I., has many attractions in natural beauty and historic associations, for which its repute has extended far and wide. Among its charms, perhaps not so well known, are the roses, and we

think our readers will agree that the picture which occupies our cover page this week fully justifies Providence in feeling that her rose garden is something to be proud of. We are indebted to the Providence Journal for their kind permission to use the photograph.

Fred C. Green is superintendent of the Providence parks.

Medina, N. Y.—White Bros. are building four new houses, 25x250, in which they will grow White and Pink Killarney, Richmond, Sunburst and Mock roses. The Gasport houses have been torn down and moved to Medina. White Bros. have been heavy shippers of carnations and the quality always best.

The Ginger Jar

Referring to the forty-four ton Kelway order for the Free Seed Department, the congressmen seem to have been as fiercely opposed to it as they were to the twenty-cents-a-mile transportation graft. They favored both.

The Senate was against free seed. About the twenty cents a mile, we can't say but for ages they have always declared against the free-seed graft,—and then agreed to allow it—in committee, all for political effect. Both houses in unison.

So between the two houses on these two measures—their battledore and shuttlecock—what can the plain folks think? It looks like a case of "heads I win, tails you lose."

So both grafts keep merrily on—the twenty-cents a mile and the free seed. If the Akoond of Swat can improve on that let us hear from him. America is a very highly civilized country—in spots.

Here is a rich one from the New York inspection literature: "If the seed appears to contain considerable of such rubbish the buyer should insist that it be cleaned before he takes it, secure a reduction in price proportionate to the amount of impurity, or look elsewhere for his supply." In other words, according to the authorities of the great State of New York, the cleaner the seed the smaller the price! The worst of it is, New York is eminently fair compared with some other states—and Washington.

The foregoing extract is from Bulletin 378 of the Geneva Station. The same Bulletin enlarges on the law not being drastic enough,—like the fertilizer and foodstuff laws. As if seeds could comply with such conditions! Seeds are not a manufactured product, and attempts to apply such laws to them are unjust and ridiculous; and do more harm than good to the farmer and all concerned. If the farmer wants

to buy cheap seeds, it's because he wants to save money—not that the seed seller is a villain. You can make seeds so clean that the price will be prohibitory. GEORGE C. WATSON.

NEW CORPORATIONS.

BUSINESS POINTERS.

Bear in mind that brain will always dominate brawn. Whether you are going to be on top or bottom depends very largely on which you employ most industriously and effectively.

Where state laws and municipal regulations do not enforce the demand for cleanliness and sanitation, public opinion ultimately will. The dirty store is just as surely doomed, whether it is put out of business by the authorities or the consumers.

Keep tab on the new developments identified with extending the parcels

GLADIOLUS ROCHESTER WHITE.

We have received from Jacob Thomann & Sons of Rochester, N. Y., stalks of bloom of this fine white gladiolus novelty. The flower is the nearest to pure white that we have seen being absolutely without a mark and its qualities for shipping and keeping are unexcelled. It will be a splendid acquisition for the retail florist. The flowers now blooming are on bulbs that were started inside in pots in April and planted outside in May. The outdoor grown plants are nearly ready to bloom. James Vick's Sons have the exclusive agency for the sale of the bulbs.

Of Interest to Retail Florists

STORE LIGHTING.

The University of Iowa has just published a pamphlet by Arthur H. Ford, professor of electrical engineering, discussing some of the problems arising in the lighting of retail stores.

When considering the problem of store lighting, the average merchant will ask some or all of the following questions:

What are the characteristics of good lighting?

Will it pay me to improve the lighting of my store?

What kind of lamps shall I use?

How powerful shall they be?

What kind of lighting fixtures will harmonize with the furnishings of my store?

The purpose of this bulletin is to present information concerning these problems. This will enable him to pass intelligently upon plans for store lighting, or to suggest desirable changes in his present lighting system.

The show window, being a powerful magnet to draw trade, is given particular attention. A man will go toward a bright light just as surely as a moth will flutter around a candle flame. As a result, the show window should be especially well lighted. The mistake of using visible lamps in the show window to attract the attention of persons at a distance should be avoided, and dependence placed on a pleasing system of street lighting to accomplish this result.

The safest rule for the designer of a show window lighting system to follow is to arrange the lamps in such a manner that the light will shine on the goods and not into the eyes of the person looking into the window. This necessitates the locating of the lamps high up in the window and close to the glass as possible, in order to avoid objectionable shadows. The lamps should be provided with reflectors which are suited to the height and depth of the window trimming and the mounting height of the lamps. The use of reflectors which are especially designed for other purposes than the window in which they are used results in bad lighting. The only lamps that should be in view are well shaded lamps of low power which are used for purely decorative purposes.

Copies of this pamphlet may be obtained free of charge on application to the Acting Director of the University Extension Division, O. E. Klingaman, Iowa City, Ia.

WASHINGTON NOTES.

The army worm is devastating grain fields, lawns and parks in and about Washington.

Mr. and Mrs. William Marche are spending a two weeks' vacation at Asbury Park, N. J.

George H. Cooke was a member of a party which last week spent several days on the lower Potomac river fishing grounds.

Carroll Carrick, with Gude Bros. Co., will spend the next few weeks on a farm in Prince Georges County, making short side trips to nearby resorts.

Mr. and Mrs. W. F. Gude and family spent the week end at Old Point Comfort, Va. A trip was also made to Virginia Beach and Norfolk. Hardy Pritchard also accompanied the party.

The Department of Agriculture is in a fair way to lose the services of another of its most efficient officials according to a report that William A.

WILLIAM A. TAYLOR

Taylor, now head of the bureau of plant industry, and slated for the position of assistant secretary of agriculture, is to be chosen as the next president of the Michigan Agricultural College. It is stated that Jonathan D. Snyder, the present head of the college, has resigned, after a service of twenty years. Mr. Taylor is an alumnus of the college, having graduated therefrom in 1888. Three years later he was appointed an assistant pomologist in the Department of Agriculture and from that time on his rise in the department has been quite rapid. He has since been following in the footsteps of Dr. B. T. Galloway for when that official was made chief of the bureau of plant industry, Mr. Taylor was made his assistant, and when Dr. Galloway was made assistant secretary of agriculture, he became the bureau chief. Dr. Galloway's resignation which takes effect on August 1, would make Mr. Taylor his probable successor.

Flower Market Reports

BOSTON The weather thus far has not been conducive to special activity at the sea and mountain resorts and the flower trade of this market feels it quite seriously. The shipping trade to Newport, Bar Harbor, Saratoga and similar places during July has not been one-half of what it amounted to in the same period last year. American Beauty roses bring good money, everything considered, but are not as good as they might be. Other roses are at the lowest figure, sales lagging badly. Carnations still hold out although the asters are crowding in on them, but they are slow to move. Lilies more plentiful, lily of the valley normal as to supply and demand. Gladioli increasing and doing as well as could be expected. Cattleyas have been selling at the lowest point ever recorded here, but have now taken an upward slant. Sweet peas from outdoors are being received in large quantities—quality poor, sales slow and prices very low.

BUFFALO Business conditions have improved slightly and there have been a few good days amongst the quiet ones. Saturday found the trade good and a fair cleaning up by the wholesalers, except on roses of which there is an over supply, especially on poor quality Killarney, Taft and Maryland. The supply of carnations is gradually going down, but as the asters have not come on as yet, the carnations are still in need even if in poor quality. Some choice America, Augusta and Pink Beauty gladioli are in and have taken well. These are not local grown but shipments have come in good, considering the very warm weather. A wedding now and then has helped lily of the valley, lilies and other stock.

CHICAGO Mid-summer conditions prevail. The market is experiencing a quiet that has seldom been equalled and the sales have reached the lowest ebb of the year. A few flowers are always needed and the little demand is strongest for roses, which are of very good quality and are to be had in considerable variety. American Beauties are said by some growers to have reached the height of the crop last week and the cut is now diminishing. Asters are steadily gaining and while the greater part are rather short, there are now some with fairly long stems. As usual, carnations have almost disappeared with the coming in of the asters. Sweet peas seem to be making a summer of it, for the counters still contain a fair supply, mostly with short stems, however. Lily of the valley finds slow sales. A quantity of double gypsophila was shipped in from Denver and took well with those florists who are keeping up their window displays. There are more gladioli than the market needs and only the very best sell. Ferns are now selling from \$1.00 to \$1.50 per 1,000.

CINCINNATI There is plenty of stock of all kinds in this market, but not enough business to begin to use it all. Only the best of the strictly seasonable flowers are enjoying any demand. During last week roses would hardly move at any price. American Beauties were very good for the time of the year, but shared the same fate as

FIELD-GROWN CARNATION PLANTS

the other roses. The supplies of giganteum, auratum and rubrum lilies are easily sufficient for present needs. The average quality of gladioli is much higher than it was. The good ones sell well while the poorer ones have little or no market. The aster supply is increasing rapidly. Carnations continue to sell well.

NEW YORK Business is dragging along at summer gait and the majority of the stock coming in finds very indifferent sale. Prices are tending downward on most lines. There is, however, a narrow vein of good business running through it all and the very fancy grades of the good summer varieties of roses hold a steady value in the market. Of these we might particularly mention Francis Scott Key,

which like all Mr. Cook's roses is proving an ideal summer variety. Lilies, lily of the valley, gladioli, sweet peas, corn flowers, etc., are all over abundant. Cattleyas are scarce and have trebled in price. Carnations are few and the white ones are bringing good returns. Asters are short stemmed so far. Gladioli are of excellent quality.

PHILADELPHIA For mid-July business last week was fair, which is not saying a great deal. It was a steaming week. Humanity was steamed, and flowers about the same. Nobody seemed to think much of flowers, unless there was death in the family or some other extraordinary event, which made them imperative. Flowers of all kinds, both indoor and out-

Flower Market Reports

(Continued on page 121)

door, were soft and had little keeping stamina. The best on the list were asters, gladioli and roses. These had more substance and keeping qualities than most items. Asters were on the short side. More good ones could have been used. All colors of these were in demand: pinks, blues, whites—especially whites. A grower should always have more white proportionately, but many of them seem to overlook this very obvious market condition when doing their planting. Gladioli are much more plentiful and very fine stock as a rule. Most of these are from local growers, although there are still a few arriving from southern points. Outside of American Beauty, the best roses at present are: White Killarney, Pink Killarney, Maryland, Radiance, Sunburst and Taft—the latter on the scarce side. It is a very good summer rose, and though small is very desirable. Carnations and sweet peas have taken a back seat.

There is not much change in market conditions, only that the quality of the stock is somewhat better, thanks to a few showers the last week. Business has been exceedingly dull. There are plenty of first and second-grade roses, fancies selling best, but only few of these come in. Carnations are somewhat scarce and demand is good on light colors. Asters, gladioli, Shasta daisies and lilies command fairly good prices. Lily of the valley also holds its own.

The demand of the past week or ten days has been of sufficient volume to use up considerable of the large stock of flowers that has been coming into the market, and particularly asters, carnations and lilies. Carnations have been holding up well, for the middle of June usually marks their demise. Both gladioli and asters are coming in more freely and are finding a fair market because of the fact that they can be easily kept during the extreme hot weather. The new crop of American Beauty roses are also in and are in fair demand. Lilies are in good supply and quality.

PERSONAL.

Mr. and Mrs. Edwin Lonsdale are enjoying a visit in Santa Barbara, Cal.

John Meekin, formerly employed by A. W. Vose, is now foreman at Chipman's Greenhouses, Woonsocket, R. I.

Alfred Rehder, of The Arnold Arboretum is in Santa Barbara, Cal., on some Arboretum research work.

David Welch of Welch Bros. Co., Boston, started from Liverpool on his homeward journey to Boston, on July 22.

John Miesem, Elmhurst, N. Y., has returned from his European trip, much to the delight of a bunch of lonesome friends.

Jackson Dawson of the Arnold Arboretum is proudly announcing to his friends the arrival of a grandson who is to bear his name. To him the White medal of honor is to be bequeathed and he is already slated for high achievements in the realm of advanced horticulture in the good time coming.

Clubs and Societies

NASSAU COUNTY (N. Y.) HORTICULTURAL SOCIETY.

The monthly meeting of this society was held Wednesday, July 8, at Pembroke Hall, Glen Cove. Special prizes for the fall shows were received from C. F. Cartledge, R. Meserole, W. R. Kinnear, E. M. Underhill and the Glen Cove Echo.

The exhibits at this meeting were more in number and better in quality than on any similar occasion for the last two or three years and gave the judges some work. Henry Gaut cleared the board in the three sweet pea classes, as well as receiving a cultural certificate for a vase of Isabelle Malcolm. Herman Boettcher was awarded a cultural certificate for fourteen vases of sweet peas in fourteen vases, and Geo. Ashworth honorable mention for a vase of Flora Norton Spencer.

A schedule was received from the secretary of New York State Fair to be held at Syracuse on Aug. 31, and it was resolved to make a collective exhibit there of vegetables representative of the society. It was also resolved to use the official judging scales of the national societies for carnations, roses and chrysanthemums at all future shows. A committee was formed to draw up a scale of points for judging vegetables.

Prizes for next meeting, Aug. 12, will be for six kinds of vegetables.

HARRY JONES, Corr. Sec'y.

The schedule of prizes for the fifth exhibition of Gladiolus Blooms, to be held in connection with the S. A. F. Convention at Boston, August 18-20, has been issued and those who are interested may obtain copies by applying to the secretary, L. Merton Gage, Wellesley, Mass. Upwards of \$200 is offered in cash prizes besides a number of cups and medals.

The Andover (Mass.) Florists' & Gardeners' Club will hold a flower show in the town hall, September 1-3. There is a fine list of special premiums, J. H. Playdon is chairman of the committee in charge.

The annual exhibition of the North Shore Horticultural Society, at Lake Forest, Ill., takes place as we go to press, and a report will be given next week. These events are always of a high order and the work mainly of the private gardeners of the large summer homes along the shore of Lake Michigan.

During Recess

Lancaster County Florists' Club.

On Thursday, July 16, about two hundred of us left Lancaster for Mt. Gretna, a noted summer resort adjacent to Lancaster, Harrisburg and Lebanon, the attractions of which are The Parade Grounds where the National Guards encamp each year, the Camp Meeting grounds with their numerous array of cottages and the Chataqua with its particular settlement, the noted Conawago Inn and the lake with its boating and bathing resorts. The committee, consisting of Elmer Weaver, Frank Kohr and J. Moore, managed the details of the affair and managed them so well that it was impossible to find one disgruntled mortal on the return trip home. Philadelphia was represented by Messrs. Pennock, Meehan, Fancourt, Liggett, Leo Niessen, Mosgrove, Fierstein, Connor and botanist George C. Watson, to whom the immense flora of the mountain was an open book. Other visitors were Mr. Nolan, of The King Construction Co., A. B. Carter, A. C. Marshall, Wm. Swayne, Mr. Bree-man from Harrisburg and Mr. Brown from Coatsville.

There was so much to see that a regular program was dispensed with, but a rain storm just before supper sent us back to the hotel and card games and children's sports were in order for an hour or more, and there was more human enjoyment piled into each minute than Mt. Gretna ever saw before from the time it was created up to July 16th, 1914, 6 P. M.

There was such a strong co-operation toward all having a good time that little of individual effort is to be noted, the most noted event being the winning of a hotly contested game of quoits by Mrs. A. M. Herr and Mr. S. S. Pennock with Mr. Brown of Coatsville as referee. Chas. Edgar of the B. F. Barr Co. kindly took charge of the visitors when they came back to Lancaster and saw them off on their various trains during the night.

The regular meeting of the club was called off for July and the next event is likely to be a visiting trip to see the Weaver asters and the Landis gladioli.

We all missed our Mr. Nagle and his quaint humor and were more than sorry to learn that he has taken up his abode in a hospital for an indefinite time with a very annoying strain of his back.

ALBERT M. HERR.

The Florists' and Gardeners' Club of Baltimore will have their annual picnic at Reul's Park, Middle River, Md., on Monday, July 20.

HAMMOND'S GRAPE DUST

**For Use Against
Mildew and Blights**

GRAPE DUST is a readily diffusible, light-weight powder, Fungicide, for destroying Mildew and preventing Blights; also for destroying the Aphid and Black Fly. It is packed in 5 and 10 pound packages; also in 25 pound bags, 100 pound kegs, and barrels of 225 pounds, net. Kept in stock and sold by the leading Seedsmen in America. Dust by use of bellows.

EXPERIENCE OF FLORISTS AND GARDENERS MILDEW ON ROSES, CARNATIONS, ETC. IT IS SIMPLE AND EASILY APPLIED

Staatsburg, N. Y., May 25, 1908.

Mr. B. Hammond.
Dear Sir: Replying to your inquiries regarding "Grape Dust," would say that we use it solely on Roses, Carnations and Chrysanthemums. As a fungicide we have not found anything to equal it; it is simple and easily applied. We close down the ventilators and fill the house with dust blown through the bellows; when the dust has settled down we ventilate again, putting on a little air as required. We have been using your "Grape Dust" with good results for the last four-ten years.
Yours truly,
JAMES BLAIR.

Flushing, N. Y., Aug. 1889.
I find your "Grape Dust" the most efficacious remedy for "Mildew" on roses that I have tried, and cheerfully recommend it to the trade.
Yours truly,
CHAS. P. ANDERSON.
The John Henderson Co., Rose Growers.

Easthampton, Mass., April 4, 1889.
The "Grape Dust" is sudden death to Mildew in greenhouses.
E. A. BRAINERD, Florist, 7 Main Street.

ROBERT SIMPSON, Rose Grower.

Clifton, N. J., Oct. 11th, 1907.
Dear Mr. Hammond: In reply to your inquiry regarding my experience with "Grape Dust," would say that I am glad to be able to say a good word for the article in question, because I have found it so generally satisfactory when used for Mildew on roses. I do not know anything about its constituents, nor do I care so long as it does the work and is as economical as anything else on the market. During the summer when the steam pipes cannot be brought into use to check Mildew, and dusting over the foliage has to be resorted to, we prefer to use Grape Dust rather than Sulphur, because it is much lighter and finer in texture; a given number of pounds will cover more than twice the number of plants; will cover them more thoroughly, and can be put on with a bellows in about one-fourth the time that would be required for Sulphur. The fact that I have used it continuously for ten or twelve years should prove to you that I consider it the best article on the market for the purpose for which it is used.
With best wishes, I am yours very truly,
ROBERT SIMPSON.

Poughkeepsie, N. Y., Jan. 25th, 1912.
Benjamin Hammond, Esq.
Dear Sir: Please send me 25 lbs. "Grape Dust" as soon as possible. I find it is the only thing for Mildew on Roses. We have used it successfully for many years past.
Very truly,
CONRAD C. GINDRA.

First used in California in 1890 at Menlo Park, San Mateo County.

HAMMOND'S SLUG SHOT WORKS, BEACON, (Fishkill on Hudson) N. Y.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$2.75 per 112 lbs.; \$12.50 per 560 lbs.

Stumpp & Walter Co.
30-32 Barclay Street, NEW YORK

IMP. SOAP SPRAY

Is a scientifically prepared compound that is highly efficient for ALL insect pests. Why bother with several sprays when this will answer every purpose throughout the year?

LOOK FOR THE IVY LEAF TRADE MARK.

Ask your dealer or write
EASTERN CHEMICAL CO., BOSTON

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.
Bag of 100 lbs. \$3.50.

Let us quote you prices in quantity.

OLD BONES AS FERTILIZER.

Dear Editor:

If any of your readers can give some in-
formation about using old bones to ad-
vantage in the field or greenhouse soil, the
writer would be very grateful. We have
some that have become very hard from
lying in the sun; in fact, too hard to use
safely in the bone-grinder, as there is
danger of breaking some of the teeth.
What shall we do to facilitate the grinding
of this hard bone and thus cheat the rag-
man and feed the plants?

ECONOMY.

If "Economy" has some grapevines
or apple trees, the bones may be buried
whole underneath them and will be
absorbed. But if it is desired to grind
them they can be quickly softened by

GREENHOUSE GLASS

OUR PRICES WILL PROVE THIS.

CHICAGO, ILL.

IF YOU ONLY KNEW what a good leave the METROPOLITAN PATENT-ED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the glass is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

WHEN YOU BUY—GET A KROESCHELL THE BOILER OF GENUINE EFFICIENCY

Expressions from Men Who Know Boilers

Kroeschell Replaces 4 Cast Iron Boilers

Previous to 1909, Mr. Schultz, of Menominee, Mich., heated his entire plant with cast iron boilers. It has been claimed that cast iron boilers are superior to the Kroeschell. Mr. Schultz is now heating 18,000 sq. ft. of glass with the Kroeschell which was installed in 1909, and they are required to fire same only twice a night. The following letter speaks for itself:

"We do not have the least trouble to maintain about 60 degrees in the coldest weather. Your Kroeschell Boiler is the best I ever had. Before I heard about your boiler I had four cast iron boilers, and I would not part with the Kroeschell for a hundred cast iron boilers now."

Getting Down to Brass Tacks

THERE is a lot of "hot air" about greenhouse constructions. Yes a lot of it!

So anxious are the building concerns to be considered leaders in things new—that they are often lead to take some little unimportant improvement to their construction and exploit it as if it were going to revolutionize the entire greenhouse building code.

Only the other day I read an ad. of a concern who made the astounding statement that they had made a tremendous improvement in greenhouse construction by abandoning for all time the **clamp** column fittings and adopting a "bolted through" one. It was exploited as a great discovery and something entirely new. As a matter of fact it has been used by another concern for at least thirty years.

Talk all you will about various improvements in private greenhouse construction, but when you get right down to brass tacks, there have been no really important developments since the introduction of the U-Bar. No one denies that. Ever since then—in spite of all the stones thrown at it) all builders have promptly adopted as far as possible U-Bar structural features.

The curve eave and 24 inch glass, just for example. But putting a curved eave on a house, does not make it a U-Bar curved eave house. There is **only one** U-Bar curved eave house, and that's the house made with the U-Bar. Other curved eaves may look like it but that's the **only** way they are like it.

Send for our new catalog. Or send for us. Or both.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Camellias

Camellias should be kept as cool as possible. A thin shade should be given to protect them from the sun. Keep the air moist by several dampings down. See that they have plenty of ventilation at all times and are given enough of room so they will not be crowded. They must not be allowed to stand dry for any length of time; this is a very important point. These plants suffer from insects such as mealy bug, red spider and white scale. Where scale shows itself, sponge with some good insecticide such as Aphine, Nicotinic acid or many others.

Care of Asters

When the summer is hot and deficient in moisture it is very hard to have good crops of asters. In some cases artificial watering in some form can be applied. But do not water unless you can do it thoroughly; it is far better to keep the surface tickled. It is really surprising how much drought the plants will stand if the surface soil is kept constantly stirred with the cultivator. But where water is near at hand it pays to have them watered copiously at least once a week and as late as you can get between them. When so large and branched that the ground is covered, a good soaking without the hoeing will not hurt, but their success is assured by that time. Look out for black aster beetle. Paris green, used at the rate of one pound to 200 gallons of water and applied through the fine misty sprayer will soon make them disappear.

Amaryllis

Some keep amaryllis in the greenhouse, but I prefer to have them in frames, as I think you can make conditions more to their liking when grown here. The pots should be plunged which will make less work in watering. The sashes should be raised both top and bottom a few inches and left this way all the time giving just enough shade to keep the foliage from burning. Amaryllises should be freely syringed, which also helps to keep down mealy bug and red spider. Give them liquid manure at least once a week. Care and attention that you give them now will not be lost, but will result in good strong bulbs by fall.

Mr. Farrell's next notes will be on the following: Aspidistra; Care of Chrysanthemums; Dahlias; Hollyhocks; Orchids; Sowing Myosotis and Daisies.

Mulching Compost

All bench crops intended for fall and winter cuttings will soon need some feeding in the way of mulches. By preparing a mulch mixture now it will have a little time to stand before being applied. It should be made rich, say half and half of new loam and well decayed cow manure. This compost should be worked over and over to make it fine and mixed well together. Where you do not get it fine enough use a $\frac{3}{4}$ inch screen. Place under cover or the heavy rains will leach out the plant food. There is no need of mixing bone meal or other fertilizing material as all these can be applied to the bed before the mulch is placed on.

Primulas for Spring Flowering

Primulas sown now will grow into fine stock for spring flowering. Where primulas are grown on without a check they will come into flower from six to seven months after sowing the seed. Use pans or shallow boxes and a compost of equal parts of loam, leaf mold and sand. Give the flats a good soaking of water before sowing the seed and let it have time to soak in. Do not sow too thickly. Just press the seed in and keep shaded and moist until they begin to germinate when they should be given a little more light, but not full sun. The young seedlings will have made enough of headway in six or seven weeks to be pricked out into other pans or flats. During this period a frame is the best place for them. Raise the sashes both top and bottom about 6 or 8 inches and shade them. Give a light spraying every good day and when they show three or four good leaves they can be potted into small pots and still kept in frames until the fall.

Labeling Plants

When we planted out our stock we were probably in a great hurry and overlooked placing good stout labels to each kind. Where this was neglected now is a good time to look them over and see that a good durable label is given to each variety.

The Special Convention Number of Horticulture

WILL BE ISSUED ON AUGUST 15

This will be an issue of exceptional interest and will be widely circulated and widely read. Its value as an advertising medium for all floral and horticultural material cannot be over estimated. S. A. F. trade is always worth a special effort at Convention time. Send your order in early and it will have our best attention.

Forcing Tomatoes and Cucumbers

Dear Sir—Having some thoughts to build a greenhouse for growing tomatoes and cucumbers I should like to have some information if you would kindly give me same.

Which is the best kind of a house adapted for this? Our preference would be for an even span, say about 100 feet long. Would you have the plants on bed, benches or pots? Please state also the temperature to be maintained for both kinds in the winter. Our idea would be a partition in the center.

I might say that I always enjoy reading your articles in HORTICULTURE.

Thanking you in advance for this and any other information you think would be valuable, I am,

N. J.

Yours very truly,

H. A. S.

In answer to the foregoing I would say first that an even-span house is well adapted for either crop. It would be of great importance to have a partition in the house, as these two crops require different temperature and atmospheric moisture. Tomatoes to be made a paying crop will want a light and tight house which should be high enough to allow of training the plants, which should be at least 5 to 6 feet above the soil in all parts. The temperature should be from 60 to 65 degrees at night; for dull days 10 degrees higher, and on bright days it can run up to about 80, but ventilate at about 72 degrees. If you could plan to have them on benches they would grow there best. They can be planted two feet apart in the rows and leaving about three feet between the rows. Give them a rich compost, say fibrous loam three parts, well decayed manure one part. To have a heavy crop they should be hand-pollinated every day. This can be done by going around on all bright days with watch-glass and tapping all open flowers, so as to collect the pollen, and when you have enough collected touch the end of the stigma of each open flower. While the plants are in bloom the atmosphere should be kept very dry as this helps out artificial aid in pollination. Train the plants to single stem, pinching out all side growths as they appear, but leaving the top for a leader. When the crop begins to swell start feeding with liquid manure once a week.

Cucumbers like a warm and moist atmosphere. When they are first set out they will require careful watering, but when they are three or four feet high they will take an abundance of water at the roots, with lots of syringing. It is then difficult to over-water them if they are healthy and the weather good. The best temperature is about 68 degrees at night, 70 being the extreme. In other words the temperature must be kept pretty even at all times. On bright days it should run up to 80 or 85 degrees and in dark weather 5 or 10 above the night temperature will be about right. Cucumbers like a good bottom heat and I think that a soil temperature of 75 degrees is not too high, although many growers theorize that it should not be higher than the night temperature of the house. This crop wants very careful ventilation. Give just enough each day to keep the temperature right. The ventilators should be raised a trifle as the temperature begins to rise in the morning and a little more added as may be necessary. Chills and drafts are always to be avoided. The atmospheric condition is what will require the time, labor, study and patience on the part of the cucumber grower. By condition of the atmosphere is meant temperature, moisture and ventilation. Give cucumbers a rich compost,—about the same as for tomatoes. If the soil is somewhat stiff add enough of sand to make it loose and porous. The cucumber bears two kinds of blossoms on different parts of the plant. The staminate or non-fruit bearing blossom is the first to appear. The pistillate flower, with the little pickle at the base appears later. In order to have a good set of cucumbers it will be neces-

sary to do some hand pollinating. This may be accomplished by the use of a camel's hair brush. In using the brush it is essential to touch each of the female flowers with the brush but first get enough of pollen from the male flowers. An occasional shaking of the plants when the air is dry will help materially in the distribution of the pollen. The distance to plant should be about three feet apart each way.

John J. M. Farrell

Dirca palustris

The Leatherwood, so called on account of the toughness of its bark, a native of the United States, with a range extending from New Brunswick to Florida, Missouri and Minnesota, and one of our best native shrubs for natural planting, is for some unknown reason receiving little attention from the nurseries.

It is a member of the family Thymeleaceae, to which belongs also the Daphne, and while it is not as beautiful as the latter it is fully as useful in its proper place. It should be planted in a good moist loam and does not mind lime, since it is to be found in deeply shaded situations on the limestone bluffs which line the course of the Alabama River, where it finds its southern limit. So far as the writer has been able to ascertain there are no insects or fungous diseases that attack the *Dirca*, although in 1896 there was reported a fungus, *Aecidium* sp., found on *Dirca palustris* in Winston County, Ala. The report does not state whether or not this fungus does any material harm to the plant.

The Leatherwood is not a conspicuous shrub in regard to flowers, although these are of a yellowish hue and appear early in the spring before the leaves, but is more valued for its habit in forming a symmetrical, almost tree-like shrub in favorable locations, with such thick and luxuriant foliage as to make an impenetrable screen four to five feet in height. It is thus particularly useful in natural border planting in moist land.

All authorities state that the fruits, which are borne immediately after the flowers have fallen, are red and drupe-like. While this may be true of the shrub in favorable localities, we in the north rarely see the fruits get red; in fact, they drop before they are hardly yellowish, a habit of most of our native moisture-loving plants. This makes the seed hard to obtain in sufficient quantities for propagation, although it germinates readily. The best method aside from propagation by seed, for increasing this plant is by layering in June, a method which is very successful.

The Leatherwood, as I have stated, derives its name from the extreme toughness of its bark, which, when taken from a well developed stem will tax the strength of two men to break it. It was used by the Indians and early settlers for string, thongs and ropes and in the manufacture of baskets. It has certain medicinal qualities as an emetic, and was not to be overlooked as a cure for toothache.

This plant, if more often found in nurseries, would, I have no doubt, find ready sale to planters, provided, however, it could be propagated in sufficient quantities to keep the price at a reasonable limit.

Herbert M. Canning

Brookline, Mass.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to THE EDITOR OF HORTICULTURE.

Painting

With the houses nearly, if not all planted, painting should not be put off any longer but should start at once. It will be difficult to get around after the plants grow up a bit, and it is therefore very necessary that the painting be done at once. Where it is possible, put several men into a house as soon as all the dirt is wheeled out, and let them finish the house right up before it is refilled and planted. Not being able to do this, however, should not keep anyone from painting, as the places hardest to get at can be done first, and the rest let go until its turn comes. In the modern wide and roomy houses plants will interfere but very little with painting operations, and painting can be done after all other work is completed. Needless to say all work should be well done. It does not pay to use cheap paint, for it is sure to crack and peel in time, and what is saved on the paint at first will have to be expended to scrape and sandpaper the wood and iron work next time. As to the thickness of the paint, see that the first coat is thin, just thick enough to keep it from running, also that it contains very little material besides linseed oil. You could mix in cheaper oils, but you would be stealing from yourself if you did that. Where white lead is used see that it is well broken before the paint is applied for white lead that has been standing in a keg for some time will not dissolve very readily when put into oil. The best way to unite the two is to take a pail of lead, pour some oil into it and mix and stir until the oil is all taken up. Then add more oil, stir some more, add oil again and keep this up until the paint is of the required thickness. See that all the materials are right, and that the work is done as it should be, if your work is let out on contract. The contracting painter may be a very good and honest man, but some of his men may be a trifle careless, and should this be so you could hardly expect to get your money's worth. It is not only the first loss that will be noticeable; you will find that if the one painting is not done well, the second will be much more difficult and expensive. Then there is the glass. A good painter will not smear as much paint on the glass as he puts on the wood, and if there are any that do this, make them wipe it up after them with a rag. A little of this will teach anyone the necessity of being careful, and better work will result. On many places this work is all done with the regular help, or by the proprietor himself. If this is the case it is well to instruct those that do not know, that it is absolutely necessary to keep clean, and not have the paint all over the hands and face. Lead is poisonous, and although very slow, it will affect some people sooner or later.

Wiring the Benches

As soon as it is necessary, the benches should all be wired, so that the plants can be tied as needed. Where the wires have been carefully cleaned and preserved it will be a very simple matter to get them and stretch them again. Where the wires are very rusty and weak, better throw them out, and secure new ones for it will be more trouble than a little to stretch them tight enough to look good, and do the work properly. Although we generally string up all the wires at once, we stretch only those that are really needed. There is not much difference in this, but we find it very much handier to do the tying when the upper wires are not there to bother. It is also more convenient to pick leaves, observe the plants and so on, for one can bend right over the plants, and see just what is what. See that the ends are well braced, so that there will not be any give whatever when all the wires are stretched later on. Should there be a give, it must be remedied, for the bottom wires would all loosen when the upper ones are stretched, and this would be bad for the looks of the house, and one could not proceed as rapidly in tying and so on, as when the wires are very tight. Syringing would prove more difficult, too.

Scratching over the Benches

In scratching over the soil in the benches, be very careful not to break up the soil too fine. It is best to leave plenty of lumps all over the surface, so that the water will stay where it is placed when applied with the hose. If the soil is broken up very fine, you will find that the water will soon run all over the benches, and that the surface will get hard and scummy, and it will be very difficult to keep in proper condition. Destroy all the weeds, for that is one of the objects in doing the scratching. Unless you have experienced growers doing the work, do not allow anyone to use srathers, or weeders. They are a very dangerous thing in the hands of an inexperienced man, and more damage is likely to result, than all the good that they ever done. The trouble is that the men are very likely to dig too deep alongside of the plants, and will thus disturb the roots, and thus check the plants. Where the soil is very hard and dry, it can be dampened down ever so little, to make it easier to break up, but use the fingers only, and do not go too deep, especially after the first working. In breaking up the soil, keep an eye open for any disease that may appear here and there, and for spot. This should be picked off at once and the leaves burned at the earliest convenience. Do not dump them right outside for bugs and insects to breed in. Burn them and be done with them, at the same time accomplishing something to prevent the spread of plant diseases.

Where
self-reliance
counts

"W'en 'Omer smote 'is bloomin' lyre
 And sang of things on land and sea;
 'W'atever suited 'is desire
 'E went and took, the same as me."
 —*Kipling*.

How many indifferent gardeners there are filling positions of high rank because they had the "nerve" to walk up and appropriate them, or how many

capable gardeners are occupying places much below their ability because of lack of courage to assert themselves, nobody knows, but without a doubt there are many who are in the one or the other category. The world has always been amply supplied with self-confident individuals who "went and took" and also with those whose lack of courage at the psychological moment has relegated them to a fate far below their real worth. These thoughts are brought out by the recent interesting discussions in our columns on the "cheap gardener" question. "God helps them that help themselves" is a proverb as true today as it was when Ben Franklin put it into Poor Richard's Almanac.

Secure
your rooms

We wish to impress as strongly as possible upon those of our readers who are contemplating a convention trip to Boston, the fact that, so far as hotel accom-

modations are concerned, they are quite likely to find that the mid-summer situation in Boston is quite the reverse of what it is in some other cities they have visited. Instead of being a dull time with the hotels August is here a busy season because of the many tourists and summer sojourners. Those, therefore, who wish accommodations during the Convention are warned against waiting until they get here, assuming that there will be plenty of room. Especially those who will be accompanied by ladies and children should secure rooms in advance and thus save themselves possible disappointment and annoyance. Any one of the houses advertising in this paper can be relied upon. They are all close to the convention hall and all first class. And those who prefer to go elsewhere can be placed by the hotel committee of which P. Welch is chairman, and who will be pleased to advise and assist in every way he can. But, in any case, attend to it now.

About
public grounds

As the attractiveness of the Boston Convention Garden grows and matures, the idea of maintaining it as a permanent floral beauty-spot develops and gathers strength in the public mind and with the press, and has evoked favorable expression from the city authorities. We earnestly hope that such disposition may be made of the tract but in no sense should it be regarded—as suggested by some correspondents of the daily press—as a possible substitute for the Public Garden. We should be very sorry to see the people of Boston or of any other of our populous centres ever consent to an abandonment of any grounds once acquired for public use, no matter how many additional garden reservations may be constituted. It is an almost universal fault in city development that public breathing spots which will be centrally located as the city expands are so seldom reserved. Too often their desirability is only realized when it is too late and the value of land has reached a prohibitive mark. As time goes on and population becomes denser Boston will have occasion to thank the men who were far-sighted enough to establish and maintain these open spaces with their health-giving verdure and sunlight. And this applies not to Boston alone but to every community. Let us have the Fenway Garden, by all means, but not at the sacrifice of any other breathing spot and coming generations will bless our memory.

THE CONVENTION CITY

THE ARNOLD ARBORETUM.

The Convention at Boston will draw this way quite a number of gardeners from divers quarters, who, for various reasons may not find a more convenient occasion to visit this city. Naturally they will endeavor to see all the more important places while here, for the neighborhood abounds with large private and public parks and gardens of note. Among the latter probably the one that appeals to most men is the Arnold Arboretum, which contains the finest collection of trees and shrubs in America, and, therefore, a visit should not be missed by anyone who has a large or small amount of planting to do, and seeing what an important part landscape planting plays in horticulture today, it is certainly to his benefit to at least spend a few hours here, where he will be able to see growing, every tree and shrub adapted to the climate of New England, be able to observe its habit and character, and acquire its proper name. Any car to Forest Hills places the visitor close to one of the entrances.

In the systematic beds during every season of the year there is some plant or other in flower, or fruit. Many various species of *Lonicera* are now very beautiful with their large displays of bright berries. Taking the upper road by the pond leads to the splendid collection of Lilacs, which, when in flower appeal to the general public more than anything else in the Arboretum. Beyond are arranged the main collection of *Viburnums* whose fruiting qualities may now be observed.

On the summit of Bussey Hill, close by, will be found arranged in a circular bed all the newer plants introduced by Mr. E. H. Wilson from Western China that prove hardy here. A belt of the beautiful Cedars of Lebanon should be noticed, that so successfully stood the

Washington Statue, Public Garden, Boston, from Commonwealth Ave. Entrance

rigors of the past severe winter. Passing down to the valley below is found the fine collection of hybrid Catawbiense Rhododendrons, beyond which is seen the broad border of Mountain Laurel, which when flowering about the end of June produces another of the Arboretum grand floral displays, while covering the steep sides and summit of the hill is the Arboretum's grandest and most beautiful feature, the splendid group of naturally planted Hemlock Spruce (*Tsuga canadensis*). Across the brook by Hemlock Hill is planted the main conifer collec-

tion. On Peters Hill yet beyond will be found the large collection of various forms and varieties of *Crataegus*, beautiful both in flower and fruit. Around the base of the hill is a mixed collection of various deciduous and evergreen trees and shrubs containing some very choice and rare species. Upon the large extent of walls that encircle the Arboretum will be observed a various collection of suitable wall covers such as *Vitis*, *Celastrus*, *Actinidias*, *Tecomas*, *Lyciums*, etc.

Space will not permit of lists, but this brief outline should prove useful to those who are able to spend a few hours there, which would undoubtedly prove to their benefit especially the younger members of the fraternity. A printed guide may be obtained at the administration building which describes the Arboretum very fully, besides containing some good photographs, together with a map or two which certainly makes the Arboretum far more interesting to the visitor.

WM. H. JUDD.

THE CONVENTION GARDEN.

Deputy Commissioner Shea states that all the beds provided for in the original garden plan have been taken up by various exhibitors and are planted. Grading has been completed, walks are being finished and the lawns seeded down. All the plantations are doing well, except that the unseasonably cool weather is holding back some of the gladioli and a flock of wild ducks have been doing mischief among the aquatic groups in the river bays. The Farquhar Japanese garden is quite elaborate and will soon be completed. The exhibitors who have taken advantage of this unprecedented opportunity for a public display of garden material will have a good thing for it will be a standing advertisement during the entire summer.

The Francis Parkman Monument 850,000 Marble Band Stand on Boston Cove

CLUBS AND SOCIETIES

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

The Sixteenth Annual Convention of the American Association of Park Superintendents will take place at Newburgh, New York City, August 24, 25, 26 and 27, 1914. Headquarters, at Newburgh, Palatine Hotel, at New York City, Hotel Astor.

Officers, 1914.

President—H. S. Richards, Chicago, Ill.

Vice-Presidents—G. W. Burke, Pittsburgh, Pa.; Fred C. Green, Providence, R. I.; Frank Brubeck, Terre Haute, Ind.; W. S. Manning, Baltimore, Md.; G. Hennenhofer, Pueblo, Col.; G. Champion, Winnipeg, Can.

Secretary-Treasurer—J. J. Levison, Brooklyn, N. Y.

Program.

MONDAY, AUGUST 24

300 P. M.—Meeting of the Executive Board. Registration.

7.30 P. M.—Annual business meeting at Headquarters, Palatine Hotel, Newburgh, N. Y. Address of Welcome, Mayor of Newburgh. Addresses by the Park Commissioners of Newburgh. Response, President H. S. Richards.

A brief sketch of the life and work of Mr. Andrew Jackson Downing, by Prof. F. A. Waugh.

"The Preservation of Natural Woodlands under Park Conditions," illustrated lecture and discussion led by Ogelsby Paul, Landscape Gardener, Fairmount Park, Philadelphia, Pa.

TUESDAY, AUGUST 25

7 to 10 A. M.—Visit to Mt. Beacon, one of the highest points in the vicinity and famous in Revolutionary times.

10.00 A. M.—Start by auto from quarters at Newburgh to visit the important points of interest in the city, thence through Tuxedo Valley to Tuxedo Park. The Association will be entertained at luncheon by Mrs. E. H. Harriman on her estate at Arden.

WEDNESDAY, AUGUST 26

10 A. M.—Through the courtesy of Hon. George W. Perkins, President of the Inter-State Park Commission, the Association will leave Newburgh by boat on a trip down the Hudson River to West Point and Inter-State Park, arriving in New York City early in the evening.

THURSDAY, AUGUST 27

9 A. M.—Meet at headquarters, Hotel Astor, New York City. Address of Welcome, Hon. John P. Mitchell, Mayor of the City of New York.

9 A. M.—Address, Hon. Cabot Ward, President of New York Park Board. Response, President H. S. Richards.

Automobile trip through parts of the park systems of Manhattan, the Bronx, and Brooklyn. At the New York Zoological Park luncheon will be served to the Convention as guests of the New York Zoological Society. Trip terminates at Coney Island.

AMERICAN GLADIOLUS SOCIETY.

Schedule of prizes, for the Fifth Exhibition of Gladiolus Blooms to be held in connection with the Annual Meeting of the Society and the Society of American Florists and Ornamental

Horticulturists at Mechanics Hall, Boston, Mass., August 18, 19 and 20, 1914.

OPEN CLASS

Vaughan's Seed Store No. 1, 25 spikes Mrs. Francis King; 2, Silver Medal, 2 spikes Chicago White; 3, \$5.00, 25 spikes Primulus Sunbeam.

E. E. Stewart 4, \$5.00, 12 Black Beauty 5, \$5.00, 12 Golden Queen; 6, \$5.00, 12 Lucille; 7, \$5.00, 12 Michigan.

W. E. Fryer 8, \$5.00, 6 Mrs. W. E. Fryer; T. A. Havenmeyer 9, \$10.00, 6 white; 10, \$10.00, 6 pink or shades of pink; 11, \$10.00, 6 yellow; 12, \$10.00, 6 blue or lavender; 13, \$10.00, 6 red or shades of red; 14, \$10.00, 6 of any other color.

W. Atlee Burpee & Co. 15, \$10.00, collection, 10 varieties, 6 each.

H. W. Koerner 16, \$5.00, 12 American Wonder; 17, \$5.00, 12 Twilight Chibi; 18, \$5.00, 12 American Giant.

Jacob Thomann & Sons 19, \$5.00, 25 of any white variety.

Montague Chamberlain—20, \$10.00, white seedling, 3 spikes; 21, \$10.00, yellow seedling, 3 spikes; 22, \$10.00, pink seedling, 3 spikes.

B. Hammond Tracy 23, Silver cup for largest and best collection of pink gladioli not less than 3 spikes of any one variety.

Bidwell & Fobes 24, Silver medal for vase 25 Panama; 25, Silver medal for 25 Niagara.

M. Crawford 26, 50 bulbs of gladiolus White Lady, for the best red variety not before exhibited.

A. H. Austin Co.—27, \$5.00, for the best gladiolus corsage bouquet. Other flowers or green may be used to finish nicely.

AMATEUR OR GARDENER'S CLASS

John Lewis Childs For collection, 10 vases Gladiolus Childs, named varieties 28, \$10.00, 1st prize; \$5.00, 2nd prize.

H. W. Koerner 29, \$5.00, 12 American Wonder; 30, \$5.00, 12 Twilight Chibi; 31, \$5.00, 12 American Giant.

Knight & Struck Co.—Vase containing 3 spikes Gladiolus Mrs. Frank Pendleton—32, \$3.00, 1st prize; \$2.00, 2nd prize. Vase containing 3 spikes Gladiolus Badenia 33 \$3.00, 1st prize; \$2.00, 2nd prize.

"The Modern Gladiolus Grower," Chatham, N. Y.—34, Silver cup, for largest and best display, to contain at least 6 named varieties, 3 spikes each.

Jacob Thomann & Sons 35, \$5.00, 3 spikes of any white variety.

L. Merton Gage, Wellesley, Mass. 36, \$5.00, vase of 10 varieties, 1 spike each.

G. D. Black, Independence, Iowa 37, 60 bulbs Golden King, vase of yellow varieties.

H. E. Meader, Dover, N. H.—38, Cut glass vase for best vase, 6 spikes of America.

American Gladiolus Society—39, Exhibit of at least 15 varieties, 3 spikes each, correctly labeled; Silver medal, 1st prize; bronze medal, 2nd prize.

Mrs. Francis King—\$10.00, for best arrangement of gladioli in basket or other receptacle, not less than 20 spikes, with two other flowers.

GLADIOLUS SOCIETY OF OHIO.

The second annual flower show of this society will be held on August 14 and 15 in the Assembly Rooms of the Hollenden Hotel, Cleveland, O. Premiums are offered as follows:

Class 1 Display (Amateur), 10 varieties, 6 each: 1st, silver medal; 2nd, bronze medal.

2.—By the Modern Gladiolus Grower—10 varieties, 6 each; silver cup.

3.—By Joe Coleman Collection, not less than 10 varieties, 6 each; silver cup.

4.—By the Gladiolus Society of Ohio Seedling, or other variety not before shown here, grown by exhibitor, 6 or more spikes; certificate of merit.

5.—By C. Betscher—Collection Primulus hybrids; \$5.00.

6.—By H. F. Michell Co.—Vase cut Gladioli; bronze medal.

7.—By The Perkins King Co. A Niagara; 25 corms Niagara.

8.—By Munsell & Harvey Vase of white; \$5.00.

9.—Classes 9 to 18 inc., by C. Betscher Vase Europa, 12 peonies value, \$12.00.

10.—Vase America, 12 peonies, value \$7.50.

Mignonette

BODDINGTON'S MAJESTY

THE finest of all the Fancy Varieties of Mignonette for Winter forcing; seed saved from select spikes under glass. We have received many testimonials with regard to the excellence of this variety.

Trade Packet 60 cts., 1/8 ounce \$1.00, ounce \$7.50.

E. J. SHAYLOR

WILLIAM R. SMITH MEMORIAL.

The following circular letter is being sent to members of the S. A. F.

Your Committee appointed at the Chicago Convention for the erection at the National Capital of a suitable memorial to the late William Robertson Smith, "The Father of our Charter," has been continuously at work, and has decided that the monument should be useful as well as ornamental in the shape of a memorial building or educational garden.

It is hardly necessary for your Committee to remind you that Mr. Smith was for more than fifty years Superintendent of the United States Botanic Garden, at Washington, D. C., and an honored member of the Society of Florists and Ornamental Horticulturists from the time of its organization.

Your Committee, therefore, asks that you now send your subscription addressed to William F. Gude, Chairman, 1214 F Street, N. W., Washington, D. C., so that the memorial may take tangible form at the earliest possible date.

We trust that your contribution will be a liberal one for this worthy cause, that the florists of the United States may show their appreciation of the man who did so much towards promoting and uplifting our calling.

Awaiting an early and favorable reply, we are, Respectfully,

WM. F. GUDE, Chairman.

RICHARD VINCENT, JR.,

HARRY PAPWORTH,

J. A. VALENTINE,

JOHN K. M. L. FARQUHAR.

William Robertson Smith Memorial Committee.

of to T. C. Thurlow's Sons of West Newbury, Mass., as stated on page 111 of last week's issue. Notes and portrait were intended to appear together but the notes were a little "too previous".

Durham, N. Y.—Two new members of the agricultural faculty of New Hampshire State College have taken up their work. J. B. Scherrer of Pennsylvania State College comes as instructor in vegetable gardening and as assistant in vegetable gardening in the state experiment station. He will teach the course in greenhouse management and landscape gardening. F. H. Wilson of the Massachusetts Agricultural College, class of 1908, will take the classes in floriculture.

PRINCESS. 20—The New Upright Pansy

This strain is entirely distinct from all others. It is absolutely compact upright growing and extremely weather-proof, enduring many storms without damage to its flower. The flowers are mostly blotched and frilled like the Masterpiece, of good form and heavy velvety texture, on heavy stems carried well above the foliage. Attractive by the brilliancy of its colors.

500 seeds 25c. 1000 50c. 1/4 oz., \$2.50, 1 oz., \$10.00

- 34—Bronze—Brown and copper shades mixed.
- 36—Fancy—Rich colors, mostly margined.
- 38—Mme. Perret—Red and wine shades.
- 40—Zebra—Fine striped mixture.
- 42—Adonis—Light blue, white center.
- 44—Black—Almost coal black.
- 46—Black with bronze center.
- 48—Lord Beaconsfield—Purple shaded white.
- 50—Bronze—Beautiful Bronze.
- 52—Bronze with yellow center.
- 54—Velvet Brown with yellow center.
- 56—Havana Brown.
- 58—Havana Brown with yellow center.
- 60—Cardinal—Curled, bright red, dark blotch.
- 62—Cecily—Steel blue, margined white.
- 64—Goliath—Large curled yellow blotched.
- 66—Hero—Curled, deep blue shaded white.

The KENILWORTH Giant Pansy

seeds are all grown by myself and are offered in the following mixtures and separate colors:

- 22—**KENILWORTH STRAIN**—The flowers are of perfect form and substance; many of the immense flowers are from 3 1/2 to 4 inches; it is a striking collection of beautiful colors and markings, rich with shades of red, brown, bronze, mahogany and many others too numerous to mention. Light, Medium or Dark Mixtures.
- 24—**KENILWORTH SHOW**—An extra fine strain of large flowers; the immense flowers are of circular form and great substance; a beautiful collection of colors and markings.
- 26—**KENILWORTH CUT FLOWER MIXTURE**—Is a distinct class by itself, surpassing all other strains as a cut flower or for exhibition purposes, for inside or outside growing; the large flowers are carried erect above the foliage on heavy stems, 7 or 8 inches long, in the most graceful manner, and stand the hot, dry weather well.
- 28—**MASTERPIECE**—A remarkable type; the curled, wavy petals giving the flower a double appearance, large flowers of great substance, on long, strong stem.
- 30—**GIANT THREE AND FIVE BLOTCHED PANSIES**—A superb mixture. Flowers large and of circular form and of great substance. The display of coloring is unsurpassed. A combination of almost every shade of rich velvety colors, reds are particularly conspicuous; the petals being distinctly marked with three or five large dark blotches.

NEW SEED NOW READY.

All sorts and mixtures, except the new Pansy Princess, are \$5.00 per oz., \$1.25 per 1/4-oz.; 5000 seeds, \$1.00; trade packet of 1000 seeds, 25 cents; any 5 pkts., \$1.00. Please order by number.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

About Seed Trade Criticisms.

Mr. George C. Watson,
Care of "Horticulture",
Boston, Mass.

Dear Sir:

We have received a copy of "Horticulture" of July 25, 1914, in which, on page 114, is a marked article in which you have done me, as author of the paragraph in question, an injustice. The paragraph in the bulletin reads: "If the seed appears to contain considerable of such rubbish, the buyer should insist that it be cleaned before he takes it, (or) secure a reduction in price proportionate to the amount of impurity or look elsewhere for his supply." This presents accurately the three options which it seems to me are before the purchaser of seed which is presented to him in an impure condition, and the wording does not at all justify your assumption that we would infer "the cleaner the seed the smaller the price."

Of course, as "Horticulture" is a trade journal you are obliged to look at the matter from the tradesmen's standpoint. We as a Station devoted to the interests of the farmers of the State look at it from a slightly different standpoint. But it would seem to me that you as a former Station worker need not go unnecessarily out of your way to ridicule our efforts to impress upon the farmer of the State the

fact that the legislators failed to secure for them, in the Seed Inspection Law, the object they desired and believed they were about to secure.

Very truly yours,

F. H. HALL,

Editor and Librarian.

N. Y. Agri. Exper. Sta., Geneva.

After reading Mr. Hall's letter, I think perhaps I was a little severe, and I hereby hand him a full and free apology. At the same time I am glad to find one man in a government position who is sensitive to criticism. The seedsmen are extremely sensitive to the aspersions that have been and are being unjustly cast on us by legislators hunting for the farmers' vote. These men do not seem to realize that the seed business is a brand of farming, and if you malign the seedsmen you're maligning the farmer also. Because a sample of seed has some sand and seeds in it, which the Almighty put there, the seller, according to the politicians has committed a heinous crime. And this has been going on for years and years. If they would say—"Mr. Farmer, be sure you get

clean seed and be willing to pay a good price for purity," then all would be well.

GEO. C. WATSON.

Pea Crop Conditions.

No radical changes in crop conditions have developed since we published our last general review of crops. Peas are nearing a point where a pretty accurate estimate of the yield is possible, not only of the total crop, but of the separate varieties; but prospects do not become any more rosy. In fact such information as we have indicates that more or less damage has occurred and it is quite within the possibilities that peas may be worth a smart premium over growing prices of last spring, at least many varieties. We believe this is unquestionably true of Alaska, and that many other varieties will be included. As an indication of how the crop will turn out, it may be stated that the pack of canned peas the country over will be at least 30 per cent. short of estimates, and a number place the shortage as high as

SMITH & HEMENWAY CO., 161 CHAMBERS ST., NEW YORK

Boddington's Gigantic Pansies

Can be produced only from the giant strains. Our CHALLENGE PANSY seed contains only the giant self-colors, the giant striped and variegated and the giant blotched, etc., all carefully mixed in proportion. You could not buy better seed if you paid \$100 per ounce. Our Challenge Pansy seed during the past season gave unprecedented satisfaction, and every order booked last year was duplicated and increased this year. All the testimonials received mentioned specially the high grade of flowers—color, form and size of the individual blossoms. This year, by adding improved types, intending customers can absolutely rely on a duplication of this season's success with increased satisfaction. Our "mark" for this strain is "Challenge," and it is all the word denotes.

Pansy—Boddington's "Challenge"—All Giants

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said: "Why don't you call it Defiance?"

½ trade pkt. 25 cts., trade pkt. 50 cts., ¼ oz. 75 cts.,
¼ oz. \$1.50, ½ oz. \$2.75, oz. \$5.00.

1914 NOVELTY PANSY SIM'S GOLD MEDAL MIXTURE

Was awarded the First Prize and Gold Medal at the International Horticultural Exhibition, held at the Grand Central Palace, New York City, April, 1913. This splendid mixture is the result of years of painstaking selecting on the part of Mr. William Sim (renowned for Sweet Peas), Cliftondale, Mass., and we are offering seed from the originator for the first time. Trade pkt. 75 cts., 3 pkts. for \$2.00, ¼ oz. \$3.50.

Boddington's Quality "English" Pansy

A superb strain of highly-colored flowers in great variety and immense size.

Our Mr. Bunyard, while visiting the Royal International Exhibition in London, was much impressed with these blooms, and strongly recommends this mixture to florists.

Trade pkt. (500 seeds), \$1.00; ½ trade pkt. (250 seeds), 50c.
¼ oz., \$2.25; ½ oz., \$4.25; oz., \$8.00.

"THESE PRICES ARE FOR THE TRADE ONLY"

Arthur T. Boddington, Seedsman, 342 West 14th St. NEW YORK

40 per cent. With 16 to 18 new canneries in operation in the canning of peas, it is now estimated that the total pack of the country will be from half a million to a million cases less than last year, and of decidedly better average quality. This means better prices.

There were certainly many thousands of bushels of what are known as

"canners' varieties" carried over, particularly of what are known as "sweet peas" including Advance, Admiral and Horsford's Market Garden, while the carry-over of pedigree Alaskas was comparatively light. It is quite well understood that a considerable percentage of the canners, including many of the largest, bought no future pea

seed last spring, and the shortage that will have to be covered is variously estimated at from 100,000 to 150,000 bushels, and the prices will hinge largely on this year's crop. As is generally known the high price of seed peas extending over several years developed quite a brood of farmer growers. No matter how good or bad the

Michell's Giant Prize Pansy

HENRY F. MICHELL CO.
518 Market St., PHILA., PA.

original seed stock, every farmer acquired religious scruples against pulling out a single "rogue" or "sport," the result being that the true type has been lost, and a wild degenerate strain has developed. Without any investment and no responsibility, these farmers have sold this junk to canners at prices far below the value of pedigreed seed, and a considerable percentage of them never could discover any difference. Of course they could only pack junk from such seed, and they have been the bane of the the pea canning industry, as the poor quality of their stock has depressed prices and retarded consumption. It may be only just, to state that a number of dealers do not hesitate to dabble in this degenerate seed whenever they can scent a few dollars' profit. We have always believed such dealers both morally and legally liable if financially responsible, and they should be "shown up" if nothing more.

One very important factor in fixing values on spot pea seed next fall is the fact that practically no Alaskas planted for canning went to seed, either East of West, and a very small quantity if any of the sweet wrinkled varieties. Last summer, according to competent judges, 4000 acres planted for canning became too hard and were allowed to ripen in Wisconsin alone, and 1000 to 1500 acres in New York state. This means not less than 75,000 bushels of seed added to the large crop raised by the regular seed growers. In comparing this year's packs of canned peas with last, this enormous seed item should be considered, as it is equivalent to half or three-quarters of a million cases. From our point of view conditions look much brighter for both the seedsman and canner than a year ago.

J. Bolgiano & Son, Baltimore, Md., have just completed the shipment of a large export order of their Early Fortune Cucumber seed to the Province of Kurland, Russia.

The fourth annual flower show at Hartsdale, N. Y., will be held September, 9 and 10. The prize list is a lengthy one.

Opposite Public Library, facing Trinity Church and convenient to Theatres and Shopping District

Three minutes' walk to the Mechanics Building; two minutes from N. Y. N. H. & H. R. R., Back Bay Station, and N. Y. C. & H. R. R. R.; B. & A. R. R., Trinity Place Station. All trains stop at these stations, and baggage can be checked to and from all stations. Electric cars pass the door for all railroad stations, steamboat landings, the suburbs, and direct to the Convention Garden. Make your reservations early.

FRANCIS HOWE, Proprietor.

KNOXVILLE NOTES.

Mr. and Mrs. A. H. Dailey are contemplating attending the S. A. F. & O. H. Convention in Boston.

Charles L. Baum is very anxious to get everything in shape before the Convention. He is also preparing his report as State Vice President of the S. A. F.

Addison J. McNutt is rebuilding three houses in which he is using Garland gutters and Advance fittings. He is trying to get through in time to attend the Convention in Boston.

Weather conditions have been more favorable for the past three weeks than anytime this season, and consequently everything has taken a new start, and prospects are much better than before. The florists of this vicinity have been very busy planting of late, but are about through now, and taking the dry season into consideration everything is looking fine.

CINCINNATI NOTES.

Mr. and Mrs. C. E. Critchell spent the week end last week with the Hills at Richmond, Ind.

E. G. Gillett was called to Springfield, O., last Wednesday because of the death of his sister-in-law.

Mr. and Mrs. L. H. Kyrk have signified their intention of attending the S. A. F. & O. H. convention in Boston.

Mrs. P. J. Olinger, who has been at the hospital for a period of twenty-one weeks following an operation is at last recovering and expects to leave that place within the next fortnight.

Hamilton, Ill.—C. P. Lindsey, fruit grower, has extended his business into another field and will add a greenhouse to his place this summer.

WASHINGTON NOTES.

Walter Hawley, with Gude Bros. Co., has returned from a visit to New York and New York state points.

George W. Hess and William F. Gude and the latter's two sons, were the guests of John Westcott, at Barnegat Bay, last week.

Appeals have been going forth for subscriptions for the William R. Smith Memorial fund and although it is but about a week since the first letter was mailed, many substantial replies have already been received. It is hoped that the contributions will continue until the fund is of such size that not only the fame of the late Mr. Smith be immortalized, but that the memorial will serve to increase the love for flowers and advance the science as Mr. Smith would wish it to be.

The army worm which has been infesting Washington seems to have disappeared, but an official of the Department of Agriculture who is an authority on this subject, says that it will reappear in the fall. Although the pest seems to be yielding to the frequent treatment of arsenate of lead and other poisonous bait, it is feared that the worms have merely burrowed beneath the surface of the earth preparatory to spinning their cocoons. If this supposition be true, a new invasion of even greater proportions may be expected in the fall, it is stated.

Captain William H. Ernest reports that he has received quite a large number of requests for reservations on the boat which is to carry the Washington and Baltimore florists to the Boston convention. He states, however, that as the time is getting shorter, those who have not as yet signified their intention of joining the party, should do so as soon as possible. It would greatly aid the committee if it could be furnished with all names not later than the evening of the next meeting which is to be held at 1214 F Street, on August 4. From all accounts the bowling team will be in fine form and will probably be on deck at the appointed time.

Flower Market Reports

Instead of improving, as **BOSTON** was expected, trade has actually fallen off this week as compared with last week which was itself considered unseasonably dull for this market in mid-summer. The very cool weather may be, in part, to blame as the summer trade of Boston depends upon the activity at the seaside and mountain resorts, very largely. Asters and gladioli are multiplying rapidly and prices are weakened although quality is very good, especially in the gladioli. Carnations still linger in the lap of asters and find very slow favor in the market. They have never held over so long and in such quantity before. As to all other material no change from last week is noticed.

Business was a little **BUFFALO** more encouraging the past few days, and this is due mostly to the supply on indoor flowers, which has shortened up considerable. This applies to roses and carnations. The market receives some good roses and only a few carnations and good sweet peas and this condition has helped the sale of gladioli, which has come in more abundantly. America and Augusta especially have had good sales. Asters are just coming on and what few are seen are not of the best.

Time hangs heavy on the hands of florists these days. A few flowers are sold each day locally and a few are shipped out, but as a whole there is little business. There are occasional days when there will be quite a little stir in trade, only to be followed by such complete stagnation that only by consulting the books can one find that this July is no worse than last. American Beauties are shortening up and prices a little firmer. Asters are convincing growers that it is useless to grow poor ones, as only the best can be sold at any price. Lilies are on every counter, but there is no demand at present. Gladioli are coming in in such quantities that nothing can be done to move them. One wholesaler said he had ten thousand in his store, Tuesday, and he had refused to accept consignments from new growers. Shasta daisies are another good flower that cannot be moved though offered very low. Roses are meeting slow sale; even Mrs. Russell in short lengths do not move. Carnations are up to summer average in quality. Orchids are low in price and share the fate of commoner flowers when customers are lacking. Ferns are \$1.50 per 1,000.

Taken as a whole **CINCINNATI** the market is rather easy. The supply is large and fully able to take care of all demands. Business last week was steady and fair. Prices were not very high because of the large supply. Roses are still more than sufficient for requirements. The larger part of the receipts are short stemmed while but a limited number have any real keeping quantities. The American Beauty cut is large and the flowers are excellent. Longiflorum lilies are fine, but the cut is not quite as large as it was. Auratum and rubrum

GLADIOLI

of better quality and very much better assortment. Plenty of good Whites and Reds, also a limited supply of some of the novelties. Good stems and plenty of foliage far superior to the short cheap stock offered by the nurserymen.

\$1.00 per 100, \$30.00 per 1000.

Our selection in assorted lots of 200 or more, at

\$2.50 per 100, \$20.00 per 1000.

ASTERS

\$1.00, \$1.50 and \$2.00 per 100.

A few extra long at \$3.00 per 100.

EVERYTHING IN RIBBONS We carry one of the largest and most varied stocks of Ribbons pertaining to the florist business of any house in the country. If you have not received one of our new catalogues, advise us and we will mail you one at once.

During July and August we close at 5 P. M.

may also be had. Gladioli, if choice, sell, while the others meet with a very slow market. The cut of asters is increasing.

NEW YORK Market conditions are practically unchanged since our last report, except that in some lines stock has shortened up somewhat in quantity. Carnations are still in good demand although asters are coming in plentifully and are bringing about the same figure as the carnations. Roses in good supply—the standard quality selling out fairly well and the little short stemmed sort being unloaded in thousand lots at about hundred price for the former. Taken all in all it would appear that business in the wholesale markets here has been more steady and altogether better than at a corresponding period in any recent year.

PHILADELPHIA There is nothing much to report. Pretty near the doldrum period—little activity in any line. Asters and gladioli continue the

leading features. Roses are of fine quality, but carnations are poor and getting poorer. Orchids are not plentiful, but enough for the light demand. Lily of the valley is very good and holds about as steady as anything, both in receipts and sales. Sweet peas, few and poor. Lilies rather redundant, with demand normal. Delphinium, centaurea, gailardia, coreopsis and other minor items help out in the way of variety to a bald and uninteresting situation.

The market has been **ST. LOUIS** greatly overstocked, but only in the lower grades. In the extra fancy class in roses, we can see only Mrs. Russell and a few long Beauties. There is an over abundance of Killarney in all varieties. The fancy Russells bring top prices. Gladioli are in good abundance and variety. These have come down in price on all except fancy America, King and Augusta. Carnations are small and short in stems. The other stocks at the market are

Flower Market Reports

(Continued on page 153)

made up of asters, lilies, Shasta daisies.

"Watchful waiting"

WASHINGTON is now the order of the day in the National Capital for there is very little doing in the flower market. Sales are extremely slow and were it not for the funeral work which continues to come in considerable volume, everyone could take a vacation. As it is, quite a few of the clerks are now enjoying their annual vacations. Gladioli are moving in moderate quantities at average prices. No one seems to want roses in any great number, while such flowers as orchids and gardenias are in little or no demand. It has been several weeks since the market has been cleaned up on any one day and little change is expected until the fall. It is now uncomfortably warm and the florists are looking forward to the cooling trip to the Boston convention by sea.

PERSONAL.

Mr. and Mrs. Thomas Capers of Wellesley, Mass., will sail for a visit to England on August 4.

J. H., Playdon, of Andover, Mass., will close his store in the Arch Building during the month of August and will rusticate in Nova Scotia.

Arthur Kirchhoff, florist for the State Institution for the Blind at Batavia, N. Y. is spending his vacation visiting in Boston and neighborhood.

Walter Miller, formerly with A. N. Pierson, Cromwell, Ct., has accepted the position of head gardener on the estate of Dr. Williams, Prospect street, Hartford, Ct.

S. D. Dysinger, of Holm & Olson's, St. Paul, Minn., and Mrs. Mary M. Chalmers were married recently. They will be at home at 176 Summit avenue after August 1.

Samuel Batchelor, gardener for twelve years at Crosswicks Farms, Jenkintown, Pa., is now manager of Tahoma, estate of Frank C. Littleton, Mamaroneck, N. Y.

A post card from James McHutchison locates that lively New Yorker at Nagasaki, Japan, from whence he sends greetings and says he is enjoying that interesting place.

Edgar Elvin, formerly a contributor of interesting articles to the columns of HORTICULTURE has opened a new flower plant and seed establishment at 255 High Road, Chiswick, London, England.

NEW CORPORATIONS.

Tenafly, N. J.—Kenwood Greenhouses, capital stock, \$90,000. Incorporators, P. F. and J. E. Burton, R. V. Daly.

Geneva, N. Y.—M. S. Harman Nursery Co., capital stock, \$20,000. Incorporators, T. C. Carson, Milton A. Harman and T. I. Smith.

& Spreng (100 bunches).....	15.00	to 20.00	15.00	to 20.00

CHICAGO NOTES.

Miss G. Lewis of J. Mangel's leaves for a Northern trip August 1.

Mr. and Mrs. Frank Oechslein are spending some of the dull weeks in Colorado.

A. Lange has returned from a week's trip to Michigan and will leave soon for another.

Wm. J. Keimmel of Wendland & Keimmel, rose growers of Elmhurst, Ill., and P. J. Foley indulged in a few days' fishing at Lake Geneva, Wis.

The sympathy of the trade is extended to Jos. Igler, of Frank Oechslein's force, in the loss of his wife, aged 23 years, on July 24. She leaves two small children.

The Budlong and Schupp families are occupying their cottage at William's Bay, Wis., and Phil. Schupp takes his vacation in week end trips to that beautiful resort.

Harry Rowe has a letter from his brother in Seattle, Wash., which says that florists there are doing little business this month. Chicago florists know how to sympathize with them.

Mr. and Mrs. C. L. Washburn leave August 3, for a visit to E. B. Washburn at Pasadena, Cal. Mr. Washburn is a regular attendant at the S. A. F. Conventions and will be missed this year.

John Michaelson and E. C. Amling and families have made automobile tours through Wisconsin, the former returning to Chicago and the latter going farther North and West, returning through Iowa.

Mr. and Mrs. Albert Cole, of the Columbia Flower Shop, 3101 Washash Ave., dropped business for a belated wedding trip, which included Toronto, the St. Lawrence and Quebec. Mr. Cole spent much of his boyhood in Montreal.

Among those spending vacations in this city is John H. Holden, who was in business here about nine years ago. He now has charge of the park and cemetery at Rensselaer, Ind., and expects to build more greenhouses this fall.

"Flowers for all occasions" is a favorite advertising phrase in Chicago, but it took on new meaning when the "occasion" was the opening of a store at 23 S. Wabash avenue, where flowers are sold for the benefit of the suffrage cause.

The Lake Shore Horticultural Society announces its first Horticultural Show to be given at Winnetka, Ill., August 6, 1914. Copies of the premium list may be had upon application to the secretary Edward Boulter, Winnetka, Ill.

Mrs. M. Buckholz of The Windmill Co., Mankato, Minn., is getting pointers on the best methods of constructing a new range of greenhouses by a tour of inspection in Chicago. She is disposing of her interest in the Windmill Co. and the new range will be built at Aberdeen, S. D.

J. J. Marsh announces that he is now sole proprietor of the Farmers' & Florists' Fertilizer Co., the other members, F. S. Markey and Wm. J. Downey having withdrawn on May 10th. Mr. Marsh has now a fine suite of offices at 809 Exchange avenue, Union Stock Yards. Send orders to Room 4, where they will receive prompt attention.

A. L. Vaughan has returned from a week's visit with his brother in Alabama. He found the South very dry in more ways than one, but says he has no doubt it means the ultimate good of that part of the country. In States that have adjusted themselves to the change, he reports business good and less difficulty in securing labor in cotton picking times, etc. Florists were having a dull summer but expect nothing else.

Phil. Schupp, of the firm of J. A. Budlong, is convinced that the Chicago market has need of more roses and especially of well-grown ones. His firm, one of the pioneers of the wholesale growers of Chicago, will this season diminish its output of carnations and increase its supply of roses. Among the varieties grown extensively will be Sunburst, Ward, Killarney Brilliant and Ophelia. Of Killarney Brilliant, Mr. Schupp says he regards the color as too harsh to make it a favorite when pink Killarney is at its best. It is too early yet to judge the merits of Ophelia at his houses, but he expects that later in the season, when it develops fragrance, it will be popular.

There are no signs of mid-summer at the factory of the Foley Greenhouse Manufacturing Co., nor any vacations in sight, for every wheel is humming. The colleges of three states, Illinois, Indiana and Iowa have all placed their orders for greenhouses with this company. The Botanical Department of the University of Illinois at Urbana, is adding one house 21 feet 4 inches by 252 feet, divided into eleven compartments. At Purdue, Ind., there will be four houses 37 feet, 4 inches by 100 feet, and one cross-house 15 feet by 107 feet 8 inches, while a shipment of material is already on its way to Ames, Ia., for ten houses. There will be a curved roof palm house, two curved roof wings, and other houses, all structures of the latest type of construction.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

MISCELLANEOUS

WANTED TO BUY OR LEASE commercial greenhouse plant, modern construction, within twenty miles or so of Boston. Write description and terms to "W. T." care HORTICULTURE.

In writing to Advertisers kindly mention Horticulture

During Recess

Minnesota State Florists.

Members of this Association and their friends to the number of 400 held a picnic at Red Wing on Friday, July 17.

Chicago Florists' Club.

The annual picnic of the Chicago Florists' Club is generally conceded to have been the best ever held in the history of the club. Members and their friends are estimated to have numbered from five hundred up, but as admission to the picnic grounds was without tickets no absolute record could be kept of the attendance. Every train to Morton Grove, where the picnic was held in St. Paul's Park, brought pleasure seekers who were welcomed by a German band, playfully called The Hungry Five, while a large proportion arrived in automobiles. An orchestra and dancing provided entertainment and the usual sports for the children kept all interested.

Buffalo Florists' Club Outing.

The annual outing was booked for the 23rd of July. Unfortunately rain set in which continued up to 3 P. M. This of course checked the record-breaker attendance which was looked for. About 65 turned out. The boat left at 2.30 and upon reaching the island the rain had ceased and the grounds were drying up fast, so the afternoon's athletic events were not marred to any extent. The program was a long one and the ball game of course had to be cut short although five innings were played and won by the east side team.

After the games were run off dinner was served in the grand dining room of the Hotel Bedel, where the tables were decorated neatly by the boys of the retail stores and the president and others were heard from in brief remarks.

Bowling and dancing followed the banquet. The committee in charge had done everything in their power to make this a success, but the weather was a disappointment to all.

St. Louis Florists' Picnic.

The long looked for picnic given by the St. Louis Florists' Club took place on Wednesday, July 22d, at Ramona Park and attracted nearly four hundred. The day was very hot and the grounds in very poor condition owing to the continued dry weather. The crowd was larger than usual and by far more sociable than any picnic in previous years. One pleasing feature was the large attendance of suburban florists with their families. The wholesalers and some of the retailers closed half a day and the members hope this will become general next year for all.

The games started at 2.30 P. M. and great interest was manifested as all contained large entries especially in the lady classes. The baseball game followed between a team of retailers and one of wholesalers. Rooters for both teams were out in full force and the umpires, Bob Newcomb of Chicago and Frank Gorley, had their hands full keeping back the crowd when the wholesalers had the retailers 4 to 0 in the third inning. In the fourth, though, the retailers counted eight

runs, when their rooters broke loose and the game had to be stopped to clear the field and the final score was 8 to 5 in favor of the retail team.

The results of all the games during the day were as follows:

75-yard dash for men: 1st, K. Pyle; 2d, O. Ruff. Backward walk: 1st, Gus Hartmann; 2d, W. A. Rowe. Flag race for little girls: 1st, Marie Dahm; 2d, Virgie Cerney. 25-yard race for young ladies: 1st, Miss Ogle; 2d, Maude Basham. Ball scramble for small boys: 1st, Erwin Hoffman; 2d, Gussie Cerney. Pot-throwing contest for ladies: 1st, Jessie Sanders; 2d, Mrs. Baumgarten. Doughnut-eating contest for small boys: 1st, A. Flanagan; 2d, Julius Hecht. Peanut race for small girls: 1st, Linda Hecht; 2d, Jessie Tayter. Ball-throwing for married ladies: 1st, Mrs. Kinzel; 2d, Mrs. W. A. Rowe. Needle-threading contest: 1st, Laura Sanders; 2d, Miss Erlinger. Hop-step-and-jump for young men: 1st, Oscar Ruff; 2d, R. Holm. Seed guessing contest: 1st, Julius Hecht; 2d, A. Jablonsky, Jr. These prizes were offered by the St. Louis Seed Co. and the Schister-Cornell Seed Co. Paddy Patton's chicken race created a great amount of fun. R. Holm was the lucky man after a hard chase with nearly fifty men trailing him. The tug-of-war for ladies proved exciting. The winners received a large box of candy each, the losers a small box. The tug-of-war for men as usual caused great rivalry between the growers and retailers. This time the retail team of Mr. Bergesterman won from Joe Hauser's team.

Bobbink & Atkins' Lawn Party.

There was a large and happy gathering—about 200 altogether—at Ruthersford, N. J., on Saturday evening, July 25, of the office force and their many friends. All the requisites for a delightful summer evening entertainment were provided. In the course of the evening the following original verses composed by a friend of the firm were read by Mr. Atkins' brother:

Of all the letters in the list,
To you I safely say,
No other two, so much appear
As these two, "B" and "A".

Note that they take their proper place
As "leaders" in the fray,
In fact, there'd be no alphabet
Without the "B" and "A".

"B" stands for beauty, bravery
And boundless generosity,
And Bobbink fills the bill for each
With wonderful precocity.

I've watched him through the changing
years,

His endless pertinacity,
His cheery smile, his gentle guile,
His sticking for veracity.

"A" stands for true aggressiveness,
That never knows defeat,
And a long list of accomplishments
"Were very hard to beat.

Activity persistent, and
A limitless ambition,
With every venture "on the square"
And consequent fruition.

You know him well, and love him, well
Enough to call him "Fred,"
But "A" will stand for "Atkins," here
Long after we are dead.

May length of days and grand success,
Continue in their train;
May these reunions sweet, be yours
Again, and yet again!

And when life's journey ends,—from now
A hundred years, or more,
And we at garden parties meet
Upon the other shore,
Let's all demand; if Peter has
Desire to have us stay,
That we have our heavenly mansions
Very close to "B" and "A".

Philadelphia—The Michell annual outing is scheduled for August 8th. A general invitation has been sent out to the customers and friends of the company, and judging from the attendance at last year's affair, this one will doubtless be a record breaker. Special train will leave Broad Street Station at 1.03 P. M.

Guaranteed under the Insecticide Act, 1910. Series No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, Insects on Rose-bushes, Carnations, etc., without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange. Effective where others fail.

AETNA BRAND TANKAGE FERTILIZER

Acknowledged to be the best balanced fertilizer manufactured. It contains the ten basic salts constituting soil. It is giving satisfactory results wherever used. Write for 500-lb. sample order.

FARMERS AND FLORISTS FERTILIZER CO.

409 Exchange Ave., Rm. 15. Tel. Yards 842.
U. S. YARDS, CHICAGO, ILL.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men;
in packages for retail trade.

Bag of 100 lbs. \$3.50.

Let us quote you prices in quantity.

**The Plantlife Company, 251 East 66th Street
NEW YORK, N.Y.**

Gloversville, N. Y.—Twenty men from the State agricultural department are in this city to fight the grasshoppers in Fulton county. They brought with them spraying machines and other necessary materials to wage a successful warfare upon the pests. Commissioner Huson says that the only way to destroy the pest is a wholesale distribution of poison mixture. He says this may destroy some of the birds which war upon grasshoppers, but that it can not be helped. He advises all farmers to keep their chickens and other poultry in their quarters while the poison is being distributed.

APHIS PUNK For Fumigating

ASK YOUR DEALER FOR IT.

NICOTINE MFG. CO. ST. LOUIS, MO.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$2.75 per 112 lbs.; \$12.50 per 560 lbs.

Stumpp & Walter Co.

EASTERN CHEMICAL CO., BOSTON

The annual flower show of the Lenox (Mass.) Horticultural Society, was held on July 22-23. Sweet peas, garden annuals and perennials, asters and roses predominated. The vegetables and grapes were, as always, very fine. Edwin Jenkins, gard. at Bellefontaine Gardens, won first in seventeen sweet pea classes.

The Recognized Standard Insecticide
For green, black, white fly, red spider, thrips, mealy bug and soft scale. Can be used on tender plants.

\$1.00 per quart—\$2.50 per gallon.

FUNGINE

For mildew, rust and other blights. It is perfectly safe to apply to fruits and vegetables, as it is non-poisonous. An infallible remedy for rose mildew, carnation and chrysanthemum rust.

75c. per quart—\$2.00 per gallon.

VERMINE

For eel, cut and wire worms working in the soil. It can be applied to all vegetation.

\$1.00 per quart—\$3.00 per gallon.

SCALINE

For San Jose, Oyster Shell and all scale on trees and hardy stock. An effective remedy for red spider on evergreens.

75c. per quart—\$1.50 per gallon.

All the above products are readily soluble in water at proportions directed on cans and are used as spraying materials.

NIKOTIANA

A 12% nicotine solution for fumigating and vaporizing.

\$1.50 per quart—\$1.50 per gallon.

NEWS NOTES.

Syracuse, N. Y.—Fred Penfold has bought the greenhouses of N. Feeley.
Johnston, N. Y.—C. H. Hamre has bought out the Larcombe greenhouses at Jansen street and Prindle avenue.
Charlotte, Mich.—Mrs. Wm. Breitmeyer has sold the Roseacres greenhouses to Ray A. Weitzke of Owosso.
Chatsworth, Ill.—William Edwards of Freeport has purchased the greenhouse and florist business of Thomas Pepperdine.
Pittsfield, Mass.—Snow-balling on the 29th of July was the sport indulged in by small boys at noon following one of the most severe hail storms that ever passed over the city. The hail fell very fast and on the lawns and roads it looked as though there had been a heavy snow storm. In the vicinity of the city hall, where the hail gathered on the roofs and then slid to the ground, the snow was piled over a foot deep. Leaves were clipped from trees and from the outskirts of the city came many reports of damage to crops.

PATENTS GRANTED.

Obituary

Alexander McKerichar.

Alexander McKerichar, one of the oldest of Washington, D. C., gardeners, passed away on Sunday last after an illness of but one week. Born in Perthshire, Scotland, eighty-three years ago, his first entrance into the business was as an apprenticed gardener at the gardens of the Duke of Athole, at Dunkeld in 1847. In 1851 he crossed the water and entered the employ of Robert Steele at Winchester, Va., as nursery foreman. He came to Washington in 1854 and entered the employ of the Government at the United States Botanic Gardens, serving first under William Breckinridge and later under the late William R. Smith, remaining in this position until June 1855, when he was appointed foreman of the gardens of the President. In May 1875, he engaged in the nursery and florist business in Alexandria, Va., continuing in this business until February, 1881, when he accepted the position of superintendent of Glenwood Cemetery, which position he held until his death. He is survived by three daughters and two sons. Death came as a result of a general breakdown brought about by the present hot weather and probably by grief at the death of his brother recently in Wroxeter, Canada.

WHEN YOU BUY—GET A KROESCHELL
THE BOILER OF GENUINE EFFICIENCY

Expressions from Men Who Know Boilers

Kroeschell Replaces Cast Iron Boilers

The range of C. Peterson & Son, at Escanaba, Mich., was formerly heated by cast iron boilers. Last season this firm installed their first Kroeschell, a No. 6, which is now heating 13,000 to 14,000 sq. ft. of glass. They state that they fire these boilers three to four times during the night in zero weather. Under date of June 28, 1913, they write as follows:

"The Kroeschell Boiler has given better satisfaction than any other boiler we have ever had. For years we have fired many different boilers, and really never could get one that we might say was entirely satisfactory—there was always something wrong—but now since we have tried the Kroeschell, we have solved our boiler proposition. We have a () cast iron sectional boiler here, only used two years, and we wish we could get rid of it and put in another Kroeschell in its place." (Signed)

C. PETERSON & SON,
Escanaba, Mich., June 28, 1913.

CHICAGO, ILL.

Putting Things Off

ALL through the months of January and February each year, every day's mail brings inquiries from growers who are "thinking of building." About 75% of the number just keep on "thinking." The other 25% turn their thinks into action and make something happen.

We have already completed a lot of houses for some of our customers. But there are several of them who are not "Put-offers," who, for various rea-

sons entirely beyond their control, were not able to build early.

To such of you, we can offer right now an unusual service in both speed of delivery of materials and erection. We can turn out a completed job quicker than ever. Of course, this is a statement any concern can make. But the things that Hitchings say in their ads. are like Hitchings houses—you can depend on depending on them.

Interior of a house 38 feet wide. It is our Reconstructed Construction. The one with rafters spaced 12 feet 4 inches apart, instead of 8 feet 4 inches, and 20 inch glass used instead of 16. There are a third less rafters; a third less columns.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the editor of HORTICULTURE.

Aspidistra

To increase stock of this very useful plant, divide up some of the most densely grown plants into pieces of two or three leaves each and pot into 4 or 5-inch pots, using a compost of three parts of new loam, two of leaf mold and one of sand. Place them in a house that is shaded and kept rather close. While making new roots they will want careful watering and syringing to keep them in a moist state. When they have made enough of headway so they can support themselves they can be given more light which will harden them up.

Care of Chrysanthemums

Chrysanthemums will need lots of feeding just as soon as the roots run through all the soil. A good mulch of well decomposed cow manure will be found beneficial, as it will keep the plants from drying out at the root and will afford needed nourishment. Before this manure is applied a dusting of bone meal on top of the soil should be given. I say bone meal; the coarser grades of bone do not give up their plant food quickly enough to be of much use and will only just begin to work after the flowers have been cut and the crop finished. If well decomposed manure is not available, the fresh manure should be used in the form of a liquid, putting a shovelful or so into a barrel of water and mixing it thoroughly. With all respect to the many remedies recommended for use on 'mums there is no insect that infests them that cannot as well or better be cleaned out by use of Aphine or one of the liquid tobacco extracts.

Dahlias

With their large amount of foliage dahlias are bound to take up large quantities of moisture and in dry weather will need water. Where they have been kept well cultivated since they were planted they will be well prepared to stand some drought. Do not fail to give them some stakes before they get too high. Pinch out all the lateral growth; this will throw the strength into the flower wanted. About every two weeks give them a broadcast sowing of some fertilizer that shows a good amount of ammonia, phosphoric acid and potash. Nitrate of soda one part, and bone meal four parts, mixed and sowed between the rows will give good results.

Hollyhocks

Now is the time to start young stock of hollyhocks. They are very popular and are sure to come in very useful in many ways, both the single and the double varieties. Where you have some frames at hand there is no better place to sow the seed. Make the compost light and mix in a good proportion of leaf mold and sand. Do not sow broadcast, but in shallow drills about five inches apart. This will make it easier to keep the seedlings clear of weeds and the ground frequently stirred. Keep them shaded and moist until germination begins

when they should have the full sun. When big enough they should be transplanted into other frames leaving 4 or 5-inches between each plant. To prevent disease spray about every ten days with ammoniacal solution.

Orchids

Calanthes should now be making a strong and healthy growth. They still need an abundant water supply, with manure water twice a week. Cow or sheep manure, with some soot added, strained through a bag, is a safe manure for these and many other orchids. Do not fail to keep the air humid by several dampings down during the day, but never allow a stagnant atmosphere. Watch the plants so they do not suffer for water but do not keep them wet all the time as the compost will become sour. An oversupply of water is usually the cause of black spots on the leaves. It is always better to permit these orchids to dry out occasionally so the compost will be kept sweet. The night temperature should be 70 degrees. In admitting air, always avoid drafts. They cannot stand air like cattleyas without suffering.

Sowing Myosotis and Daisies

Where a stock of these plants is wanted make a sowing now. There is no better place than in a cold frame. Make the surface nice and fine and sow the seed in drills about 4-inches apart. See that they are nicely firmed and kept moist. When big enough to handle they can be pricked out into other frames where they can stay until spring.

Poinsettias and Begonias

Dear Sir—Kindly let me know, through the columns of HORTICULTURE, whether it is possible to keep poinsettias recently potted into small pots, and to transplant them into three-inch pots as the final shift, to carry them until Christmas with the help of liquid manure? Also, until how late is it advisable to take cuttings of Begonia Lorraine and Cincinnati, in order to have them in flower for Christmas? I have some leaf cuttings of the former mentioned plants in sand; will they make small flowering plants for Christmas if potted now?

J. R.

You would find it quite a job to keep poinsettias in three-inch pots, and have them in anything like a salable condition for Christmas. They are sure to become stunted and lose most of their foliage. Why not plant them in 4 or 5-inch pots and when these pots are filled with roots feed with liquid manure? Then you would be able to have a presentable plant with good-sized bracts. The leaf cuttings that you have in the sand are late enough and should make nice little begonias in three-inch pots by Christmas if you grow them on without a check. Use three parts of turfy loam, two of well decayed cow manure and one part each of leaf mold and sand. Keep them on a bench well up to the glass. They should be provided with some shade during the hottest part of the day. Be careful to water them evenly.

Mr Farrell's next notes will be on the following: Care of Carnations; Cinerarias; Lorraine Begonias; Lilium Candidum; Young Palms; Propagate Variegated Vinca.

While fortunately free from the terrors of attacking battalions of armed men, we in this country have our own trials in a less distressing but by no means insignificant form. From all directions come startling accounts of the invasion of vast armies of worms which lay waste fields and gardens and destroy all the crops in their path. No section of the eastern half of the United States seems to have escaped more or less serious damage from the ravages of the dreaded army worm. Many suppressive remedies have been recommended, some of which we have published in previous issues and which

need not be repeated here. We just wish to call attention to the statement now made by the Secretary of the Massachusetts Board of Agriculture that robins, bluebirds, blackbirds, grackles and English sparrows, assisted by a small detachment of toads, have succeeded in checking the destructive march of the army worms through southeastern Massachusetts. We hope that the distribution of poisoned bran mash in gardens as heretofore recommended will not be generally adopted for it would kill many of these feathered allies which nature has given us for a useful purpose. Indeed, they are all too few now.

In common with every civilized community and every individual possessing a spark of human sympathy and pity for those who suffer, we are deeply saddened by the terrible infliction which has fallen with such appalling suddenness upon Europe, and, indeed, upon the whole world. Millions of human lives, untold millions of value in property, the garnered harvest of centuries of industry, the commercial prosperity of a continent, institutions of philanthropy, justice, refinement and art—the best that the human mind has ever devised or achieved—all this and more is made a ghastly sacrifice to the inflamed passions of war. The most frightful pages in human history are about to be written and the burden of woe and life-long misery will fall with crushing weight upon millions and millions of our fellow-creatures who are blameless of any part in bringing about the ruthless devastation and slaughter. None of us, however remote from the theatre of this titanic death-grapple, can hope to entirely escape the effect of its withering blast. Let us hope that it will be quickly over and that it may be the last, as it is unquestionably the greatest conflict this world has ever seen.

In the light of these most momentous aspects of the situation it seems trivial to refer to the immediate interruption and stagnation of commerce and the overthrow of customs and conditions with which we have grown up and of which we feel to be a part. In our horticultural relations with the warring countries upon which we have been so dependent for a large part of our supplies we must, for the time being, relinquish much that we have taken for granted and counted upon as assured. Fortunately a large proportion of the French bulbs are already on this side and others are on the way with a fair prospect of safe arrival. The outlook for German imports is much more dubious. Lily of the valley is hardly within the line of possibility. Erfurt which is the centre to which we look for many flower and vegetable seeds is directly in the probable path of invading armies. In Belgium every man is called to the field of combat and our chances for getting azaleas look very slim. As we write, Holland is yet classed as "neutral" and if it so continues our Dutch bulbs may meet no trouble other than some delay, but who can say that Holland may not yet be overwhelmed by the wave of wrath and destruction which surges all around her borders, before the ink is dry on these pages? Horticultural importing houses in this country are hard hit and if present forebodings come true most of their business for this year is ruined. In the present uncertainty and chaos our only course is to wait and hope for the best. The one redeeming feature of the situation is the possibility of the use of more home material. In the contingency that here may begin an era of special development of hitherto untried home resources we may yet perhaps discern the "silver lining" to the dark clouds that now appear so ominous.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the editor of HORTICULTURE.

Heating Repairs.

There are parts of the country where katy-dids are already sounding the warning of the coming fall, and if repairs are to be made on the heating plant, no time should be lost in seeing that these are all attended to before the first cool nights come, although the summer with us here has been very cool so far, and steam was required off and on all the time. There is still time to see that there is nothing wrong with the pipes and that they are in good shape to stand the strain this coming winter. The best time to do this work is when the houses are being emptied so that it is a very simple matter to get under the benches wherever it may be necessary. After all the system is looked over from the boilers to the expansion tanks, test the whole by starting the fire and running it hard for a time. If there are any bad places anywhere they will show up, and can be repaired in time for the cold weather.

Ventilation.

As fall approaches it will be necessary to pay more and more attention to the ventilators. Never close the houses down tight on these cool nights, but keep at least a crack of air on all night. If heat is used, so much the better, as there will be less danger of the houses getting cold. In the morning it is well not to raise the ventilators too soon, or too much at a time. It is much wiser to go according to the thermometers, letting the houses reach 78 degrees F before they are finally lifted up full. In the even-span houses that have ventilators on both sides of the ridge it will be well to use the side opposite from the wind, and then use about two inches of air from the windward side for every eight inches on the opposite side. This arrangement will allow the wind to blow in and then blow out, taking more air with it, instead of blowing over the house and sucking the air out as it goes, thus causing draughts all over.

The Bottom Leaves on Beauties.

These will have to be picked off as the season advances, for if they are not, blackspot is very likely to start in from this cause. Pick off all the leaves that touch the soil and do away with them. There is no need—in fact it is harmful to skin the plants half way to the first wire, but all the leaves that actually lie on

the soil, or touch it more than is safe should be removed. Care must be taken in doing this or some of the bottom breaks are liable to come off with the leaves, and then there would be as much as, if not more damage than, good. Another thing picking off these leaves will help prevent, and that is spider. It is very difficult to get the hose under these leaves, and that is where spider will form a nest and then they will gradually spread all over the plant. Keep after these leaves and you will be glad of it.

Lime.

The houses that were planted very early, will now be large enough to need a little lime. Use air-slaked burnt lime, and not the so called agricultural lime, unless you happen to know just what it is. Do not apply too much of it all at once but enough to whiten the surface of the benches. If the houses have been mulched recently it will be best to wait with the lime until most of the mulch is dissolved, and then apply a little of the lime should the plants appear to need it. Although it is no nice work, we like to apply the lime screened, so as to be sure that it is free from all lumps that will slake later, and leave heaps of lime here and there on the benches. Fresh lime is best, for it is far more active and it will give quicker results.

Manure for Mulching.

If there is no manure heaped up for mulching as yet, begin at once to get some in, and turn it over several times to decay it and to keep it from burning. Manure sheds will come in handy for this, as the rain will not be able to get into the manure, and thus wash it out. If one had a way to figure the amount of money florists lose by letting the manure piles lay around in the rain, it would run up into large numbers. Fork the manure over quite often and see that it is left in nice heaps, well shaped, for it looks much better that way, and does not require any more labor. Avoid using manure with long straw in it. If you can, offer your man a little more and have him cut up all the bedding into short pieces with a fodder cutter. The manure will then be much easier to handle, and will decay more rapidly, making it better all around. Of course for liquid manure the short straw would be a nuisance but the season is still some distance off, and little manure water will be used within the next few weeks.

The Special Convention Number of Horticulture

WILL BE ISSUED ON AUGUST 15

This will be an issue of exceptional interest and will be widely circulated and widely read. Its value as an advertising medium for all floral and horticultural material cannot be over estimated. S. A. F. trade is always worth a special effort at Convention time. Send your order in early and it will have our best attention.

THE CONVENTION CITY

Courtesy Boston Chamber of Commerce

THE CONVENTION GARDEN.

Work on the Convention Garden has progressed rapidly during the past few days, and with the exception of the greensward which has only just been sowed down and some of the gladiolus beds which will not be in bloom for the Convention, the visitors will find in this feature much to repay them for their trip to Boston. The Farquhar exhibit, which was the last to be installed is now approaching completion and is much the largest and most elaborate feature on the grounds, Gondolas will ply the waters starting from the Japanese pagoda and rustic pier erected here and the city will provide brilliant illumination for the grounds at night which will add greatly to its charm. It is much to be regretted that so much unavoidable delay, caused by changes in the city government, supplemented by an unusually cold and wet season, has hampered the work on this big undertaking, but on the whole, a very creditable result has been attained and the visitors will enjoy it.

AUGUST FLOWER SHOW IN BOSTON.

Gladioli and phloxes will be the features of the August Flower Show of the Massachusetts Horticultural Society at Horticultural Hall, Boston, on Saturday and Sunday, August 8 and 9.

In addition there will be interesting exhibits of annuals, including China asters and other seasonable flowers. A novelty of this exhibition will be a display of caladiums from the estate of Thomas E. Proctor of Topsfield, consisting of over 125 varieties, arranged with garden effect. Fruit and vegetables also will occupy a conspicuous place and the first specimens of the season of apples, pears, plums, and peaches will be shown. Hothouse grapes and fruit trees grown in pots are scheduled for this show.

The exhibition is free and will be open Saturday from 12 to 6 and Sunday from 2 to 6 o'clock.

BOSTON DAY, FRIDAY, AUGUST 21.

Arrangements are now all completed for a glorious outing on Friday, the Allied Horticultural Interests of Boston acting as hosts. A large steamer of the Nantasket line has been chartered and will sail for Fort Warren in Boston harbor, where the baseball game and a list of other interesting events will take place. After the conclusion of these games the sail will be continued out into Massachusetts Bay for a short distance and then to Nantasket Beach where a shore dinner will be served at the Rockland House. This will terminate the official convention festivities.

FLORISTS' TELEGRAPH DELIVERY.

The fact that the European retailers allow only ten per cent in their exchange of orders and expect to allow only ten per cent when transacting business with the retailer of our country has been drawn to the attention of the Florists' Telegraph Delivery. All members are requested to arbitrarily deduct twenty per cent in dealing with foreign flower shops.

In case there is any controversy over the matter the same should be taken up with the Secretary of the F. T. D. and proper provision will be made for taking care of it. A resolution requesting permission to mail all foreign orders net—that is, with a discount of twenty per cent subtracted, when dealing with foreign houses not permitting more than ten per cent, will be offered at the Boston meeting of the Florists' Telegraph Delivery.

IRWIN BERTERMANN, Pres.

Indianapolis, Ind.

AMERICAN CARNATION SOCIETY.

A meeting of the board of directors will be held in Boston, Mass., at 9.00 A. M., Thursday, August 20th. All members who are in attendance upon the S. A. F. & O. H. convention are invited to meet with the board.

S. J. Goddard, Pres.

A. F. J. BAUR, Sec'y.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The Chrysanthemum Society of America will hold a meeting in Paul Revere Hall, Mechanics Building, Boston, 9.30 A. M., Wednesday, August 19, 1914, the second day of the convention. This announcement should have been included in the program mailed to all members some time ago.

JOHN YOUNG, Sec. S. A. F.

ACCOMMODATIONS.

Have you engaged your hotel accommodations? If not, HORTICULTURE suggests that any of the following named houses will be found acceptable in all appointments and reasonable in charge. All are within convenient distance from the Convention hall.

Hotel Nottingham, Copley Square. Francis Howe, Proprietor; Hotel

Brunswick, Boylston Street and Copley Square, Fred E. Jones, Proprietor; Hotel Puritan, Commonwealth Avenue, H. H. Costello, Manager; Hotel Victoria, Dartmouth and Newbury Streets, Thomas O. Paige, Manager; Kent Mansion, 12 Kent Street, Brookline, Martin & Gillies, Proprietors; Copley Square Hotel, Huntington Avenue, cor. Exeter street. Be careful and not confuse the "Copley-Plaza" with this hotel.

THE SHRINE OF A GIFTED AUTHOR.

"Orchard House" the home of Louisa M. Alcott, where she wrote "Little Women" will be a spot of more than passing interest to the ladies, particularly, on the occasion of their visit to Boston and no doubt many of them will desire to make the pilgrimage to the beautiful spot so charmingly portrayed in the photograph we here reproduce.

A LETTER FROM GERMANY.

The following letter, dated at Munchen, Germany, July 25, and received in Boston, August 6, will be of more than ordinary interest to our readers in view of the stupendous events which have transpired in the brief time since the letter was written. Mr. Huebner, who is in the florist business at Groton, Mass., sailed from Boston on the Hamburg-American steamer Cincinnati, July 7, for a well-earned vacation in his native country. We hope he may be able to complete it in safety and comfort.

My dear Mr. Stewart:

As I promised to drop you a line, I suppose I have to keep my promise. As you will see by the heading, this comes from Munich, the home of Munchner beer. Germany is certainly a beautiful country, everything seems to go so harmoniously. Nobody seems to be in a hurry, yet everything goes along punctually. It is a great rarity to have a train arrive one minute late. But you will probably be less interested in such matters than you would be in anything pertaining to plants and gardening.

One of the first things I noticed is the amount of flowers and plants used here. Every little yard has a few flowers and in the larger houses in the cities every window up to the attic has a window box. Petunias and ivy geraniums seem to be the favorites for the window boxes. There is one beautiful dark blue single petunia called Rathhaus petunia, which is used very much, and it certainly is pretty in connection with white or yellow. I visited the exhibition in Altona, which is now in progress. Cactus and aquarium plants seem to occupy most of the space. I also noticed a new strain of bedding begonia, very dwarf and compact, very pretty, exhibited by G. Borneman, Blankenburg. The Thierpark (menagerie) of Hazenberg in Stellingen, is also very interesting, as there were some very fine flower beds, but the most interesting place I found to be E. Neubert, in Wandsbek. He is the bly of the valley king of the world. Everything here is carried on on a large scale. Mr. Neubert took me in his auto all over his plantation, which is very extensive, and it was certainly most interesting. He informed me that he raises about fifty million valley annually, also about seventy thousand lilacs call in pots for potting, thousands and thousands of his clematis, azaleas, etc. A fence about one mile long, covered with climbing roses, called D. Perkins, were in full bloom and presented a beautiful sight. A new sight to me was to see sixty women on their knees weeding in one of the valley fields. The greenhouses, of which there are a good many are all glazed with two thicknesses of glass, having about one inch air space between. Some of the cyclamen and gloxinia specialists are also situated in Wandsbek, but I could not see many of these flowers in bloom, as all are raised for the seed. The women seem to do the principal work in the fields; their hours are from

Copyright by B. & L. N. S. C.

LOUISA M. ALCOTT'S HOME, "ORCHARD HOUSE," CONCORD, MASS.

6 A. M. to 6 P. M., and their wages are about 6¼ cents per hour.

In the Thiergarten in Berlin, which is a park of about 650 acres, right in the center of the city, there is a beautiful rose garden, about six acres, which was laid out by the present Empress. Some of the most prominent roses used were: Gruss an Teplitz, Aechten Muller, C. Testout, Jeanne d'Arc, D. Perkins, Kaiserin A. Victoria, Fisher Holmes, Frau K. Druschki, Marechal Niel, Orleans, etc. The gardens in Potsdam around the Emperor's palace are also very fine, as were also those at Sans-souci, where there are the old orange-ries and graperies from Frederick the Great's time.

In Erfurt, where I spent several days visiting the large seed growers, I noticed some beautiful new petunias and begonias which we shall hear of in a year or two, also a good many new plants. Everything here is raised for seed or bulbs. Asters were not yet in bloom, and gladioli were just beginning, so in about three weeks will be a better time to see them. Stocks, of which there were formerly very many raised, are very little grown here now. At Pfiltzer's in Fellbach (Stuttgart) I noticed as one of the best novelties a dwarf, compact Mrs. Sander marguerite. It makes a beautiful pot plant, and is a great improvement in every way. I understand that one of our American firms has engaged a large quantity of this variety. There were also several new bedding begonias, very fine, and a deep orange canna, beautiful, not named yet, also an endless variety of plants not commonly seen.

The new botanic garden in Nymphenburg (Munich) is really wonderful. I went out this morning early (it is about eight miles from Munich) but had to wait until ten o'clock before gates were opened. It closes again at 12.30, and during the 2½ hours I had not seen one half. One house which attracted my attention was planted with tuberous begonias, and if we ever get these varieties in commerce, it will be a revelation to all of us. I leave tomorrow for Innsbruck, in Tyrol, which also has a famous botanic garden.

Sincerely yours,

H. HUEBNER

AMERICANS WITHIN THE WAR ZONE.

Many of our horticultural friends are in the beleaguered countries of Europe on business or pleasure and the sud-

denness with which war began must have caught some of them in an awkward predicament. The following named parties are presumably all of them over there still, most of them having sailed within the past three or four weeks and we have not heard of the return, thus far, of any of those mentioned.

Prof. C. S. Sargent, Arnold Arboretum; A. Anderson, Chicago; H. Huebner, Groton, Mass.; C. Lorenzen, Hartford, Conn.; A. A. MacDonald, Somerville, N. J.; Frank Denzer and Harry Breitmeyer, Detroit, Mich.; Peter Duff, Orange, N. J.; Mrs. E. A. Williams, Pittsburgh, Pa.; H. W. Betts, Richmond, Mass.; Edward Reid, Philadelphia; A. Leuthy, Roslindale, Mass.; Otto Heineken, New York City; Julius Roehrs, Rutherford, N. J.; R. R. Root and H. B. Derner, Urbana, Ill. R. M. Ward and James McHutchison of New York are somewhere in the far east.

TO LOVERS OF DAHLIAS.

An invitation is extended to every lover of dahlias to meet at a formal gathering of all American dahlia enthusiasts at Newport, R. I., on August 13th, 1914, for the purpose of organizing the American Dahlia Society.

This society will be founded for the purpose of promoting the interests of the dahlia; it will endeavor to further its progress, establish a clear classification, encourage more public exhibitions, and, last but not least, it will disseminate useful and helpful information at regular intervals to its members.

The meeting will take place at 8.00 P. M., August 13th in the Weaver building, Broadway, Newport, R. I. August 13th is the first day of the combined flower shows given at Belcourt, and the exhibits of dahlias here will certainly be an attraction worth while for all dahlia lovers to undertake the trip to Newport. Come and help in a worthy cause.

MAURICE F. ...

A MAGNIFICENT FLORAL BUILDING

The illustration on our cover page and those appearing herewith will give some idea of the beautiful structure of the F. R. Pierson Company at Tarrytown, N. Y., which we noted in our issue of May 30 and which is now completed. The building is of stone and fireproof throughout. The building is 41½ ft. front, 50 ft. deep, and 30 ft. high. The large plate glass windows are 10 ft. 6 in. by 14 ft. The building is flanked on the north by a plant show-room, 15 x 50, of steel and copper enclosed with heavy plate glass, and on the south by an Italian garden—a massive, dignified structure—in keeping with the solidity and massiveness of the main building, the pergola post, being constructed of stone also.

While the photographs give a very good idea of the exterior of the building, the interior needs a little description. It is very beautifully finished, and is quite unique. The ceiling is 30 feet high, and is of elaborate design. It is a beautifully executed piece of workmanship. It is supported by two massive columns, which also support the balcony. The main floor is not intended for a store or shop, but for a reception, or show room. The floor of this room is of quarry tile, imported from North Wales. There is a large open fireplace nine feet in width, surmounted by a very beautiful mantel, which is a magnificently executed piece of hand-carved work.

On the east side of the room is what would ordinarily be termed a refrigerator, but which is in reality a show case so designed as not to appear at all like a refrigerator. This is seven feet wide, sixteen feet long and eight feet high. The frame work is of steel and cement, insulated with cork, and

LAWN VIEW SHOWING SIDE ENTRANCE TO MAIN BUILDING VIA PERGOLA

the exterior is finished in marble, bronze, and Caen stone. The plate glass front is double, with an air space between to prevent condensation. The pilasters are solid bronze. The floor is constructed of moss-green encaustic tile; the rear walls are large mirrors; the ceiling and other interior walls are covered with opal plate glass. The roof of the show case is covered with smaller tiles, of the same general design and color as the floor of the main building. The show case is lighted by two ceiling lamps enclosed in opalescent globes. In the rear of the show case, extending from the floor to the ceiling on each side, are

five sets of aluminum drawers, for the storage of violets, gardenias, ferns, asparagus, and other articles of that character. These drawers are concealed by doors covered with a mirror. A balcony, 16 feet from the main floor, extends around two sides of the building, affording ample space for office work. Between the balcony and the main floor is a mezzanine floor, on which are the toilets and a large safe deposit vault. Below the mezzanine floor is a large workroom 10 x 40. There will be no counters or other conventional store fixtures on the main floor.

The interior walls are of Caen stone imported from France. The stairways are of marble, with bronze railings. All of the doors in the building are of metal, the door on the main entrance and those leading into the conservatory and Italian garden being of bronze.

The lighting effects are most artistic. The large central fixture, suspended from the ceiling, is five feet in diameter, and contains lamps of eight hundred candle power. The inside bottom of these fixtures is covered with amber colored glass, which gives a soft, mellow light.

If it were not for the conservatory on the north and the Italian garden on the south, the building might be mistaken for a modern public library or bank. Nothing like it has ever before been attempted in the florists' business, either in breadth of conception or execution, and it is a building that will probably not be duplicated for a long time to come. It represents an outlay of nearly fifty thousand dollars.

The building is designed to meet the conditions of a high-class residential neighborhood. A building of this character would only be possible in such a town as Tarrytown, which is the wealthiest suburban section in the United States, being only twenty-five

PERGOLA VIEW

¶ In response to the numerous inquiries from our customers and friends who want to visit our nurseries while in Boston during Convention week, we wish to state that we shall be glad to have them visit our nurseries any time during their stay here. We will have a Private Gardeners' Day at our Dedham Nurseries on Wednesday afternoon, August 19th. Come and meet your friends.

R. & J. FARQUHAR & CO.

Boston, Mass.

miles from the heart of New York City. The building is located on the main thoroughfare along the Hudson River between New York and Albany and the north and west. It is estimated that on pleasant days between three and four hundred automobiles an hour on the average pass the building.

All in all, it is a building that must be seen to be appreciated. Neither photographs nor description can convey the general effect of the beauty of the structure. William R. Cobb, General Manager of the Lord & Burnham Company, is the architect, and the design as worked out is the result of the collaboration of Mr. Pierson and Mr. Cobb, the latter, of course, having carried out the technical construction and the general design.

BAR HARBOR SWEET PEA SHOW.

The Bar Harbor Horticultural Society held its second annual Sweet Pea Show on July 25 and 26. This exhibition was under the direction of the following committee: William T. Burton, chairman; Edward Kirk, Clarence E. Dow, John H. Stafford, John Renwick. The staging of the flowers was under the care of Arthur E. Thatcher, who had charge of the exhibits, and acted as manager for the show. William Sim, of Cliftondale, Mass., and George Cruickshank, of Boston, acted as judges, and made the following awards:

12 vases, 12 varieties: 1st, Mrs. John S. Kennedy, gard. William T. Burton; 2nd, Mrs. E. C. Cushman, gard. John Renwick. 6 vases, 6 varieties: 1st, Mrs. John S. Kennedy; 2nd, Mrs. E. C. Cushman. 25 sprays, dark pink: 1st, Mrs. John S.

Kennedy; 2nd, A. C. Gurnee, gard. Charles L. Shand. 25 light pink: 1st, Mrs. John S. Kennedy; 2nd, Mt. Desert Nurseries. A. E. Thatcher, manager. 25 white: 1st, Mrs. John S. Kennedy; 2nd, D. C. Blair, gard. Eugene Mitchell. 25 lavender: 1st, Mrs. Edgar Scott, gard. Almado Mitchell; 2nd, Mrs. John S. Kennedy. 25 mauve or blue: 1st, A. C. Gurnee; 2nd, Mrs. John S. Kennedy. 25 crimson or scarlet: 1st, Mrs. Edgar Scott; 2nd, Mrs. J. T. Bowen, gard. Arthur E. Chilman. 25 orange or salmon: 1st, D. C. Blair; 2nd, Mrs. E. C. Cushman. 25 any bicolor: 1st, A. C. Gurnee; 2nd, Mrs. John S. Kennedy. 25 mixed: 1st, Mrs. John S. Kennedy; 2nd, D. C. Blair. 25 yellow or buff: 1st, D. C. Blair; 2nd, Mrs. E. C. Cushman. 25 any other variety: 1st, D. C. Blair; 2nd, Mrs. E. C. Cushman.

Light Pink—25 Hercules: 1st, Mt. Desert Nurseries; 2nd, D. C. Blair. 25 Doris Usher: 1st, Mrs. John S. Kennedy; 2nd, Edward Kirk. 25 Elfrida Pearson: 1st, Mrs. John S. Kennedy. 25 Mrs. Routzahn Spencer: 1st, John H. Stafford; 2nd, Mrs. E. C. Cushman.

Orange—25 Thomas Stevenson: 1st, Mrs. John S. Kennedy; 2nd, Mrs. Edgar Scott. 25 Barbara: 1st, D. C. Blair. 25 Edith Taylor: 1st, Mrs. John S. Kennedy.

Mauve—25 Irish Belle or Dream: 1st, Mrs. John S. Kennedy; 2nd, A. C. Gurnee. 25 Asta Ohn: 1st, Mrs. John S. Kennedy; 2nd, D. C. Blair.

Scarlet—25 Scarlet Emperor: 1st, D. C. Blair; 2nd, John H. Stafford.

White—25 King White: 1st, Mrs. John S. Kennedy; 2nd, D. C. Blair.

Rose Pink—25 Royal Rose: 1st, Mrs. John S. Kennedy.

Display, 30 square feet: 1st, Mrs. E. C. Cushman.

Display, 50 square feet: 1st, Mt. Desert Nurseries; 2nd, A. C. Gurnee.

Table decoration of sweet peas, sweet pea and other foliage allowed: 1st, Mt. Desert Nurseries; 2nd, John H. Stafford.

Amateur Classes—30 sprays white: 1st, Marston Salisbury. 30 pink: 1st, I. Miller; 2nd, John Stafford, Jr. 30 lavender: 1st, Marston Salisbury; 2nd, I. Miller. 30 orange: 1st, John Stafford, Jr. 30 red: 1st, Marston Salisbury; 2nd, I. Miller. 30 sprays mixed: 1st, I. Miller.

Besides the above prizes, a special award was given John H. Stafford for

a meritorious display of sweet peas in a space covering 30 square feet.

CLARENCE E. DOW, Sec'y

WORCESTER COUNTY HORTICULTURAL SOCIETY.

The largest and finest exhibition of sweet peas ever seen in Worcester was the verdict at the weekly show of the Worcester county horticultural society in Horticultural hall, Thursday afternoon, July 23. A special feature was the table decorations. The first prize table by Mrs. Percy G. Forbes was decked with deep shaded sweet peas, the centerpiece being a flat glass basket with the blossoms, and at each place was a smaller basket with the flowers surrounded with smilax. Miss Lucy M. Coulson's table took second. Pale pink sweet peas were used and tiny place cards in tinted colors with corsage bouquets of sweet peas were at each place, and on the centerpiece, a large vase of the flowers, was perched a white butterfly. The third prize was by Mrs. Leonard C. Midgley. It was done in white, the only color being the green candles with delicate green shades. The centerpiece was a high slender vase set on a glass plate and surrounding it were smaller vases all linked with a glass chain work. Harry L. Randall showed a splendid basket of sweet peas which won first prize.

The annual Summer flower show of the North Shore Horticultural Society will be held August 26 at Mrs. R. C. Winthrop's estate at West Manchester, Mass., where the show has been held for the past two years.

Tarrytown Horticultural Society.

The annual outing of the Tarrytown Horticultural Society took place at Rye Beach, Rye, N. Y., Aug. 4th. Dinner was served at Edwards' Hotel. Seventy-five members and friends of the society were present, and all enjoyed the dinner and the day's outing. The committee in charge, James W. Smith, William Scott, John Brunker, George Wittlinger and Thomas A. Lee—deserve much credit for the day's enjoyment. Games were indulged in. The hundred-yard dash for all was won by George Wittlinger; the hundred-yard dash for boys by Harold Gniff; potato

race by Alfred Lee; three-legged race by Wm. Kastberg and George McIntosh; running broad jump by Wm. Kastberg; tug-of-war, Wm. Scott on one side and W. Melville Scott on the other, Wm. Scott, winner.

Westchester and Fairfield Horticultural Society will hold their annual outing at Edwards' Rye Beach Hotel, Aug. 11th. Dinner tickets can be procured from W. J. Sealey, Portchester, N. Y., at \$1.50 a person. The fall show of this society to be held in Germania Hall, New Rochelle, N. Y., Nov. 4, 5, 6.

CLUB AND SOCIETY NOTES.

The St. Louis Florist Club will hold its regular monthly meeting August 13 at the home of the Cannon Floral Co. at Webster Grove, Mo. This is a most important meeting on account of the

election of officers and matters pertaining to the S. A. F. Convention at Boston.

The Ornamental Growers and Nurserymen's Association are holding their annual meeting in Boston this week, with headquarters at Hotel Bellevue. A trip among the nurseries in Framingham, Lexington, Bedford, Concord and other suburban towns was enjoyed on Wednesday. Details of meeting in our next issue.

Lenox, Mass.—Many of the employees on the private estates here are French (Breton) and a large number of them—upwards of forty—have resigned their jobs and gone to Boston whence they will sail to do military duty in France if transportation can be secured.

PICNIC OF MINNESOTA FLORISTS.

The above view shows the group of participants in the picnic of the Minnesota Florists' Association, Minneapolis Florist Club and St. Paul Florist Club at Red Wing, Minn., on July 17. The trip was by steamer down the river, with barge for dancing attached and return by special train. Races and general sports were held in. About four hundred were in attendance.

LILIUM HARRISII

For Immediate Use

We have received our first consignment of Harrisii, and offer a selected stock of the original true Harrisii for early forcing. This stock was grown from the original true type and will be found splendid stock for early forcing, for which purpose Harrisii is so valuable. The crop is much shorter than usual this season, but we are in position to supply a nice lot of selected stock, and can make delivery from first shipment.

6 to 7-inch bulbs, 350 to the case, \$5.50 per 100, \$45.00 per 1,000

7 to 9-inch bulbs, 200 to the case, \$9.00 per 100, \$80.00 per 1,000

Full case lots at thousand rates.

FERNS

There is nothing better for summer use than the fine varieties of NEPHROLEPIS. We offer a nice stock of the following varieties, well established plants ready for immediate shipment.

Nephrolepis elegantissima (The Tarrytown Fern), 3½-inch, 25c. each; 6-inch, 50c. each; 8-inch, \$1.00 each.

Nephrolepis magnifica, 3½-inch, 25c. each.

Nephrolepis muscosa, 3½-inch, 25c. each; 5-inch, 50c. each.

Nephrolepis Harrisii, 6-inch, 50c. each; 12-inch—very large plants, \$5.00 each.

Nephrolepis Bostoniensis, 6 inch, 50c. each; 12-inch—very large plants, \$5.00 each.

Pteris Wimsettii multiceps fine hardy fern 3½-inch, 15c. each.

Small Ferns for Fern Pans. A fine assortment. 2½-inch, \$4.00 per 100.

SPECIAL OFFER OF KILLARNEY BRILLIANT, Grown in 4-inch Pots, To Close Out Stock

We have a few thousand extra fine plants of this valuable rose. Those who have not completed their planting or who have been building or who have not all the stock they need, will find this a bargain. Plants are strong plants from 4-inch pots. In order to close out stock, we offer what we have left unsold at \$25.00 per 100, \$200.00 per 1,000.

F. R. PIERSON CO., TARRYTOWN-ON-HUDSON

NEW YORK

NORTH SHORE (ILL.) EXHIBITION.

The strip of land along the shore of Lake Michigan, north of Chicago, is commonly known as The North Shore and contains some of the finest as well as the largest estates in America. Here the landscape gardener has everything to assist him and finds nature always ready to respond to his efforts. Among the North Shore towns, Lake Forest has been a leader for many years and its exhibits of flowers and vegetables under the auspices of The North Shore Horticultural Society, have been notable events. On July 22, occurred the eighth annual exhibit, held at Durand Art Institute, Lake Forest, Ill., participated in also by the Garden Club of Illinois, of which Mrs. Tiffany Blake of Lake Forest is president and which has for its object the cultivation of garden flowers.

The exhibit this year was held earlier than usual, to the advantage of the floral display, but not quite so favorable to the vegetable collection. Occupying the center of the main hall were two large groups of decorative plants from the conservatories of L. F. Swift and A. B. Dick, and the stage was filled with collections of fine gladioli, while other large collections were shown on the main floor. The gold medal offered by A. E. Kunderd, for the largest and best collection was won by Mrs. E. S. Moore, Lake Forest, Ill., gard. D. McNaughton. The sweet pea section was remarkably well filled for a July show, one collection of 32 varieties all Spencer type, including the new Edith Taylor, was grown by Knut Lofving, gardener for D. M. Cummings. Vaughan's Seed Store showed phlox and delphiniums. L. F. Swift easily won first prize on house ferns which were exceptionally good. A table of six gloxinias by Stanley Field showed plants splendidly grown and flowers of exquisite coloring. The collection of baskets of flowers numbered several dozen and showed much taste and skill in arrangement, loose effects prevailing. In vegetables the displays were good for July though not equal to those of former years. An admission of 50 cents was charged in the afternoon and 25 cents in the evening.

Hightstown, N. J.—The greenhouses of Jos. H. Black, Son & Co. have been leased by Ferris C. Waite.

CLUBS AND SOCIETIES

FLORISTS' CLUB OF PHILADELPHIA.

Routine business of only local interest occupied the regular monthly meeting of the above club held on the 4th inst. The various convention committees reported progress, and everything looks favorable for a good crowd from this city. About fifty will go on the regular club party via Reading and Metropolitan steamers on Monday; but there will be four times that number and more by other routes, and by auto; and on various dates. A committee on co-operation was appointed on request of M. C. Ebel of the N. A. G. A. E. Wohlert, Fred Hahman and Alfred Burton are the committee. After adjournment a pleasant social time was enjoyed—the creature comforts being supplied by A. E. Wohlert, who is an active member of the essay committee. Very kind of him, and everybody appreciated the good time. It should not be forgotten however, that the club has a house and entertainment committee, whose duty it is to attend to these matters. The essay committee's functions are, of course, purely intellectual. The feature of next month's meeting will be a review of the convention by four leading club members.

SOUTHAMPTON (N. Y.) HORTICULTURAL SOCIETY.

The eighth annual exhibition of this Society was the best ever staged in Southampton. The postponement of the exhibition from the previous week proved to be a very wise move, for there was a wealth of flowers now in bloom that had not arrived at maturity last week.

The exhibits were divided into five divisions. Division A included table decorations and decorative designs. Division B included cut perennials, annuals, etc. Division C included greenhouse and herbaceous plants in pots or tubs. Division D included ornamental stove and greenhouse plants. Division E included fruits and vegetables. The principal attraction was the exhibition of decorated luncheon and dinner tables, open to the women of the cottage colony only, the flowers and foliage used in the decorations to be grown by the exhibitor. The judges of the exhibits were G. W. Gilbert of Shelter Island, George Wittinger of Tarrytown and Frank Niquet of Patchogue. One-half of the net proceeds will be donated to the Southampton Hospital.

NEW YORK FLORISTS' CLUB.

President Duckham having received ten written requests, complying with the constitution and by-laws of our club, instructs me to call a special meeting to be held in the Grand Opera House building, Monday, August 10, at 8 P. M., the purpose of the meeting being what action, if any, our club should take as a recommendation to members attending the Convention of the Society of American Florists and Ornamental Horticulturists to be held at Boston, as to the supporting of candidates.

JOHN YOUNG, Sec'y.

FLORISTS' CLUB OF WASHINGTON

Announcement was definitely made at the August meeting of the Florists' Club of Washington, that a show would be held in the Old Masonic Temple, during the week of November 2 to 8, inclusive. The show committee consists of Fred H. Kramer, chairman; R. L. Jenkins and William F. Gude. Immediately following the announcement as to the advisability of holding a show this year more than one-half of the guarantee fund was subscribed and the preliminary work was begun.

For the Boston convention transportation committee, R. L. Jenkins submitted a report as to who would go via the steamship "Howard." This party will consist of about twenty-five while those who will go later by train will number up to fifty. Richard Vincent, Jr., was present to inform the members of the action taken by the Baltimore Club with respect to the sea trip. Captain William H. Ernest reported that Boston and the florists who attend the convention would have an opportunity to see the Capital bowling team in action for he will make the trip accompanied by George H. Cooke, George C. Shaffer, Robert MacLennan, Samuel Simmons, George Dalglish and Harry Lewis. The boat party will consist of President and Mrs. Cooke, B. L. Stidham and wife, O. C. MacCardell and wife, J. A. Barry, Harry B. Lewis, R. L. Jenkins, Theodore Diedrich, Otto Bauer, William H. Ernest, Mrs. William J. Hart, Jr., Mr and Mrs. George C. Shaffer, D. O'Connor, Miss Della B. Barry, Mr. and Mrs. William F. Gude, Ernest, Amelia, Louise and Granville F. Gude, Adolph Gude, Adolph, Jr., Edwin, Edgar and Miss Esther Gude.

W. F. Gude made a short report on the progress being made by the William R. Smith Memorial committee, of which he is the chairman, stating that funds were being received in response to the appeal sent out by the committee. A feature of the evening was the exhibition of a vase of gladiolus "Snow King," by John Lewis Childs, of Flowerfield, N. Y. A certificate of merit was awarded it.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that Vaughan's Seed Store, Chicago, Ill., offers for registration the Christmas Orchid-Flowered Sweet Pea, Selma Swenson. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's Description—Variety originated by G. Swenson, Elmhurst, Ill. Color a light, soft, clear pink, for greenhouse forcing.

JOHN YOUNG, Sec.

July 31, 1914.

The Cincinnati Florists' Society holds its next regular meeting at the club rooms on August 10, at 8 P. M.

Mignonette

BODDINGTON'S MAJESTY

THE finest of all the Fancy Varieties of Mignonette for Winter forcing; seed saved from select spikes under glass. We have received many testimonials with regard to the excellence of this variety.

Trade Packet 60 cts., 1/8 ounce
\$1.00, ounce \$7.50.

ARTHUR T.
BODDINGTON
SEEDSMAN

342 West 14th St., - NEW YORK
"These Prices are for the Trade Only."

A grand lot of well colored 6-inch pots, \$1.00 each.

PRINCESS. 20—The New Upright Pansy

This strain is entirely distinct from all others. It is absolutely compact upright growing and extremely weather-proof, enduring many storms without damage to its flower. The flowers are mostly blotched and frilled like the Masterpiece, of good form and heavy velvety texture, on heavy stems carried well above the foliage. Attractive by the brilliancy of its colors.

500 seeds, 25c. 1000 50c. 1 lb. \$2.50 1 oz. \$10.00

- 34—Bronze—Brown and copper shades mixed
- 36—Fancy—Rich colors, mostly margined.
- 38—Mme. Perret—Red and wine shades
- 40—Zebra—Fine striped mixture
- 42—Adonis—Light blue, white center.
- 44—Black—Almost coal black.
- 46—Black with bronze center.
- 48—Lord Beaconsfield—Purple shaded white.
- 50—Bronze—Beautiful Bronze
- 52—Bronze with yellow center
- 54—Velvet Brown with yellow center.
- 56—Havana Brown
- 58—Havana Brown with yellow center
- 60—Cardinal—Curled, bright red, dark blotch
- 62—Cecily—Steel blue, margined white.
- 64—Goliath—Large curled yellow blotched
- 66—Hero—Curled, deep blue shaded white.

The KENILWORTH Giant Pansy

seeds are all grown by myself and are offered in the following mixtures and separate colors:

- 22—**KENILWORTH STRAIN**—The flowers are of perfect form and substance; many of the immense flowers are from 3½ to 4 inches; it is a striking collection of beautiful colors and markings, rich with shades of red, brown, bronze, mahogany and many others too numerous to mention. Light, Medium or Dark Mixtures.
- 24—**KENILWORTH SHOW**—An extra fine strain of large flowers; the immense flowers are of circular form and great substance; a beautiful collection of colors and markings.
- 26—**KENILWORTH CUT FLOWER MIXTURE**—Is a distinct class by itself, surpassing all other strains as a cut flower or for exhibition purposes, for inside or outside growing; the large flowers are carried erect above the foliage on heavy stems, 7 or 8 inches long, in the most graceful manner, and stand the hot, dry weather well.
- 28—**MASTERPIECE**—A remarkable type; the curled, wavy petals giving the flower a double appearance, large flowers of great substance, on long, strong stem.
- 30—**GIANT THREE AND FIVE BLOTCHED PANSIES**—A superb mixture. Flowers large and of circular form and of great substance. The display of coloring is unsurpassed. A combination of almost every shade of rich velvety colors, reds are particularly conspicuous; the petals being distinctly marked with three or five large dark blotches.

NEW SEED NOW READY.

All sorts and mixtures, except the new Pansy Princess, are \$5.00 per oz., \$1.25 per ¼-oz.; 5000 seeds, \$1.00; trade packet of 1000 seeds, 25 cents; any 5 pkts., \$1.00. Please order by number.

- 68—Emp. William—Ultramarine blue, violet eye
- 70—Eros—Velvety brown, yellow margin
- 72—Emp. Franz Joseph—White blotched blue
- 74—Emp. Frederick—Maroon with gold edge
- 76—Fairy Queen—Azure blue, white edge
- 78—Freya—Purpleish violet, white edge
- 80—Gold-Edge—Velvety brown, gold edge
- 84—Superba—Orchid tints of red and wine
- 86—Sunlight—Yellow with brown blotches
- 88—Andromeda—Curled apple blossom
- 90—Colossea Venosa—Light veined shades
- 92—Almond Blossom—Delicate rose
- 94—Aurora—Terra cotta shades
- 96—Mammoth—Greenish yellow shades
- 97—The above 7 named Orchid mixed
- 98—Indigo Blue—Deep velvety blue
- 100—Light Blue shades
- 102—Minerva—Red ground, violet blotched
- 104—Meteor—Bright red brown.
- 106—Pres. McKinley—Yellow, dark blotched
- 108—Mahogany with white margin
- 110—Mahogany with yellow margin.
- 112—Mourning Clock—Black with white edge
- 114—Purple—Large rich deep color
- 116—Peacock—Blue, rosy face, white edge
- 118—Psyche—Curled white, five blotches
- 120—Pres. Carnot—White five blue blotches

- 126—Red—A collection of rich red shades.
- 128—Red Riding Hood—Curled and blotched
- 130—Rosy Morn—Purple crimson, white edge
- 132—Striped on lilac ground.
- 134—Striped on bronze ground
- 136—Victoria—Blood red, violet blotches
- 138—White, Large satiny white.
- 140—White with violet blotch
- 142—Yellow, Large golden yellow.
- 144—Yellow with dark blotch
- 40—34 to 144 mixed in equal proportions

For fuller description send for catalogue

RAINBOW is a mixture of the most beautiful, gorgeous colors; blotched, striped, veined, margined, etc. With every \$1.00 worth of pansy seed I will send, free, 1000 seeds of Rainbow, and with other amounts in like proportion.

Obituary

Mrs. Martin Finaghty.

Mrs. Martin Finaghty, wife of Martin Finaghty, formerly in business at Lenox, Mass., and now employed in the Boston Park Department, died in Dorchester, Mass., on July 30.

Ruby B. Leslie.

Mrs. Ruby Bartholomew Leslie, daughter of George Bartholomew, well known and popular in florist trade circles, died on July 23, aged 29 years. She leaves her husband and infant daughter.

Mrs. John H. Newman.

Mrs. John H. Newman, wife of the well known florist, passed away Friday morning, July 31, at her home, in Woburn, Mass. She is survived by one daughter, and five sons. She was born in Ingatestone, Essex, England, and came to Woburn at an early age.

Estella Kaiser.

Estella Kaiser, wife of Louis Kaiser, a Flatbush retail florist, died Saturday, August 1, at her home, 1414 Cortelyou road, Brooklyn, N. Y. She was born in Brooklyn thirty years ago, a daughter of Mr. and Mrs. Michael Alexander, and besides her husband and parents is survived by a brother and one sister.

Henry Kahrs.

Henry Kahrs, head of the shipping department of Grimm & Gorly's, St.

Louis, died on Saturday, August 1, after a two weeks' illness of typhoid pneumonia at St. Mary's Hospital, at the age of 37. He was in Grimm & Gorly's employ for the past ten years and was well known in trade circles and highly thought of by his employers. The body was shipped to New York City Aug. 3, where burial took place, New York being his former home.

Theodore Bock.

Theodore Bock, one of the oldest florists in Ohio, committed suicide at the home of his brother in Hamilton, on July 27, owing to ill health. He retired from active business about a year ago and since that time had been in poor health. He was 68 years of age and is survived by several relatives in Germany, Canada and Ohio.

Thomas Mansfield.

Thomas Mansfield, florist, died suddenly at his home at Lockport, N. Y., on July 24, aged 75 years. Mr. Mansfield was for many years a member of the Society of American Florists and a very regular and always interested attendant at the annual conventions.

where his cheery, happy disposition made for him many personal friends.

E. W. Habermehl, Jr.

Edward W. Habermehl, Jr., of Philadelphia, son of Edward W. Habermehl, member of J. J. Habermehl's Sons, florists, was drowned Monday afternoon, August 3, in the Schuylkill river at Spring Mills. He was seized with cramps while trying to swim across the river, and went down before his chum and fellowcamper could reach him. The body was recovered an hour later. Young Habermehl and Brandt have been camping near Spring Mills since Saturday.

Habermehl was 22 years old in June. Since he left Brown Preparatory School a year ago he has been working with his father. He returned from a hunting trip to Canada about ten days ago. He was a good swimmer.

His mother died two years ago, and the boy was greatly affected by her loss. Mr. Habermehl went to Ocean City as soon as he had brought the body to the city, to notify his four daughters.

Boddington's Gigantic Pansies

Can be produced only from the giant strains. Our **CHALLENGE PANSY** seed contains in the giant self-colors, the giant striped and variegated and the giant blotched, etc., all carefully mixed in proportion. You could not get a better seed if you paid \$100 per ounce. Our Challenge Pansy seed during the past season gave unprecedented satisfaction. In every order booked last year was duplicated and increased this year. All the testimonials received mentioned specially the high grade of flowers—color, form and size of the individual blossoms. This year, by adding improved types, intending customers can absolutely rely on a duplication of this season's success with increased satisfaction. Our "mark" for this strain is "Challenge," and it is all the word denotes.

Pansy—Boddington's "Challenge"—All Giants

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said: "Why don't you call it Defiance?"

Plymouth, Mass.—Fritz J. Schlecht will continue the business of Braunecker & Schlecht, the firm having dissolved.

RAISING HARDY PERENNIALS FROM SEED.

Can you furnish me with directions as to the methods employed by nursery concerns in raising perennial and other plants from seed in the open air. What is the size of the seed bed, how is it prepared, what is the usual distance between the rows, the length of the row, the manner of identifying the varieties of plants sown, giving the size of label if one is used, and such other information as would be helpful in this connection. As perennials are frequently slow to germinate, what is done to control the weeds between and in the rows, to prevent injury to the seedlings it is desired to preserve?

Thanking you in advance for any hints you may furnish particularly with regard to weed control, I am,

Yours truly,

C. P.

SIZE OF SEED BED. For all large seeds such as lupins, lathyrus, hollyhocks, etc., five row 4 ft. beds, with 15 in. walks. Fine seeds do better in frames that can be shaded with screens until they germinate.

HOW IS BED PREPARED? Manure and trench the ground in the fall, and in spring when the ground is dry enough, dig with spading fork and rake fine and form beds or frames according to the seed to be sown.

DISTANCE BETWEEN ROWS AND LENGTH OF ROWS. For plants that are to remain in the beds for a year or more, 8-in. to 1 foot. For plants that are to be transplanted early and are sown in frames, 3 or 4 inches. Length of rows to be convenient to water with hose in dry weather.

IDENTIFYING THE VARIETIES. Mark name on painted labels.

SIZE AND KIND OF LABEL. Twelve inch painted labels and sixteen inch for plants that are to remain where sown for any considerable length of time.

WEED CONTROL BETWEEN AND IN THE ROWS. Weeds between rows are best controlled by hoeing carefully when they are small, and by hand weeding in and along the rows also when small. Keep the ground stirred up between the rows with a narrow rake after rain or watering, when the

surface is about dry enough so the soil will not adhere to the rake. Small seeds are much better not to be disturbed. I find that cultivation with a narrow rake will keep the small weeds from getting ahead.

P. FORBHAM.

LILIUM MYRIOPHYLLUM FROM SEED. FORCING BULBS SECOND TIME.

I want to let some of my Liliun myriophyllum go to seed. How can I tell their maturity, the sowing and treatment after? Will such bulbs as Narcissus myriophyllum, grape hyacinths, produce the same quality of flowers if forced again the coming winter?

Very truly yours,

J. R.

Let the seed stay on Liliun myriophyllum as long as there is no danger of frost. They can be kept until March and then sowed in flats in the greenhouse and transplanted in summer or early fall to the open ground. Narcissi and grape hyacinths will produce fairly good flowers the second year provided the plants have been watered after flowering, the foliage allowed to remain, and such conditions given as will insure thorough development and maturing of the bulbs. Otherwise they will turn out much weaker than the previous year.

Of Interest to Retail Florists**THE MODEL RETAILER.**

To sum it up—what Mr. Retailer must do is to assume his proper relationship with respect to his fellow merchants and to his community. He must become one of the moving spirits of that community and if he will but take time to consider he will see that it is possible for him to use his time in planning for his community in such a manner as to pay bigger dividends than he will earn by sitting in his office and figuring discounts. He must be a progressive merchant; he must use the latest and best methods in conducting his business. His store and his business methods must be reflections of himself and he should be the kind of man that will command the respect of the people and do full credit to the position in all that is best.

—Firing Line, Times-Union.

OWING to the many cancellations and uncertainty caused by the war in Europe our list of foreign steamship sailings will be discontinued until further notice.

NEWS NOTES.

Evansville, Ind.—Karl Zeidler has
purchased the florist business of the
Evansville Floral Co.

Lawrence, Mass.—Thornton Brothers,
florists and seedsmen, are now
established in their new home in the
Oswald Block. This is an ideal loca-
tion in the centre of the business dis-
trict. The store itself has not been
occupied before and has been fitted up
especially for the flower and seed
business. The flower window is one
of the prettiest in New England, and
an experienced window trimmer keeps
it up to the minute. They are to be
congratulated upon the business they
have built up, and they have received
the heartiest wishes for success in
their new home by many leading
seedsmen and florists throughout this
country and Europe.

1008 Vine St., PHILADELPHIA, PA

Clinton, Ind.—Herman G. Hershey has purchased the Sunnyside Greenhouses and will shortly open a retail store.

ST. LOUIS NOTES.

Mrs. Otto G. Koenig will entertain the Lady Florists' Home Circle on August 12 at her home on Florissant avenue.

R. J. Windler, state vice-president of the S. A. F., says he has booked quite a large delegation for the S. A. F. Convention. They will travel with the Chicago delegation.

Mr. and Mrs. Fred C. Weber, with the Misses Meinhardt, departed for an eastern trip on July 31, which will extend thirty days. While east they will take in the Boston Convention.

Miss M. S. Newman and Miss Armstrong are spending their vacation in Colorado. Their store at Olive street and Spring avenue is closed for the summer and will not be opened before September 1, when they return.

The Windler Wholesale Floral Co. are making quite a lot of improvements in their salesroom—a new enclosed office and new interior decoration. Frank Windler, the boss, will make the Boston trip with the local delegation.

The wind and hail storms the early part of the past week did some damage to the greenhouses in the northern part of the city. All in that section suffered some little by hail. If taken as one the damage would be quite heavy.

Flower Market Reports

BOSTON The flower market is at the lowest stage of the season this week, there being no call for anything beyond a few white flowers. There is a scarcity of presentable sweet peas and good white roses. Asters and gladioli are heaped up with no takers. Roses, with the exception of good white ones are very plentiful. Perhaps lilies and Beauties are the brightest spots in the dull picture presented. The seaside resorts are stagnated as never before and there is no probability now of any revival of gaiety to help out the flower situation.

Very little to report on **BUFFALO** market condition. although the trade at this time has been up to that of last year. The market is filling up on gladioli mostly of the mixed and ordinary quality and hard to move to advantage. America is the best and these clean up. Augusta has been quite plentiful and they too have taken fairly well. Roses are not coming in quite so heavy and clean up more satisfactorily. Fancy asters are not plentiful and sell rapidly. There are some fine lilies in rubrum, album, auratum and magnificum. Some good sweet peas are seen. On Saturday there was a good cleaning up on most everything.

CHICAGO It would be hard to convince some wholesale florists that trade was so quiet last year or the year before and no one seems to care to try. The best argument is an appeal to the books and every one in the business has an

abundance of time to look up sales. The opening of the last month of summer was uneventful and showed no change in the general apathy of the market. Asters are making a record, as was predicted in the spring. Their growth was stunted by the early heat and not only are the stems short but the blooms are lacking in substance. An extremely small proportion bring the top price, which is not high. In roses Mrs. Russell still leads at Poehlmann Bros', where the best ones run to 40 in. and sell for \$2.50 per dozen. In all the varieties of roses the proportion of short ones is very large. Beauties are not so plentiful as earlier in the summer. Lilies are selling very slowly. Lily of the valley is not much in demand. A few extra carnations bring \$2.00 and many more bring

nothing. Orchids sell fairly well for there are very few coming into the market. A good variety of outside flowers is on the counter and plenty of all kinds of green is offered.

The call for stock in **CINCINNATI** this market is fair and steady but not very large, while receipts on the other hand are large and apparently increasing in size each day. As a result there has been considerable crowding in the market. Prices are not very high. Gladioli and asters hold the leading positions. The supply of each is large and comprises many blooms of the best quality. These good blooms alone find a market. The rose supply continues heavy. The general inferior quality of the bulk of the stock

Flower Market Reports

(Continued on page 191)

is the direct cause for slow sales. The American Beauty cut has shortened considerably. Limited quantities of good Lilium auratum and rubrum may be had. Other stock includes tuberose, dahlias and hydrangeas.

The flower market **NEW YORK** seems to interest nobody at the present time and these notes will probably meet with the same fate. The impression one gets in passing along the wholesale stores is a sensation of tomblike silence and desertion, relieved by miniature mountains of gladioli and asters. These two items constitute about nine-tenths of the entire bulk of each day's receipts. As to quality, the are both excellent. There is a moderate supply of roses—mostly small stuff. The yellows seem to predominate but whites are scarcely in evidence. Hadley shows up well and is evidently a great acquisition as a summer rose. Cattleyas have reduced in numbers, but that does not help much as there is no demand for them. Carnations are very few.

The irregularity of the local market is caused by the summer dullness, and the conditions are such that it is hard to quote correct prices as the market has stood during the past week. Demand is light and ordinary stock of all kinds is plenty, but really first-class stock is hard to find in any quantities. Carnations are completely off crop, and the few coming in are several points shy of first-grade stock. Gladioli and asters are now received in large quantities, also good shasta daisies and lilies.

WASHINGTON Business during the month of July was about normal, for when summer comes there is little doing in the National Capital and the florists are not at all disappointed. A few flowers are sold each day, just enough to keep some little activity. The weather last week was very variable. Hail storms did some little damage, particularly at Mount Vernon where lightning injured some of the old trees and the wind broke down some of the plants. The cold wave stopped the inrush of flowers to a certain extent but with the mercury rising the market is again being flooded. Low prices generally prevail and more often the grower or jobber is glad to accept what the retailer offers.

CHICAGO NOTES.

The Chicago special park commission lost a valuable member and chairman in the death of Alderman Beilfuss, July 30. Under his leadership Chicago's system of small parks developed rapidly and has become a source of pride to the city. He had been a member of the council ten years.

The trials of the retailers during the dull summer months, when expenses must be met, are not a few, and not the least is the competition of the ten-cent stores. This week the writer saw bunches of nine Sunburst roses, six to eight inches in length, with plenty of ferns, offered for ten cents and wondered where the stores secured them.

Fred Lautenschlager of Kroeschell Bros., leaves Chicago, Aug. 10, for Boston, where he will see that the Kroeschell exhibit is in perfect order. A car load, including a greenhouse boiler and all the necessary fittings, left this week. The space taken this year by the firm is unusually large and the display will be the most complete one ever made by this firm, whose boilers are known all over the world.

A. Henderson, of the A. Henderson Seed Co., left Chicago last week, and sailed from New York on the Ryndam, of the Holland-America line, on July 25th. He should reach Amsterdam Aug. 6 and expected to spend a little time looking into the bulb situation. Mr. Henderson has a father in Aberdeen, Scotland, and a visit to his old home is the real object of the trip. The foreign complications since his leaving home are causing Mrs. Henderson much anxiety.

There is much speculation among Chicago growers as to the effect of the European war on azaleas and bulbous stock. If the countries of supply cannot ship into the United States and we are cut off much of the winter's business will be lost. If, on the other hand, these countries can ship here and not elsewhere, there will be thrown on the market such a quantity of stock as will demoralize prices. Another probability would be the injury to stock from transportation delay for any length of time.

Last week the city hall was added to the long list of downtown buildings, whose first floor windows have been decorated with well-filled plant boxes. The cost is said to have been \$375.00. If another year brings an equally large advance in the window-box movement, as has been made this year over the small beginning of a year ago, the "loop" will no longer be the barren stretch of burning walls but an inviting place for the summer visitor as well as a less trying place for the summer worker.

Lester E. Partridge, of Sharp, Partridge & Co., and Mrs. Partridge, have returned from an eastern trip, including a stop at Atlantic City, where a meeting of the Glass Manufacturers' Association was in progress. In discussing the glass situation, Mr. Partridge expressed himself as feeling certain that the outlook shows no possibility of lower prices during the fall. As no glass can be imported from Belgium at present, there will be extra demand to supply California and Canada, which have been getting their supply largely from Belgium.

CINCINNATI NOTES.

Wm. Sunderbruch has just returned from a trip to New Mexico.

The floral exhibit at the Carthage Fair will be held on Thursday, August 13. The entrants have not as yet been announced but it is probable that T. Ben. George, who has a habit of winning most first prizes will again be among those exhibiting.

Dan Carmichael of J. M. McCullough's Sons Co., has announced his intention of attending the S. A. F. Convention in Boston. Other Cincinnatians who will be present are Mr. and Mrs. C. E. Critchell, Mr. and Mrs. L. H. Kyrk, Mr. and Mrs. J. A. Peterson. The last four named will go in one of their motor cars.

PERSONAL.

A. Henderson, Chicago, sailed for Europe on the Rhyndam last week.

Miss Winkelhouse, Wm. Elliott & Sons' winsome and ever-courteous office clerk at 42 Vesey street, New York, has returned from her vacation.

Julius A. Wolff, son of Julius Wolff, florist, of Philadelphia, surprised his parents on July 30 with a telegram from St. Louis, announcing his marriage to Miss Marjorie Adams, that city. Neither the young man's friends nor his family had any idea that he was even engaged. The telegram said he was on his way with his bride to visit his parents at their summer cottage at Avalon, N. J. Wolff is about 25 years old, and has lived in St. Louis four years.

John Donaldson, who has now got well settled down in his new home at Patchogue, Long Island, had a visit from the board of directors of the Cut Flower Exchange, from which he has just retired, one day last week. They came in autos, the party numbering fifteen and everybody had a royal time. A fine field glass was presented to Mr. Donaldson as a token of esteem. He can now sit on top of his house and spy out what is going on in New York without having to make the trip.

HAMMOND'S GRAPE DUST

**For Use Against
Mildew and Blights**

GRAPE DUST is a readily diffusible, light-weight powder. Fungicide, for destroying Mildew and preventing Blights; also for destroying the Aphids and Black Fly. It is packed in 5 and 10 pound packages; also in 25 pound bags, 100 pound kegs, and barrels of 225 pounds, net. Kept in stock and sold by the leading Seedsmen in America. Dust by use of bellows.

EXPERIENCE OF FLORISTS AND GARDENERS MILDEW ON ROSES, CARNATIONS, ETC. IT IS SIMPLE AND EASILY APPLIED

Mr. B. Hammond.

Dear Sir: Replying to your inquiries regarding "Grape Dust," would say that we use it solely on Roses, Carnations and Chrysanthemums. As a fungicide we have not found anything to equal it; it is simple and easily applied. We close down the ventilators and fill the house with dust blown through the bellows; when the dust has settled down we ventilate again, putting on a little air as required. We have been using your "Grape Dust" with good results for the last fourteen years.

Yours truly,

JAMES BLAIR.

Staatsburg, N. Y., May 25, 1908.

VALLEY VIEW GREENHOUSES.

Velle Bros., Props.

Growers of Choice Cut Flowers.

Marlborough, N. Y., July 9, 1908.

Mr. B. Hammond.

Dear Sir: Your letter asking our opinion of the qualities of "Grape Dust" received. We have used "Grape Dust" on Carnations, Chrysanthemums and Asters, and we find it an excellent thing for keeping the plants in a healthful condition. No greenhouse establishment should be without "Grape Dust." We find it O. K.

Yours truly,

VELIE BROS.

I find your "Grape Dust" the most efficacious remedy for "Mildew" on roses that I have tried, and cheerfully recommend it to the trade.

Yours truly,

CHAS. P. ANDERSON.

The John Henderson Co., Rose Growers.

Flushing, N. Y., Aug. 1889.

The "Grape Dust" is sudden death to Mildew in greenhouses.

E. A. BRAINERD, Florist, 7 Main Street.

Easthampton, Mass., April 4, 1889.

ROBERT SIMPSON, Rose Grower.

Clifton, N. J., Oct. 11th, 1907.

Dear Mr. Hammond: In reply to your inquiry regarding my experience with "Grape Dust," would say that I am glad to be able to say a good word for the article in question, because I have found it so generally satisfactory when used for Mildew on roses. I do not know anything about its constituents, nor do I care so long as it does the work and is as economical as anything else on the market. During the summer when the steam pipes cannot be brought into use to check Mildew, and dusting over the foliage has to be resorted to, we prefer to use Grape Dust rather than Sulphur, because it is much lighter and finer in texture; a given number of pounds will cover more than twice the number of plants; will cover them more thoroughly, and can be put on with a bellows in about one-fourth the time that would be required for Sulphur. The fact that I have used it continuously for ten or twelve years should prove to you that I consider it the best article on the market for the purpose for which it is used.

With best wishes, I am yours very truly,

ROBERT SIMPSON.

Poughkeepsie, N. Y., Jan. 25th, 1912.

Benjamin Hammond, Esq.

Dear Sir: Please send me 25 lbs. "Grape Dust" as soon as possible. I find it is the only thing for Mildew on Roses. We have used it successfully for many years past.

Very truly,

CONRAD C. GINDRA.

First used in California in 1890 at Menlo Park, San Mateo County.

HAMMOND'S SLUG SHOT WORKS, BEACON, (Fishkill on Hudson) N. Y.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$2.75 per 112 lbs.; \$12.50 per 560 lbs.

IF YOU ONLY KNEW what a good save the METROPOLITAN PATENTED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the gave is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

The Dunlop houses are 61 feet wide and 100 feet long.

More About the Dunlop Range at Richmond Hill, Canada

THOSE of you who happen to know the exposed, tempest swept locations of both the Thomas Roland and Wm. Sim, Lord & Burnham big houses, near Boston, have a good idea of the terrific wind pressures Mr. John H. Dunlop's houses have to stand at Richmond Hill, Canada. Twice have big houses of his neighbors blown down. Glass breakage from vibration is a source of constant expense to them. Last Winter when one of these houses went down, a gale averaging 80 miles an hour, and at one time reaching 105, hammered and shoved

It is a model range, with concrete power house, elevated tracks for coal supply and all that sort of thing.

against the two L. & B. iron frame houses without an impression. Scarcely any glass was even cracked—none loosened. When you think that these houses were hit broadside by the gale, it's practically impossible to form any idea of the tremendous pressure they were under both on the exposed side; and the suction strain on the opposite side caused by the vacuum formed by the wind passing with such rapidity and force over the ridge. We believe it to be the most severe test our big houses have ever been subjected. We tell it to you as a matter of conviction.

The columns are double steel angles, riveted together.

Rather Early for Fall

It may be rather early for frost, but you don't want to wait for frost before ordering your palm and fern stock. Get in ahead and get your shipments by freight if you can, and save that way. Our palm stock is the finest we have ever handled. Come and look it over and leave us your order. We will reserve it, if you wish, and ship it when you are ready for it.

A FEW BIG VALUES:

Kentia Belmoreana—

6-inch pots, 6-7 leaves, 22 inches high, \$1.00 each
\$12.00 per doz.

Phoenix Roebelenii—

8-inch pots, 21 inches high, 26 inch spread, \$3.50 each.

9-inch pots, 24 inches high, 30-inch spread, \$4.00 each.

Boston Ferns—

5-inch pots, \$.35 each, \$4.00 per doz.

ADIANTUM CROWEANUM—

3-inch, \$.50 per 100, \$70.00 per 1000.

Our Fall planting list of Roses, Perennials and Shrubs is now ready for mailing.

The prices in this Ad. are for the trade only.

GOLD MEDAL PEONIES

It takes no more time or space to grow prize winning Peonies than poor ones. Why not have the best? By combining the Gold Medal collection with our own Gold Metal collection we can furnish some of the finest Peonies to be found in the world.

We also have a large supply of the more common varieties suitable for cut flowers and will gladly quote attractive prices on the same. Send for catalogue.

We are only 30 miles north of Boston and invite you to visit us while at the Convention.

T. C. THURLOW'S SONS, Inc.
WEST NEWBURY, MASS.

AN INVITATION

We most cordially invite our friends and members of the S. A. F. to visit our Nurseries at Bedford during Convention Week. Take train from North Station, Boston, or electric car from Harvard Square.

New England Nurseries Co.
BEDFORD, MASS.

¶ In response to the numerous inquiries from our customers and friends who want to visit our nurseries while in Boston during Convention week, we wish to state that we shall be glad to have them visit our nurseries any time during their stay here. We will have a Private Gardeners' Day at our Dedham Nurseries on Wednesday afternoon, August 19th.

¶ Come and meet your friends.

R. & J. FARQUHAR & CO.
Boston, Mass.

All Florists going to or from the Convention are Invited to Visit

POEHLMANN BROS. CO'S

GREENHOUSES

THE LARGEST AND MOST UP-TO-DATE GREENHOUSE ESTABLISHMENT IN AMERICA

The above cut shows in the foreground our **PLANT DEPARTMENT**, which is two years old, and consists of 150,000 square feet of glass. This is devoted to **POT PLANTS**, such as **Palms**, **Ferns**, **Pandanus**, **Araucarias**, **Dracaenas**, and other **Decorative Stock**, as well as all the **Blooming Plants** for **Christmas** and **Easter**.

We make Specialty of Grafted Rose Stock for Florists' Forcing

using nothing but the best **English Manetti Stock**. **Chrysanthemums** and other **Stock** for growing on ready for immediate delivery. **Young Plants** and **Rooted Cuttings** of **Carnations**, **Roses** and **Mums** will continue to be a feature here, and will be grown by the million next year in all the **Standard Commercial Varieties**.

FIELD CARNATIONS ready now. **CUT FLOWERS** in season. **FLORISTS' SUPPLIES**—**Ruscus**—have also been added to our stock, and we furnish everything the market affords.

See our Display at the **CONVENTION**, in charge of our Mr. Waters, who will be glad to meet all old and new friends.

Take Chicago, Milwaukee & St. Paul Railway from Union Depot, Chicago, 14 miles northwest to Morton Grove, Ill.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

LIBRARY
NEW YORK
BOTANICAL
GARDEN

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Carnations

Neglect in watering, syringing or ventilation at this time is sure to cause such damage to young carnations that no matter how well we may treat them later on, they will never be able to fully recover. Keep on cultivating the beds, as too much importance cannot be attached to this work, which should be persisted in until the feeding roots make their appearance near the surface. Go over the beds daily to see where they may need water at the roots. Give a syringing in the morning, which will help to keep them clear of red spider, etc. Do not permit any laxity in respect to ventilation day and night. Keep a sharp outlook for green fly and thrips and on the first sign of either spray or fumigate. It is a good plan to give a light fumigation once a week.

Cinerarias

From the middle to the end of August is the proper time to start the seeds of cinerarias. These gems of the conservatory are worth all the extra labor and watchfulness demanded in their raising. Well drained earthenware seed pans are filled with a very sandy mixture of turfy loam and partly decayed leaf mold. After a good watering down of the soil the seeds are thinly scattered on the surface. This requires some care, since the grains are very small. With a piece of smooth board the seeds are pressed gently into the soil and the pans covered with panes of glass. The best place now for these pans is a coldframe, with loosely fitting sashes. As soon as they afford a hold to thumb and finger, a pricking off into other pans or flats is in order, and after they have made four or six leaves a potting off into small pots takes place. As they now attain small size, needing a shift into larger pots every now and then, the richness of the compost for each shift should be slightly increased, until at the end of the season a potting mixture of coarse and unsifted, yet porous and mellow, containing fully one-fourth of well-decayed cow manure is used.

Lorraine Begonias

All begonias in $2\frac{1}{2}$ -inch or 3-inch pots should be potted before they become pot-bound to any extent. Those that are in $2\frac{1}{2}$ -inch will go into 4-inch and those that are in 3-inch should go into 5-inch pots. For a compost use turfy loam three parts, well-decayed cow manure one part and some sand. Pot moderately firm, but not hard. Do not keep them under too great a shade as it tends to make them weak in growth. After August discontinue all pinching on those intended for

early flowering. These plants should never be allowed to dry out, but on the other hand they should not be kept in a soaked condition. Give them plenty of ventilation during hot days, and damp down the house two or three times a day.

Lilium candidum

The best candidums generally come from the north of France. Just as soon as they are received pot them up as they should not be a day longer out of the soil than is absolutely necessary. They do better when grown in 8-inch pots placing three in each pot, but where you want to grow them singly use either 5 or 6-inch pots. Give them a compost that has been mixed up some time and runs in proportion one part manure to three parts fibrous loam. If compost is dry give them a watering, but if not it can be postponed for a couple of days. These bulbs should be placed in a frame where they will get full sun and do not need any covering of soil at all. Give general care as to watering and weeding. During heavy rains see that they have some sashes put on.

Young Palms

Seedling palms that were sown early in the year should be coming along nicely by this time. Keep potting them just as soon as they have made a little top growth. Do not let them stay too long in the seed flats as they are liable to make too much root growth and when this is the case they will get a great set back when they are potted. For a compost use any good heavy soil four parts, well decayed cow manure one part. See that each one is potted firm. Keep the atmosphere humid by giving the walks under the benches and all around the whole house a spraying. Use great care in watering at all times. Ventilate every day so as to keep as even a temperature as possible. When the outside conditions make it impossible to keep the temperature at 70 degrees during the night give them some fire heat.

Propagating Variegated Vinca

Now is a good time to work up some of this very important plant. Cuttings can be made of the medium ripened part of the trailers, cutting them so as to have from two to three eyes. They can be put in the propagating bench or in flats. They take some time to root so do not try to hurry them. When they have rooted pot them off into either 2 or $2\frac{1}{2}$ -inch pots. They can be kept all winter in a house that stands about 50 degrees at night.

Mr. Farrell's next notes will be on the following: Bouvardias; Smilax; Chrysanthemums; Geraniums; Providing Compost; Propagating Ivy Geraniums.

Welcome HORTICULTURE extends a sincere welcome and congratulations to the grand old S. A. F. on its visit to Boston. We earnestly hope that the attendance may be large and representative of every section of our great country, that its sessions may be instructive, its deliberations conducted with wisdom and that its strength, usefulness and prestige may be greatly increased by the results accomplished. The horticultural interests of Boston, with an unanimity and unselfishness most commendable, have willingly put aside their individuality and worked together as one for the credit of Boston and for the entertainment of the visitors who now, after so long an interim, come once more as Boston's guests. We trust the weather clerk will provide ideal weather and that the hospitality so carefully planned may fully measure up to its intent

and that no untoward incident may come to mar the complete success in every particular of the Convention of 1914. Welcome, thrice welcome, S. A. F.!

Brother
and brother

While we are busy making ready for this great gathering in the interests of the most refined and beneficent of the arts of peace, our fellow-craftsmen in the old world are in the midst of a sanguinary conflict, the most terrible in history. Each and every one of the great nations involved in the struggle has done its share in the advancement of horticulture. To them we are indebted for a goodly portion of what we have come to regard as indispensable in our work and from them, too, have come many of the most intelligent and honorable men who grace the profession of horticulture in America. Horticulture knows no race nor creed. It recognizes no differences among its votaries except the rank of attainment and the emulation to excel in proficiency and the knowledge of horticulture. In our ranks are found representatives of all the warring countries and races. Ties of kindred and places of birth may influence our sympathies and excite individual prejudices in this time of high tension and inflamed passion. Let us forget all this in our intercourse with our fellow workers. By all means, let no words of argument, reproach or prejudice escape our lips wherever and however we may foregather in the coming convention and its attendant social intercourse.

"For a' that, an' a' that,
 It's comin' yet for a' that,
 That man to man the world o'er
 Shall brithers be for a' that."

Many Interests
to subserve

With a membership double what it was a decade ago and three or four times the volume of twenty years ago, the question may arise as to why the attendance at the annual convention of the S. A. F. has not increased proportionately. Notwithstanding the generally recognized inducements of a summer convention in Boston it is by no means sure that the attendance of members this year will exceed that at the first convention in Boston twenty-four years ago. A restricted attendance does not necessarily indicate a lack of interest as there are undoubtedly many who will be absentees only with the greatest reluctance. The European war will have a restraining effect on many who would otherwise make the trip to Boston. The withdrawal of the special low transportation rates that formerly were obtainable cuts quite a figure in the matter of attendance nowadays. Much enthusiasm is apt to mark the first few years of any organization but this moderates in time and it then takes skillful work on the part of officers and others to combat this tendency to indifference. Different individuals are actuated by different motives in their attendance upon these affairs and the greatest permanent success will usually attend that society which provides something for all tastes and permits no domination by any one interest. The S. A. F. Convention does not exist for purposes of trade alone, for buying and selling, nor is it all for entertaining and feasting and social enjoyment; it is not all for technical essays and discussions; neither is it simply for practising politics or to advance the interests of favorite candidates; nor even to make money for the Society, although all these may contribute more or less to a lively and successful meeting. The final test of a convention must really be its permanent educational, inspiring and elevating influence on the trade and the profession and all those features that most contribute to this ultimate result should in all cases be given the right of way and see to it that the others are all put to full use as accessories to that end.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The War

Although it may not involve this country at all, it may at the same time make hard times here, and should this be the case, the florists will be the first to feel it, for the people will generally turn down the flowers the very first thing. It will be well for all growers to handle everything carefully, and try to cut expenses down as much as possible, also see that there is no waste at any part of the range. Do not cut the wages of the men to reduce expenses—rather increase these, encouraging all the men to take more interest in their work and thus saving in the long run. Look after every little detail thoroughly, so that even if prices are very low, there will still be profit enough to pay running expenses, without any loss.

The Coal Supply

Right now is the time to think about the coal supply for the coming season, even though the weather is still hot. Growers should have ample room in the cellar to avoid storing the coal outside in heaps exposed to all sorts of weather. Then, too, the coal will have to be handled twice if stored away from the boilers, and that means double expense. Expenses have a good deal to do with profits, and all men employed should be made to earn more than their pay, therefore keep them at something useful and not at any odd job that is not worth doing. Growers who are a distance from the railroad, and still have to ship all their stock, should take advantage of this good weather when the roads are dry, and get their coal in. A motor truck cannot be beat for this work, when the roads are good, but do not rely on one to haul your coal in the winter, or you may regret it, for they are useless for roads such as we generally find around country places in midwinter.

Fumigating

Never leave this important item undone for any length of time, for when the plants once get overrun with greenfly it will require heroic efforts to get rid of the pest this hot weather. And then there is the check that the plants will get if the fly is bad. It will take a long time for them to recover, after all the fly is done away with. The best time to fumigate is at night, especially if a thunder storm comes up, and it rains. The houses should never be smoked unless they are below 70, for they are very likely to get scorched if fumigated when the temperature is any higher. It is also essential that the houses be wet, so that there is not a plant that will be real dry at the roots. The smoke will be more effective if the air is damp, and so will gas. Where gas is used it will require even more care than smoke. Spraying regularly will keep the plants free from all insects but this will require care too, and should never be entrusted to a person with little experience. There are some very good preparations on the market, and if properly used will be found very satisfactory. For fumigating material we use tobacco stems while the plants are real small, and there is no danger of damaging flowers. The stems should be fresh, and no old moldy stems should be used. See that they are not allowed to

burn with a flame, for then the smoke would be very likely to burn the plants. Where it can be done, or where it is not possible to get good stems, some of the fumigating compounds that are offered to the trade will be found as cheap and far more pleasant to use. If the houses are not much below 70 they had better be opened after an hour or two, so that the plants will not take harm from the close air that will fill the houses while they are shut down tight. With tobacco papers the smoke will clear away in about an hour and the houses should then be opened a little bit, and shortly after, a little more.

Daphne Cneorum

The ease or difficulty of propagation makes plants common or rare. It also largely determines the price of plants; plants difficult of propagation always cost more than those which may be readily multiplied. Unfortunately on this account some of our most beautiful garden plants are rare or not as well known as they deserve to be. *Daphne Cneorum* is one of these. It belongs to that select little family *Thymelæaceæ*, one of the few families of plants that "hasn't any poor relations"; it has but one protoplasmic relative in the Eastern States at least, and that is the Leatherwood or *Wicopy*, *Dirca palustris*.

Daphne Cneorum is a native of the mountains of middle Europe, and, like many plants which hail from high altitudes, is of a low, prostrate or spreading habit. It is an evergreen and shrubby in character. The branches are supple or inclined to be leathery and are well clothed with small, narrow, sessile leaves, oblanceolate in outline, and alternately arranged. The bright pink, deliciously fragrant flowers are produced in terminal clusters abundantly in May (often earlier) and continuing more or less freely till September or October. It does not appear to produce seeds in this country, probably because we have not the insect to bring about fertilization, and the method of propagation most commonly practised is that of layering, which should be done in June.

Daphne Cneorum has proved perfectly hardy in Massachusetts. It thrives in any fairly good soil, but prefers a rich peaty soil, either in full sun or shade, although it does its very best if planted where it can receive some shade during the hottest part of the day. It is an excellent subject for the rock garden, or it may be planted in the hardy perennial border, or in beds by itself, or it may be used as a ground cover among compact growing shrubs in shrubbery borders. It is also a good plant for cemetery lot planting, since it is evergreen and exceedingly persistent or tenacious of life: the writer knows of a bed which was planted nearly forty years ago and is today healthy and vigorous and looks capable of rounding out a century. Few shrubs possess as many good qualities as this charming *Daphne Cneorum*.

Hubert H. Canning

THE CONVENTION CITY

Courtesy Boston Chamber of Commerce

Strange as it may seem, there are some incorrigible people who cannot be induced to say they like Boston. Our friends from the boundless West take exception to its narrow and tortuous streets in which they invariably lose their way, and in trying to get somewhere, finally turn up at the spot from whence they started. To the *blase* New Yorker, Boston is a "one-horse town," sadly lacking in life and amusement after 11 p. m.—a good place in which to die! Yet the natives think it the best place on earth, the place of all places in which to live and they make no secret of their belief. "Boston State House is the hub of the solar system. You couldn't pry that out of a Boston man if you had the tire of all creation straightened out for a cross-bar."

In these days of guide-books and catalogues, sight-seeing autos and souvenir post cards ad infinitum, a mass of statistical compilations and exhaustive review of Boston's history for nearly 300 years and a descriptive illustrated catalogue of the many places of interest, historical, commercial or romantic, in and about the city, would be both superfluous and tiresome. We realize, however, that our readers will expect us to say something about the Convention City, what it stands for and what it is doing in the field of horticulture, and we shall try to comply with premeditated brevity, keeping in mind and observing as far as possible the advice in the old-time popular ballad:

"Solid men of Boston, make no long orations!
Solid men of Boston, banish strong potatoes!"

Boston As It Is

Boston has,
with good reason,
been

termed the most interesting city in America. Certainly it is, in many respects, "different," and to this fact is due much of its quaintness and charm. From the group of six states almost isolated geographically from the rest of the United States and known as New England, Boston is the centre of transportation, commerce, finance, industry and social life. From all parts of this section has been recruited the proud list of great men who in one way or another have made for themselves and for Boston a world-wide and imperishable renown, and from Boston, into and throughout this New England country, has emanated the light of Boston's influence, inspiration and character.

Among the people of such a territory we should naturally look for the impress of superior horticultural enlightenment and an exceptionally keen appreciation of the garden and garden products. Under such encouragement are evolved advanced exponents of the science and art of horticulture and within such environment the spirit of useful and constructive activity finds its great-

est stimulus. It is not surprising, then, that in this favored section we find by far the largest number of horticultural organizations in any territory of equal size on the American continent.

The city of Boston "proper" is of very limited extent geographically. As a metropolitan community Boston is really a group of forty municipalities aggregating within a radius of twelve miles a population of 1,500,000, all closely allied industrially and

SPOT POND IN MIDDLESEX FELLS

Middlesex Fells is a tract of forest reservation comprising about 2,000 acres of land and water, hill and dale, under the control of the Metropolitan Park Commission. It is located five to six miles from Boston in the towns of Winchester, Stoneham and Medford, and reached by Fellsway, or Mystic Valley Parkway.

OLD BOSTON.

This interesting old engraving shows Boston as it appeared from what is now the site of the magnificent Back Bay section, in 1835. The place where the primitive railroads are seen to intersect is about where Copley Square is now. The first spire to the right of the State House dome is Park Street Church, just across the street from the office of HORTICULTURE. On the extreme left is seen Bunker Hill Monument, partially completed. The tree adorned tract in the centre of the picture is Boston Common.

socially but each section jealously holding its political autonomy and local self-government. Parks, sewerage and water are, however, under unified control, with state-appointed commissions, and the administration of affairs of police, docks and the sale of liquors is also entrusted to boards appointed by the Governor of Massachusetts.

A very large part of what is now Boston proper was once submerged land and it will interest our visitors to know that the entire Back Bay territory, comprising all of the section westward from Boston Common, has been reclaimed from the ebbing and flowing tide. This is the most beautiful part of Boston, today, embracing the Public Garden, Commonwealth Avenue and Fenway Park, and such buildings as the Public Library, Art Museum, Opera House, Horticultural Hall and scores of other imposing public buildings, institutions, hotels and palatial private residences, all of which reclamation and constructing has taken place within the memory of men still in the prime of life. For many miles northward and southward along the rock-bound Atlantic Coast stretch the summer estates of Boston's opulent citizens and on both shores miles of magnificent beaches have been incorporated into the Metropolitan Park System for the use of the public forever. Shoreward and inland these public reservations exceed 12,000 acres in extent and connecting in all directions is a network of

boulevards and fine auto roads, of which, we doubt not, the convention visitors will take full advantage. For information regarding these suburban attractions, as well as the many interesting historical and legendary places and shrines which abound in this romantic country a special Information Bureau has been specially constituted for this convention and will be found conveniently located in a conspicuous place in the Convention hall, close to the entrance. Make full use of the facilities thus provided for your convenience and pleasure.

Horticulture in Boston

The Pilgrim settlers brought with them the love for gardening. In the year 1621 Edward Winslow wrote "Here are grapes white and red and very sweet and strong also; strawberries, gooseberries, raspberries, etc.; plums of three sorts, white, black, and red, being almost as good as a damson; abundance of roses, white, red, and damask, single, but very sweet indeed." Letters sent home from the colonists, as quoted from the published chronicles of those early days made frequent mention of the wild fruits, vegetables and herbs and of the astonishing crops raised in the kitchen gardens. Fish was the principal fertilizer used, a method which the settlers learned from the Indians. Writers as early as 1630 gave interesting accounts of the rapid progress of horticulture in Salem, 1712,

OLD NORTH BRIDGE, CONCORD.

The famous spot where the roused farmers of Lexington and Concord trapped the advance of King George's troops on the memorable April 19, 1775.

Roxbury, Dorchester, Boston and other adjoining places that are still in the public eye, horticulturally and otherwise, and we learn from these accounts that it was not long before they discovered that the insect pest was no stranger in the new country. Arsenate of lead and spraying were unknown to them and so, when seriously harassed they resorted to fast days and prayer as remedies for these evils.

The first horticultural literature published in Boston of which we have any knowledge was "The New American Garden," by Thomas J. Fessenden, and a Treatise on the Cultivation of Flowers, both of which appeared in the year 1828.

Boston Parks

Boston was settled in 1630. Four years later Boston Common was purchased and set apart as a public ground in perpetuity. Here was the beginning of what is now acknowledged to be the finest park system in this country. All the

reservations outside of the boundary lines of the city proper, comprising many thousand acres of hill and valley, forest and lake, beaches and boulevards are administered by the Metropolitan Park Commission, under State control. Those reservations within the city boundaries are administered by the Boston Park and Recreation Board, of which John H. Dillon is chairman and J. B. Shea deputy commissioner. Thos. F. Galvin is also a member of the Board. In the jurisdiction of this department are Franklin Park, Back Bay

IN THE WOODS, FRANKLIN PARK, BOSTON.

This shows a kalmia bordered road through the thickly wooded section of Franklin Park, photographed in June.

Fens, Public Garden and Common, Franklin Field, The Riverway and many smaller parks and playgrounds. It was only by the co-operation of this Park Board and the Mayor of the city that the unique Convention Garden was made a possibility.

The Flower Trade

We scarcely need to mention that Boston has been the source and fountain head of many of the ideas and advancements that have nourished floricultural progress of America. It has the honor of being the birthplace of Grace Wilder, Lawson, Enchantress and other well-known varieties which have set the pace for the whole carnation world. Also of the Russell and Hadley roses, the White Killarney and others of more or less renown. In the growing of acacias, violets and sweet peas, and such plants as cyclamen and Lorraine begonia Boston growers of the present day have few rivals anywhere. We mention none by name for they are many and we do not wish to slight any by omission. Their establishments are easy of access and no doubt many tours of inspection will be made. Directions for reaching any and all will be obtainable at the office of the Bureau of Information.

The Boston retail flower trade will be well to the front in greeting the visiting florists. Several of the leaders are represented in our advertising columns and they will appreciate a friendly call and a confab on the F. T. D.

SUMMER BLENDING IN THE PUBLIC GARDEN.

In recent issues we have presented several views in Boston's popular Public Garden, and this is another in the series. The picture was taken early last month.

Practically the entire wholesale trade is concentrated in Winthrop Square. Here are located the two extensive co-operative flower markets, and the big wholesale flower and supply houses of Welch Bros., N. F. McCarthy & Co. and several others. During the busy season a tremendous amount of floral product representing hundreds of growers in New England are marketed daily in Winthrop Square and an early morning visit even now will fully repay the trouble.

Before closing these trade notes we must not forget the seedsmen. The seed trade of Boston is done entirely in the section adjacent to the public markets, in South Market and North Market streets and Faneuil Hall Square, an unique and interesting part of the old city. The extensive market gardening industry of the surrounding country and the many highly developed private estates whose supplies are secured here, demand a very high quality of seed and while Boston does not figure materially in the big wholesale and agricultural seed industry of the country yet when it comes to quality the Boston seedsmen go the full limit.

Massachusetts Horticultural Society

The Massachusetts Horticultural Society, organized on March 17, 1829, was, so far as recorded, the fifth organization of the kind in this country. Of its predecessors, only one—the Pennsylvania Horticultural Society—existed beyond a few years. Before the end of its first year the Massachusetts Horticultural Society boasted 249 members. Gen. H. A. S. Dearborn was the first president. At that date Boston had only been an incorporated city seven years, with a population of 60,000.

It may be interesting to note here that the establishment of Mt. Auburn Cemetery in Cambridge, the first ornamental rural cemetery in the United States, was the first enterprise under the auspices of the Massachusetts Horticultural Society. Unrivalled in its natural sylvan beauty and for the number of eminent men and women who repose beneath the shade of its majestic groves, this consecrated city of the dead will be found full of interest by those who have time and opportunity to visit it.

Horticultural Hall, the headquarters of the Massachusetts Horticultural Society—the finest structure devoted to horticulture in this country, is located on the corner of Huntington Avenue and Massachusetts Avenue,

THE OLD LIBERTY ELM.

Standing at corner of Green and Rockview streets, Jamaica Plain, Boston, this grand old monarch attracts the attention of thousands. Its history is shrouded in obscurity and no authentic account of its age is extant. Much speculation has been rife as to its age. A safe and sane conclusion is that it is about 200 years ago. Whether the legends regarding the part it played in Revolutionary times are authentic or not, the fact remains that it is "monarch of all it surveys."

a few blocks south of Mechanics Building where the Convention is held. In this building many notable floral exhibitions of recent years have been held. Within it is housed one of the largest and most valuable horticultural libraries in the world. The Massachusetts Horticultural Society has ever been true to its trust and its halls have at all times been placed at the disposal, without charge, of kindred societies for their meetings and exhibitions. When the S. A. F. last met in Boston, 24 years ago, the Horticultural Society generously donated the use of their halls—then located on Tremont street, for the use of the National Society, and a similar privilege would have been extended on this occasion had the building been large enough for the present

HORTICULTURAL HALL, BOSTON, MASS.

requirements of the S. A. F. The Horticultural Society has, however, made a generous contribution for the use of the Boston Convention Committees and will, further, extend the courtesy of a special horticultural exhibition on Tuesday, Wednesday and Thursday of Convention week, in honor of the visiting society. J. K. M. L. Farquhar has been, for the past two years, President of the Massachusetts Horticultural Society. Secretary W. P. Rich will be pleased to have S. A. F. visitors make a social call.

Gardeners' and Florists' Club of Boston

The Gardeners' and Florists' Club has for twenty-seven years held a position high in the regard of sister organizations. As a body it has taken a leading part and generously contributed to the local preparatory work for the Convention, and its members are strongly represented on the various committees. Its meetings are held in Horticultural Hall, the membership being between four and five hundred. Wm. J. Stewart was its first president. The present officers are W. J. Kennedy, president; H. H. Bartsch, vice-president; W. N. Craig, secretary, and Peter Fisher, treasurer.

The Arnold Arboretum

We published two weeks ago an interesting account

JACKSON DAWSON
Superintendent Arnold Arboretum.

of this great institution and its work. It contains the finest collection of hardy trees and shrubs in this country, if not in the world. Although a department of Harvard College and endowed and maintained by private munificence it is insofar as road ways and policing are concerned a part of the Boston park

FANEUIL HALL.

Everybody knows the "Cradle of Liberty" and its stirring history. Every pilgrim to Boston should make it a point to go there and register his name in the time-honored "Visitors' Book."

system by special agreement. Professor Charles S. Sargent is its director, and Jackson Dawson its superintendent. E. H. Wilson has for a number of years carried on its exploring and plant collecting work in China and is at the present time engaged in some special research work in Japan. Among the most interesting features in the Arboretum at the present time are the collections of Wilson's new Chinese introductions numbering several hundred species and varieties. S. A. F. visitors will receive a cordial welcome. Forest Hill cars, either by subway and elevated or surface car go very close to the entrance.

E. H. WILSON
Plant Collector for Arnold Arboretum.

COPLEY SQUARE.

Architecturally one of the beauty spots of Boston. In our picture appear Trinity Church, Copley-Plaza Hotel and Public Library. A centre of activity during the S. A. F. Convention.

Botanical Garden

The Harvard Botanical Garden at Cambridge will interest botanically inclined visitors especially. It is under the efficient care of Robert Cameron as superintendent. Reached by Cambridge subway cars from Park street, transferring at Harvard Square to North Cambridge car and alighting at Linnaean street. Or the trip may be made by surface car entirely.

The First Boston Convention

A few words about the first S. A. F. Convention in Boston may not be inappropriate here. The meetings and trade exhibition were held in Horticultural Hall, Tremont and Bromfield streets. Because of lack of space and inadequate elevator facilities the boilers and other heavy material were shown in Bumstead Hall, under Music Hall, one block away. The late J. M. Jordan was president. The addresses of welcome were made by Lieutenant-Governor Haile and His Honor Mayor Hart. Robert Craig made the response to these addresses. The meetings of the Society were to some extent eclipsed by the visits to two of the most noted private estates and the superb exhibition installed by the Massachusetts Horticultural Society in Music Hall (now turned into a theatre) which they hired for the purpose after generously giving up their own building to the S. A. F. The exhibition there put up has never, either before or since been equalled in this country. The aquatic display, the palms, the orchids, and the superb mantel decoration by the late David Allan were a revelation to the visitors and have

REVERE BEACH.

One of the great seaside park reservations under the control of the Metropolitan Park Commission. Located on the "North Shore" of Massachusetts Bay, as Nantasket Beach is located on the "South Shore."

been a never-failing source of reminiscent delight.

The bowling contest and the festivities following was an occasion never to be forgotten. The highest score (234) was made by J. A. Penman of the New York team and won for that team the big cup. Of the six members of the Boston team on that occasion but two are now alive.

At that time, 24 years ago, there was but one florists' trade paper and that a semi-monthly. Its Convention Number comprised 32 pages and was considered quite a triumph.

VIEW IN CONVENTION GARDEN

WM. N. CRAIG

Secretary Gardeners' and Florists' Club of Boston.

PETER FISHER

Treasurer Gardeners' and Florists' Club of Boston.

lar florists' clubs who wish to join the S. A. F. & O. H. as a body, will be reduced to Three Dollars for the first year, and the annual dues thereafter to be Two Dollars per year for each member thereof. These dues must be paid to the S. A. F. & O. H. by the treasurer of each club and not by the members individually, and we further recommend that our constitution and by-laws be amended to comply with this recommendation."

At the meeting of the Board of Directors, held in Boston, March 17-18, 1914, the matter of affiliation was again very thoroughly discussed by the full Board, with the result that the recommendation was considered to be rather indefinite. It was therefore voted that a special committee of three be appointed to work out a definite plan of affiliation, the same to be presented as an amendment to the constitution and by-laws. The Committee, consisting of Messrs. George Asmus, chairman, Wm. F. Kasting and J. J. Hess, ultimately submitted the following

ing amendment, which has been approved and is now recommended for adoption by the Board of Directors in place of the recommendation offered at Minneapolis:

Amendment to Paragraph (b) of Section 2 of Article II.

1. That clubs, societies or kindred organizations of professional florists, gardeners and horticulturists, having a paid-up membership of one hundred or more members in the S. A. F. & O. H., shall be entitled to one representative on the Board of Directors of the S. A. F. & O. H.

2. Such representative shall be the president of such organization and must be a member of the S. A. F. & O. H.

3. Any elective officer or appointed director of the S. A. F. & O. H. shall not be eligible as a representative of such organization.

AFTERNOON

2 P. M., Essay—"What Should the

Society of American Florists Do for the Private Gardener?" by Arthur E. Thatcher. Discussion.

Thursday, August 20—Third Day.

MORNING.

9 A. M., Meeting of the Florists' Hail Association. Meeting of the American Carnation Society.

10 A. M., Meeting of the American Gladiolus Society. Meeting of the American Rose Society.

11 A. M. to 12 M., Polls Open for the Election of Officers.

AFTERNOON.

Ladies' Blowing Race. 1st—one-half dozen silver teaspoons, Geo. Asmus. 2nd—Pearl handled steak set, Geo. Asmus.

Tug-of-war, East vs. West. 1st prize—\$10.00, Wilkins Press.

LOCAL LADIES' COMMITTEES.

Executive Committee—Mrs. M. A. Patten, chairman; Mrs. W. W. Edgar, secretary; Mrs. B. Hammond Tracy, Mrs. Peter Fisher, Mrs. W. H. Elliott, Mrs. P. Welch, Mrs. Wm. R. Nicholson, Mrs. E. Allan Peirce.

Reception Committee—Mrs. W. W. Edgar, chairman; Mrs. Wm. R. Nicholson, Mrs. P. Welch, Mrs. Henry Penn, Mrs. E. Allan Peirce, Mrs. Frank Edgar, Mrs. Peter Fisher, Mrs. B. Hammond Tracy, Mrs. W. H. Elliott, Mrs. M. A. Patten, Mrs. Wm. Sim, Mrs. F. E. Palmer, Mrs. Katherine Mathison, Mrs. Herbert Capers, Mrs. Henry Comley, Mrs. Wm. J. Stewart, Mrs. John Flood, Mrs. Alexander Montgomery, Mrs. Ethel Fisher Flett, Miss Emelie Edgar, Miss S. N. Comley, Miss Helen Goddard, Mrs. J. W. Rogers.

Bowling Committee—Mrs. B. Hammond Tracy, Mrs. Wm. R. Nicholson, Mrs. Henry Penn, Mrs. E. Allan Peirce.

Historic Committee—Mrs. W. H. Elliott, chairman.

BUREAU OF HORTICULTURAL AND HISTORICAL INTEREST.

The headquarters of the Bureau of Horticultural and Historical Interest and Information, will be stationed near the main entrance to Mechanics Building on the right of passageway to the Hall, and will be designated by a sign "Information." Members of the committee will be in constant attendance to render every assistance in their power in giving information and pilot-ing our guests to places of interest.

OFFICIAL PHOTOGRAPHER.

F. B. Conlin, 53 Temple Place, Boston, has been sanctioned by the local executive committee as official photographer. He will make numerous plates of the garden, exhibits, etc., and a group picture of the party at Nantasket Beach on Friday afternoon.

LADIES' SOCIETY OF AMERICAN FLORISTS.

The date of the Ladies' Reception has been changed from Thursday, Aug. 20, to Wednesday evening, Aug. 19, 8.45, at Copley Plaza, by order of Mrs.

Chas. E. Critchell, President.

A meeting of the Board of Directors is called Tuesday evening, Copley Plaza, by Mrs. W. N. Rudd, Chairman.

Members of above society will find the secretary at her office, Mechanics' Building, Tuesday, Wednesday and Thursday. Members will please register.

MRS. CHAS. H. MAYNARD, Sec'y.

GARDENERS' BOSTON MEETING.

Through the courtesy of the Society of American Florists and Ornamental Horticulturists, the National Association of Gardeners will hold its summer meeting in Paul Revere Hall (Mechanics Hall), Boston, on Wednesday, Aug. 19th, at one o'clock, this being the convention hall of the S. A. F. All gardeners, and all interested in the profession of gardening, are cordially invited to attend this meeting. Several able speakers from different parts of the country will address the meeting on subjects pertaining to the profession of gardening and horticulture in general.

All members in a position to attend the summer meeting should make every effort to do so; to show an interest in their national association. The trip to Boston offers several days of pleasant vacation where the visitors will find much to entertain them. From the horticultural point of view there are few places to be visited in this country which would prove more interesting than a trip to Boston and its vicinity.

An executive meeting of the trustees and directors, as provided in the by-laws, will be held on Wednesday morning, the 19th, at nine o'clock, at the Copley Square Hotel, the headquarters of the association.

Many of the members, going by way of New York, have decided to travel by the outside line of steamers, leaving foot of Murray street on Monday, 17th, five o'clock.

'M. C. EBEL, Sec'y.

CHRYSANTHEMUM SOCIETY OF AMERICA.

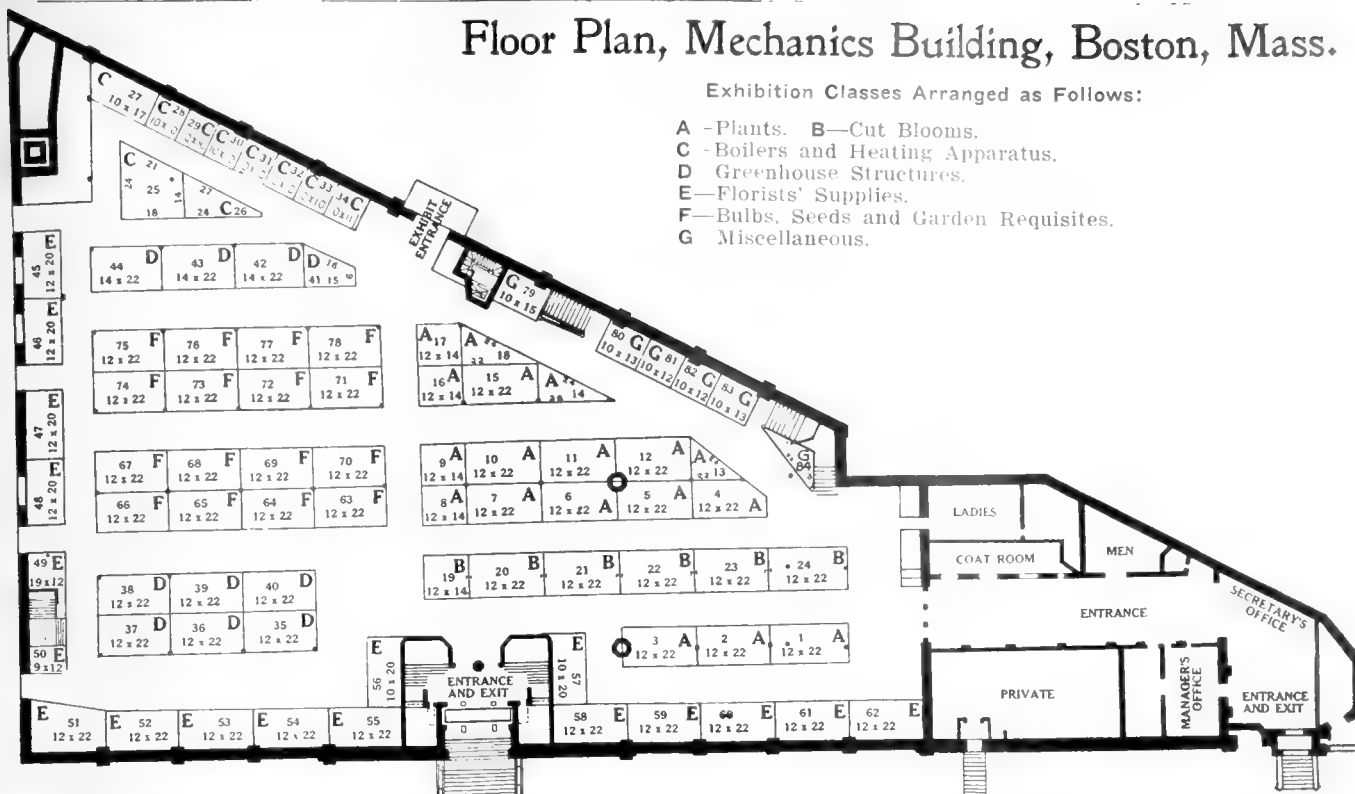

Owing to the absence in Europe of President Kleinheinz, Vice-President A. F. J. Baur will preside at the meeting to be held in Paul Revere Hall, Mechanics' Building, Boston, 9.30 A. M., Wednesday, Aug. 19, 1914. Members attending the convention are requested to be present and to bring up any suggestions they may have for the good of the society. The preparations by The State Florists' Association of Indiana for the annual meeting and exhibition to be held at the German House, Indianapolis, Ind., Nov. 6, 7 and 8, 1914, are going on right up to date. A splendid exhibition and record attendance from members, florists and the public is expected.

CHAS. W. JOHNSON, Sec'y.

Floor Plan, Mechanics Building, Boston, Mass.

Exhibition Classes Arranged as Follows:

- A—Plants. B—Cut Blooms.
C—Boilers and Heating Apparatus.
D—Greenhouse Structures.
E—Florists' Supplies.
F—Bulbs, Seeds and Garden Requisites.
G—Miscellaneous.

LIST OF EXHIBITORS IN THE BOSTON CONVENTION GARDEN.

Bidwell & Fobes, gladioli; A. T. Bodington, gladioli and montbretias; Carter's Tested Seeds, clock dial in plants; John Lewis Childs, gladioli; H. R. Comley, cosmos and white chrysanthemums; Conard & Jones Co., cannas; A. Cowee, Gladiolus Peace; Henry A. Dreer, Inc., nymphaeas; Eastern Nurseries, collection of nursery stock; W. W. Edgar Company, heliotrope and lilies; R. & J. Farquhar & Co., extensive formal garden and Japanese arbor; F. W. Fletcher, antirrhinums; S. J. Goddard, Begonia Gloire de Chate-laine; P. Henderson & Co., Geraniums Gen. Funston; A. H. Hews & Co., planted vases and pottery; Knight & Struck, buddleia and cosmos; H. Magnuson, salvias; W. A. Manda, extensive general display; Mt. Desert Nurseries, phloxes, astilbes, spiraea, etc.; F. E. Palmer, Petunia Veilchenblau and marigolds; Boston Park & Recreation Dept., formal bedding; A. N. Pierson, Inc., extensive display of Baby ramblers, perennials and geraniums, foliage plants and cannas; Wm. Sim, Snapdragon Pride of Cliftondale; E. E. Stewart, gladioli; B. Hammond Tracy, gladioli; Wm. Tricker, aquatic plants; Vaughan's Seed Store, cannas; James Vick's Sons, Gladiolus Rochester White; R. Vincent, Jr. & Sons Co., geraniums; A. M. Davenport, coleus and euonymus; Thomas F. Galvin, formal bedding.

AMERICAN ROSE SOCIETY.

At the Society of American Florists' Annual Convention to be held next week, August 18 to 20, there will be a meeting of the American Rose Society, at which time the Hubbard gold medal will be presented to M. H. Walsh of Woods Hole, Mass., and the silver medal to John Cook of Baltimore, Md.,

in recognition of the merits of the rose Radiance. Other matters in a general way will be taken up, particularly the efforts being made to extend the usefulness of the American Rose Society among local associations throughout the country. This is a movement that every commercial rose grower in the country, and especially the plant men, would be benefited in seeing carried out. The American Rose Society has grown steadily, and the time may now be at hand where a large advance in its membership may be secured.

Theodore Wirth, President of the

S. A. F., and Superintendent of Parks at Minneapolis, Minn., writes: "I have something which may be of value to some rose growers, particularly amateurs. We have been very successful in subduing mildew by using the following preparation: 3 gals. water, 6 ozs. soap (soft), 2 ozs. potassium sulphide. We dissolve the soap in water, then add the potassium sulphide. This spray is also very good for aphids and will help along blighted buds. For mildew, as I have already said, it is the best thing we have ever tried. I am giving this to you for general information."

Roses this year have certainly shown up in fine condition in many sections. Come to the meeting of the American Rose Society when you go to Boston next week.

BENJAMIN HAMMOND, Sec'y.
Beacon, N. Y.

CHICAGO TO BOSTON.

Niagara Falls Stop-off.

On the way to the convention city, as already announced, there will be a stop-off at Niagara Falls from 12.04 o'clock to 3.50 P. M., Monday, August 17. The fare from Chicago to Boston and return is \$30, good for 30 days. Berths, Chicago to Boston (one way), lower, \$5.50; upper, \$4.40. The foregoing rates apply only to Boston and return.

The Chicago Florists' Club, at its meeting of August 6, instructed its transportation committee to arrange for through Pullman cars Chicago to Boston so that it will not be necessary to transfer baggage at Niagara Falls. There will be an additional charge of 50 cents for this accommodation.

MICHAEL BARKER, Chairman,
Chicago Florists' Club,
Transportation Committee.

WILLIAM P. RICH

AFFILIATION FOR CO-OPERATION.

I think enough has happened this past year in horticulture to bring affiliation closer home with most branches of horticulture. Anybody who has eyes to see and ears to hear can discern the sign of the times, the need for combined effort to give and to hold the rights in our profession, a profession which does so much for better life and better citizenship. Our whole great country is aroused against the ravages of rum. Let us help, in a more sensible way than the many misdirected efforts, by building up the home ties and taste, the love for flowers and plants and trees. That branch of education rests with us.

So that we can all do our best, no matter what branch we are in, we must not be hampered by unjust legislation, by dishonest and greedy competition. We should be on the same footing all over the country, honest seeds and trees and plants and flowers. No sliding scales. Neither wealth, nor position, nor ignorance should be a factor in any sale. Integrity should be written all over our great profession, all its branches, absolute and always. If we want to be educators, we must be honest to ourselves and to the public. No Burbankism will stand the acid test of the public for any length of time.

To do this, we must get closer together so we can understand each other's needs better. Brains, applied science and common sense should soon make us independent of Dutch and French bulb growers, English roses and nursery stock, and German seeds. In our great country we should and would be able to find climate and soils for all purposes. But such enterprises

must be helped from some central point, where tests and records can be made and kept, and so stimulate this enterprise from one common source. It takes a staff of able men to take care of all problems of horticulture so that scientific and practical methods can be applied to all branches needing this help and protection. As we grow, so must our problems grow towards the public. Constructive foresight is a great asset. Let us make it in time. I again appeal to your loyalty and common sense to help and uplift your chosen profession. Everyone should care to see horticulture shoulder to shoulder with other enterprises. At the present time it is not.

The verdict against the growers of flowers and plants in Ohio a month or so ago, taxing greenhouse products as personal property, is the straw that shows how the wind blows. The public in general thinks that the florists and those engaged in allied branches are making money by the barrel, therefore make them pay taxes. What is a law now in Ohio will possibly soon be

tried in other states, such as Illinois, New York and Pennsylvania. We must not lose sight of the good will of the people.

It was an ugly blow to our seed merchants when the government gave its contract for seed to English firms. It seems as if the integrity of the home merchant were doubted. What is our seed trade going to do about it? If responsible firms did not care to take the orders the government had to give, on account of their agitation against free seed, they seem to have made a mistake. They forgot the public. Foreign seedsmen will make the most out of it and advertise it widely, and the public here will wonder why did Uncle Sam do it. It leaves the door wide open to all kinds of harmful conjectures. Watchful waiting does not seem to have sufficed as far as the seedsmen's troubles are concerned.

I think a more aggressive method, backed by all horticultural interests would put a different aspect on this feature. The seedsmen could not make a wiser move, and for that matter all

DON'T FAIL, if interested in our

NEW CARNATION "ALICE"

to visit Ellis when at the Convention, and see the stock of this Grand Variety, from which cuttings will be taken next Fall. Advance orders for 100,000 now booked. Steam Cars for Ellis leave South Station. Electric Cars from Boston pass the door. Take Elevated Trains to Forest Hills, then Norwood and East Walpole Cars which pass the greenhouses.

PRINCESS. 20—The New Upright Pansy

This strain is entirely distinct from all others. It is absolutely compact, upright growing, and extremely weather proof, enduring many storms without damage to its flower. The flowers are mostly blotched and frilled like the Masterpiece, of good form and heavy velvety texture, on heavy stems carried well above the foliage. Attractive by the brilliancy of its colors.

500 seeds, 25c 1000 50c 1/4 oz. \$2.50, 1 oz. \$10.00

- 34 — Bronze — Brown and copper shades mixed
- 36 — Fancy — Rich colors, mostly margined
- 38 — Mme Perret — Red and wine shades
- 40 — Zebra — Fine striped mixture
- 42 — Adonis — Light blue, white center
- 44 — Black — Almost coal black
- 46 — Black with bronze center
- 48 — Lord Beaconsfield — Purple shaded white
- 50 — Bronze — Beautiful Bronze.
- 52 — Bronze with yellow center.
- 54 — Velvet Brown with yellow center.
- 56 — Havana Brown
- 58 — Havana Brown with yellow center
- 60 — Cardinal — Curled bright red, dark blotch
- 62 — Cecily — Steel blue, margined white
- 64 — Goliath — Large curled yellow blotched
- 66 — Hero — Curled, deep blue shaded white

The KENILWORTH Giant Pansy

seeds are all grown by myself and are offered in the following mixtures and separate colors:

- 22—**KENILWORTH STRAIN**—The flowers are of perfect form and substance; many of the immense flowers are from 3 1/2 to 4 inches; it is a striking collection of beautiful colors and markings, rich with shades of red, brown, bronze, mahogany and many others too numerous to mention. Light, Medium or Dark Mixtures.
- 24—**KENILWORTH SHOW**—An extra fine strain of large flowers; the immense flowers are of circular form and great substance; a beautiful collection of colors and markings.
- 26—**KENILWORTH CUT FLOWER MIXTURE**—Is a distinct class by itself, surpassing all other strains as a cut flower or for exhibition purposes, for inside or outside growing; the large flowers are carried erect above the foliage on heavy stems, 7 or 8 inches long, in the most graceful manner, and stand the hot, dry weather well.
- 28—**MASTERPIECE**—A remarkable type; the curled, wavy petals giving the flower a double appearance, large flowers of great substance, on long, strong stem.
- 30—**GIANT THREE AND FIVE BLOTCHED PANSIES**—A superb mixture. Flowers large and of circular form and of great substance. The display of coloring is unsurpassed. A combination of almost every shade of rich velvety colors, reds are particularly conspicuous; the petals being distinctly marked with three or five large dark blotches.

NEW SEED NOW READY.

All sorts and mixtures, except the new Pansy Princess, are \$5.00 per oz., \$1.25 per 1/4 oz.; 5000 seeds, \$1.00; trade packet of 1000 seeds, 25 cents; any 5 pkts., \$1.00. Please order by number.

- 68 — Emp. William — Ultramarine blue, violet eye
- 70 — Eros — Velvety brown, yellow margin
- 72 — Emp. Franz Joseph — White blotched blue
- 74 — Emp. Frederick — Maroon with gold edge

other branches of horticulture, than to join hands with the S. A. F. & O. H. as a society. This great society is broad in scope, and it has a charter made to suit these very purposes. The times are here to combine; teamwork is what is needed. Horticulture does not produce multi-millionaires, our means are all moderate, so as individuals we may not amount to much, but we are strong in numbers. If we could only forget for once our special interests and feel more as a horticulturist in the broadest sense of the word, we would then soon get together on a basis of mutual benefit. Horticulture united will put all on a higher plane of life, from the humble private gardener to the most exalted position in horticulture.

All who go to Boston will have a chance to vote on affiliation either one way or the other. Other members who cannot be there and think favorably of affiliation, please send me a letter with just these words: "I am in favor of affiliation" and your name. I will make the most of it, and this holds good of any man in business, in any branch of horticulture, whether nurseryman, seedsman, private gardener, send me just those few words. The stronger the effort, the quicker the results. You don't need to be a member of the S. A. F. to show your sentiments towards affiliation. It may turn out to be the straw to show how the wind blows. Do it now.

ADOLPH FARENWALD.

Roslyn, Pa.

A SPECIAL EXHIBITION.

The Massachusetts Horticultural Society has arranged for a special plant and flower show at Horticultural Hall, Boston as a compliment to the Society of American Florists, on Tuesday, Wednesday and Thursday of Convention week. It is hoped that the sensational exhibit of caladiums which was made by Mr. Marlborough of the Proctor Estate last week may be again secured as a feature.

We were shown flower spikes of the gladiolus stock referred to in the advertisement of Charles Millang in this paper and must say we have never seen finer blooms—the stalks averaging three to four feet in height. Pink Beauty and America were fine.

STANDARD POT RECORDS.

We are pleased to learn that after these many years an original copy of the standard flower pot committee's report at the convention in Boston, 1890, together with complete diagrams and measurements of all sizes has at last been found. The S. A. F. and the trade are indebted to Mr. Hall of A. H. Hews Company, Cambridge, who unearthed it and has kindly placed it in the hands of J. K. M. L. Farquhar and Thomas Roland for the society to make such use of it as may seem desirable.

A special delegation from the Florists' and Gardeners' Club of Rhode Island is scheduled to attend the Convention on Wednesday, 19th.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Effect of the European War.

Fifteen of the Leonard Seed Co.'s traveling salesmen were called together at the Chicago office the last week in July and the first of what will be semi-annual conferences was held. That they might fully understand the situation, the company's seed farms in Michigan, Wisconsin and Illinois were visited and the condition of crops noted. The 550 acres just outside of La Grange, where small seeds are tested received especial attention. As a result of the tour it was decided that wax beans were short, the present price being from \$6.00 to \$8.00 per bushel, and also a slight shortage of some varieties of peas, including those used by canners. The cutting off of European seeds is adding to the demand for home-grown ones and this firm predicts a decided change in the seed market in consequence. European seed houses have recalled a large proportion of their salesmen in this country. Trade is unusually brisk

with the Leonard Seed Co. and the heads of departments have so far found vacations out of the question.

Owing to unsettled conditions in Europe all grass and clover seeds originating there are sharply higher and in many cases unobtainable. In fact, it is a hard matter to place an order on any terms in most places. We think, however, that after the first flush of the scare is over, the situation will develop reasonable supplies in a good many lines, especially along the line of the earlier grasses already harvested and cleaned. This does not apply, of course, to German sources of supply. The Holland houses with neutral ports and a clear passage at sea, will no doubt be available up to the limit of their supplies, and will do their best.

PUBLICATIONS RECEIVED.

Chrysanthemum Society of America. Proceedings of the Twelfth Annual Meeting, held at Art Institute, Chicago, Ill., November 5, 6 and 7, 1913. Contains a report of the meetings, list of members, list of varieties domestic and foreign disseminated in 1913, etc. A portrait of Wm. Kleinheinz, president, forms the frontispiece.

Annual Report of the Park Commissioners of the City of Haverhill, Mass., for year 1913. This is the 23rd annual report of the small but well-kept park department under the efficient superintendency of Henry Frost.

Union Nurseries, Oudenbosch, Holland.—Wholesale Catalogue 1914-'15. McHutchison & Co., New York, are exclusive American agents.

Framingham Nurseries, Framingham, Mass. (W. B. Whittier & Company)—Trade Price List of Evergreens for August and Summer Planting, 1914.

WARNING TO THE TRADE.

The trade is warned against a young man who has made his appearance in the New England States, who is representing himself as "Young Mr. Dreer." In one instance, on a plausible story, he secured the loan of some money from a brother florist. There is no such person as a young Mr. Dreer and William F. Dreer is not in the country at this time.

YOKOHAMA NURSERY CO.

WOOLWORTH BUILDING, N. Y.

The House of Burpee

is recognized throughout the world as American headquarters for Sweet Peas. Our strains are selected with special care, and the seed is the best it is possible to produce. THE BURPEE SEED CROPS, both on our own farms and under contract, are subject to careful, critical inspection during growth, while samples of every lot are tested both for vitality and trueness to type.

The Burpee Standard in Seeds

is the highest it is possible to attain today, and yet we aim for still further betterment. Progress is our watchword! Planters, whether gardening for pleasure or profit, soon learn that the best is the cheapest. The cost of the very best seeds is so small compared with the value of the resulting crop that sensible planters know they cannot afford to risk seeds of doubtful pedigree,—and we know just as well that we cannot afford to risk our hard-earned reputation by selling stock of uncertain character.

We are Specialists in Seeds.

Our entire time is devoted to producing and distributing seeds,—seeds only, and only seeds of the best quality. We aim to do this one thing well. We shall be pleased to give any advice in our power as to your other horticultural requirements. The same care is used in testing and improving the excellence of Burpee's Flower Seeds that has made Burpee's Vegetable Seeds famous.

Florists and Market Gardeners

should write for our Blue List. This is our Wholesale Price List for those who plant for profit. The business of market growing does not warrant the use of seeds of unknown quality any more than the use of haphazard methods. We will gladly mail both our Annual, which is a descriptive catalog, and our Blue List, which contains the right prices for florists and market gardeners. Our Blue List contains the full list of desirable florists' seeds.

Burpee's Flower Seeds for Florists.

At Fordhook Farms in Pennsylvania, Sunnybrook Farm in New Jersey, and our Floradale Farm in California, we are growing acres of flower seeds, especially those varieties that do best in the different localities. Other flower seeds are produced on contract by careful growers both at home and abroad. Superior quality cannot be procured from any source.

Write Today—"Lest you forget." A postcard will bring both these books

BURPEE BUILDINGS, . . . PHILADELPHIA

THE HOUSE C

MILLIONS of square feet of glass have been added within the past year for the production of cut flowers. Probably more than half of the new space will be devoted to the production of an augmented product to be disposed of? It cannot sell itself. **STOP, LOOK AND THINK** grower if these roses could be made to yield even 50 cts. a hundred more than now, paying the interest on the entire investment, would it not?

THE ROSE And the ORCHID

What I have done towards the commercial advancement of the Cattleya is known to the florist trade of the continent. I am still holding where I was at the start, trying to maintain the just prestige of this regal flower in the floral world and to keep it from the degradation of the "5 and 10 cent counter." If it gets there from whatever cause you cannot blame it to McManus. It is a fair proposition, is it not, that if the grower turns out a first-class product in cattleyas, roses or other specialties, and sends it to a first-class market, it is entitled to a first-class effort to get for it a first-class price?

CLOSE FOLLOWING THE CONVENTION COMES SEPTEMBER Whether it be Orchids, Roses, Lily of the Valley, Carnations, Sweet Peas, Daisies, Gardenias with you and fully explain my facilities for handling a much larger amount of shipments than ever presented in past years and **the money is always ready when due.** *Best Wishes for a Glorious*

few months to the Commercial greenhouse ranges for the production devoted to the production of Roses for the big markets. How is this, **LISTEN!** Think what would be the increase in gross returns to the they returned last year. The increased sum would come pretty close to

WANTED A SQUARE DEAL

I am satisfied that the rose situation can be improved upon. The oft-quoted proverb, applied to the rose business as it stands at present, might well read, "take care of the hundreds; the thousands will take care of themselves." What I believe the rose grower needs more than anything else today is selling agents who will work for the rose as a specialty, strive for the elimination of the "bargain lot" system from which the rose has been the most conspicuous sufferer, and see to it that every bud that is of worthy quality gets its square deal. Mr. Grower, am I not right?

It is now time to make plans for the marketing of your product for the coming season. Anything else that counts for something in the flower market I should like to talk it over the past. We believe that we enjoy the implicit confidence of those growers we have represented at the *Convention and a Busy and Profitable Season.*

Boddington's Gigantic Pansies

Can be produced only from the giant strains. Our CHALLENGE PANSY seed contains only the giant self-colors, the giant striped and variegated and the giant blotched, etc., all carefully mixed in proportion. You could not buy better seed if you paid \$100 per ounce. Our Challenge Pansy seed during the past season gave unprecedented satisfaction, and every order booked last year was duplicated and increased this year. All the testimonials received mentioned specially the high grade of flowers—color, form and size of the individual blossoms. This year, by adding improved types, intending customers can absolutely rely on a duplication of this season's success with increased satisfaction. Our "mark" for this strain is "Challenge," and it is all the word denotes.

Pansy—Boddington's "Challenge"—All Giants

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said: "Why don't you call it Defiance?"

½ trade pkt. 25 cts., trade pkt. 50 cts., ¼ oz. 75 cts.,
¼ oz. \$1.50, ½ oz., \$2.75, oz. \$5.00.

1914 NOVELTY PANSY SIM'S GOLD MEDAL MIXTURE

Was awarded the First Prize and Gold Medal at the International Horticultural Exhibition, held at the Grand Central Palace, New York City, April, 1913. This splendid mixture is the result of years of painstaking selecting on the part of Mr. William Sim (renowned for Sweet Peas), Cliftondale, Mass., and we are offering seed from the originator for the first time. Trade pkt. 75 cts., 3 pkts. for \$2.00, ¼ oz. \$3.50.

Boddington's Quality "English" Pansy

A superb strain of highly-colored flowers in great variety and immense size.

Our Mr. Bunyard, while visiting the Royal International Exhibition in London, was much impressed with these blooms, and strongly recommends this mixture to florists.

Trade pkt. (500 seeds), \$1.00; ½ trade pkt. (250 seeds), 50c.
¼ oz., \$2.25; ½ oz., \$4.25; oz., \$8.00.

NATIONAL DAHLIA SOCIETY.

The National Dahlia Society will hold its national convention in Seattle, Wash., Sept. 18 and 19. The headquarters of this organization are in Seattle and according to the Sun it is doing pioneer work in its field. The main feature of the convention will be an exhibition for which 30 trophies have been offered. There are to be 342 classes in the competition, and preparations are being made for at least 5000 entries.

"We are assured of an attendance from outside the city," said R. M. Buttle of Seattle, president of the society, "of 5000 or 6000 people at least. Our member societies are all up and down the Pacific coast and extend as far east as Denver and north into British Columbia, and we expect to cover the United States before long.

"So far, everybody has named his dahlias according to his own ideas, and the confusion is endless. The task of the National Dahlia Society will be to straighten it out."

NEW JERSEY FLORICULTURAL SOCIETY.

The above named society will resume its meetings on Monday, Sept. 7th, after its summer vacation. Preparations are almost completed for the Ninth Annual Dahlia, Gladiolus, Fruit and Vegetable Show, to be held Oct. 5th, 1914, in the O. U. A. M. Hall, Orange, N. J. A schedule of over 40 classes is in the hands of the secretary and may be had on application. Excellent prizes are offered and it is the desire of the society to make this show a record breaker.

GEO. W. STRANGE, Sec'y.

216 Main street, Orange, N. J.

A WORTHY ASSOCIATION.

A note from Mrs. Francis King, Alma, Mich., calls attention to the existence of the Woman's National Agricultural and Horticultural Association of which she is president and which has now over five hundred members, and whose first object is to promote agricultural and horticultural interests throughout this country, especially among women. The dues are but one dollar a year, and the general secretary, Miss Margaret Jackson of Englewood, N. J., will gladly furnish information to anyone desiring it. Mrs. King expresses the hope that some who read this invitation will accept it.

INCORPORATED.

El Paso, Tex.—W. D. Wise Seed Co., capital stock, \$30,000. Incorporators, W. D. Wise, Chas. Davis and M. J. Murray.

F. DORNER & SONS CO.
LA FAYETTE, IND.

MASSACHUSETTS HORTICULTURAL SOCIETY EXHIBITION.

One of the most sensational exhibitions ever put up by this society in midsummer took place at Horticultural Hall, Boston, on Saturday and Sunday, August 8 and 9. It filled the main hall and the smaller hall to repletion. The central feature was the display of about 300 specimen fancy caladiums in 125 named varieties from the Thomas E. Proctor estate, gard. James Marlborough. A fountain with basin filled with nymphaeas was also included in this remarkable exhibit which was awarded a gold medal and, to Mr. Marlborough a silver medal for the cultural excellence displayed.

The collections of hardy herbaceous flowers from the various perennial plant nurseries were brilliant in the extreme. Aconitums from Mt. Desert Nurseries received a well-merited silver medal and the same exhibitor also received certificates of merit for Astilbe June and A. Silver White. Peony flowered dahlia Fred Grinnell, exhibited by P. J. Rooney was recognized with a certificate of merit. Honorable mention was given to R. & J. Farquhar & Co., for display of herbaceous flowers; William Nicholson for Buddleia variabilis varieties; A. M. Davenport, display of heliotrope; John Lewis Childs for display of gladiolus and new Gladiolus Whitest White.

There were some very effective gladiolus tables which added stately splendor to the general color effect. Annual flowers, too, in sparkling array did their part in illuminating the scene. The fruit and vegetable groups filled the small hall and were of superior excellence. A special \$50 prize for cultivated blueberries went to the estate of W. C. Jennison, gard. H. Chamberlain; a certificate of merit to the same exhibitor for seedling everbearing strawberry and a cultural certificate to E. S. Webster for nectarines. Prizes in the plant and flower section in addition to the above were as follows:

Perennial Phloxes, 12 varieties: 1st, F. J. Rea; 2d, T. C. Thurlow's Sons Co.; 3d, Eastern Nurseries. General display: 1st, T. C. Thurlow's Sons Co.; 2d, F. J. Rea; 3d, Bay State Nurseries. Twelve varieties, for private growers only: 1st, William Whitman. Gladioli 12 named varieties: 1st, William Sim. Twelve named varieties, private growers: 1st, Miss H. A. Riordan. Fifty spikes, any named variety: 1st, William Sim. Display, 100 vases, arranged for effect: 1st, Mrs. Frederick Ayer. Basket, artistically arranged: Chamberlain & Gage. China asters—display of all classes, named, 50 vases: 1st, William Whitman. Twenty-five vases: 1st and 2d, William Whitman. Annuals—general display: 1st, Mrs. J. L. Gardner; 2d, Col. Charles Pfaff; 3d, William Whitman.

Gratuities were awarded to Wm. Sim, Chamberlain & Gage, B. Hammond Tracy and Miss Helen Riordan for extra displays of gladioli; E. F. Dwyer & Son for dahlias; Gustav Olsen for Shasta daisies; Wm. Nicholson for Buddleias, Bay State Nurseries, Eastern Nurseries, G. W. Page, Miss Cornelia Warren and Mrs. E. M. Gill for general displays of flowers.

OBITUARY.

Mrs. C. H. Homeyer.

Elizabeth A. Homeyer, widow of Christian H. Homeyer, who before his death was a well-known florist in Elmhurst, N. Y., died at her home, 234 Stoothoff avenue, Richmond Hill, August 10, aged fifty-eight years.

Roots on this have not been pruned since it was six inches high. Note the absence of fine, fibrous roots.

Twice transplanted and twice root-pruned. Note the compact mass of fine roots and the number of branches and denseness of foliage.

Think These Facts Over Before you buy Evergreens for your Aug.-Sept. Planting

ALL gardeners know that root-pruning when done right and done systematically induces a dense growth of fine, fibrous roots. It's these fine roots that do the bulk of the food absorbing from the soil. The greater, then, the quantity of these fine roots, the more rapid and thicker the foliage and the stronger and more satisfactory the tree will be in every way.

But that isn't all—when it comes to transplanting, all the roots will be clustered in a compact mass that can be dug with a moderate-sized ball of earth and still practically every root and rootlet will be intact. It's only just plain every-day common sense that such trees can be the most successfully shipped long distances, and will transplant with the least possible setback and continue to grow rapidly.

Our eight-year-old White Spruce have been two times root-pruned, the last time in August, 1913, and two times transplanted, and grown in squares so we could cultivate and root-prune on four sides. As a result, they are beautifully developed, broad-branched specimens, every one of them. The foliage has that dense bushiness which you like so to see and

are always trying to secure in the trees you buy. As might be expected, fine high class trees grown this way cost somewhat more than the ordinary nursery stock, but no one who knows trees questions that they are worth more, and worth decidedly more. It is a dense, cheerful, blue-green, not open, yellow-green, and melancholy.

You know White Spruce can't be beaten for seashore planting. They fairly revel in the salt spray.

Here are our prices. What can we do for you?

We guarantee all Evergreens in August and September, replacing any that fail.

PRICES—WHITE SPRUCE

3 ft. high, 22 in. spr. \$9.00 per 10 \$80.00 per 100.
\$90.00 per 1000

3½ ft. high, 2 ft. spr. \$17.50 per 10. \$150.00 per 100. \$1,000.00 per 1000

4 ft. high, 2½ ft. spr. 8 yrs. old, \$22.50 per 10. \$200.00 per 100.

5 ft. high, \$30.00 per 10. \$250.00 per 100.

Can you use a White Spruce hedge, 3 ft. high, at \$22.50 per 100 feet?

Need any White Pines, 7 ft. to 14 ft. high?

Eight horses are hitched to this U-shaped root-pruner and the long roots cut off so that compact, fibrous rootless develop, which can all be delivered in the ball of earth.

DREER'S SPECIALS

In Palms and Other Decorative Plants

For Convention Month

As usual we will have an extensive display of our many specialties at the Convention, and our staff of travelers will be in attendance and will be pleased to show you samples, but a personal inspection of the stock where it is grown is the most satisfactory. Why not stop off at Philadelphia on your way to or from the Convention and visit our nurseries. We are sure that you will find it both entertaining and profitable.

Of Interest to Retail Florists

GLEANINGS ON FOLIAGE PLANTS AND FERNS.

Nephrolepis Smithi, according to Robert Craig, Jr., is one of the very best for use in small sizes for baskets and table ferneries. It is exceedingly graceful in appearance, filmy, and a good laster.

Teddy Junior is another good one among the newer Bostons. It is just as dwarf as Scotti but has that wave to the frond which is an added charm and the finishing touch. It is also a quicker grower and gives more young growths.

Schoelzeli sells well and is popular everywhere except around New York. This is rather strange, seeing that it was in that city that it was first introduced.

Of the crested type of Nephrolepis the leader is robusta as far as selling quality is concerned. It is a very quick grower also.

Pteris Parkeri is making new friends right along. Tough as an Aspidistra, and that is saying something almost unbelievable about a fern. A sample plant that Alphonse Pericat sent in to the Philadelphia Florists' Club stood over a steam register in the Library Room all winter and spring and came through looking elegant. A wonderful thing. Tougher than leather. We noticed a fine lot of them out at Craig's.

All the crotons seem to be in better than usual form this year. Maybe it's the season, maybe the good culture, maybe the fine fresh air at Norwood, maybe all combined. Anyway, they are certainly fine and there are quite a lot of new seedlings of great merit. The croton is certainly a wonderful foliage plant. All the colors of the rainbow and, as for form: old Dame Nature was certainly in her friskiest mood when she played that wonderful tune—from bang to twitter and back again—and then threw in a few corkscrews for good measure.

CHICAGO NOTES.

Mr. and Mrs. Frank Oechslein spent the week end at Fond du Lac, Wis.

Miss Carrie Zech, daughter of John Zech, is slowly improving after her long illness, now nearly a year.

C. E. Anderson, foreman of the plant department at Poehlmann Bros., and Mrs. Anderson spent a week cruising on the lakes.

Miss O. Tonner, who successfully handles flowers on commission in the wholesale market, is spending a couple of weeks in Wisconsin.

Peter Reinberg, as president of the school board, has been very anxious over the teachers who are abroad, and was greatly relieved when Supt. Ella Flagg Young was heard from.

Miss Thelma Vaughan, daughter of A. L. Vaughan, is now visiting the family of W. F. Lynch in Massachusetts. Mr. and Mrs. Vaughan will meet her there and attend the convention at Boston.

The greenhouse plant started by Lord & Burnham at Union Grove, Ill., has been abandoned. J. E. Meredith, of the Meredith Flower & Vegetable Co., Libertyville, Ill., had formed a company, representing a capital of \$17,000 for the purpose of erecting the new houses. But Mr. Meredith has disappeared leaving the Lord & Burnham Co. with a lot of material cut especially for the houses and which may be a considerable loss to that firm.

The greenhouses of Frank Oechslein probably attract more visitors than any other range of glass in Chicago. They are for the growing of pot plants

only and constitute the only exclusively wholesale plant range in Chicago. Everything is kept in such perfect order that it is a pleasure to walk through the houses and see the palms, ferns and decorative plants growing so nearly to perfection, as well as preparations always going on for blooming stock for the bedding season, Christmas and Easter. Those interested in the growing of pot plants can always find something particularly attractive here.

The value of an establishment like that of the Poehlmann Bros., as an educational institution is hard to estimate and is sometimes lost sight of. Every one who will, is allowed to visit the houses, and their method of construction, material and heating arrangements are all open to inspection. There are very few growers who so willingly give out information on the kinds of stock and the quantity of each variety grown as Mr. Poehlmann. The great advantage in this comes from its accuracy which can be obtained only in the system maintained there. Every house and every bench has its record and is expected to show a balance on the right side. All through the plant the work in every department is carried on with the same exactness and the packing and delivery is accomplished in a like systematic way. One rush order for 5000 lily plants at Easter was packed and delivered to the city store, a distance of 14 miles. When the magnitude of the place is considered (seven miles of houses) and modern methods everywhere employed, it is a wonderful school for all who take advantage of it.

PHILADELPHIA

KNOXVILLE (TENN.) NOTES.

Addison J. McNutt is building two new houses to be planted to sweet peas.

Among those going to the Boston Convention are Chas. L. Baum, Mr. and Mrs. A. H. Dailey, Mr. and Mrs. C. W. Crouch, A. J. McNutt and L. A. Giger.

Business conditions here are very quiet and at the different stores everyone seems to be planning vacation trips. We have had several good rains in the past few weeks, which are helping out-door stock considerably.

Mr. and Mrs. C. W. Crouch have gone to Atlantic City, and from there will go to Boston for the Convention. They contemplate spending the next two months in the East. A. H. Dailey and Mrs. Dailey are also at Atlantic City, and from there will go to Boston to attend the Convention.

All of Baum's store force is given a vacation of two weeks. He also allows each clerk an afternoon off each week during the dull season. Miss Margaret Todd is off on her vacation now, Miss Mary Attix having returned from her trip. Karl Baum returned from a well-earned week's stay in the mountains. Miss Bessie Smith received her vacation during the last week of June and the first week of July.

PERSONAL.

Col. W. W. Castle is at the Boothby Hospital, Boston, where he had an operation performed on August 6 and is convalescing finely.

Ed. Sceery, florist, of Paterson, N. J., has been appointed as a member of

the Retail Affairs Committee of the Chamber of Commerce of that city.

Among the tourists now in Germany are Mr. and Mrs. S. J. Reuter and daughter of Westerly, R. I. Charles Schwake has arrived safely in New York. No tidings have been received thus far from A. Leuthy who is presumed to be in Belgium. Mrs. W. Atlee Burpee and her sons David and W. A., Jr., are still abroad.

CINCINNATI NOTES.

The exhibitors at the Carthage Fair on Thursday of this week will be T. Ben George, Henry Schwarz and Fred Bachmeier.

Frank Kyrk will take charge of L. H. Kyrk's business while the latter and Mrs. L. H. Kyrk are on their trip to and from Boston.

The engagement of Clarence Peterson to Miss Mary Critchell has been announced. The wedding, it is said, will take place very shortly.

LONGING FOR PEACE.

Extract from verses read at the outing of the Tarrytown Horticultural Society last week:

"And while our brothers 'cross the sea,
Die in this sad and cruel strife,
Our duty, so it seems to me,
In this great sacrifice of life,
Is ever to protest and pray
That war's dread horrors soon may cease,
And from this universal fray
May dawn the age of lasting peace."

• Charlevoix, Mich.—Babcock & Son have purchased the greenhouse business of B. B. Blair, who has retired.

Early Blooming Gladioli

Everybody in the Flower Business knows how **desirable and profitable** it is to have Gladioli **in bloom early**. My Bulbs planted outside this year in early April were in bloom **ahead of the frame-planted stock**, in June when they brought good money and made a big hit with the New York trade. I shall plant 300,000 next year.

See me at the Boston Convention, or write for information regarding this stock, of which I expect to have a good supply.

BOSTON, MASS.

During Recess

THE "TRULY RURALS" INVADE
BARNEGAT BAY, N. J.

HIS celebrated aggregation of bucolic experts, famous the world over, with headquarters in Philadelphia, blew into the offing at Westcott's Bungalow on the 31st ulto., under a fair wind and a

sunny sky. They were ex-bucolic for the time being, however, and from keel to capstan smelt of the briny.

The Bungalow was captured without resistance, Commodore Westcott deeming discretion the better part of valor.

The next act in the tragedy was the deposition of Capt. Stackhouse as master of the high power cruiser "Emily" and the installation of Bos'n Trainer as sailing skipper.

After scouting the bay fore and aft and from leeward to windward from early morn to 3 P. M. at last the German craft "Unter der Linden," owned by one Louis Boss (a seceder) and sailed by Captain Hiram (a merce-

nary) was sighted and after a short but lively skirmish punctuated by hard Scotch Haggis balls, made by the Tornaveen Terror, was captured, the prisoners taken aboard, and the prize towed to port.

The victory was celebrated in due form on shore—and in proper sailor fashion.

Chief Cook Edward J. Dooner, assisted by an improvised crew consisting of Cooper McNab, Burgomaster Flood, Boiler Factory Connor, Flint Dobbins and others, made the commis-

sariat department hump itself and covered themselves with much glory.

Minstrel Brennan and Robin Hood Reed made the Welkin ring until even the jungle tigers (alias mosquitos) stopped to listen.

Later a penny-ante was in full swing, an incident of which was the recovery of a bushel of red, white and blue, surreptitiously captured by Bos'n Trainer with a bogus three sixes. He was keel hauled. Boiler Factory was also caught in the act, with one up his

sleeve, and by order of Hon. Judge Burton was bastinadoed.

The next day was declared "an armistice" and all hands went fishing. The Minstrel broke two rods—and very near a third—pulling them in. Heavy seas were shipped, and convoys were lost and found, the lighthouse was charted; and other valuable information gathered for future cruises.

(Here the log stops abruptly and the narrator is unable to learn of the subsequent developments.)

Later. We have just learned that the Commodore, finding the privates in a gentle and sentimental mood, sent out a call to the timid natives of the surrounding woods, to hear Boniface Dooner who warbled to them "Kilkeny" and "Oft in the Stilly Night" in a way that wound round their hearts like a piece of new red flannel, and made them all declare that he was the mildest mannered pirate that ever cut a throat or scuttled a ship. The Princess Mick and her retainers were especially delighted.

FIELD DAY AT MICHELL'S.

Saturday, Aug. 8, being the date fixed for the annual field day exercises given the employees of the H. F. Michell Co., Philadelphia, 150 or more were mobilized at Andalusia, under command of the Michell general staff, where an immediate attack was made on the Commissary Dept., which was captured and destroyed after a short but severe engagement. An armistice having been declared, a speech of welcome and good fellowship was given by Henry F. Michell, the founder and president of the company, and he also entered cordially into the spectator

list on all the merry doings. Other prominent members of the craft followed him and said kindly words in regard to the fine record and standing of the big house in which every individual from the highest to the lowest had done their share in building up,

after which the victorious army under the direction of Generals Michell, Jr., Goudy and Cowperthwaite were allowed to relax a little after their severe duties and left to their own diversions.

"After labor cometh rest," rest in this case taking the form of trials of endurance and feats of skill as exemplified in wheelbarrow, sack and potato races, 75 and 100-yard dashes, base-

ball, etc., for the men, and 45-yard dashes, potato race and nail driving contests for the ladies—the latter event being one of great moment and tense excitement, as to be expected. Miss Nellie Monahan was the victor in both the potato race and the nail contest. The 45-yard dash was a draw, as all the ladies reached the tape at the same time, so that no jealousies or heart burnings exist. The sack race for men was won by Wm. Whitaker; the wheelbarrow and potato race by Fred Albartz; 75-yard dash by Jack Smith. The baseball game between the office staff and the packers was won by the latter, 17 to 10, the opposing teams being made up as follows:

Packers—Mahon, c.; Michell, Frank, p.; Sheppard, s. s.; Myers, 1st b.; Bush, 2d b.; Albartz, 3 b.; Hamlin, r. f.; Keller, c. f.; Allen, l. f.

Office—Schermerhorn, c.; Michell, Harry, p.; Callahan, s. s.; Hirshorn, 1st b.; Kelly, 2d b.; Burton, 3d b.; Shilling, r. f.; Koe-hane, c. f.; Eadon, l. f. Umpire, Ira Robb.

The game was brilliant throughout with many distinguished plays and errors on both sides.

Speaking in the vernacular, a good time was had and the field day of the Michell employees proved a splendid success.

So, vale, Andalusia—and I look forward to you next year.

WILLIAM BURCHARD.

CHICAGO FLORISTS.

The stag party given by the Chicago Florists' Club at Morton Grove Saturday evening, August 8, was largely attended, 150 or more being present. The time passed quickly, a first-class vaudeville being followed by a sparring contest and greatly enjoyed by the florists.

To the Convention Visitors

We joyously extend the Glad Hand and say

WELCOME TO OUR CITY

Honor us with a call, and if we can add
to your pleasure in Boston, command us.

Flower Market Reports

BOSTON In common with the rest of the country Boston is depressed under the burden of asters and gladiolus blooms which are being rushed in from all directions. They are good enough but there are far too many of them and even if business was rushing beyond precedent it could not absorb half of them. But it is not rushing nor even creeping. The usual sources of summer demand are silent this year, Newport, Bar Harbor, Saratoga, Naragansett Pier, etc., being apparently off the map. All kinds of flowers are plentiful and difficult to move with any profit.

BUFFALO What we need in this section is good rain in order to get a good late crop of asters. The early crop is practically a failure and there are but very few coming into the market that are what you call first-class. There are a lot of short-stemmed and off color quality coming in on which there is little or no sale. The same may be said of gladioli. The best sell and the balance goes for whatever is offered in many cases. Roses are not so plentiful and quite satisfactory sales have been had. My Maryland is fine as are also Mock, Ward, Double White Killarney and Beauty; the latter have not taken well up to this time. A fine lot of lilies are had in giganteum and Japans, also lily of the valley and sweet peas and other stock. Plenty of greens.

CHICAGO There is no change in either price or condition this week. A few dol-

lars will buy a large quantity of flowers. American Beauties did not shorten up as much as had been predicted and are still seen in quantity. All roses, especially short ones, are abundant with the exception of good white roses, which are scarce. Lilies are moving fairly well, while lily of the valley goes slowly. Field carnations supply the bulk of that flower; stems are short but there are a few fairly good blooms from old plants. Asters are still of the early varieties and a very large proportion are not worth handling. Some much better ones, grown in greenhouses, are offered and it is from these that the best sales are made. Gladioli are an impossibility when it comes to exchanging them for the dollars and the growers

are producing better stock than in past seasons, which means only a greater loss. Miscellaneous stock is also in fair supply and there seems no lack of green.

Business is rather quiet. As far as the demand is concerned it is very limited in amount. The cut of all kinds of seasonable flowers is far more than sufficient for immediate needs. The rose supply is large and includes some excellent offerings in American Beauties, Taft, My Maryland and Sawyer. Sales are slow and prices very low. Giganteum lilies are again plentiful. Aster receipts are large and more than able to take care of all business in this line. The large

Flower Market Reports

(Continued from page 255)

white ones are apparently enjoying the best call. Gladioli continue plentiful. The market in both asters and gladioli is more or less crowded.

As the season advances the unsatisfactory market conditions become more wearisome and unmanageable. The shipments of gladiolus blooms and asters are this week enormous, beyond all past experience. A large proportion of the stock cannot possibly be disposed of, other than to throw them away daily to make room for the oncoming avalanche. Lilies are again overplentiful and values have dropped back into the discard. Of carnations very few are seen and the whites are the only ones that sell. No change in roses since last week, quantities of little ones from young plants being received but good stock in white being quite scarce. Other material is about normal for mid-summer. Southern asparagus continues to make a fine record. It arrives in excellent shape and finds an active demand.

We are in the PHILADELPHIA midst of the usual summer dullness; buyers are very conservative and sales are small and few. Lots of poor asters—probably fifty per cent are under grade, especially of the older crop. The newer crop is much better. Gladioli are still fairly plentiful but not so much of a glut as heretofore. The high tide is past. Roses are coming rather more freely. Some of the new crop are now appearing. White and pink Killarney are among the latter, short-stems but very good flowers. There are some nice Hadley and Ophelia, also rather short-stemmed as yet. Carnations are not a factor. Belladonna and other delphiniums of that type are again in good form from the second crop, although not so long-stemmed as earlier in the season.

The market has been very weak as far as demand was concerned, ST. LOUIS but as to receipts it is in fine condition. Anything wanted and as much of it as wanted are to be had at prices that are much lower than any summer heretofore. Gladioli, roses and asters have been crowding the market all week with the demand so light that much of the stock had to be dumped. The young roses are coming in heavily. Asters are in abundance with only the light colors selling. Gladioli have choked up the market and \$10 per 1,000 is considered a fair price for them.

PHILADELPHIA NOTES.

No decision has yet been rendered in the damage suit brought by Frank P. Myers and George Burton against the local Smelting Co. This being vacation season the County Court judges need more time than usual. The case was tried last week.

Robert Craig Co. will have three beds of crotons at the outdoor exhibition in the Back Bay, Boston. These will be well worth seeing and will emphasize what a superb effect can be produced with this subject. They will be mostly American grown seedlings as yet but little known.

A FLORIST FARMER.

Up at Chappaqua, N. Y., once famous as the home of Horace Greeley, lives a successful Long Island florist who, while desiring to retire from the burden and exactions of business life yet could not bring himself to abandon hard work so he moved to Chappaqua, acquired a farm of seven acres and settled down to the enjoyment of plowing, digging, hoeing, planting and other light relaxations of like character. And now the wilderness on the hillside begins to blossom as the rose and the trees are bending under their weight of luscious fruit and the neighbors all about are commencing to take notice, and wonder why they can't do likewise, and so Chappaqua may soon become famous again—this time because of its beautiful gardens, and another monument may sometime be erected—this one to commemorate W. H. Siebrecht, because instead of saying "Go west, young man," he said, "Stay right here, young man, and develop the land you have at home."

Besides fruit of every description and an extensive vegetable garden, large numbers of ornamental trees, shrubs, conifers, etc., have been set out and beauty and utility have been agreeably combined. Bee culture is also carried on to the extent of about a ton of extracted honey a year. The real eye-opener, however, for the commercial florist is the contents of a greenhouse 40x175, crowded to the limit with *Acacia pubescens*. We doubt if there is anywhere in the world a house to equal it. The old plants are trained to cross trellises, five plants and six plants alternately to a trellis, the centre ones rising to a height of 15 feet and spreading out in great umbrellas of lacy green that almost obscure the roof and will produce their pendant showers of golden yellow in great profusion from Christmas to Easter. There are 39 of these cross-trellises, so that the number of trees in the house is over 200. Between them stand as many more young plants in pots of various sizes and another large house will soon be erected to accommodate these. Mr. Siebrecht is still working away on the old problem of the propagation of *Acacia pubescens* and with a considerable success. Many difficulties are encountered but the solution seems to be on the way. "Ye editor" had a glorious holiday visiting this interesting place and in the society of its genial companionable owner. We hope he may have many years yet in which to enjoy his farm and its charming outlook over the green hills and valleys of Chappaqua. "They are happy men whose natures sort with their vocations."

THE ANNUAL MEETING OF THE FLORISTS' HAIL ASSOCIATION

will be held at

**Mechanics Hall, Boston, Thursday,
August 20, at 9 A. M.**

JOHN G. ESLER, Sec.

FOR SALE

FOR SALE—Large place in New Jersey, near New York City; 30,000 feet of glass, large dwelling and furniture, barn, horses, and automobile; well established business, local and wholesale; also large landscape business. Place is near trolley and railroad, and is in first class condition, all up-to-date improvements. Price very reasonable; owner must sell at once, going west. Particulars **CHAS. MILLANG**, 55 W. 26 St., New York City.

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. **PAR-SHELSKY BROS., INC.**, 215-217 Have-meyer St., Brooklyn, N. Y.

FOR SALE—Florist refrigerator and also cash register made especially for the florist business. For sale cheap. **OSGOOD BROS.**, 287 Elm St., Everett, Mass.

FOR RENT

FOR RENT—Greenhouse range, six houses about 10,000 sq. ft. of glass, with store and sheds attached, in very favorable retail location. Write for particulars, giving references as to financial responsibility, character, etc. **CURRIE BROS. CO.**, Milwaukee, Wis.

MASTICA
FOR Greenhouse Glazing
USE IT NOW.
F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$2.75 per 112 lbs.; \$12.50 per 560 lbs.

See our Representative at the Boston Convention

This snap-shot of the framework of Mr. Roper's house at Tewksbury, Mass., gives something of an idea of the construction. When completed, we will take another photo and tell you all about it.

Points of Interest About Some Of Our Boston Houses

TEWKSBUURY, on the outskirts of Mr. Roper's home town, is a quiet village of about 1,000 people, with a population of about 1,000 people. It is a quiet village of about 1,000 people, with a population of about 1,000 people.

The house is a fine example of the construction of the Hitchings and Company. It is a fine example of the construction of the Hitchings and Company. It is a fine example of the construction of the Hitchings and Company.

The house is a fine example of the construction of the Hitchings and Company. It is a fine example of the construction of the Hitchings and Company. It is a fine example of the construction of the Hitchings and Company.

The house is a fine example of the construction of the Hitchings and Company. It is a fine example of the construction of the Hitchings and Company. It is a fine example of the construction of the Hitchings and Company.

The house is a fine example of the construction of the Hitchings and Company. It is a fine example of the construction of the Hitchings and Company. It is a fine example of the construction of the Hitchings and Company.

So Saturday afternoon, all three went over to Mr. Roper's house. They found the house in a state of construction. They found the house in a state of construction. They found the house in a state of construction.

one thing in mind that of influencing you to surely see the McCarthy house. Its construction is of special design, made to meet Mr. McCarthy's ideas and the chances are you might not want one just like it. But it is a splendid example of fine workmanship in EVERY PARTICULAR.

Based on the quality of materials, and careful attention to every construction detail, both Mr. Roper and Mr. Beal (the latter of Hanover, Mass.) were influenced to buy our houses.

All three houses are constructed differently—but in the same way. They are constructed differently—but in the same way. They are constructed differently—but in the same way.

Some don't seem to care a hoot how their house is "finisled up". But there is an increasing number who do. They are "finisled up". But there is an increasing number who do. They are "finisled up".

GERANIUMS

We have a splendid lot of good three inch pot plants ready for immediate shipment in a fine assortment of colors for winter blooming \$3.00 per 100, \$25.00 per 1,000.

As noted in the trade papers a short time ago, there is a growing demand for a greater variety of colors. We have the best assortment in the Country; our standard list of doubles and semi-doubles contains forty-five distinct and different varieties. Then we have a good list of standard single sorts; besides the newer kinds and novelties.

We are booking orders for next season's delivery at \$2.00

per 100, \$18.50 per 1,000, for two inch stock of the standard kinds.

Everybody who grows Geraniums should have our catalogue. Ask for it.

READY FOR SHIPMENT.

Alyssum, Giant and Double; Swainsonia White and Pink; Hardy English Ivy, \$2.00 per 100, \$18.50 per 1,000.

Look for Maryland and Scarlet Bedder at the Convention, then see us.

Special Offer of Astilbes and Spiræas

FOR EASTER FORCING.

In this existing European entanglement, it will be wise to secure forcing stock you can depend upon for the coming season.

We have on hand strong field-grown plants of the following Astilbes and Spiræas, which we are offering for fall shipment. All of these varieties are excellent for forcing. Speak quick as we expect they will go "like hot cakes."

Astilbe Japonica			Astilbe Lemoinei, Gerbe d' Argent. White,
" " Blondin	} White.		shaded lightly soft pink.
" " Dr. Cattie		" "	Gerbe de Neige. White.
" " H. Witte		" "	Mont Blanc. White, with
" " Lord Salisbury			slight shade of pink.
" " McKinley		" "	New Rose. Soft pink.
" " Queen of Holland		" "	Panache. White.
" " Tourbillon		" "	Plumet Neigeux. White.
" " Washington		" "	Pyramidalis. White.
" " Superba			

Note: The Lemoinei section are taller and stronger growing than the Japonica, and make ideal plants when grown under glass. Astilbe Thunbergi, white, with pink shade. Astilbe Rivularis, White. Astilbe Chinense, Pale rose.

All of the above varieties are offered at the uniform price of \$6.00 per hundred to the trade.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Bouvardias

In lifting these tropical plants save all the roots you can and spray five or six times a day for the first week but the need of that will depend largely on the weather. If they have been stopped or pinched within a week or two they will not need any more, but if that has been neglected, then pinch the strong, leading shoots as soon as they are established after lifting. They make roots in the pots or bench quicker when surroundings are warm than when chilly. Bouvardias need very careful lifting. If only one crop of flowers is wanted and always easily had for Christmas, they will do very well in 6-inch pots. But in five inches of soil on a bench at 60 degrees is much the best place for them, for after a good crop of flowers around the holidays they will make a strong growth and you will get flowers again in March and on.

Care of Smilax

Avoid careless watering of smilax, which usually leaves the surface wet, while the under soil remains dry. While smilax likes moisture it will not stand too much of it, yellow leaves and a sickly growth often resulting. An overmoist condition is likely when the beds are prepared on the ground. Water first around the ball until they begin to fill the soil with roots after which the whole bed can be soaked. Do not fail to give them a good syringing on all bright days. Give plenty of ventilation whenever possible. Provide strings just as soon as the plants are willing to climb and do not wait until they become intergrown with one another. When they are growing well give a mulch of well-rotted cow manure.

Chrysanthemums

General work in the houses now is largely routine, staking plants, tying them up, and keeping the beds sweet and free from weeds by a weekly stirring up. It pays to examine the under side of the foliage once in a while. Many a stray brood of caterpillars can be picked up in this way, and one can also see where red spider begins to get in its work. About every two weeks use a sprayer that will get right under the foliage, and wash every leaf on the under side. The top side of the foliage may be perfectly clean while on the under side there may be whole colonies of insects. Frequent and copious spraying will keep the temperature down to a reasonable point and if this is not done the plants suffer very much under torrid conditions. Clean off any suckers that may be showing round the plants, as they help to take away the strength from the flowering shoots.

Geraniums

The last week in August we have found to be a good time to take off the first batch of cuttings, in the garden or field. Three or four joints of the leading shoots make ideal cuttings. Never rob a cutting of all its foliage (as I have seen done), nor leave on too many leaves. The two youngest leaves are enough which will leave two joints without leaves, which should be cut close to the stem and not pulled off. If cuttings are taken early in August, the strong stems you cut back will make a lot of lateral growth which in early September will give an abundance of the very best of cuttings, which with cooler weather will root with ease, and these cut back plants will be in excellent order to lift and put in pots or plant on a bench for winter propagation. After the one good, thorough watering it is not easy to say when water is needed again. It will depend on how much sun they receive and on the weather, but don't water again until they are decidedly dry.

Providing Compost

Nothing impresses me more at the present moment than the great carelessness which many florists display in regard to the supply of soil for next spring and summer's crops. Many a florist gets along fairly well in his own opinion by scraping up a load of mother earth here and there and adding a large quantity of animal manure. So important is it, and so disastrous is neglect that I feel there is no more timely seasonable hint. Prepare a sufficient quantity of good soil and when spring comes, you will bless yourself. Get the top three inches of a pasture, pile it up in layers six inches in thickness and for every six inches of sod spread three inches of fresh cow manure. If that is not to be had, then short stable manure will do. Build the pile of sod with perpendicular walls and a flat top. If this is done within a few weeks, you will be able, before freezing time comes to chop it down and throw it into a long heap, which will thoroughly mix it, and render it fit to use in early spring.

Propagating Ivy Geraniums

Make up some flats with two or three inches of soil, having about an inch of crock and soil on the bottom. After the cuttings are placed in the flats give them a good soaking of water. Keep shaded for a short time. When rooted pot off into small pots using any good compost. They will do all winter in a cool house where they will have lots of light.

Mr. Farrell's next notes will be on the following: Care of Carnations; Feeding Chrysanthemums; Planting French Bells; Schizanthus Wisetonensis; Violets; Ventilating Orchids.

The Boston Convention

Although the Convention activities are still far from their finish at this writing, yet it is not too early to declare the event a great and notable success in every particular. We might say, without fear of much contradiction that it is the crowning success in the history of S. A. F. Conventions but we wish to avoid an appear-

ance of boasting and so will leave that for others not so closely identified with Boston interests to say. The management of the various local receptions and entertainments was exceptionally thorough and every detail went through without obstacle or friction. Much business of importance was transacted by the S. A. F. and the auxiliary bodies, notwithstanding the many outside diversions. It will take some time to assimilate and realize fully the lessons of this significant event in the history of American horticulture and we shall have much more to say on the subject in subsequent issues of HORTICULTURE. For now it is enough to express our gratitude and delight over the coming of such a throng of distinguished men and women to honor Boston by their presence.

Affiliation

At last after these many years of fruitless and seemingly hopeless effort and the encountering of obstacles innumerable, the great riddle of how to establish a union for mutual advantage between the Society of American Florists and Ornamental Horticulturists and the various lesser bodies with kindred purposes seems to be approaching a solution. The moulding of sentiment on all sides has progressed slowly but it is all the better that this is so. Out of the multitude of counsellors wisdom has come and now we see the gratifying result of the gradual evolution in the simple and business-like proposition which has finally received the approval of and been incorporated into the laws of the chartered national society and which, in all probability will be cordially welcomed by the other organizations vitally concerned. The principle of recognition and encouragement of the work and autonomy of the zealous special organizations which owe their incentive and example to the S. A. F. as a parent now takes its place as a fundamental principle of the interrelation of these useful bodies and brings to all concerned the benefits of a moral alliance, the value of which, time will quickly prove.

In the flower of youth

One of the most hopeful signs in the career and circumstances of any organization is a good representation of young men in its active ranks. Nobody with this thought in mind could fail to be deeply impressed by the very large proportion of young men, many just coming into manhood proudly wearing the membership button of the old but ever young S. A. F. A full share of these were from remote localities, in many cases accompanying their elders who have been good earnest workers in the organization for years. A sprinkling of grey heads through an audience is a sign of stability and dignity not to be lightly esteemed but when a society runs too strongly to maturity in this respect it is a most ominous presage of decline. The young blood is what we must have if we are to progress and maintain prestige and it is a happy augury for horticulture in America that its leading organized exponent is so well equipped in this respect. We feel sure, too, that the welfare of the good old Society, so jealously guarded and promoted by the pioneers, will be in safe hands when the virile youth of the profession as seen in Boston come to seriously take up its burdens and responsibilities.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Cool Nights

Towards the end of August the cool nights generally begin, and it is advisable to have everything in readiness to start the fires in the steam boilers on a minute's notice. It would be a poor policy indeed to shut the houses down tight to save a little coal, and if this was done the results might prove ruinous. Have the boilers all overhauled, and plenty of wood on hand so that it will not take long to get the steam up to pressure. The houses should never be allowed to drop below 64 deg. F. at night, for in spite of the cool nights the day temperature will run up over 80 with the vents up full. As long as this continues, 64 at night with plenty of air will be right. All boilers should have a graduating valve on them, so that when the steam runs up on the boiler, there will be only so much pressure on the pipes and no more. This you will find will prove very helpful in regulating the temperature for even with the best of care the steam will go up and down in the boiler. A pipe with eight pounds of steam in it will be about right now, and will also give heat enough. If the pressure is increased to forty or more, then the pipe is too hot, and the heat too intense to serve the purpose well. Where the above mentioned valve is used, the pressure on the pipes can be regulated to so many pounds and there will be no more on the pipes than the amount needs, no matter how much pressure there is in the boiler.

Sulphur

As soon as the steam is used a little sulphur can be painted on the pipes here and there; say, every ten feet paint about three foot of pipe with a thin mixture made of sulphur and water, with a little lime added. One pipe in a house twenty feet wide will be plenty for a little dose, and with the wide houses use pipes in proportion. There does not have to be any mildew in sight, but it will prove beneficial to the plants even though there is none. There should not be over eight pounds pressure in the pipes at the time the sulphur is applied, or it will be likely to evaporate too rapidly, and make the fumes in the houses too strong for the plants.

Lime

It is very important now to use a little air-slacked lime all through the houses after each watering or syringing. It should be perfectly dry, and should be blown around with a pair of bellows. There is a little trick in doing this, and it should be borne in mind when the work is being done. The object of the lime, or rather the lime dust, is to take out whatever moisture may linger around the bottom leaves at night. Lime absorbs water from the air more readily than anything that we know of, and if all the dampness is taken out from around the base of the plants, there will be little danger of the moisture condensing there and inviting blackspot to start in. Now in blowing the lime underneath the plants, make sure that too much strength is not used in handling the bellows, as that would send most of the dust right across the bench, and into the walk on the opposite side. This would do the plants very little good, and

that is why the dust should be blown only hard enough to get in under and then it will rise slowly among the plants, as the air carries it, and will accomplish what it was intended to do.

Syringing Plants

Syringing will be very important now, and growers should lose no opportunity to syringe all their rose plants. As fall advances the days will grow shorter and there will be streaks of dark weather when it will be unsafe to syringe. It is therefore advisable to make most of everything now, and have the plants as free from spider as it is possible to get them. Watch out for all the corners of the benches, around the braces, and so on. Here is where they generally start. When tying or doing anything around the plants, mark all spots where traces of spider can be found, by tying a piece of cardboard to the wire or stake right on the spot, and then when the syringing is done these places can be syringed with extra care, and the pests cleaned out.

Tying

This should receive all the care and thoroughness with which all tying should be done, for it is one of the important factors that figure in success. In tying Beauties or other roses to wires, see that the plants are well distributed, and that there are no places where the growth is bunched together or the plants mistreated otherwise. With stakes, this means the same. We would hardly call tying, a job where a string is run all around the plants and tied in one knot, holding all that there is to the plant grouped in a bunch right around the stake. This method will kill the leaves quicker than anything that we know of, and should never be employed. It takes a little more time to tie all the leading shoots separately each one by itself, but the extra labor is more than repaid by the saving of the plant's vitality, a considerable amount of which would otherwise be lost. It is not nice, or good for the plants to be allowed to lie all over, after they are well established, but they should never be bunched in tying. Tie them securely, but at the same time loosely so as to give them all the chance they are entitled to, to grow. Needless to say when tying to wires the string should be run about the wire once or twice before the shoot is tied fast. This will keep the shoots from sliding all around when they are being syringed.

Shaking the Plants

From now on it will be advisable to shake the plants well right after each syringing so that they will be sure to get dry before the night comes. Do not wait until all the houses are syringed before this is started, but have a boy start as soon as one house is done, or in the wide houses, as soon as the man with the hose gets a safe distance away, so that no water will come back on the shook plants. The plants in the back rows will need this more than the plants in the front rows, and should be done first and shook better. Needless to say the plants should not be broken with the shaking, but they should be shook firmly but gently as well.

THE BOSTON CONVENTION

A Splendid Turn-out of Professional Horticulturists of All Classes from Every Section of the Country. The Convention Garden one of the Prime Attractions. A Notable Trade Display in Mechanics Building. Inspiring Meetings and Brilliant Social Features. Entertainment and Sight Seeing Unlimited. Superb Floral Exhibition at Horticultural Hall. San Francisco Selected for 1915 Convention.

Officers Elected—President, Patrick Welch, Boston, Mass.—Vice-President, Daniel MacRorie, San Francisco, Cal.—Secretary, John Young, New York, N. Y.—Treasurer, William F. Kasting, Buffalo, N. Y.

We believe that all who were present will agree with us that the Boston Convention of the Society of American Florists was fully up to all that had been promised and all that had been expected of it. In every respect it was a splendid success and in some respects exceptional as compared with any and all of its predecessors. An unusual number of old-time prominent workers in the ranks of the Society, men whose names are familiar from the Atlantic to the Pacific were in attendance but perhaps the most manifest indication of the present virility of this big organization was shown in the great preponderance of young men and this held equally good as to the representatives from every section.

With the exception of a few "early birds," and those interested in the installing of displays in the exhibition building who arrived a few days in advance the first important party reached "the Hub" on schedule time Monday morning by steamer from Baltimore and Norfolk. This was the excursion party which Mr. Vincent, of White Marsh, Md., had been so enthusiastically working up for some time and it included about sixty from Baltimore, Washington and Pittsburgh. A local committee headed by A. P. Calder met the visitors and took charge of them for the day, a visit to historic Lexington and Concord and other places of interest in the northern suburbs of Boston. Monday afternoon and evening brought parties in increasing numbers by train and the exhibition hall and hotel corridors rapidly filled up with old friends and new extending greetings and getting their bearings generally. Tuesday morning brought the larger part of the visitors. The party by the all-water route from

New York numbered over one hundred and fifty. Nearly every state in the Union was represented—from Maine to California inclusive, as well as various parts of Canada.

OPENING CONVENTION GARDEN.

The opening gun of the Convention was fired when, at 11 A. M. Tuesday, a large concourse wended their way to the Convention Garden in the Fenway and listened to the addresses with which this big undertaking was formally opened. It was a most inspiring occasion and full of impressive suggestion as to the broadening scope and future greatness of the S. A. F. on lines scarcely indicated in the past.

James B. Shea, Deputy Park Commissioner of Boston, as Chairman of the Convention Garden Committee, presided over the exercises at the opening of the garden at noon on Tuesday. A rustic pergola had been erected, over which the emblem of Boston was unfurled. The platform was decorated with urns filled with ivy geraniums. There was a large concourse of people. In introducing Mayor Curley he said:

I am not going to recount the trials and tribulations which our committee encountered in formulating this garden. We have had, however, the active support and co-operation of the Mayor and the city government, and have had also the active help of the committee upon which I have had the honor to serve. I know that it has been the desire of everyone to have the one who is most responsible for this garden to give it an official opening, therefore, I ask His Honor to give it his sanction.

Mayor Curley said: Mr. Chairman, Ladies and Gentlemen: It is with exceeding pleasure that I welcome to

Boston this morning the Society of American Florists and Ornamental Horticulturists, and as the chief executive of this old, beautiful and historical city, I want to express to them the sincere thanks of the people of Boston for this magnificent and beautiful flowering garden, their handiwork, which I trust public sentiment will insist shall be perpetuated as a public park for all time for the City of Boston. (Applause.) I question if a more ideal location could be selected for a garden of this character, the natural surroundings, the beautiful buildings, typifying an interest in the city's welfare and an interest in the people of the city, typical of that spirit of benevolence that has ever characterized genuine Bostonians and that has made the word Boston a word to be conjured with in every great crisis in the history of the American people. It is my sincere hope that this park opened today through the public spiritedness of the Society of American Florists, will become a permanent institution of the city of Boston, a monument for all time to the generous public spirit, to the foresight of the men who constitute the membership of the Society of American Florists.

Mr. Shea next presented Chairman J. H. Dillon of the Park and Recreation Department, who most eloquently supplemented the sentiments expressed by the mayor. His remark "I want to say that I believe there is more honor due the man who plants a tree and grows it for posterity than to the millionaire who erects a marble palace" drew forth long continued applause.

President Wirth, being called upon extended hearty thanks to the city, the mayor and officials and the committee on behalf of the Society of American Florists.

After the dedicatory exercises Mayor Curley and the park officials greeted the local Convention committee chairmen and a number of other invited guests at an informal luncheon at the Parker House. J. J. Cassidy presided. Mayor Curley aroused great applause by stating that he had the assurance of a sum of at least \$50,000 from public-spirited citizens to be devoted to further beautifying that section of Boston where the Convention Garden is located, the initiative for which had been the Society of American Florists' Convention Garden example. Among the other speakers was Judge C. W. Hoitt of Nashua, N. H., who eloquently voiced the sentiments of the horticultural people against any disposal of Boston's Public Garden for business purposes. Addresses were also made by President Wirth, Chairman Dillon of the Park Commission, John Minton, Park Commissioner Charles Gibson and W. F. Kasting.

OPENING SESSION.

The opening session, scheduled for 2 P. M., Tuesday, August 18, was rather late in getting under way but, once started was a well attended and interesting meeting. On the platform, besides the Mayor of Boston, President Wirth, Vice-President Welch, Secretary Young and Treasurer Kasting were seated Ex-Presidents Hill, O'Mara, Kasting, Stewart, Norton, Gude, Vincent, Asmus, Traendly, Pierson and Farquhar, also Messrs. Peterson, Hess and Totty of the Executive Board, Park Commissioner John H. Dillon and J. J. Cassidy.

The convention was called to order by Vice-President Welch, who was given an ovation, three cheers and a tiger. He said: As vice-president of this organization and as chairman of the Boston Committee, I have the honor, and I assure you it is a great pleasure, to welcome you to Boston, the Athens of America and the "Hub of the Universe," as it is sometimes called.

Boston is the greatest convention city in the world. I say that not because we Bostonians alone think so, but because from January 1st to December 31st of every year, almost every day some great convention, such as ours, is holding its deliberations within our walls, and after a lapse of

INDIVIDUAL EXHIBITS IN CONVENTION GARDEN.

Formal Bedding by City of Boston.

a few years we find them returning once more to Boston, as you have returned after twenty-four years of absence.

Boston, as you know, was founded in 1630, ten years after the landing of the Pilgrims at Plymouth, and its narrow streets in the business section remind one very much of some of the cities of the Old World. Boston is noted for its magnificent park system and its suburbs are the finest in the world. Right in the centre of the city is a Common of 84 acres and a Public Garden of 22 acres, which was cultivated as a flower garden as early as 1837. They are the breathing places and the beauty spots of the city of Boston, and I can assure you that you all should visit them both to appreciate the forethought and generosity of the people of this great city even in the early days.

Fruit and flowers were cultivated in Plymouth Colony even from the beginning, and apple orchards, gardens and farms were plentiful in Boston until the progress of the times drove them further into the country. Many fine business blocks of today were formerly farms and gardens of our forefathers, so that horticulture has always been encouraged here, but it has especially flourished since the foundation of our Massachusetts Horticultural Society in 1829.

Boston is always willing to learn

however, and I assure you that we feel that this great gathering of horticulturists and florists, representing as they do the best brains of our profession, will develop many an idea which will be for the future benefit of the city.

The Boston Committee has worked early and late, and we hope successfully, to make this convention the greatest ever held by our society; nor have they neglected the entertainment of our guests, for we have felt that all work and no play would hardly suit the members of this Society and their friends.

The city of Boston always recognizes the importance of officially receiving its guests; and today, Ladies and Gentlemen, we have with us as Chief Magistrate of the City, a young man who during fifteen years past has served the city both as a member of the City Council, as a member of the State Legislature, as a member of Congress, and finally now as Mayor of our city. His career has always been marked by his statesmanlike sagacity and manly integrity. His talents and ability have ever been directed and devoted to his constituents and the people of Boston. The members of this Society owe him much for his kindness and generosity and the great interest he has taken in our Convention Garden in the Back Bay Fens. It now gives me great pleasure to present to you the Mayor of Boston, James M. Curley.

Hon. James M. Curley, Mayor, now addressed the Convention and was received with great applause, the assembly rising in his honor.

He spoke as follows:

Mr. President, Ladies and Gentlemen, I am exceedingly grateful to the Chairman for his very cordial and kindly introduction, and am also deeply grateful to you for your splendid reception here this afternoon. It has been a very great pleasure and privilege for me today to enjoy the opportunity of spending the greater portion of the day with the delegates visiting our beloved City of Boston. Many of you I have met personally, and some it has been my pleasure to know for a considerable length of time; and regardless of what portion of the United States you may come from, we welcome you here today in the name of Boston, as American citizens interest-

INDIVIDUAL EXHIBITS IN CONVENTION GARDEN.

Formal Planting at Entrance to Farquhar Garden.

ed in all that goes to make America a better and a more beautiful place in which to live. (Applause.) I have enjoyed for many years the friendship of the Chairman of our Boston Park Commission. He has arrived at the responsible position of Chairman of the Park Commission from an ordinary gardener in the employ of the Park Department to the responsible head of a system the annual expenditures of which exceed one million dollars, thus exemplifying how scrupulously the American people adhere to those principles that made Boston possible and made possible as well the liberty of the American people—among these principles being that of absolute equality of opportunity; and it is in that spirit of friendship, of brotherhood and of equality that I offer the welcome of Boston to you ladies and gentlemen assembled here today.

Boston is truly grateful for the members of this splendid organization, for its contribution of brains, of energy, of effort and of labor as illustrated in the Convention Garden, which I sincerely trust will continue as a permanent institution of Boston. Every American who has not had the pleasure of a visit to Boston looks forward eagerly to the time when he may come here and revel in the history and traditions of the early times which are more in evidence and more strongly characterized in Boston than any other city in America. Every American citizen looks forward to the time when he may come and see Faneuil Hall, when he may visit the Old South Church, the Old North Church; when he may look upon the scene of the Boston Massacre, where was shed the first blood in that fateful struggle that made possible the liberties of the American people and strengthened the arm of struggling humanity in its desire to achieve liberty and equality in every portion of the entire world. (Applause.) Now when the citizens of this great country come to Boston and visit Harvard University in Cambridge adjoining Boston; when the cultured and the educated come here to inspect our educational and our historic institutions, we want the pleasure, the privilege and the opportunity of showing them this Convention Garden, and we want it to be the finest and most beautiful spot of its kind in the entire world. We aim to make it such. (Applause.)

If there is anything that Boston prides itself upon it is its sense of honor, its desire and determination to keep its word with the rest of the country; and as its Chief Executive I give you my word today that with your assistance, with your advice, with your encouragement, with your ideas and in pursuance with your ideals, we will labor to make Convention Garden a permanent institution that one day, let us hope in our time, will excel in beauty and excellence the Champs d'Elysees of Paris, or any other garden spot in the entire world.

We are pleased to have you with us, but appreciating that the business of your convention will exact much of your time, I will simply say in conclusion that I trust your stay in Boston will ever remain as pleasant a memory to you as your visit here is a benediction to the oldest and the best city in the United States. (Applause.)

In introducing Past President Frank

R. Pierson to reply to the Mayor, Vice-President Welch said:

The distinguished member selected to reply to the very hospitable and cordial welcome extended by His Honor the Mayor, needs no introduction at my hands. You have known him in the past as a leader, untiring, able and efficient, qualities which he still exemplifies.

Past President Pierson, responding to the Mayor, said:

I wish that someone might have been selected for this pleasant duty who possessed greater ability as an orator than your humble servant, who is only a worker in the ranks, but who would ask that whatever he lacks in oratorical ability may be pardoned in return for his sincere feeling of grateful appreciation of the pleasing reception to the Society of American Florists by His Honor the Mayor.

I wish to thank you, Mr. Mayor, for your cordial welcome to your beautiful city. A year ago, when we were invited to hold our 30th Annual Convention in Boston, we were told that we would honor your city by accepting your invitation. I think, Sir, that we are the ones most honored by the invitation to be your guests on this occasion. And this is not our first visit to Boston; it is the third time in the history of our Society that we have been your guests, so that we well know the genuine warmth of a Boston welcome.

After an appreciative reference to the splendid occasion of the National Flower Show in Boston, the great work done by the Massachusetts Horticultural Society, the magnificent park systems surrounding Boston, the historic Boston Common and Public Garden, Mr. Pierson said: What we are intimately connected with at this particular time is your Convention Garden. Boston is to be congratulated on having a Mayor as alive as is your present Mayor to the welfare of the city and to the importance of its conservation through its magnificent park system in which he has given ample evidence that he is deeply interested. I was delighted this morning to hear him say that this Convention Garden would become a permanent institution of Boston, and I am sure that such an expression from him is equivalent to a guarantee of fulfillment. I want to say that the Society of American Florists is deeply indebted to Mayor Curley for the interest and the valuable assistance that he has felt and rendered this unique institution, our Convention Garden.

In conclusion, Mr. Mayor, I wish to thank you again for your most gracious welcome from the City of Boston, and, through you I wish to thank also the different horticultural associations—the Massachusetts Horticultural Society, the Gardeners' and Florists' Club of Boston, the Horticultural Club of Boston, and other allied horticultural interests, all of which have united in providing so lavishly for our entertainment. (Applause.)

Vice-President Welch in relinquishing the chair and turning the conduct of the regular business of the convention over to President Wirth, said:

Now, Ladies and Gentlemen, my duty as temporary chairman of this convention ceases, and I will surrender the chair to your President, a gen-

tleman who has done great missionary work for the advancement of horticulture in the section of the country where he resides; and this work he has done with a devotion and loyalty that is particularly notable and deserving of the highest commendation—your President, Mr. Theodore Wirth.

President Wirth now took the chair, and delivered his address, which follows in full:

PRESIDENT'S ADDRESS.

Ladies and Gentlemen, Members of the Society of American Florists and Ornamental Horticulturists:

Ever since you paid me the great honor of electing me to the highest office within your gift, I have anticipated this hour, not so much to harvest the honors and privileges extended to your presiding officer, as for the opportunity to express to you my deep-felt gratitude and appreciation for your kindness and good-will towards me. My home city, Minneapolis, also bids me to extend to you again its thanks for your last year's visit. The benefits of your coming to our city have been manifold to our people, and the lessons taught us through your Convention Garden have taken root and will bear fruit forever after.

Our Conventions.

I hope that your visit to the country west of the Mississippi river the second time in the history of the society, has convinced those who attended the last Convention that the great western country is well worthy of your going again. I also hope that the favorable reports about last year's Convention will convince those who did not attend that it was no mistake to go so far west,—really, the west only begins where we met last year—and if as a national society we want nation-wide recognition and progress, we must go west once in a while for the two-fold purpose of, first, to help advance the possibilities of horticultural development; and second, to share in the benefits of such development.

From the society's financial point of view, last year's venture can also be considered a success. The three highest returns to our treasury from our conventions have been—from the Convention of 1912 held in Chicago—\$3251.88, from the Convention of 1913 held in Minneapolis—\$2522.40, and from the Convention of 1911 held in Baltimore—\$2258.19. The highest gain, however, that the Society made in going west, was in the interest it created amongst our craft, and the information it gave to those who attended from the east, about our western country. Let us extend our pilgrimages to all parts of the country and become a national society from a national as well as a professional point of view.

The Past Year.

The twelve months passed since we last met have been busy ones for those entrusted with the affairs of our organization. At the Board of Directors' meeting, held here last March, every member was present, and the many important questions pertaining to the welfare and healthful growth of the Society and the many interests which it represents, were very carefully considered and conscientiously acted upon. Your standing committee have also

been faithful to their trusts and duties, as their reports will reveal to you.

Our Flower Shows.

I most earnestly believe that one of the most helpful agents in the advancement of our profession and the development of our interests is our flower shows. The great successful New York flower show of last March, held by the horticultural interests of that city, was made possible through the national flower shows held previously in Chicago, Boston and New York. We have no better means of getting next to and educating the public, our customers, to our aims, means and powers, than through such demonstrations of our skill and achievements. Those shows are the best possible advertisement of our business, and the competition and rivalry of professional skill stimulated through them is our most efficient educator and teacher. Therefore, I say, let us all support our flower shows of national and local character, to the best of our ability.

Mr. George Asmus, Chairman of the National Flower Show Committee, reports very promising prospects for the next national flower show to be held in Philadelphia in the spring of 1916, and I wish to extend to him and his co-workers the Society's thanks for their faithful and successful work, and congratulations for the progress already achieved.

School Gardens.

It is eminently proper that we should try to exercise some influence outside of our professional boundaries, or in other words, spread the gospel of gardening amongst laymen and their people. Mr. Benjamin Hammond is chairman of our School Garden Committee, and as such, has tried to reach every city and village where there is a florist, in his efforts to create and stimulate an interest in school and home gardening. If but a small number of his appeals find a responsive chord, much will have been accomplished through his efforts and activity. Mr. Hammond's enthusiasm induces me to express the wish and hope that a goodly portion of the essence of his teaching will be absorbed with profit by members of the Society under whose banner he is making his laudable campaign.

INDIVIDUAL EXHIBITS IN CONVENTION GARDEN.

Coleus Bed by A. M. Davenport.

Gardening, under one name or another, above all, means order and cleanliness, and I have often wondered why it is that so many of our commercial establishments are such striking examples of disorder, neglect and ugliness, in place of order, neatness and attractiveness. I have seen some excellent examples of well-kept, attractive commercial horticultural establishments in the vicinity of our Convention City of today, and I hope that they will bring home, to some of these in need of this reminder, the truthfulness of the saying, that "we might with profit practice ourselves what we try to teach."

Tariff and Legislation.

As I am not engaged in the commercial business of our trade, I believe you will forgive me if I admit the fact that I have given no special attention to this part of my official duties. I feel that my appointees to that important committee are able, and have taken good care of the interests entrusted to their care. Our Society never had a more efficient and faithful officer as chairman of any committee, of whom we could say with such propriety that he is the right man in the right place.

as is our friend, William F. Gude, Chairman of the Tariff and Legislation Committee and our Representative in Washington, D. C., his home town. I venture to say that he has, at all times, made all the hay he could for us while the sun was shining, and that every bit of it is under a waterproof roof.

The William R. Smith Memorial.

We should indeed do our best to erect an appropriate memorial to our beloved departed leader and friend, William Robertson Smith, to whose efforts alone is due our possession of a national charter, the only one ever granted by the United States Congress to any similar organization.

Mr. W. F. Gude, Chairman, reports that his committee is most favorably inclined to recommend that this memorial shall be in the form of a Horticultural School or Garden conducted along more practical lines than most existing institutions of similar character have so far followed. To assist in such a plan of practical education, which would surely have met with the approval of him whom we wish to honor, would indeed be the most appropriate form of tribute we could give to him and his memory.

Every horticulturist, professional and amateur, employer and employee, should willingly and readily contribute his mite towards such a worthy object. It behooves our organization to take the lead in this movement, and through united action we shall earn and receive the moral and financial support of the National Government. Many progressive and influential men outside of our profession and from all parts of the country, who are also great admirers of the man whose memory we wish to perpetuate, will gladly aid us. We cannot expect to carry out so large and far-reaching an undertaking through our own resources alone, but we not only can but must take a leading part in its launching as well as in its development. For this work we should prepare ourselves and I venture to make the following suggestions: First—That the W. R. Smith Memorial Committee be made a per-

INDIVIDUAL EXHIBITS IN CONVENTION GARDEN.

Bed of Hyacinthus candicans by A. T. Boddington.

manent standing committee, similar in appointment, service and number to the National Flower Show Committee. Second—That this committee be instructed, not only to further the financial and other interests pertaining to the creation of a memorial as outlined, but that it also formulate for its own guidance a plan of work by which it would become an acceptable advisory board to the authorities under which the W. R. Smith Memorial Garden or School of Practical Horticulture would eventually be conducted. Third—That the committee be requested to consider and report to the Society within reasonable time the possibility and advisability of creating a professorship, to begin with, at some leading horticultural school, to be endowed by our Society, whose purpose would be to inaugurate the practical methods and means of teaching we desire to have adopted at the proposed Memorial School.

That we shall get the moral and active support of our National Government in this or any other worthy undertaking, if we go about it in a right, business-like, progressive manner, I feel doubly assured by the ready assistance given us for the Rose Test Garden now established on Government land at Arlington Farms.

Our Advisory Officers From Our Different State Colleges.

I wish it distinctly understood that my suggestions in connection with the proposed W. R. Smith School are not intended to cast the least reflection upon the efficiency of any one of the many excellent state colleges which have rendered us in the past service of inestimable value in many directions. Besides the services rendered through their regular courses of study of horticulture and its branches, they have always given us willing, efficient help through the holders of our official positions of botanist, entomologist and plant pathologist. I wish to call your special attention to the suggestions offered in the communication of Professor W. E. Freeman, Plant Pathologist of the University of Minnesota. His suggestions, in the main, embody the idea that we ought to inaugurate a policy of permanent constructive work in our scientific researches entrusted to those officers. I believe he is absolutely right. This work could eventually be entrusted to the staff of the proposed W. R. Smith School, which would in itself be an assurance of the carrying out of the policies suggested by Professor Freeman.

Our Convention Gardens.

I can truthfully say that in all my professional life I have never experienced more pleasure and satisfaction than in the success of our Convention Gardens. The willing, enthusiastic and efficient work of our Boston friends, and the support given by the progressive exhibitors represented in the outdoor plant exhibit at the last and this year's Convention conclusively prove to me that I am not mistaken in placing the value of those gardens as secondary only to that of our flower shows.

Our trade exhibits are most valuable and are, to a great extent the main stay of our conventions, but I have always felt that they are a trade ex-

hibit pure and simple, interesting and instructive only to the trade itself. They show us all progress made from year to year in everything we need in our business in all its many details. Our aims, however, should go farther. We must show ourselves and the public as well, what we have achieved, and we must educate the latter through such appropriate exhibitions to make use of our labors, our knowledge and our experience to improve, beautify and better the home surroundings. We must show them how it can be done. Our mission must be to help them, and we cannot help them without helping ourselves.

I sincerely hope that the Convention Garden will become a permanent feature of our conventions, and since it is, as I believe it is, the adopted policy of our Society to select its convention cities from its own point of view of possible advancement and benefit and not from one of offered entertainment and outside attractions, I trust that the possibilities offered by cities for such a Convention Garden will always be a strong factor in deciding where the convention shall be held. I believe that the present method of financing this undertaking will, in most instances, be the most feasible one, and that under all circumstances the Society should assume full responsibility and control of it, financially and otherwise.

Affiliation.

I have studiously gone through the messages of my predecessors of the last twelve years and find that this problem has been in the mind of most of them in one form or another. My personal belief is that the different kindred associations, organized for the advancement of the specialized branches of our profession to which they are devoted, are better able to tend to those interests than any appointed committee of the National Society possibly could be.

Your Board of Directors has given this important question very careful consideration and I believe that the plan submitted through the suggested amendments to our constitution and by-laws represents the best solution of this long pending question, at least for the present. I sincerely hope that the great majority will approve the plan as presented and that the recommendation of the Board of Directors be adopted.

The main object of affiliation at this time is to establish such relative and representative connections between the National Society, kindred associations and clubs as will afford united action on questions of general importance, and this I believe the proposed amendments would bring about.

L'Union Horticole Professionnelle Internationale.

Through Mr. Leonard Barron our attention has been called to the International Association of Professional Horticulturists of Europe, organized for the purpose of protecting the interests of commercial horticulture involved in questions of tariff and other legislation, and registering and nomenclature of plants, and all other matters pertaining to the advancement and protection of all branches of Horticulture.

Your Board of Directors recommends that the S. A. F. & O. H., apply for membership in this organization, the expense of which membership at the time of consideration being \$10.00 per year, but which fee will eventually be increased. The Board feels that the Union is worthy and entitled to our support and that sooner or later we might derive benefit from such association. Each association member of the union is entitled to be represented by two delegates, and it is proposed that the S. A. F. & O. H., be represented by proxy or by such members of our Society as may be in Europe at the time the Union meets in congress, which would entail very little expense, if any, on our Society. I trust that the recommendation of the Board of Directors will meet with your approval.

State Vice-Presidents.

Some of the vice-presidents have made use of the financial aid granted them through a small appropriation to defray the expenses of a campaign in behalf of the Society. I hope that the results will prove satisfactory.

I wish to repeat Ex-President Farquhar's excellent suggestion, that our vice-presidents will be able to exercise the greatest influence by calling meetings in their respective territories and by addressing such gatherings in behalf of our Society on general topics tending to advance our aims and interests.

Our Finances.

Financially, our Society is in a flourishing condition, and under the watchful and experienced guidance of our most efficient treasurer, Mr. William F. Kasting, our treasury will grow in proportion to our numerical strength and progressive policies. We must not, however, let our prosperity lead us into untimely or, from a financial standpoint, premature undertakings which will infringe on our capital or overtax our income. We should build up our treasury, which is our working fund, and keep it intact so that eventually the income from the capital will suffice to finance our undertakings.

The Name of Our Society.

Our first president, to whom all who have known him well refer with love, profound respect and admiration, was a gardener, and as I am also a gardener I feel greatly honored and am exceedingly proud of the distinction conferred upon me in calling me to the same office which he so ably filled for the first three years of this Society's existence. Since you have shown me this confidence and your good will and friendship in such a marked degree, I am led to believe that you will bear with me if I make a suggestion which I fear will not meet with general favor, but which I know will find a responsive echo in the minds and hearts of many of our most progressive and liberal-minded members, and which I believe will sooner or later be most seriously considered and finally adopted.

Agriculture, in its broad translation, means the cultivation of the ground for the purpose of raising food for man and beast. Horticulture stands for the cultivation of a garden with three main

divisions, namely, fruit, flowers and vegetables. Every florist, worthy of the name, is a horticulturist, but every horticulturist is not a florist.

Considering the broadened interests and aims of our Society of today, and the liberal, progressive policies which it is bound to follow in the carrying out of the very plans which at the present time are its principal aims and tendencies, I am of the opinion that the present name of our society is a misnomer because we really are "The American Society of Professional Horticulturists." Ex-President Stewart, in his message of 1907, quoted Andrew Jackson Downing, who said, "Horticulture is the refined essence of agriculture, agriculture being the basis of all wealth." Brothers of our noble calling, why not make all followers of our profession feel welcome to our ranks and within them by calling ourselves what we are—Horticulturists? I hope to live to see this come about.

The Spirit of Our Convention Workers.

Wherever we go to hold our annual meetings, we meet the real workers, and Boston is not only no exception, but a notable example of what hard work and efficiency, together with harmony and unity of purpose can accomplish. Long before we leave Boston we shall all realize what our friends here have done for us for a successful Convention and for our comfort and our pleasure. We will not wait another twenty-four years before we return to "The Hub" at the foot of Bunker Hill.

In conclusion, I wish to thank my fellow officers, the Board of Directors, and the Boston workers of this Convention, for their splendid work and co-operation. The assistance given me by our Secretary, Mr. John Young, made my labors a pleasure and not a burden, and I wish to say that it would be poor business policy to dispense with the services of our present secretary and our treasurer as long as we can induce them to accept and retain their respective offices.

On motion of Past-President George Asmus, a committee of five was authorized to consider various recommendations in the president's address and report at tomorrow's session. President Wirth announced the committee a little later on in the session, viz: George Asmus, J. J. Hess, F. R. Pierson, C. E. Critchell and Adolph Farenwald.

Secretary Young read the minutes of the Executive Board, which on motion were received and made part of the record.

Secretary Young also read his financial report for the year ending December 31, 1913, and also supplemental financial report, January 1, 1914 to August 1, 1914.

SECRETARY'S REPORT.

Membership.

A general increase in the membership may be reported. The maximum membership is 2004. By this is meant the inclusion of all members who have, at the time of making this report, qualified for 1914, and those who have not resigned but have been continued on the membership roll through expectation that they will make good their obligations. In this connection I

might state that the delinquents' list is highly satisfactory in point of quality. Our life membership also shows a gratifying addition to the roll of life members. With the members in good standing, and those whose dues are accounted collectible, our total membership may be considered as 2004, of which 357 are life members and 26 pioneers, exempt from dues.

From these figures, it will be seen that our society is advancing in membership and that it is becoming more and more the representative body of the trade. It must be understood, however, that these figures are available only several days before the Convention opens. As is usual, a considerable increase in the list of new members will no doubt be observable at the Convention.

The Exhibition.

It is unfortunate that early August found our plans greatly affected through the European war, now raging. Our exhibition has suffered greatly, in that many of our exhibitors have found it necessary to cancel or reduce orders for exhibition space. Particularly has this curtailment been felt in the florists' supply department, where samples of goods ordered for the season are exhibited, goods which are produced mainly in Europe and whose delivery none of us can guarantee.

Many of our exhibitors of bulbs, too, are affected, and the improbability of the arrival of much stock ordered for distribution is reflected in the scarcity of exhibits in some of our usually well filled departments.

The following have sent in one or more names for membership since the last convention.

S. J. Goddard, 4; Florists' Telegraph Delivery, 15; E. Danker, 1; Mr. Farquhar, 1; T. B. DeForest, 1; Theo. Wirth, 4; J. J. Hess, 7; W. F. Gude, 1; A. M. Terrill, 1; P. Welch, 25; E. T. Mische, 2; H. F. Grove, 2; Geo. Morrison, 1; W. R. Nicholson, 50; P. J. Windler, 3; F. Hahman, 3; J. Mieson, 1; C. L. Baum, 1; G. E. Buxton, 1; S. A. Anderson, 3; J. F. Huss, 2.

We Have Lost Through Death

W. A. Daggett, Feb. 9, 1914; Albert Dirwanger, Nov. 3, 1913; W. H. Grimes, Oct. 5, 1913; Geo. A. Heintz, Nov. 5, 1913; Ernst W. Mack, March 13, 1914; C. M. Newman, March 13, 1914; G. R. Oliver, Sept. 25, 1913; Geo. P. Whitmore, Feb. 25, 1913; Geo. M. Garland, June 12, 1914; Thos. Mansfield, July 24, 1914.

Plant Registration.

The following plants have been registered:

No. 584, Oct. 7, 1913. Fern, Pteris Kinkii, by Henry Krinke & Son, St. Paul, Minn.
No. 585, Oct. 15, 1913. Canna, Jessica, by R. Vincent, Jr. & Sons Co., White Marsh, Md.
No. 586, Oct. 15, 1913. Canna, Benivoila, by R. Vincent, Jr. & Sons Co., White Marsh, Md.
No. 587, Oct. 15, 1913. Canna, Horatio, by R. Vincent, Jr. & Sons Co., White Marsh, Md.
No. 588, Oct. 15, 1913. Canna, LaFou, by R. Vincent, Jr. & Sons Co., White Marsh, Md.
No. 589, Oct. 15, 1913. Canna, Gonzabo, by R. Vincent, Jr. & Sons Co., White Marsh, Md.
No. 590, Oct. 15, 1913. Canna, Mercutio, by R. Vincent, Jr. & Sons Co., White Marsh, Md.
No. 591, Oct. 27, 1913. Canna, Mrs. Woodrow Wilson, by Conard & Jones Co., West Grove, Pa.
No. 592, Oct. 27, 1913. Canna, Golden Gate, by Conard & Jones Co., West Grove, Pa.

No. 593, Oct. 27, 1913. Canna, Wintzer's, by Conard & Jones Co., West Grove, Pa.
No. 594, Oct. 27, 1913. Canna, Lady Adams, by Conard & Jones Co., West Grove, Pa.
No. 595, Oct. 27, 1913. Canna, San Diego, by Conard & Jones Co., West Grove, Pa.
No. 596, Nov. 1, 1913. Rose Indica, by The Montgomery Co., Inc., Hadley, Mass.
No. 597, Nov. 8, 1913. Chrysanthemum, by Frederick Lagerstrom, Belle Haven, Greenwich, Conn.
No. 598, Nov. 8, 1913. Chrysanthemum, by Chas. L. Baum, Knoxville, Tenn.
No. 599, Nov. 26, 1913. Begonia, Florence Davenport, by Alfred M. Davenport, Waterbury, Conn.
No. 600, Dec. 2, 1913. Geranium, John G. Meyer, by F. H. DeWitt & Co., Wooster, Ohio.
No. 601, Dec. 2, 1913. Pteris, by F. H. DeWitt & Co., Wooster, Ohio.
No. 602, Dec. 17, 1913. Rose, Mrs. F. F. Thompson, by Chas. L. Baum, Knoxville, Tenn.
No. 603, Dec. 15, 1913. Rose, September Morn, by Dietrich & Turner, Montebello, Cal.
No. 604, Jan. 24, 1914. Begonia, Mellor, by Julius A. Peterson & Sons, Cincinnati, Ohio.
No. 605, Feb. 16, 1914. Nephrolepis, New York, by Geo. J. Glatras, West Hoboken, N. J.
No. 606, Mar. 14, 1914. Antirrhinum, Janesville, by Chas. Rathjen, Janesville, Ohio.
No. 607, Mar. 28, 1914. Carnation, Dr. Sam, by Chas. L. Baum, Knoxville, Tenn.
No. 608, May 8, 1914. Hybrid Orchid, Laeliocattleya Tuttleae, by Mrs. B. B. Tuttle, No. Latock, Conn.
No. 609, May 28, 1914. Geranium, General Funston, by Peter Henderson & Co., New York.
No. 610, May 23, 1914. Rose Climbing Pink American Beauty, by The United States Nursery Co., Rosacres, Miss.
No. 611, July 24, 1914. Sweet pea, Selma Swenson, by Vaughan's Seed Store, New York and Chicago.

The society bronze medal was awarded in January to S. S. Skidelsky for Carnation Philadelphia, exhibited at the annual exhibition of that society.

SUMMARY OF SECRETARY'S FINANCIAL STATEMENT

For Year Ending December 31, 1913.

RECEIPTS.

Fees and dues.....	\$ 4,198.00
Life members.....	625.00
Outdoor garden at Minneapolis..	2,326.15
Trade exhibition at Minneapolis..	3,653.20
Gate receipts, flower show.....	322.00
National Flower Show committee to general fund (refund).....	100.00
National Flower Show committee to special fund.....	1,500.72
Registration fee.....	5.00
Ladies' S. A. F. (rebate for music)	4.00
	<hr/>
	12,734.07
Interest.....	1,085.46
	<hr/>
	\$13,819.53
Total disbursements.....	\$9,350.62

Mr. Irwin Bertermann, President Florists' Telegraph Delivery, Indianapolis, Ind., stated that during the past year, 84 new members had joined the Florists' Telegraph Delivery, a certain percentage of whom were already members of the S. A. F. & O. H., but the larger proportion of whom by reason of joining the Florists' Telegraph Delivery necessarily also took out membership in the S. A. F. & O. H., which announcement was received with applause, and with thanks from the presiding officer.

Treasurer William F. Kasting, Buffalo, N. Y., submitted his report as treasurer from January 1, 1913, to January 1, 1914; also supplemental report from January 1, 1914 to August 1, 1914.

SUMMARY OF TREASURER'S SEMI-ANNUAL REPORT.

January 1st, 1914, to August 1st, 1914.

Jan. 1, Balance in Permanent Fund \$15,704.03
Receipts to Aug. 1, 1914 1,431.98

Balance Permanent Fund, Aug. 1, 1914 \$17,136.01

Jan. 1, Balance in General Fund, \$13,386.74
Receipts 3,200.00

Disbursements \$16,586.74
5,088.85

Balance General Fund, Aug. 1, 1914 \$11,497.89

Balance Special Fund, Aug. 1, 1914 \$1,558.50

Invested as follows:

Permanent Fund.

Dunkelberg Bond & Mortgage, Fort Wayne, Ind. \$5,000.00
City & Suburban Realty Co., Fort Wayne, Ind. 1,500.00
Germania Savings Bank, Pittsburgh, Pa. 711.78
Peoples' Bank, Buffalo, N. Y. 6,082.10
American Savings Bank, Buffalo, N. Y. 3,842.13
\$17,136.01

General Fund.

American Savings Bank, Buffalo, N. Y. \$4,898.87
German-American Bank, Buffalo, N. Y. 3,368.78
Peoples' Bank, Savings account, Buffalo, N. Y. 2,848.42
Peoples' Bank, Checking account, Buffalo, N. Y. 549.98
\$11,666.05
Less Checks still out - No. 360-1... 168.16
\$11,497.89

Special Fund.

Manufacturers' and Traders' National Bank, Buffalo, N. Y. \$1,558.50
Bond and Mortgage at 5% interest.
Pittsburg and Buffalo Savings Banks, 4% interest.
Peoples' Bank on Savings account, 4% interest.
Peoples' Bank on Checking account, 3% interest on quarterly balances

William F. Gude, now presented several reports, all of which were duly received and separately acted upon, as follows:

REPORT OF WASHINGTON REPRESENTATIVE.

W. F. Gude made a brief report stating that he had not been called on for much of importance during the year. He made reference to the resignation of Prof. Galloway as Assistant Secretary of Agriculture and the appointment of Geo. W. Hess as superintendent of the Botanic Garden. He also made allusion to the useful records being compiled by the office of Economic and Systematic Botany of the Bureau of Plant Industry and by the office of Horticultural and Pomological Investigations.

For the Committee on Law and Legislation he reported that with the one exception of a reference for adjustment of certain classification of freight rates, the Committee has had nothing before it. In this case, after a visit to the Interstate Commerce Commission in Washington, the matter was transferred to New York. There the Commission heard Mr. Ward of the S. A. F. Committee, and then took the matter under advisement. In the event the classification is reduced, it will make considerable difference in the service rendered, as the goods will not go forward as promptly as first-class freight.

REPORT OF COMMITTEE ON ROSE GARDENS AT ARLINGTON FARM, VA.

W. F. Gude reported for this committee that they had been actively at work co-operating with the officials of the U. S. Government, having the Rose Garden laid out and getting nearly 50 per cent of it planted and although the garden has only been in existence about four months, over three hundred varieties of roses are already growing nicely. This garden is only about ten minutes ride from the center of the city of Washington. The largest part of the work, laying out and planting the garden has been under the direction of C. L. Mulford, landscape gardener, Department of agriculture.

Three hundred and thirty-six lots of roses have been planted, including three hundred and nine varieties. Only one-half of the garden was laid off this year. This was made into twelve beds capable of accommodating eventually seventy-two varieties a bed, 12 plants of each kind. The rose garden is to be surrounded by a trellis six feet high for the training of climbing roses, provided at appropriate points with eight-foot posts and cross pieces over the adjoining walk for the more vigorous climbers and shorter posts for the pillar roses. It is planned also to have pergolas in the corners of the garden and special decorative features at the four entrances. At the most commanding point on its main walk a low mound will be raised from which to view the garden. On this an appropriate rose covered shelter is planned from which can be seen the Capitol, Washington Monument and many other notable buildings in Washington, as well as the old Lee Mansion at Arlington and the new naval radio station. Everything possible will be done to have a beautiful garden, as well as a test garden.

In addition to Mr. Mulford, Mr. Gude mentioned Robt. Pyle, Westchester, Pa., who had rendered wonderful help toward getting the Garden started, also Prof. Corbett, Dr. Van Vleet and Mr. Steubenranch, of the Department of Agriculture, all of whom rendered valuable assistance.

The committee asked that any one having roses, not yet listed in said garden, contribute such for the general good of the rosarians throughout the country.

COMMITTEE ON WM. R. SMITH MEMORIAL.

W. F. Gude reported for this committee that progress is being made in the collection of funds. The proposed removal of the Botanic Garden at Washington will have a bearing on the character of the Memorial and as soon as the new site has been decided upon it is expected that a substantial sum can be appropriated for a suitable memorial in the new garden. Mr. Gude stated that the sum in bank to date amounts to \$1396.60; pledged \$750.

President Wirth recognized Mr. R. C. Kerr, President, Texas State Florists' Association, Houston, Texas, who spoke interestingly of the rapid and enthusiastic progress being made in floriculture in his state.

William J. Stewart being recognized by the Chair, called attention to the

enforced absence of Ex-President John N. May on account of sickness and read from a personal letter by that gentleman sending greetings and kind wishes to the members. The message was received with appreciative applause, and on motion of Ex-President Hill, Secretary Young was requested to send a letter of sympathy and good wishes to Mr. May.

Irwin C. Bertermann called attention to the sad death of Mrs. E. A. Fettes, of Detroit, Mich., who lost her life while out boating Sunday and suggested that a suitable floral offering be forwarded with the sympathy of the Convention, Mrs. Fettes having been a member of the Ladies' S. A. F., and her husband a member of the S. A. F. The motion carried unanimously. President Wirth announced that the next business in order was consideration of invitations for holding 1915 Convention.

On motion of W. F. Kasting, Buffalo, N. Y., the time for balloting on the convention city was fixed at from 7 to 9 o'clock P. M.; ballots to be deposited in the Secretary's office.

SELECTION OF MEETING PLACE FOR 1915.

This item in the program, the last regular business for the afternoon session on Tuesday, was the incentive for considerable oratory, serious and humorous, participated in by D. MacRorie of San Francisco, who presented credentials and greetings from the Pacific Coast Horticultural Society and eloquently urged the California city for the next meeting place, Benj. Hammond of Beacon, N. Y., Hugo Plath of San Francisco, M. C. Ebel of Madison, N. J., E. G. Hill of Richmond, Ind., J. G. Esler of Saddle River, N. J., all advocating San Francisco; S. A. Anderson who presented an invitation from the Buffalo Florists' Club; W. F. Kasting of Buffalo, W. A. Manda of South Orange, N. J., Chas. Lenker of Freeport, N. Y., and George Asmus of Chicago, all of whom favored Buffalo for 1915. It was decided that the polls should be open for balloting, from 7 to 9 P. M., Messrs. Anderson and MacRorie being appointed tellers and J. G. Esler judge. The President's Reception was on at its height at the Copley-Plaza Hotel when the news was passed around that San Francisco was the winner by the margin of one vote.

PRESIDENT'S RECEPTION.

This important social event took place on Tuesday evening in the magnificent ball room of the Copley-Plaza Hotel and was one of the most successful affairs of the kind in the history of the Society. President and Mrs. Wirth were assisted in the receiving line by a number of present and past officials of the Society and their ladies and it took fully an hour for the long and brilliant procession to pass. Music was furnished by a band of 24 pieces and dancing was indulged in until the midnight hour.

SECOND DAY.

The session on Wednesday morning opened with a light attendance but the hall gradually filled up and a very interesting meeting ensued. The tellers reported on the balloting for next place of meeting showing the selection of San Francisco by a plurality of one vote. The announcement was received

with cheers. A telegram from the Portland, Oregon, Horticultural Society was presented by Emil Mische, State Vice-President for Oregon, giving the names of fifteen new S. A. F. members from that state. Nomination of officers was the next business. The name of Patrick Welch of Boston for President was presented in an able speech by W. F. Kasting of Buffalo, and ably seconded by Robert Craig of Philadelphia, Patrick O'Mara of New York and John H. Dillon of Boston. Charles H. Totty of Madison, N. J., was nominated by F. H. Traendly of New York in appreciative words, followed by E. G. Hill, Richmond, Ind.; M. C. Ebel, Madison, N. J.; H. A. Bunyard, New York, and R. Vincent, Jr., White Marsh, Md., as enthusiastic seconders. Unanimous nominations were made for the remaining offices—D. MacRorie of San Francisco for Vice-President, John Young for Secretary and W. F. Kasting for Treasurer.

Then came the great discussion on the proposition providing for affiliation of the S. A. F. with other horticultural bodies, national or local, on the basis as provided for in the proposed amendment to the by-laws. Adolph Farenwald, M. C. Ebel, W. R. Pierson, J. G. Esler, W. F. Kasting, George Asmus, R. C. Kerr, H. B. Howard, Patrick O'Mara and others all joined in the debate, the outcome being an unanimous vote of approval as the sentiment of the meeting.

While the discussion was under way the meeting was electrified by the appearance upon the platform of His Excellency the Governor of the State of Massachusetts. Gov. Walsh was introduced in a few well chosen words by Vice-President Welch and received an ovation, the audience rising and cheering loudly. An inspiring speech, the equal of which in eloquence and patriotic sentiment has rarely been listened to by the S. A. F. followed and frequent outbursts of prolonged applause gave testimony to its appreciation. The Governor presented the greetings of the 3,500,000 people of the Commonwealth, referring to what Massachusetts had done as a leader in industrial development, wealth and education, but more important than all in the uplift of the people and the development of a strong, vigorous manhood. Robert Craig, in response, voiced in his choicest language the thanks of the meeting for the inspiring words and after three rousing cheers had been given by the audience standing, the Governor came down from the platform and everyone present had the pleasure of a handshake.

At the afternoon session, which was brief, the paper by A. E. Thatcher on the private gardeners' interests in the S. A. F. was read by Secretary Young, Mr. Thatcher having been called away unexpectedly.

The evening of Wednesday was devoted to the Reception given by the Ladies' S. A. F. in the ball room of the Copley-Plaza Hotel. It was a very brilliant and successful event and dancing continued until nearly midnight.

During the evening Mrs. Charles E. Critchell, the retiring president, and Mrs. A. M. Herr, the treasurer, each received as a gift a cut glass electrolier. The presentations were made by Mrs. W. W. Edgar and Mrs. Charles H. Maynard.

THURSDAY MORNING—ELECTION OF OFFICERS.

The polls were opened promptly at 11 A. M. and a long line of voters was immediately formed, it being nearly one o'clock before all had voted. The only contest was for the office of president, all the other officers having unanimous nomination.

THURSDAY AFTERNOON.

The order of business for Thursday afternoon was the announcement of the result of the ballot counting and the reading of a paper on Soils by Dr. George E. Stone. Dr. Stone was delivering his address as we closed our forms. It will appear in a later issue in full. The announcement of the election of Patrick Welch for president by a majority of eighty votes was the signal for tumultuous applause and C. H. Totty at once gained the floor and moved that Mr. Welch's election be made unanimous. Here closes a canvass of more than usual interest but without a word of bitterness on either side.

At Thursday forenoon session, President Wirth appointed Robert Craig, E. G. Hill and Ole Olson as committee on final resolutions.

LADIES' SOCIETY OF AMERICAN FLORISTS.

The Ladies' Society of American Florists held their annual meeting Wednesday A. M., in the committee room of Paul Revere Hall. The attendance of over one hundred, the addition of thirty new members and the lively interest shown in all the discussions mark the rapid progress in the advance of the society, no less than the 449 members now on the rolls. But nine years ago the first thought of such an association sprung up, at Dayton, O., and materialized the next year at Philadelphia with charter membership of sixty.

The meeting of 1914 in Boston was called to order by the president, Mrs. C. E. Critchell of Cincinnati, who greeted the members with a few well chosen words. A short address of welcome was given by Mrs. W. W. Edgar of Waverly, Mass., and responded to by Mrs. J. A. Peterson of Cleveland, O. The Secretary, Mrs. Charles H. Maynard of Detroit gave a full report of the previous meeting which was accepted.

News of the death of Mrs. E. A. Fetters of Detroit, by drowning, Aug. 16th, was read and acknowledged by the rising of the members. Resolutions of sympathy were adopted to be sent to the family. A motion by Mrs. Traendly to discontinue the annual gift of \$25.00 for bowling prizes was carried. Mrs. B. Hammond Tracy made a strong plea for a larger membership in the L. S. A. F. and its advantages.

Mrs. Ellen M. Gill of Medford, Mass., was introduced as a long time member of the Massachusetts Horticultural Society, being 84 years old and still greatly interested in the work. By unanimous vote, she was made an honorary life member of the L. S. A. F. A plea was made by several members for the extension of the objects of the L. S. A. F. into business and educational lines in addition to their social work.

A motion was made and carried that the president and two others appointed by the president investigate the Robert Burns library of the late Wm. R. Smith with the idea of placing it where it could be enjoyed and kept in safety.

Twenty-five dollars was voted to the Wm. R. Smith Memorial fund. The action of the Board of Directors making life membership \$10 was approved, as was also a motion that members notify the secretary of illness and death of members and that flowers be sent by the secretary.

An address was given by Governor Walsh of Massachusetts, who announced that he addressed the ladies in the absence of a governess, which caused much amusement. It was noticed that the bachelor governor wore a boutonniere of bachelor buttons.

Election of officers was as follows: President, Mrs. Wm. F. Gude, Washington, D. C.; first vice-president, Mrs. George Asmus; second vice-president, Mrs. G. L. Grant, California; treasurer, Mrs. A. M. Herr, Lancaster, Pa.; secretary, Mrs. C. H. Maynard, Detroit.

LADIES' BOWLING.

Much enthusiasm prevailed at the bowling alleys on Wednesday afternoon. Prizes were won as follows:

In the bottle pin event, for which 13 prizes were offered, the winners finishing in the following order: Mrs. Bauer, Mrs. Shafer, Mrs. Smith, Mrs. Gosner, Mrs. Traendly, Mrs. Manda, Miss Matilda Meinhardt, Miss Cook, Mrs. Clapp and Mrs. Critchell.

Mrs. Bauer also won the 11th prize with a high single string of 176, Mrs. Gosner won the prize for the most strikes with four to her credit and Mrs. George Smith won the spare prize with seven spares.

In the candlepin contest for the highest pinfall in two strings the scoring was as follows: Mrs. Smith, 154; Mrs. Shafer, 149; Mrs. B. Meinhardt, 143; Miss L. Palmer, 135; Mrs. Asmus, 134. Mrs. Shafer won the high single with 78.

LADIES' AUTO TRIP.

The auto ride tendered to the visiting ladies by the horticultural interests of Boston, took place on Thursday. Fifty-three large touring cars were loaded up with ladies exclusively and the parade as it started away at 9.30 from the Copley-Plaza Hotel made a striking display, all the machines decorated lavishly with bright gladioli and fluttering banners of blue and gold. The route followed the North Shore to Manchester-by-the-Sea, the most beautiful stretch of shore on the Atlantic Coast. At Manchester the North Shore Horticultural Society provided luncheon for the visitors. The return to Boston was at 6 P. M.

NATIONAL ASSOCIATION OF GARDENERS.

At the executive meeting of this society held at Copley Square Hotel, it was voted to hold the next annual convention in Philadelphia during the first week of December, 1914. Report of the regular meeting of the society at Boston will appear in our next issue.

FLORISTS' HAIL ASSOCIATION.

Secretary John G. Esler's report for the year ending August 1, 1914 gave in detail the amount of insurance placed on glass in the different states and the number of hail storms and losses paid in each. The figures indicated an insurance upon 39,303,677 square feet of glass.

The total receipts for the year ending August 1, 1914, and including last year's balance, as per treasurer's report, are \$53,764.75.

The total expenditures, as per treasurer's report, for the year ending August 1, 1914, are \$26,029.95.

The cash balance on hand is \$27,734.80, of which \$1,145.76 belongs to the Reserve Fund.

The Reserve Fund now amounts to \$33,145.76, of which \$32,000.00 is invested in first class municipal bonds, and \$1,145.76 cash in hands of the treasurer.

The amount of interest collected on bank deposits for the year is \$404.90.

The amount collected on Reserve Fund investments for the year is \$1,410.00.

2100 losses have been adjusted since the organization of the F. H. A., involving a total expenditure of nearly \$300,000.00.

The number of members at date of closing is 1,609.

An equivalent of 114,056 square feet of single thick glass was broken by hail, for which the Association paid \$5,702.80; and an equivalent of 197,458 square feet of double thick glass was broken which cost the Association \$13,822.03.

The Florists' Hail Association, after passing its twenty-seventh milestone, carries a larger amount of risks, has a larger Reserve Fund, and is in a healthier condition than at any time in its past history.

The working of the recent amendments to the By-Laws has been such as to equitably distribute the burdens of insurance in such a manner that no portion of the territory covered will have reason to complain. It may be well, also, to call attention to the fact, that hazardous risks, wherever located, are paying a hazardous premium.

Those members who remained with the Association in its days of adversity can now rejoice in its present prosperity.

Treasurer Heacock's report was presented at the same time and was in accordance with the foregoing figures.

AMERICAN GLADIOLUS SOCIETY.

The meeting of this society on Wednesday was a well-attended and business-like session. The following officers were chosen: Charles F. Fairbanks, president; Henry Youell, secretary; A. E. Kunder, treasurer; Maurice Fuld, I. S. Hendrickson and T. A. Havemeyer, executive committee; Prof. A. C. Beal, A. C. Hoddis and L. M. Gage, nomenclature committee. Awards in the gladiolus display in Mechanics Building were as follows:

25 spikes Mrs. Francis King, S. E. Spencer, Woburn, Mass.; Vaughan silver medal for 25 Chicago White, C. W. Brown Ashland, Mass.; 12 spikes Black Beauty, Madison Cooper, Calumet, N. Y.; 13 spikes Golden Queen, L. E. Meader, Dover, N. H.; 12 spikes Michigan, Madison Cooper; 6 white, C. F. Fairbanks; 6 pink or shades of pink, T. A. Havemeyer; 6 yellow, T. A. Havemeyer; 6 red or shades of red, C. W. Brown; 6 any other color, T. A. Havemeyer. Collection of 10 varieties, six each, John Lewis Childs, Flowerfield, N. Y.; 25 spikes any white variety, Jacob Thumann & Sons, Rochester, N. Y.; White seedling 3 spikes, Arthur Cowee, Berlin, N. Y.; Yellow seedling, H. E. Meader; pink seedling, E. N. Fischer. Red variety never before exhibited, Arthur Cowee. Corsage bouquet, Arthur Cowee. 10 vases Gladiolus Childs named varieties, T. A. Havemeyer; 3 spikes Gladiolus Badenia, T. A. Havemeyer. Silver cup for display correctly labeled, T. A. Havemeyer. 3 spikes any white variety, amateur, Thomas Cogger; 10 varieties, 1 spike each, A. A. Rosin. Vase of yellow varieties, T. A. Havemeyer; America, Thomas Cogger; silver medal for exhibit, 3 spikes each, correctly labeled, C. F. Fairbanks; basket, Arthur Cowee; C. F. Fairbanks, 2nd.

AMERICAN ROSE SOCIETY.

The American Rose Society held a meeting in Paul Revere Hall on Thursday forenoon. After reading of the minutes of the last meeting, President W. R. Pierson delivered a very interesting address on the present and future work of the society, particularly in the establishment of test gardens and affiliation with existing amateur societies. Mr. Pyle advocated the appointment of committees of three for each rose test garden, who shall be subsidiary to one central board with power to make rules and regulations concerning the arrangement and conduct of same.

FLORISTS' TELEGRAPH DELIVERY ASSOCIATION.

The Florists' Telegraph Delivery officers of last year were re-elected except directors for three years who are H. Papworth, New Orleans, G. E. M. Stumpp, New York; O. J. Olson, St. Paul, Minn. President Bertermann's address showed a prosperous condition and over two hundred members. The secretary urged greater publicity in window displays and otherwise. Dues will be doubled for next year, those admitted this month to pay present dues. The secretary was voted five hundred dollars for clerical help next year. A letter of regret and greeting was received from Philip Breitmeyer, Detroit. General consensus of opinion was that a discount of twenty per cent. on European orders be permitted at the source.

CONVENTION NOTES.

Mrs. E. Suder, of Toledo, O., one of the active elderly ladies of the trade had the misfortune to stumble when stepping up on a curbstone and strike her chin. Though the wound was severe, she did not lose her share in the enjoyment of the convention.

Phil Foley, of Chicago, as pensive and beaming as ever, was one of the happiest of the throng in the exhibition hall. He distributed dainty little pocket mirrors among his friends, with the remark, "If your wife don't look pleasant when she sees herself in that, I'll get you another wife."

Those ladies who were not bowling enthusiasts were given an automobile trip to points of historical interest in Boston, the Old State House, the Navy Yard, Faneuil Hall, Paul Revere House, Bunker Hill Monument, etc. This ride was particularly enjoyed as most of the visitors had never seen these places before.

W. & T. SMITH COMPANY, Geneva, N. Y.

NEW YORKERS ON THE WAY TO BOSTON.

Many, many pleasant memories will live long after the Boston Convention but none of them may outlive the pleasant night given by the New York Florists' Club on board the steamer "Massachusetts" on the way to Boston. Seldom if ever were a jollier party got together on a boat, one and all imbued with jovial friendship, and the committee headed by Frank Traendly worked hard and extremely successfully, so to the end that hospitality went its natural capacity. The party consisted of nigh 250, many of whom came from distant states to join the New York party. The main dining saloon was handsomely decorated with the finest flowers New York growers had and when the members and guests were seated it was a most inspiring sight. That veteran of many occasions, Charlie Weathered, in his ever choice words introduced William Duckham as toastmaster of the evening and although at times William had some job in keeping the tide of joy within bounds, yet in his graceful style he did wonders. E. G. Hill responded to the hearty welcome and reminded those whose racial pride may naturally turn to events in Europe that they were all Americans and should so consider themselves during this Convention, winding up in a eulogy of that sterling member C. H. Totty, who he hoped would be the next president of the S. A. F. Amid vociferous demands Totty was called upon for a speech and responded by saying he was willing to serve in any capacity his friends placed him, even be it as a member of the rank and file. Robert Craig added to his classic bon-mots of wisdom in the interests of horticulture and friendship and urged that the Society should demand more recognition from the powers that be—be it state or national. Mr. Coles of Kokomo cordially invited all those present to Indianapolis during the autumn show. Frank Traendly was loudly called for and in his own concise way informed the party that he, as chairman of the transportation committee, had taken care to have on board sufficient ballast to steady the boat (and he afterwards proved it). Then the songs started with Robert Craig singing "Loch Lomond" in which all joined. John Livingston sang several old ballads, after which Robert Craig, just to show he was still able to do it, executed a catchy song and

dance. Adolph Farenwald expressed his delight at being present and Mr. Grakelow, a comparatively newcomer to many, surprised the party with his powers for recitation. A duel in story telling was well fought out between Messrs. Craig and Hill to the immense delight of all present. Mrs. Frank Traendly responded for the ladies present. It was indeed a merry party, refreshing inwardly and outwardly.

J. IVERA DONTAN.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The annual outing of the W. & F. Society was held at Edward's Rye Beach Inn, Rye, N. Y., Aug. 11th. There was a large attendance of the members and their families and friends. The trade was well represented by a goodly number of seedsmen and nurserymen. An excellent shore dinner was served. The old fashioned game of "Breaking the Flower Pot" was a feature which caused many a hearty laugh. The winners in the athletic sports were as follows:

16 lb. Hammer Throwing—1st, Thos. Aitcheson, 62 ft. 2 in.; 2nd, Wm. Whittin, 59 ft. 8 in.

Putting Shot—1st, Wm. Whittin, 33 ft. 10 in.; 2nd, Geo. Aitcheson, 32 ft.

Running Broad Jump—1st, Wm. J. Sealey, 15 ft. 3 in.; 2nd, Colin Aitcheson, 14 ft.

Standing High Jump—1st, Wm. Whittin, 4 ft. 1 in.; 2nd, J. B. Roy, 4 ft.

100 Yards Dash—1st, Wm. J. Sealey; 2nd, Wm. Whittin.

Boys' Race, under 16 years—1st, Fred'k Henderson; 2nd, Walter Foster.

Fat Men's Race—1st, Chas. Adecock; 2nd, Mr. Earnshaw.

Men's Race, over 50 years old—1st, Alfred Nichols; 2nd, John Henderson.

Ladies' Race—1st, Mrs. Olsen; 2nd, Miss Wood.

Girls' Race, under 10 years—1st, Agnes Aitcheson; 2nd, Catherine Tindigan.

Ladies' Foot Ball Kick—1st, Mrs. Whittin, 49 ft. 2 in.; 2nd, Mrs. Olsen, 46 ft. 8 in.

Aunt Sally Contest for Ladies—1st, Mrs. Lough.

Match Game of Quilts—Fairfield Co., 21 points; West Chester Co., 19 points.

Foot Ball and Base Ball games were called on account of rain.

THE TRADE EXHIBITION

Following is a complete list of all the exhibits in the trade exhibition in Mechanics Building:

Benjamin Hammond, Beacon, N. Y. A very complete assortment of his specialties, insecticides, greenhouse paints and putty. In charge of Walter Mott.

New England Entomological Society, Jamaica Plain, Mass. Beautiful display of preserved butterflies for use in floral work. A very attractive exhibit.

Department of Floriculture, Massachusetts Agricultural College. A collection of floricultural and other literature issued by the Massachusetts Agricultural College. Exhibit in charge of Prof. Nehrling.

H. F. Mitchell Company, Philadelphia. Desk and literature of the Mitchell Seed House.

L. B. Brague & Son, Hinsdale, Mass. Green goods.

C. S. Ford, Philadelphia, Pa. Florists' supplies, letters, etc.

S. A. Anderson, Buffalo. Lorraine begonias.

J. G. Harrison & Sons, Berlin, Md. Samples of conifers.

Skinner Irrigation Company, Troy, O. Irrigation Specialties.

Taylor Steam Specialty Company, Battle Creek, Mich. Exhibit of their water circulator device in operation.

Kroeschell Brothers Company, Chicago, Ill. This exhibit weighs 30,000 lbs., and consists of one No. 7 Kroeschell boiler, sold to Peter Murray, Fairhaven, Mass., and one No. 9 boiler, sold to H. S. Wolcott, Concord, Mass. Also Kroeschell 2 in. threaded piping system and Kroeschell threaded tube piping system. Boilers set on concrete foundations ready for operation, cross connected, so that either one or the other boiler can operate the entire plant. Rest room fitted up for the ladies. Fred Lautenschlager in charge.

Advance Company, Richmond, Ind. Bench of fittings and a ventilating apparatus, all nickel plated. In charge of James E. Jones and son.

Hitchings & Company, Elizabeth, N. J. Model of house showing the side details of full iron frame house and different types of sash operating apparatus. Heavy cast iron base used for either side posts or angle iron columns. Tell-tale device shown for the first time, which shows the amount of opening the roof sash have in inches. Square sectional cast iron boiler and photographs of different houses constructed by this firm.

John C. Meyer & Co., Lowell, Mass. Exhibit of Silkline.

Revere Rubber Company, Chelsea, Mass. Revere hose.

Joseph Breck & Sons, Boston, Mass. Desk and samples of various specialties.

J. C. Mounger Company, Chicago, Ill. No. 237 steam boiler, completely fitted; half section of iron frame house showing detail. Half detail section of pipe frame house showing new bolted clamp fittings. All kinds of heating fittings, wood gutters, eave plates and sundries. Water color sketch of the W. H. Gullett range of 24 houses, each 60 x 500 ft. Ingenious paper model of iron frame house showing steel work, benches, etc. Useful souvenirs in the form of pencils for the men and powder books for the ladies, presented all visitors. A. Hammarstrom, of the New York Office, in charge, assisted by N. J. Rupp.

Welch Brothers Company, Boston, Mass. Extensive display of baskets, ribbons and miscellaneous florists' supplies.

King Construction Company, North Tonawanda, N. Y., section of King greenhouse.

M. Rice Company, Philadelphia, Pa. Desk and ribbon samples.

S. S. Penlock-Mechan Company, Philadelphia, Pa. Elaborate and beautiful exhibit of florists' ribbons and other dainty supplies for retail florists; also ferns, pandanus and other standard florists' plants.

Williams' Book Store, Boston, Mass. Nature books.

A. T. Storrs Lumber Company, Boston, Mass. Complete greenhouse structure equipped with Evans' challenge ventilating apparatus.

A. A. Arnold Paper Box Company, Chicago, Ill. Folding flower boxes.

Wertheimer Brothers Company, New York, N. Y. Florists' ribbons.

Lord & Burnham Company, New York, N. Y. Handsomely decorated booth, with photographs and water color sketches of

greenhouse structures erected by that company.

Crowl Fern Company, Millington, Mass. Exhibit of laurel roping, ferns and other florists' green goods.

James Vick's Sons, Rochester, N. Y. Superb display of gladioli in which Rochester White showed up in most wonderful effect; asters and Vick's Ruffled Giant Petunias; a most superb strain.

Detroit Flower Pot Company, Detroit, Mich. Samples of standard flower pots.

Lager & Hurrell, Summit, N. J. Newly imported orchids, also blooming samples.

George L. Stillman, Westery, R. I. Display of named dahlias.

R. M. Ward & Co., New York, N. Y. Desk and samples of lily bulbs.

H. Bayersdorfer & Co., Philadelphia, Pa. Large collection of photographs of florists' material.

Robert Craig Company, Philadelphia, Pa. One of the finest plant displays ever presented at a trade exhibit, including many seedling crotons shown here for the first time, dracaenas, ferns, Lorraine begonias and cyclamens.

Lion & Company, New York, N. Y. Ribbons and chiffons.

H. M. Robinson Company, Boston, Mass. Large exhibit of florists' supplies.

Florists' Telegraph Delivery Association, Detroit, Mich. Booth and information bureau. In charge of Albert Poehelon.

F. R. Pierson Company, Tarrytown, N. Y. Grand exhibit of specimen nephrolepis in the many varieties which are specialties with this house.

Penn. the Florist, Boston, Mass. Booth showing some of the special advertisements which this enterprising florist has made use of during the past year. Also exploiting telegraph work such as supplying weddings, funerals and providing bon voyage baskets.

Schloss Bros., New York, N. Y. New headed corsage novelty shown for the first time, receiving honorable mention. Also silver and gold ribbons for basket and corsage trimming, new line of fancy figured ribbons, new lace chiffons in rainbow and ombre colorings.

MacRorie-McLaren Company, San Francisco, Calif. Phalaenopsis.

Arthur Cowee, Berlin, N. Y. Gorgeous display of gladioli, producing a most brilliant and elaborate effect and contributing largely to the attractiveness of the hall.

Brookland Gardens, Woburn, Mass. A very beautiful collection of gladiolus novelties of the highest quality.

John Lewis Childs, Flowerfield, N. Y. Extensive collection of gladiolus blooms, showing some very fine blooms of Childs type.

R. Vincent, Jr. & Sons Co., White Marsh, Md. Large table of the new bedding geranium, My Maryland.

W. A. Manda, South Orange, N. J. Very extensive and varied collection of stove and greenhouse plants, including many beautiful novelties introduced by this house. In charge of R. Karlstrom.

Vaughan's Seed Store, Chicago, Ill. Large booth of French and Dutch bulbs, gladioli and lily bulbs.

Peters & Reed Pottery Company, South Zanesville, Ohio. Display of Moss Aztec pottery.

Fottler, Fiske, Rawson Company, Boston, Mass. Desk and display of freesias, gladioli and violas.

Poehlmann Bros. Co., Chicago, Ill. Collection of florists' supplies in variety.

McNeff-Swenson Company, Chicago, Ill. Floral publicity literature.

Teare & Black Company, Cleveland, O. Capitol Plant Food.

Foley Mfg. Company, Chicago, Ill. Samples of greenhouse building material and sash bars.

Jackson & Perkins Company, Newark, N. Y. Pot-grown lilacs, etc.

Henry A. Dreer, Inc., Philadelphia, Pa. As usual a display of fine healthy palms of the popular florists' varieties, also crotons, variegated pineapples, dracaenas, araucarias and dish ferns.

Williams Florist, Utica, N. Y., electrical welded wire designs.

Storrs & Harrison Company, Painesville, O. Exhibit of useful commercial florists foliage plants, also sample plants of forcing roses.

E. Allan Peirce, Waltham, Mass. The well known paper flower pots introduced by E. Allan Peirce.

Knight & Struck Co., New York, N. Y. Collection of ericas and other hard-wooded greenhouse stock.

J. A. Peterson & Sons, Cincinnati, O. Specimen Dracaenas Victoria, bird's nest ferns and Adiantum Farleyense.

Bon Arbor Chemical Company, Paterson, N. J. Samples of plant food, worm eradicator and other insecticides.

Aphine Mfg. Company, Madison, N. J. A very interesting exhibit of the many insecticides and fungicides manufactured by this company.

Charles D. Ball, Holmesburg, Pa. Display of well grown kentias.

Jos. Heacock Company, Wyncote, Pa. Specimen kentias and Cibotium Scheidti.

Estate of Lemuel Ball, Wyomissing, Pa. Palms and decorative plants.

A. H. Hews & Co., North Cambridge, Mass. A very extensive display of standard flower pots, vases, jardinières and other pans. In charge of Thomas Benwell and L. D. Bryant.

C. Keur & Sons, Hillegom, Holland. Very complete collection of Holland bulbs, freesias, etc.; also coleibicums.

A. Lenth & Co., Roslindale, Mass. Group of healthy kentias and dracaenas and other decorative foliage plants.

R. & J. Farquhar & Co., Boston, Mass. Table of high grade Dutch bulbs.

Thomas Roland, Nahant, Mass. Well arranged display of crotons, araucarias, hard-wooded plants in variety, Lorraine begonias, etc.

Carl Hagenburger Co., West Mentor, O. New fern Nephrolepis Mentori, a very pretty variation from the standard types, having some of the characteristics of the original Fosteri.

Wm. Plumb, superintendent of floriculture at the Panama-Pacific Exhibition, photographs and literature concerning Panama-Pacific Exposition.

The display of gladioli in the amateur section was a most beautiful feature, including new and improved named varieties of exceptional merit.

The floral exhibit of the American gladiolus Society formed a very attractive display and was a prime center of interest for the visitors. A list of the exhibits and awards will appear in the regular report of that society.

EXHIBITION AT HORTICULTURAL HALL.

A rare courtesy which was greatly appreciated by the Convention visitors as well as by the home people was the magnificent free floral exhibition given by the Massachusetts Horticultural Society in compliment to the Society of American Florists. All three halls in Horticultural Building were filled to repletion. The exhibition lasted from Tuesday until Thursday night. More about it next week.

PERSONAL.

John N. May, Summit, N. J., is now able to be about and last Thursday, with the aid of crutches was able to walk to the office for the first time in three months, the first six weeks of which he was confined to his bedroom. His trouble is phlebitis. In a cordial letter to the editor of HORTICULTURE he expresses his great regret at not being able to get to the Boston Convention and meet the many old friends congregated there.

In our notes on the gladiolus exhibition at Boston last week, the award of honorable mention to C. W. Brown of Ashland, Mass., for the new Kunderd gladiolus Mrs. O. W. Halliday was inadvertently omitted. This is a fine pink flower with cream throat.

C. C. MORSE & CO.

San Francisco, Cal.

NEW SWEET PEA

MARGARET ATLEE

THE SPENCER SUPREME

The largest and finest Sweet Pea yet introduced.

First Prize American Sweet Pea Society.
Silver Medal, National Sweet Pea Society
of Great Britain, London, July, 1914.

MARGARET ATLEE

Life Size as Grown by Ordinary Culture

MARGARET ATLEE is a rosy-salmon pink on a creamy buff ground; a rich, soft color, and extremely attractive, both as individual flowers and in the bunch. The standard is large and wavy and inclined to double under favorable conditions. The wings are equally large, wavy and well set. It runs almost uniformly four blossoms to the stem; well poised and graceful. In all respects, it is the grandest Sweet Pea we have ever grown, either from foreign introductions or American varieties.

MARGARET ATLEE has finally yielded us sufficient seed to warrant our adopting a unique method of exploiting it. We are confident that America does not half appreciate real SPENCER SWEET PEAS, and we propose to use **MARGARET ATLEE** as a missionary in the hope that it will invade every home garden where Sweet Peas can be grown.

MARGARET ATLEE was introduced in 1912, but a short crop that year and the year following prevented our offering it to the Trade, and it has not yet appeared in our Contract Lists.

Messrs. Lowe & Shawyer, the largest flower growers in Great Britain, simply insisted on having some of it last season and we let them have a pound out of our planting stock, to be used for growing cut flowers for the Covent Garden Market. They had a packet of it the year previous and considered it the very finest thing they had ever seen in Sweet Peas. With them it is a leader as a florist flower.

Ever so many people who have seen bouquets of Margaret Atlee have exclaimed, "Are those really Sweet Peas?"

Under ordinary culture they are delicate and refined to a degree. Under special culture for exhibition flowers they produce unusually large thick petals and enormous stems and leaves. It is not uncommon to see stems 22 inches long, $\frac{1}{4}$ inch thick and leaves $5\frac{1}{2}$ inches across.

MARGARET ATLEE will be put up in inside white packets, 2 x $3\frac{1}{2}$ inches, simply printed thus:

SWEET PEA

MARGARET ATLEE

There will also be an outside packet in salmon pink, 27 x $4\frac{1}{2}$ inches, printed thus:

10 Seeds

SWEET PEA

MARGARET ATLEE

New Giant Flowered Spencer.

Rich rosy salmon-pink on creamy buff. Immense wavy standard, inclined to double. Large wavy wings.

25 Cents

These outside packets can be left off if required or they can be supplied empty so that the dealer's name may be printed at the bottom.

PRICES net to the Seed Trade: —

\$3.50 for 25 pkts.

12.50 per 100, up to 500 pkts.

10.00 per 100 for 500 pkts. and over.

NOTE—The name was chosen as an appreciation to Mr. Burpee,—Mrs. Margaret Atlee being his aunt.

We are issuing a circular offering several other Sweet Pea Novelties and will mail it to the Trade in a few days.

Rochester, N. Y.

Boddington's Gigantic Pansies

Can be produced only from the giant strains. Our **CHALLENGE PANSY** seed contains only the giant self-colors, the giant striped and variegated and the giant blotched, etc., all carefully mixed in proportion. You could not get a better seed if you paid \$100 per ounce. Our Challenge Pansy seed during the past season gave unprecedented satisfaction, and every order booked last year was duplicated and increased this year. All the testimonials received mentioned specially the high grade of flowers—color, form and size of the individual blossoms. This year, by adding improved types, intending customers can absolutely rely on a duplication of this season's success with increased satisfaction. Our "mark" for this strain is "Challenge," and it is all the word denotes.

Pansy—Boddington's "Challenge"—All Giants

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said: "Why don't you call it Defiance?"

½ trade pkt. 25 cts., trade pkt. 50 cts., ¼ oz. 75 cts.,
¼ oz. \$1.50. ½ oz., \$2.75, oz. \$5.00.

1914 NOVELTY PANSY SIM'S GOLD MEDAL MIXTURE

Was awarded the First Prize and Gold Medal at the International Horticultural Exhibition, held at the Grand Central Palace, New York City, April, 1913. This splendid mixture is the result of years of painstaking selecting on the part of Mr. William Sim (renowned for Sweet Peas), Cliftondale, Mass., and we are offering seed from the originator for the first time. Trade pkt. 75 cts., 3 pkts. for \$2.00. ¼ oz. \$3.50.

Boddington's Quality "English" Pansy

A superb strain of highly-colored flowers in great variety and immense size.

Our Mr. Bunyard, while visiting the Royal International Exhibition in London, was much impressed with these blooms, and strongly recommends this mixture to florists.

Trade pkt. (500 seeds), \$1.00; ½ trade pkt. (250 seeds), 50c.
¼ oz., \$2.25; ½ oz., \$4.25; oz., \$8.00.

"THESE PRICES ARE FOR THE TRADE ONLY"

Arthur T. Boddington, Seedsman

342 West 14th Street, NEW YORK

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers.—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. M. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Effect of War on Seed Trade.

We assume that the trade in general has considered the probable effects of the European war on their business. It may be accepted at once that they will get nothing from Germany or Austria-Hungary, not only during the continuance of the war, but for a long time after, as the demoralization of all business systems, and the practical annihilation of the German merchant marine will prevent the exportation or importation of anything but foodstuffs, and for which the few ships escaping capture or destruction will be urgently needed. What we shall get from Great Britain, France, Denmark and Holland is problematical. Until the seas are cleared of hostile cruisers, commerce will be restricted to bare necessities, and the need of many ships as transports, and conversion of many of the largest lines into cruisers or commerce destroyers does not augur well for the seedsmen getting delivery of their contracts from any of the European countries. This will be most keenly felt in the line of small seeds, particularly in radishes and biennials, and flower seeds, for excepting sweet peas, Europe furnishes seventy-five to ninety per cent of the flower seeds used in the United States. It is generally known that many of our seedsmen have placed large orders for garden peas with German and British firms, including New Zealand. The high cost of producing peas in Montana, Idaho and other Northwestern states, and the lowering of the duty, has enabled our German and British friends to underbid American growers, thus securing a considerable volume of business. It looks now as if those who are depending on foreign contracts would do well to face the situation as it is, and at least secure a part of their requirements before what seems now like an inevitable advance in prices occurs.

It seems unlikely that such a serious situation can have escaped the attention of the officers and directors of the Wholesale Seedsmen's League, and an early meeting to take suitable action in the matter is not improbable. A general advance on nearly all lines seems inevitable, and we learn that wholesalers are rather chary about quoting on large quantities, and two sets of quotations which we have been permitted to see within ten days from two of the leading wholesale houses,

show advances of 50 to 100 per cent. over the prices of last season.

Bean, Pea and Corn Crops.

The condition of bean crops in Western New York and Michigan was very serious a week or ten days ago, the result of many days of intense heat and drought, but some rain which fell over the bean-growing sections within the past few days has greatly relieved the situation, although there is no question but that bean crops have been irretrievably damaged, and that yields will fall far below last spring's estimates. It also is certain that peas will not give us the bumper yields of a year ago, and the market is growing stronger every day. This is especially true of the long pod and fancy early varieties. We advise anyone who has to buy, to get busy, and buy at any quotations made, as today's prices will look low in sixty or ninety days, and we believe this will apply to most items in seeds. Speaking of crops, we must not overlook corn. The prolonged drought has caused permanent damage, but further injury has temporarily at least been arrested by recent rains. With favorable weather conditions from now until maturity, the damage will not prove serious.

Next Cannery Convention.

Some weeks ago we stated that New York City had been selected as the place for holding the next convention of the National Cannery Association and allied industries. Last week contracts were closed. Grand Central Palace will house the exhibits of the Canning Machinery and Supplies Association, and Hotel Astor has been chosen as official headquarters. We understand that the management of the Astor has promised the convention a minimum of four hundred rooms. Those desiring rooms at the headquarters should act quickly, as they will not last long. The probable date of the convention will be the week beginning February 7th.

Washington, D. C.—President Wilson has submitted to the Senate the name of Carl Schurz Vrooman, of Bloomington, Ill., as the successor to Dr. Beverly T. Galloway as Assistant Secretary of Agriculture. Mr. Vrooman was born October 25, 1872, in Macon, Mo., and his early education was obtained in the middle west. He attended Washburn College in Topeka, Kan., going from there to Harvard where he was a student from 1891 to 1894 and attained considerable prestige as a member of the debating club which met a similar club from Yale University in 1893. Mr. Vrooman sprang into national prominence following the year 1894 by his able articles on political and economic questions. He is the author of "Taming the Trusts," and "American Railway Problems," and others of his articles found their way into the magazines. At about this time he went abroad for the purpose of investigating and writing upon conditions in Europe. During the years 1898 to 1900, he was a regent of the Kansas State Agricultural College. At present he is engaged in scientific farming on more than two thousand acres of land in central Illinois and Iowa.

"FULL MANY A FLOWER."

Aunt Lindy had brought around her three grandchildren for her mistress to see. The three little darkies, in calico smocks, stood squirming in line while Lindy proudly surveyed them.

"What are their names, Lindy?" her mistress asked.

"Dey's name' after flowers, ma'am. Ah name' 'em. De bigges' one's name' Gladiola. De nex' one, she name' Heliotrope."

"Those are very pretty," her mistress said. "What is the littlest one named?"

"She name' Artuhficial, ma'am."

Of Interest to Retail Florists

A STORE MAN'S VIEWS OF THE CUT FLOWER SITUATION.

By John C. Gracey, President, Retail
Florists' Association of Philadelphia.

What should be done to move the vast quantities of cut flowers that are being grown in late years with the continual increase of greenhouses?

The business will have to be placed on a more modern basis. I believe it is up to the grower and the commission man to do it. What I wish to condemn is their method of packing cut flowers and the number of flowers to the box. There are often 500 to 1000 of each variety to a box, and on account of this large number a store will not take a straight box as they arrive. Today they arrive with some attempt at grading, each grower having his own ideas and placed in the box by the handfulls, sometimes 50 at a time with paper separating them.

What should be done is to pack the roses, carnations, asters, dahlias and similar flowers so many to the box, I should say 200, or if they are extra choice 100, to adopt a more standard grade and place them in rows in the box. I have seen roses arranged that way twenty years ago and I know it helped the sale, especially after the bad petals had been removed. There can be no question that careful packing is a great aid to the sale.

I believe the best way of packing would be to use slat crates that will hold 10 to 20 boxes and sell the boxes direct to the storemen without re-handling them. Take as an illustration the dahlia situation in Philadelphia today. Inside of one hour from the time they arrive they are generally all sold. The reason is because they are packed so many to the box and plainly marked with number and variety, generally about 250 to the box. You know who the grower is, your order is placed in advance because you know what you are getting. The storeman can buy all the dahlias he wants in five minutes or less. The commission man makes one delivery a day with dahlias. Mr. Grower, you can hardly realize when I say the commission man will make from five to fifteen deliveries a day on other flowers. If other flowers were packed similar to dahlias I see no reason why more storemen would not visit the commission houses in the morning, as that is the only way to buy flowers—see what you are getting—and I believe all sales would be over by one P. M.

Now, as to the prices asked, that must be modernized. Take carnations, for instance, \$1.00, \$1.50, \$2.00, \$3.00 and so on up per 100. The jump is too great. The store man jumps his prices the same way. The result is more careful buying; the same with the retail customer. If

FLORAL TRIBUTES.

Sent to Funeral of Mrs. Wilson By House of Representatives and Citizens of Knoxville, Tenn.

oranges, peaches, tomatoes and other perishable goods were sold as cut flowers are with such jumps in prices, the wholesale business in these lines would not be done in the same number of hours it is. Why not raise the price from 5 per cent. to 10 per cent. The storeman if he wants to be successful would do the same, which would create a continuous demand for our goods.

Mr. Grower, you are the main loser by your methods; the commission man is a loser due to the unsalable condition of your goods, rehandling which means bruising; extra help; extra deliveries. By the end of the week I do not believe the garbage man would receive so many flowers. The storeman wastes a great deal of his valuable time in a commission house waiting for the goods to be assorted before he can be waited on. Mr. Grower, just pay your commission man a visit during the dahlia season and see the difference it makes

for everybody, and I believe you will agree with what I say, "we are all losing by our present method."

A great many storemen do not visit the commission houses and, therefore, do not know what condition the market is in, or what quality of stock they can get and I believe it would certainly be to the advantage of the storeman to see what is in the market daily and to buy in such quantities that the above suggested method of packing stock can be carried out.

As a few final remarks, a great many will say it cannot be done. You all know you are doing things today you would not have thought of doing 20 years ago. I believe we are 20 years behind the times with our present system of selling goods, depending entirely on the demand and regulating prices accordingly. Let us create a continual demand, not letting exorbitant prices continually check our growth, but make our goods a necessity.

WASHINGTON NOTES.

Although it had been planned to conduct the funeral of Mrs. Wilson, wife of the President, and first lady of the land, along most simple lines, friends to perhaps the number of three hundred expressed their sympathy for the President through the medium of what proved to be the handsomest floral tributes ever seen in the National Capital, and the florists of this city alone produced upwards of one hundred and fifty designs, many of which were worthy of more than passing mention.

The largest number of designs were furnished by J. H. Small & Sons, although others of the local florists came in for a large share of the business.

Gude Bros. Company furnished upwards of thirty pieces, including the one for the United States House of Representatives which we illustrate herewith and which was said to have been one of the largest wreaths made in this city. It was of cattleyas, lily of the valley, white asters and American Beauty roses with a large base of American Beauty, asters and lilies.

Several large wreaths were furnished by William Marche & Company. O. A. C. Oehmler, the DuPont Flower Shop, Fred H. Kramer, and others of the local florists, furnished a half-dozen or more designs each. The florists began sending in their work to the White House as early as Friday night and so great was the rush that the attaches were forced to call a halt. It is said that more than fifty pieces had to be discarded on Monday before the funeral services because of the

wilting of the flowers due to the intense heat. When informed of conditions the florists discontinued the sending of the wreaths, sprays, etc., and those which they had already made up were stored in their ice boxes and the others held over until late Sunday night or early Monday morning. It is also said that no greater display of flowers was ever made here, regardless of the occasion, and special provisions had to be made on the train which bore the body and the mourners to Rome, Ga., where interment took place.

A CORRECTION.

In a note in our issue of July 25, we listed C. C. Wagoner & Bro. as located at Louisville, Ky. This was incorrect as the proper address of this firm is 217 Second avenue, North, Nashville, Tenn.

FOUND AT LAST.

In many of our northern states, reaching from Massachusetts to Nebraska, it is often hard to find flowers suitable for Decoration Day. Wherever they can be had, peonies are in great demand; unfortunately they are very scarce that day. For ten years in succession we would have only hundreds the last of May, and thousands only a day or two after. LaEsperence (*Edulis Superba* really) would often be on hand. This is a beautiful fragrant pink; we could not always rely on this however. After testing hundreds of varieties for a good many years, we have found that *Umbellata Rosea* completely fills the bill and all along this range of northern states can be depended on. It is beautiful rose, sweet and winsome. It is somewhat rare and as soon as its characteristics and earliness are found out, there must be a large call for it. It is a free bloomer and a good multiplier, so that if the price is a little high it will soon make good.

C. S. HARRISON

York, Neb.

Lacrosse, Wis.—Anna Guillaume, a florist, has started suit against the Wisconsin Light and Power Company for \$925. She alleges in her complaint that a gas service main under the hot house in Sixth street was shut off Feb. 28, 1913, and that in repairing it, the workmen allowed noxious fumes to circulate in the greenhouse, causing the death of plants valued at \$750.

Flower Market Reports

BOSTON While the market has been flooded this week both with convention visitors and an abundant supply of flowers business shows little improvement over last week and market conditions are away behind the corresponding week of last year. The new crop of carnations has made its appearance and while flowers are of a good quality stems are short and it has little if any commercial value. The same may be said of roses but judging from present indications both give promise of an excellent crop later. Easter lilies are of fine quality and are worth much more than they are bringing at the present time. Lily of the valley are plentiful and the quality is excellent.

There was very little business the past week; in fact it was a dull one. The market is well supplied on quite everything and sales are much disappointing. Speculative buying was out of the question and no large amount of anything could be disposed of no matter how cheap. This applies to gladioli which were had in large abundance. There are enough of the poor quality of asters and not enough fancy. The late varieties have not come in as yet though next week they are looked for. There are too many lilies and too many poor roses. The best pink roses are Marylands and the best white are the Double White Killarney. Beauties are good though sales are also slow. There is plenty of everything to supply the light demand during these summer days. A reaction cannot come too soon.

CHICAGO Warm weather, a heavy supply and very slow demand. Business drags along in a listless way. The latter part of last week, however when the weather turned cool, trade began to pick up with the result that by Saturday night the market was cleaned up in much better shape than has been the case for weeks. Prices remain practically the same as last week, but quotations as listed have ruled quite firm. Roses, though still plentiful, have ceased to be a glut. The quality in most items has improved. Killarney both pink and white may be had in all length up to thirty-inch stem; the longer length, however, is limited. In novelties the list is growing. The latest addition is Ophelia and Prince d' Arenberg. Mrs. Russell is still the leading summer rose. Mrs. George Sawyer is improving daily and is now offered in various grades up to twenty-four-inch length of stem. Sunburst and Bulgaria are both in good supply and enjoy a good demand, and so does My Maryland. Beauties are still quite plentiful with prices rather low, considering quality. However the demand is about equal to the supply, and accumulations are not serious. The glut of the early asters is past; recent heavy rains have rendered most of the remaining crop worthless. Of the late or mid-season varieties there is little in evidence yet. Most of the offerings in good asters are those grown under glass, although a few very fine field-grown

GLADIOLI

Due to the good rains we had in July our Gladiolus growers are cutting the finest spikes of this **grand summer flower** that we have ever received. For any purpose they are among the best flower you can use.

Best varieties \$2.00, \$3.00, and \$4.00 per 100. **Special** 500 lots, \$7.50.

CHRYSANTHEMUMS

A few of the early yellow. Good Quality. \$2.00 per dozen.

blooms may be had. Gladioli are less plentiful and meet with somewhat better demand. Lilies are still in large supply and demand quite active. In lily of the valley offerings are not large and prices hold stiff. Carnations from new crop under glass are now coming in with very good blooms and fair length of stem. Field-grown stock is more or less damaged by heavy rains.

CINCINNATI Business has been rather slow and judging from present market business this week will follow in the footsteps of last week. A good many of the gladioli offered now are the best we have had this year. They bring, however, a very poor price. The poorer grades have practically no market at all. More large asters are received than came in a week ago and they have a fair market. The rose supply continues large in every variety and still meet with the same slow call. Lilies are plentiful and fine. The first cosmos made its appearance last week.

The local market has **ST. LOUIS** about anything the season offers, the bulk being of excellent quality but too much of it is coming in for the demand which seems to be lighter than in any summer known. Prices are low on all stock. Roses are more plentiful than any other flower at present. These are followed by gladioli and asters, of which the market has many more than the wholesalers can handle. Outside of these not much of anything is coming in. Lilies are fine and single tube roses are commencing to come along.

BOSTON CO-OPERATIVE FLOWER MARKET.

The eleventh annual sale of choice of stalls in this market is announced for Saturday, September 5, at the headquarters, 260 Devonshire street, Boston. As usual, W. W. Tailby will "wield the hammer."

est in the work as carried on by his sons was unabated. One of the sons, Alexander, is well and favorably known here, having visited this country on several occasions, on one of which he was accompanied by his father, who quickly made many sincere friends in the trade here.

George Dickson was one of the recipients of the coveted Victorian Medal. He also received in 1912 the Dean Hole Memorial Medal. He was president of the Newtonards Horticultural Society for over half a century. Too much cannot be said of his eminent services to the rose business in America, not to mention his home benefactions for to his firm we are indebted for Killarney, Liberty, Melody, Fire Flame and other roses that stand high with our rose forcers. Culinary peas and sweet peas of much merit also emanated from his establishment. Mr. Dickson was a

gentleman, whose personality quickly touched the heart of those who met him personally. He was beloved as a father by the young men who enjoyed the benefit of his acquaintance and was well worthy of the respect of horticulturists everywhere for his sterling character.

William H. Diehl.

William H. Diehl, aged 45 years, for the past ten years in the employ of Penn. the Florist, Boston, Mass., was drowned in Hancock Lake, Sebago, Maine, early Thursday evening, while fishing. He is survived by two brothers and three sisters.

Annie C. Norman.

Annie C. Norman, daughter of Ed. J. Norman, superintendent of the Westinghouse estate at Lenox, Mass., died of diabetes on August 7, aged 27 years.

TWENTY-FIVE YEARS OF PRACTICAL EXPERIENCE.

HAMMOND'S GRAPE DUST AGAINST MILDEW and BLIGHTS

GRAPE DUST is easily diffusible, light weight powder, Fungicide, for destroying Mildew and preventing Blights; also for destroying the Aphis and Black Fly. It is packed in 5 and 10 pound packages, also in 25 pound bags, 100 pound kegs, and barrels of 225 pounds, net. Kept in stock and sold by the leading Seedsmen of America. Dust by use of bellows.

EXPERIENCE OF FLORISTS AND GARDENERS

MILDEW ON ROSES, CARNATIONS, ETC. IT IS SIMPLE AND EASILY APPLIED

ROBERT SIMPSON, Rose Grower.

Clifton, N. J., Oct. 11th, 1907.

Dear Mr. Hammond: In reply to your inquiry regarding my experience with "Grape Dust," would say that I am glad to be able to say a good word for the article in question, because I have found it so generally satisfactory when used for Mildew on roses. I do not know anything about its constituents, nor do I care so long as it does the work and is as economical as anything else on the market. During the summer when the steam pipes cannot be brought into use to check Mildew, and dusting over the foliage has to be resorted to, we prefer to use Grape Dust rather than Sulphur, because it is much lighter and finer in texture; a given number of pounds will cover more than twice the number of plants; will cover them more thoroughly, and can be put on with a bellows in about one-fourth the time that would be required for Sulphur. The fact that I have used it continuously for ten or twelve years should prove to you that I consider it the best article on the market for the purpose for which it is used.

With best wishes, I am yours very truly,

ROBERT SIMPSON.

First used in California in 1890 at Menlo Park, San Mateo County.

S. G. BENJAMIN, Wholesale and Retail Florist.

Fishkill, N. Y., Jan. 8, 1914.

Mr. Benjamin Hammond, Beacon, N. Y.

Dear Sir: Replying to your inquiry, I have known and used your "Grape Dust" in the greenhouse for the past 25 years, and have found it excellent in preventing and keeping down Mildew and other fungus diseases, also found it would prevent and keep down the ravages of the Red Spider on Carnations and other plants. Have used it with success for Mildew on Grape Vines grown under glass.

Yours, etc., S. G. BENJAMIN.

Poughkeepsie, N. Y., Jan. 25th, 1912.

Benjamin Hammond, Esq.

Dear Sir: Please send me 25 lbs. "Grape Dust" as soon as possible. I find it is the only thing for Mildew on Roses. We have used it successfully for many years past.

Very truly, CONRAD C. GINDRA.

HAMMOND'S SLUG SHOT WORKS, BEACON, (Fishkill on Hudson) N. Y.

PUBLICATION RECEIVED.

Standard Cyclopedia of Horticulture by L. H. Bailey. Volume II of Professor Bailey's big work is now ready. As explained in our notes on Vol. I, published last spring, this new edition is much more than a mere revision of the original Cyclopedia, for, while it retains a large part of the contents of the old work, it has been greatly enlarged and added to, and many of the genera have been entirely rewritten. Vol. II comprises topics from C to E. Glancing through its pages we find the extended elaboration noted in Vol. I conspicuous throughout. For example, in the older edition four pages were devoted to the subject of plant diseases and seven to insects, whereas in the volume now issued these two important topics have been wisely combined under the caption of "Diseases and Insects" and fill forty pages, the catalogue being very complete with minute descriptions for identification and ample directions for combating these pests of the cultivator. In like manner we might instance the genus Euphorbia, extended from four to eight pages, Dendrobium from four to nine, Clematis from six to ten, Eucalyptus from seven to twelve, Cam-

panula from eight to sixteen, Crataegus from three to ten pages, etc., as showing how greatly the original Cyclopedia has been added to and its usefulness enhanced. To say that the old work which has filled so important a place and served its purpose so well in the past has been greatly improved upon is to put it mildly. A vast amount of up-to-date information has been introduced from the best sources obtainable. Many new genera have been incorporated. There are 770 figures and 19 full-page plates, of which 4 are in colors. The MacMillan Company of New York, who are the publishers, are rendering an inestimable service to the horticultural world in putting this treasury of knowledge into their hands in such excellent and attractive form.

The August meeting of the New London Horticultural Society was held on the 13th inst. Dr. Chas. B. Graves, New London's well-known botanist, was the speaker, his subject being The Wild Plants of New London and Vicinity. The rooms were packed and a great variety of wild flowers were exhibited by the members, among them being a fine vase of the Yellow Fringed Orchis (*Habenaria ciliaris*). The Aster show is to be held on the 26th inst. at Ocean Beach. The next will be September 10th, the subject being "Fruits." H. E. L.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held its first out-door meeting on Thursday afternoon, Aug. 13th, in Webster Grove, on the grounds of the Canon Floral Co. This, with the election of officers and S. A. F. matters brought out a very large attendance. Most of the members made the trip in their automobiles. Mr. Windler, the state vice-president of the S. A. F., was instructed to report back the proceedings of the affiliation meeting at Boston so that the club could take action at its next meeting. Jules Bourdet for president, W. S. Wells for vice-president, J. J. Beneke for secretary and W. C. Smith for treasurer were all re-elected by unanimous vote. W. A. Rowe was elected trustee. William C. Young exhibited a vase of blooms of a new dark pink Canna which the members thought would be a good one.

The meeting then adjourned to the home of John Cannon nearby where a nice spread was set. At the finish a hearty vote of thanks was given Mr. Cannon for the afternoon's pleasure. The August meeting of 1914 will be long remembered by those who attended.

POISON KIL - WORM POISON

Destroys Worms, Ants, etc., infesting Golf, Cricket Grounds, Parks and Lawns. Sure death to Smalls. Does not injure Grass; causes the insects to come to the surface to die. (Must not come in contact with fine plants.)

One gallon Kil-Worm makes 50 gallons liquid when mixed with water.
 1 qt., \$1.00; 1/2 gal., \$1.75; 1 gal., \$3.00; 5 gals., \$13.50.

POISON KIL - WEED POISON

A scientific Weed Destroyer—free from odor. An unsurpassed preparation for the removal of Grass, Weeds, Vines and Bushes from paths, etc. Saves expense of several men; can be applied with an ordinary sprinkling can.

One gallon Kil-Weed makes 30 to 35 gallons liquid when mixed with water.
 1 qt., 35c.; 1/2 gal., 60c.; 1 gal., \$1.00; 5 gals., \$4.00; 10 gals., \$7.50; 1 barrel, per gal., 65c.

LEMON OIL COMPANY, Dept. K

420 W. Lexington St., Baltimore, Md.

Directions on every pkg.; write for circular.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
 \$1.00 per 112 lbs.; \$17.50 per 500 lbs.

Stumpp & Walter Co.

**IF YOU ONLY
KNEW** what a
good save the
METROPOLITAN PATENT-
ED is, you would
use no other. It
is made of cast
iron and will not
rust. That part
of your green-
house which in
other construc-
tions is the weak-
est becomes the
strongest. Not
this alone, it is
ice-clearing and
carries all the
water of con-

densation from the inside, and it is so
constructed that almost the entire end
of the bar is exposed to the air, there-
by preventing decay. Only one screw,
about two inches from the end, is all
that is necessary to secure the bars.
For side stationary glass, wood headers
are absolutely unnecessary, thereby
causing no shade. Zinc glass stops are
not necessary—the cave is made with
a lug to prevent the glass from slip-
ping. Let your next house be built
with a Metropolitan Patented Iron Wall
Construction. You will never regret it.
Our price and service are right.

METROPOLITAN MATERIAL CO.

Patented Greenhouses—Heating Engineers
Hotbed Sash, Glass, etc.

1392-1414 Metropolitan Ave., BROOKLYN, N.Y.

Mastica is elastic and tenacious, admits of
expansion and contraction. Putty becomes
hard and brittle. Broken glass more easily
removed without breaking of other glass
as occurs with hard putty. Lasts longer
than putty. Easy to apply.

**THE FLORISTS' HAIL ASSOCIATION OF
AMERICA**, insurer of 39,000,000 sq. ft. of glass

WHEN YOU BUY — GET A KROESCHELL THE BOILER OF GENUINE EFFICIENCY

The customer's interest first is the basis of the Kroeschell standard, and this principle makes the Kroeschell boiler the most liberal of all the greenhouse boiler business.

The great variety of boilers that we make places us in a commanding position. We make every type of boiler that is used, from the smallest house heater to the largest water tube steam boiler 200 horsepower. For the above reason we can furnish the most efficient boiler unit in every case.

It is the Kroeschell principle to supply only that type of boiler which is best suited to the conditions, and under no circumstances do we take any other stand.

Every Boiler of the Highest Standard

MATERIAL—governed by Kroeschell specifications—the best that money and brains can produce. **WORKMANSHIP**—the kind that is an inspiration to all boiler makers. **BOILER EFFICIENCY**—determined by actual tests under working conditions. **BOILER RATINGS**—honest and true blue—guaranteed actual working capacities.

Probably you have wondered why the Kroeschell Greenhouse Boiler is not sold by any of the greenhouse material and construction companies. In justice to all concerned we feel it is our duty to state that the Kroeschell Boiler is never sold by any one but The **KROESCHELL BROS. CO.** We have no agents, and as our prices are based on sales direct from factory to user, we do not quote anyone dealing in boilers special resale prices. Our stand in this matter has brought out a lot of competition; nevertheless, the great efficiency of the Kroeschell Greenhouse Boiler cannot be disputed, and in spite of the keen competition the Kroeschell Greenhouse Boiler is heating more glass than any other make.

Kroeschell Bros. Co.

470 W. Erie Street, - CHICAGO

YOU look out the window some day and see two men go past. One is of chunky solid build, and he hustles perspiring along with a great swinging of his arms. He impresses you as a man who is going to get there "if it takes a leg."

Man number two is of a slighter build. He walks with a light springiness. He does not seem in a great hurry. There is no lost motion in his movements however. No swinging of arms, but he is getting there just as fast as the other fellow. In fact he is actually walking faster.

If you and I could follow those two men throughout the day, man number two (the light, wiry one) would always be easily overtaking the thick set one. Always he would pass him.

It's exactly the same with greenhouse construction. The light, U-Bar constructed house, beats all other constructions when it comes to actual growing results. Its slender strong frame of U-Bars, has all the strength of the heavy framed houses, but none of the lost motion in actual getting of results.

Some houses with curved eave attachments look like the U-Bar; but "looks are deceiving." If it's not built with U-Bars; it's not the U-Bar curved eave house.

To get a point by point pointing out, of the excelling points of the U-Bar house, send for the new catalog; or send for us; or both.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, \$2.00 per 100; 7 to 9 in. circumference, \$3.00 per 100; 9 to 11 in. circumference, \$6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, \$2.50 per 100, \$22.50 per 1000; Single Mixed colors, \$2.25 per 100, \$20.00 per 1000; Double Separate colors, \$4.50 per 100, \$40.00 per 1000; Double Mixed colors, \$4.00 per 100, \$35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, \$4.00 per 100, \$35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, \$9.00 per doz.; 24 in. high, 12 to 14 buds, \$12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, \$35.00 per dozen.

DUTCHMAN'S PIPE—Aristolochia Siphon, tops 4 ft. long, a grand vine for shade and cold exposure, \$3.50 per dozen, \$25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, \$1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft. high, at \$1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, \$12.00 per 100.

The Storrs & Harrison Co.

Painesville, O.

FERNS IN FLATS

All the popular and useful small ferns, including a specially fine lot of Pteris Victoricae, \$2.00 per flat. Guaranteed 200 plants to a flat.

CIBOTIUM SCHIEDEI

Fine plants in 8 in. flats, \$3.00 and \$1.00. In 7 in. pots, \$2.50 each.

CYPERUS ALTERNIFOLIUS

3½ in. pots, \$8.00 per 100

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the Editor of HORTICULTURE.

Care of Carnations

From now on until cool weather is a most critical time in the life of the carnation. With the transfer from the field to the house, the vitality falls to the lowest point. Keep the beds very clean from weeds or any foreign substance and look out for the fatal stem rot. The successful passing of this critical period is in good care in watering, ventilating and keeping house and plants clean. Be very careful when working through the plants not to break any of the growth near the soil as this is where the majority of the plants become affected with the stem-rot fungus.

Feeding Chrysanthemums

During the last half of August and through September we should feed chrysanthemums liberally. This will help to make good strong stems that will produce fine flowers. Light mulch of half-decayed cow manure is a great help in maintaining moisture in the soil, as well as affording good nourishment for the plants. Before putting on the mulch, apply a sprinkling of fine bone and ruffle the surface over with the fingers, being careful not to dig up the soil so deep as to break off any roots in the operation. If cow manure is not available sheep or horse manure may be used, but more care must be exercised because they are much more caustic and are apt to burn the roots. Whatever is used must be broken up very fine. Never give these plants manure water while they are dry. Always see that they are moist at the roots before applying liquid feeding.

Planting French Bulbs

It will soon be time to plant Roman hyacinths and paper white narcissi bulbs. Do not use old worn-out soil, but give them a good compost of fibrous soil intermixed with about one-third well-decayed manure. Use boxes of a uniform size because it is economy of space. We find 12 x 24 inches, and 3 inches deep, a convenient size and they are not backbreaking to carry in and out of the houses. You can put the bulbs quite close. Sixty Roman hyacinths or fifty paper whites will go in a flat of the size mentioned. Let the top of each bulb be even with the surface of the soil or top of the box. The soil should be moderately firm beneath and around the bulbs. There is no better place for the flats than outdoors. Before covering the flats with three inches of earth, or whatever material you use, give them a most thorough watering. We shall get lots of warm dry weather before these bulbs are brought into the greenhouse and the object of putting them in flats so early and covering them with earth is to get a good root growth without starting the bulb. They must not be neglected for water. Paper whites do not need to be covered.

Mr. Farrell's next notes will be on the following: Primulas; Cyclamen; Dutch Bulbs; Hydrangeas; Sweet Peas; Starting the Fires.

Schizanthus Wisetonensis

One of the best annuals for cut flowers in winter, or for use as a pot plant for house decoration, is *Schizanthus Wisetonensis*. If wanted at Christmas, the seed should be sown now in pans or flats, in a mixture of loam, leafmold and sand. As soon as the seedlings can be handled put them in 2½-inch pots. Keep them potted on and flower them in 6-inch pots. When the pots are filled with roots, manure water should be given twice a week until the plants show color. If large plants are wanted, they can be shifted into 9-inch pots and, if grown cool, they will make plants measuring two-feet or more through. We find, however, that the 6-inch size is the most convenient to handle. For these shifts give rich mixture, say two-thirds fibrous loam to one-third of well decayed cow manure. A later batch can be sown in September, to flower in February and March. These can be grown in pots or planted out on a light bench, ten inches apart in a sandy loam. They should have the same culture as stocks, with a night temperature of 45 to 50 degrees. They need plenty of water when established.

Violets

At about this time of the year a period in the violet growing season begins that is fraught with difficulties, of which the fine appearance of the stock at present gives no warning and the grower has reason to be constantly on the watch for what might prove of evil to his stock until conditions are more nearly under his control. Dead and diseased leaves, premature buds and side runners, must be plucked or cut off, and snails, wood lice and such creatures, if present in old benches, can be destroyed by a tempting mixture of meal, sugar and paris green which should be strewn here and there among the plants and along the edges of the bench. Overwatering, with never a chance for the soil to dry out a bit, is the common cause of too soft a growth. Sudden rising or falling in temperature, also shifting winds, cold rains or freezing nights, alternating with sun-warmed days—all tend to keep the grower active in guarding against foes from without and within the houses.

Ventilating Orchids

In the cool house we can keep on plenty of ventilation for some time yet. The intermediate house will want a little less every week and by the end of the month they will need some fire heat. In the warm house they will need but little ventilation and nice fire heat during the night from now on.

Arctostaphylos Uva-ursi

Arctostaphylos Uva-ursi, the Bearberry, a member of the family Ericaceae (Heath Family), and a relation of the Trailing Arbutus, is one of our best evergreen trailers, which, although so valuable, is not in general use. It is a native of North America with a range extending from Labrador and Alaska south as far as Pennsylvania and California, and can be relied upon to be perfectly hardy in gardens of the northern United States, where it will thrive if given a favorable location.

The woody, yet slender stems proceed from one central stem, and range from two to five or more feet in length, growing in thick mats, or hanging in long festoons over the rocks which it covers. On these stems the leaves are disposed alternately and are produced abundantly. The leaves are petioled, firm or coriaceous, and evergreen, glabrous or minutely puberulous near the base. The flowers which range from white to pale pink are borne in terminal racemes, and are not unlike the flowers of our common Blueberry, *Vaccinium corymbosum*, in shape. They appear in May and June and are followed by the drupe-like fruits which turn a brilliant red in the late summer. These fruits are in size as large as a pea and have a somewhat insipid taste. They are dry and mealy and form a part of the diet of the winter birds. They produce a very handsome color effect against the dark evergreen foliage, and if unmolested they remain this way all winter. This is one reason why the plant is so highly prized by those who have established a colony in their gardens.

The propagation of the Bearberry is not unlike that of the Arbutus and is slow and difficult as well. Seed may be sown in the early spring or late fall, or one may propagate from cuttings of the mature wood in late summer, placing these in a sandy peat under glass with gentle bottom heat. These will, however, root but slowly and it is recommended that a better way is to use cuttings of the young growth under the same conditions, for being an Ericaceous plant this young growth has more power and a better tendency to send out roots in shorter time than the older wood. Loss is to be expected up to a high percentage by the cutting method and the writer has known of losses as high as 60 per cent. to 75 per cent. It is recommended that the best and surest way of propagating is by seeds, sown as above mentioned.

A great many people prefer, however, to use collected plants, chancing the loss and making up the vacancies the following spring with other plants similarly collected. For this purpose only the strongest and sturdiest plants should be selected, and the time during which they are out of the ground should be as limited as possible. The sooner they can be placed in their permanent position the better. Care should be exercised to give these collected plants plenty of water until they have become well established, for although they love a dry and sandy situation, experience has taught that they need water just as badly as any other plant at this time. As soon as they have become established they may be left to take care of themselves in this respect.

The Bearberry is at its best when seen tumbling over rock and cliffs where its long slender stems mat together and the effect is that of a beautiful festoon. It is used in a great many cases for a ground cover in which capacity it has proven very valuable, especially on dry sandy banks where little else will take hold successfully.

New Sweet Pea, Margaret Atlee

MARGARET ATLEE

The accompanying cut shows this wonderful sweet pea life size as grown for exhibition by special culture. This is the first year it has been offered to the trade by the introducers, Messrs. C. C. Morse & Co., San Francisco. For full description, prices, etc., see their full-page advertisement in our issue of August 20.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be promptly received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the Editor of HORTICULTURE.

Mulching

With houses that were planted rather early, the plants will be of a good size by this time, and if allowed to go unmulched much longer they may receive a very serious check that will hold them back for the whole season. The object of the first mulch should not be to feed the plants so much, but to protect the fine young feeding roots that will be filling up the benches from now on. If no mulch at all is applied the benches are very apt to get too dry in places, and with the hot rays of the sun it will not take very long to kill a large number of these little rootlets. Apply the mulch a little thinner on the north side of the benches, for they will receive more shade, and the mulch might prove everything but good for the plants. Well decayed cow manure should be the only material used, so that the plants will have something to get their roots into as they need it. Do not apply it very thick, but just enough to cover the surface of the benches. Nothing will be gained by piling it on thick. Water will only wash the plant food away for the plants will only take it so fast and no faster. Better apply less and then when it is all gone apply more. There will be no chance taken with the weather then, and should a dark cloudy spell come, all those who mulched lightly need not worry, for the benches will not remain as soggy as they would if covered with a deep layer of manure.

Use of Bone Meal

Before any mulch is applied it is advisable to use a little bonemeal, dusting it on the benches as carefully as possible, to get it evenly distributed. This is important, for the plants will behave much better if they are all treated alike, instead of giving some of them more food than others. Use only pure bonemeal, and not any prepared stuff that the dealer claims is the same. Never apply anything to the benches unless you know just what it is composed of, or there may be a chance to regret it. The reason why bone is used so much is because it is more of a food than a stimulant, and its effect will be noticed long after any fertilizer would be gone. As soon as the bonemeal is applied, go over the benches, and rub the bone into the soil ever so lightly, just enough to slightly incorporate the surface of the soil with the bonemeal, and thus keep the latter from forming a crust that will shed all water and keep a dry spot under it for a long time. Never use weeder, or scratchers for this work, as they are sure to go too deep, and damage the roots. Needless to say, all leaves that may lie on the benches should be removed before the bone is applied, and no undesirable matter should be covered up with the manure to avoid

the task of removing it. Clean the benches well before any mulch is applied.

Ventilation After Mulching

Do not make the mistake and close the houses down after a mulch of manure is applied. This would prove harmful, and if the manure is thoroughly decayed the ammonia escaping from it would be very likely to burn the foliage. Generally it will turn a good many leaves yellow if the vents are allowed to be closed too much, so it will be well to choose sunny weather for doing all mulching. Old leaky houses will require less air than new houses, or houses that are kept in good shape, and are tight. Make this distinction when you ventilate.

Watering

This should not be trusted to the boy or any other person incapable of doing his work. The hose in the hands of a wrong or unskilled person is a very dangerous weapon, and will make trouble if not used with care. If the plants were well selected in the start, and kept growing evenly the watering will not be such a problem as when big plants were mixed with little ones, and so on. Whichever is the case, see that they are watered evenly, leaving the poor and weak plants on the dry side a least bit. Otherwise try to keep the whole house as even as possible. Do not force the plants by excessive watering at this time of the year, for they will generally not like it, and will then rest when the prices are high. Keep them going by all means but do not induce them to overdo the blooming stunt now, and have them sleep later on. This applies to Beauties especially, for they will produce about so many flowers and no more, and if forced too hard early in the season will not do so well later on.

Dark Corners

On every place that has existed for a number of years, there will be found places at the ends of the houses, near the potting sheds, etc., where no roses will thrive to any extent, and it would be far more profitable to grow some asparagus or smilax, or any other green that may prove useful around the place. Good asparagus will always sell, and it will be found that it will thrive well in these shady places that are generally quite warm. The above is only too true with cross houses and we would never attempt to grow roses in these, for they would be more trouble than they would be worth. Then, too, the cross-houses are generally a source of diseases for it is here that mildew will start, also spot or spider. Better keep the roses where they should be, and grow something that will pay in the crosshouses.

Convention gardens and their value

In Mr. Farquhar's remarks at Nantasket last Friday afternoon that gentleman alluded to the Convention Garden at Boston as the third in the series of outdoor exploits by the S. A. F. Mr. Farquhar was right, although this year's affair appears to have been understood by some to be the second only. The first convention garden was in the year 1906 at Dayton, Ohio. The sessions of the Society were held in a spacious pavilion with the sides all open, in the centre of the Fair Grounds. The secretary's account of the event contained the following paragraph:

"On all sides skirting the green lawns were to be seen the brilliant flower beds of the out door display, contributing a charming effect and causing much regretful comment on the costly mistake the ornamental nurserymen had made in failing to take advantage of this unprecedented opportunity for showing their goods."

The judges' report on this, the first convention garden, was signed by Peter Bisset, Edwin Lonsdale and William Miller. It will be noticed that the dealers in hardy decorative trees and shrubbery held aloof from participating in this just as they have stayed away from the Boston affair, leaving the field mainly to the dealers in cannas, gladioli and other soft-wooded material, with a disregard of opportunity and a lack of enterprise which seems almost incredible. President Kasting, in his splendid address at the opening of the Dayton Convention said:

"How can we best reach the people who are interested in garden matters, and increase their love for vernal surroundings, as well as to plant desire where no desire exists, are questions of vital importance and worthy of our most earnest consideration. Exhibitions as a factor in education are of the greatest value. It is by the eye more than the ear that people are interested."

Mr. Kasting, in these words, sounded a key note for commercial horticultural progress.

The S. A. F. and hail insurance

In the printed S. A. F. records of the great debate on the proposition for the establishment of a system of insurance against losses by hailstorms, at the Philadelphia Convention in 1886, we learn that John G. Esler submitted a plan for the organization of a mutual hail insurance company to be known as the Florists' National Hail Insurance Company, together with draft of proposed government, by-laws, etc., in which no mention was made of any connection with the S. A. F. other than that the annual meetings of the organization were to be held at the time of the S. A. F. annual convention. This scheme with some amendments presented by J. N. May concerning method of fees and assessments, was finally approved by unanimous vote and on motion of Mr. Esler, "a committee of five appointed to organize a company, with the understanding that the Society of American Florists will not be liable, financially, because of such organization." This committee as appointed by the president consisted of J. M. Jordan, H. A. Siebrecht, E. G. Hill, J. G. Esler and J. C. Vaughan. In the report presented by the committee the following year at Chicago, announcement was made that the Hail Association had been organized in July under the laws of the State of New Jersey and was already doing business, with John G. Esler as Secretary. Chairman Jordan supplemented the report with a few remarks from which we quote the following:

"I presume that most of you know that this organization of the Hail Association is the child of this Society. We want you to father it in such a way that we will know, by your assistance and your appreciation of the work, that you are in hearty sympathy with our efforts. I think the child is now ready to be set to work upon its own responsibility."

The success of the working of the Hail Association was again proclaimed by Secretary Esler at the Convention in New York City the following year. In the light of the facts as above stated we fail to see any justification for the remark by the esteemed secretary of the Hail Association during the discussion on "Affiliation" at the meeting in Boston last week, that the Hail Association had been "thrown out" by the S. A. F. at the time of its inception. This is not the first time the S. A. F. has been reprimanded in this fashion. If its repetition is allowed to go unchallenged year after year the accusation will in time assume the appearance of truth and it seems proper that those familiar with the facts should now take opportunity to refute it.

BRITISH HORTICULTURE.

Sweet Pea Show.

At the annual show of the National Sweet Pea Society in London, July 16th, amongst the novelties which had been tested in the Society's trials was *Fiery Cross*, a cerise-scarlet, shown by Alex. Malcolm, also *Royal Purple* and *Jean Ireland*, from Dobbie & Co. There was a keen competition in the Henry Eckford Memorial class for 12 bunches of distinct varieties; Mrs. H. V. Macnamara, County Clare, Ireland, was first, and E. G. Mocatta, second. The Sutton challenge cup for 18 bunches was secured by A. E. Usher, Lord North being second. Sir G. O. Trevelyan was first in the class for 18 varieties. The E. W. King challenge cup for 12 bunches fell to E. Cowdy. The W. Atlee Burpee trophy for a display of waved sweet peas was won by E. G. Mocatta. Gold medals for trade exhibits were awarded to Bide & Sons, R. Bolton, Alex. Dickson & Sons, Dobbie & Co., and Hobbies, Ltd., C. C. Morse & Co., of California, received a silver medal for a splendid group of the new variety, *Mary Atlee*.

National Rose Society.

The National Rose Society scored another success on July 7th, at their annual summer show at the Royal Botanic Gardens. The following gold medal awards were made for new introductions: Hugh Dickson, Ltd., for Mrs. Berham Walker; B. Cant & Sons, for a vivid red *Augustus Hartmann*; Alex. Dickson, for *Margaret Dickson Hamill*, of an apricot tint; Wm. Paul & Sons, for *Majestic*, an attractive pink bloom; and Rev. J. H. Pemberton, for *Clytemnesha*, a light pink climbing variety. A silver gilt medal was taken by Alex. Dickson & Sons for Mrs. Maud Dawson. The other novelties exhibited by this firm included *Donald McDonald*, rose pink. Hugh Dickson, Ltd., has a group of new hybrid teas, including a sulphur colored yellow named *Ulster Gem*. The champion trophy in the class for 72 blooms was secured by B. R. Cant & Sons. Prizes for premier blooms were taken as under: Best H. T., George Prince with *British Queen*; best H. P., B. R. Cant & Sons with *Horace Vernet*; best Tea, J. Mattock with Mrs. Foley Hobbs.

The Trade and the War.

The horticultural trade is being hard hit by the lamentable war. Florists doing a West End trade in London are suffering from the effects of the cancelling of public dinners and social functions. At this serious period there will be wholesale cutting down of expenses, and in this policy of strict economy the horticultural section is bound to suffer. The Dutch bulb trade will also be seriously hampered, owing to the difficulty of shipping the consignments to this country. The Rev. W. Wilks, the Secretary of the Royal Horticultural Society, and Professor Keeble, the Director of the Society's Gardens, at Wisley, have rendered good service in calling attention in the public press to the importance of the small unused or uncropped plots of ground being planted with such food plants as it is possible to sow at this season of

A NEW HAVEN ROSE GARDEN.

The accompanying illustration is a view in the rose garden of L. E. Stoddard at New Haven, Conn. There are

the year to provide against any possible shortage in the future.

Experiments at Woburn.

A party of members of the International Congress on Tropical Agriculture recently visited the Woburn Experimental Fruit Farm. Amongst the experiments to which attention was directed was the demonstration of the remarkable influence of grass upon fruit trees. Even where the grass was not sown until four years after the trees were planted the latter were all but dead after twelve years, and in the living trees the difference in color of leaf, bark, and fruit was striking as compared with trees grown on tilled ground. An investigation of the problem by pot culture indicates that the effect is produced by something that goes from the grass to the roots of the trees. If the soil is aerated the poisonous substance may become beneficial. The conclusion drawn from the pruning experiments is that the less pruning there is the better. Root pruning dwarfs the growth, and yield where done every fourth year, and is injurious if done oftener.

A Narcissus Bulb Disease.

The Board of Agriculture has issued a leaflet dealing with a disease of narcissus bulbs (*Fusarium bulbigenum*, Cooke and Mass.). During last year the disease increased to such a serious extent that, according to the statement of growers on a large scale, entire plots of bulbs were completely destroyed. The continuance of the disease, it is stated, may be due to two independent causes, viz.: (1) to slightly diseased bulbs containing the *Fusarium* spores; (2) to infected soil. So far as is known at present the fungus has only been met with on narcissus bulbs, but it may extend its ravages to other bulbous plants. The leaflet suggests that for this reason the safest course would be to avoid planting bulbs for two or three

about 1000 roses in this garden and they have done wonderfully well this season. William Austin is the gardener on this fine estate.

years on land that has produced a diseased crop. No kind of dressing would be likely to destroy the chlamydospores directly, but during the spring, when they are germinating and producing secondary spores, the latter would be killed by a dressing of kainit, or of sulphate of potash, lightly worked into the soil. The disease is known in Holland, from whence it may often be re-introduced into this country by means of slightly infected bulbs. W. H. ADSETT.

HOME FROM THE WAR COUNTRY.

H. Huebner of Groton, Mass., who was in Switzerland when the war broke out, has safely returned after some unique and exciting experiences. He managed to get passage from Genoa in the steerage of the *Stampalia*, where he had as fellow passengers bank presidents, millionaires, opera singers and others, who were getting their first experience in roughing it, and mightily glad of the opportunity. All of them had lost their baggage and many, including Mr. Huebner, had absolutely nothing except the clothing they wore. The trip to New York consumed two weeks, the first five days of which in traversing the Mediterranean to Gibraltar was a time of peril and anxiety for fear that Italy would get into the fight before they were safely out. Mr. Huebner not only lost his entire baggage, but also a lot of valuable plants he had bought and for which he had paid cash.

PERSONAL.

We are glad to learn of the safe arrival in New York of Harry A. Barnard, of Stuart Low & Co., Rush Hill Park, Enfield, England.

William E. Schmeiske, formerly foreman for Alex. Maxwell, florist of Springfield, O., has taken charge of the greenhouses of W. Murray Crane, Dalton, Mass.

THE BOSTON CONVENTION

The Society of American Florists Finishes Up Its Business and Adjourns—Various Reports—Friday's Entertainment and Games

CLOSING SESSION OF THE CONVENTION.

The first business at the Thursday afternoon session was the report of the Committee on Standard Flower Pots. Thomas Roland, chairman, presented the following:

Report of Committee on Standard Pots.

Your Committee took up the consideration of the flower pot question thinking that there was considerable dissatisfaction with the present standard. With a view to finding out what changes were desired in the standard as adopted by the society in 1890, your committee wrote to a large number of pot manufacturers and consumers of flower pots in various parts of the country and with one or two exceptions the replies were decidedly against any change of the present standard.

The retailers claim to have some difficulty in fitting pots into the various jardinières so much used now. Your committee feel that much of this trouble would be avoided if the manufacturers of vases and jardinières were to adopt a standard to conform with that of this Society. Your Committee are strongly of the opinion that it would be a mistake to change the present Standard, and feel that any possible gain that might be made would be offset by a larger loss.

We therefore recommend that a copy of the present Standard be furnished to all manufacturers of jardinières, etc.; and that the copy of the scales and drawings attached be made a part of the permanent records of this Society.

Your Committee are indebted to A. H. Hews & Co., who kindly gave the Committee a copy of the Standard adopted by this Society in 1890.

Signed, THOS. ROLAND,
J. J. HESS,
J. K. M. L. FARQUHAR,
Committee.

On motion of Harry A. Bunyard, the Standard adopted in 1890 was re-adopted as recommended by the Committee, ordered spread upon the minutes, and published in the annual Proceedings.

Other Reports.

The reports of the botanist, Professor J. F. Cowell, Buffalo, Botanic Gardens, Buffalo, N. Y.; of the Pathologist, Professor E. M. Freeman, Plant Pathologist, University Farm, Minneapolis, Minn.; and of the Entomologist, Professor W. E. Britton, State Entomologist, New Haven, Conn., were respectively considered as read, and will be printed in the Proceedings of the Society.

The report of the judges on the Trade Exhibit was then read by Secretary Young.

Awards in Trade Exhibit.

At S. A. F. conventions the judges do not pass on the trades' display as a whole, but only on such novelties as have been brought to their attention by the exhibitors in writing.

On plants and cut flowers the judges were M. A. Patten, J. R. Fotheringham and William Sim. They awarded a certificate of merit to the Robert Craig Co. for *Nephrolepis* John Wamaker, high commendation to Carl Hagenburger for *Nephrolepis* Mentorii, and honorable mention to Arthur Cowee for demonstration of the uses of gladioli.

O. J. Olson, W. F. Gude and G. E. M. Stumpp, judges of florists' supplies, awarded high commendation to Schloss Bros. for their exhibit as a whole and for beaded corsage novelties, rainbow effect chiffon and fancy ribbon novelties, also honorable mention for gold and silver ribbon.

The Report of the Committee on the Convention Garden was then presented but not read, and ordered to be printed. Following is a summary:

Report of Judges and Awards Made to Exhibits in Convention Garden.

Silver Medals: R. & J. Farquhar & Co., for Japanese Garden. The judges consider this a most comprehensive exhibit, displaying a very varied collection of plants. W. A. Manda, Inc., a most interesting and extensive exhibit of Conifers, Boxes, Bay Trees, Dahlias, etc., well arranged exhibit. *Salvia Greggii* here was highly recommended as a bedding plant or for the greenhouse. *Cuphea Llavea* was highly recommended as a bedding plant. A. N. Pierson, Inc., Bedding Plants, Hardy Garden Roses and Hardy Perennials. The judges consider this a very creditable exhibit. Conard & Jones Co., large display of Canna novelties, which include Wintzer's Colossal, Panama, Kate F. Deemer, Wm. Saunders, Meteor, *Rosea gigantea*, Olympic, Mrs. Alfred F. Conard, Loveliness, Beacon and Wyoming. The judges considered this a very meritorious exhibit. Robert Craig Co., display of Crotons raised and introduced by Robert Craig Company. Arthur T. Boddington, grand display of *Hycinthus candicans*, fine bed of *Canna* Panama and a superb bed of *Gladiolus* America.

Certificates of Merit: John Lewis Childs for display of *Gladiolus* Sunburst, Radiance, Charmer, Attraction, Snow King, Scribe, Sulphur King, Rosy Spray, Gleam, Winsome, of the Childs type. Vaughan's Seed Store, a bed of *Canna* Fire Bird. The judges

consider this a very good canna. F. W. Fletcher, *Antirrhinum* Nelrose. The judges consider this a good bedding variety of snapdragon. Eastern Nurseries, display of Hardy Evergreens and Perennials. The following new plants were worthy of notice: *Juniperus Kosterianus*, *Juniperus Pfitzeriana* and *Taxus repandens*. Thomas F. Galvin, Inc., a formal bed. William Tricker, display of aquatic plants, *Lythrum* Perry's variety and *Lythrum virgatum* roseum. R. Vincent, Jr. & Sons Company, Bed of *Geraniums* My Maryland, Scarlet Bedder and Mrs. Lawrence. William Sim, bed of *Antirrhinum* Pride of Cliftondale. S. J. Goddard, bed of *Begonia* Gloire de Chatelaine. R. & J. Farquhar & Co., *Canna* Firebird and *Liliums* myriophyllum and Sargentiae.

Diplomas of merit: Carter's Tested Seeds for exhibit of Carter's grass, and an artistic dial and ornamental bed. The judges were especially pleased with the grass. Wm. W. Edgar Co., a very fine bed of *heliotrope* as standard, carpeted with lower *heliotrope* plants and edged with *Vinca* minor, making a very pleasing effect. Park & Recreation Department of the City of Boston, Formal Beds, which show such excellent workmanship. In the opinion of the judges, great credit was due to James B. Shea, superintendent of parks of Boston for the work he has done and the interest he has taken in the garden.

Honorable Mention: Arthur Cowee, for display of *Gladiolus* Peace; Peter Henderson & Co., bed of new *Geranium* Gen. Funston, edged with *Alternanthera* Jewel; F. E. Palmer, effective bed of *Petunia* Veilchenblau, Marigold Legion of Honor, and White Verbena. Mr. Desert Nurseries, exhibit of Hardy Perennials and Conifers. A. H. Hews & Co., display of large flower vases. R. Vincent, Jr. & Sons Co., *Geraniums* Scarlet Bedder and Mrs. Lawrence.

The following exhibits received mention: A. Magnuson, Seedling *Salvia*; A. F. Coolidge, Bedding *Geraniums*; Edward MacMulkin, Bedding plants; B. Hammond Tracy, *Gladioli*, not in bloom; Knight & Struck Co., *Cosmos* and *Buddleia variabilis grandiflora*; E. E. Stewart, Brooklyn, Mich., *Gladioli*; Bidwell & Fobes, *Gladiolus* Panama and Niagara, not in flower; Henry R. Comley, *Cosmos*; A. M. Davenport, Coleus and *Euonymus*; Henry A. Dreer, Inc., *Nymphæas*; James Vicks' Sons, *Gladiolus* Rochester White, not in bloom.

The judges were Robert Cameron, John N. Champion, John F. Huss and Gustav X. Amrhyn.

A. H. Hews & Co. were accorded a vote of thanks for their kindness in

loaning the society 3,000 saucers to be placed under the exhibits of plants in the trade section.

Greetings from California.

Secretary Young read the following telegram:

San Francisco, Calif., August 19, 1914.
John Young, Secretary, S. A. F. and O. H.,
Boston, Mass.

Permit me to extend my hearty congratulations to the gentlemen of the Society of American Florists upon their selection of San Francisco as their next meeting place. Needless to say that it will be our aim to make the next gathering the most interesting in the history of the Society, and earnestly hope that all members will take advantage of the opportunity that presents itself to witness the greatest three ring attraction in the world, namely, the wonders of California, too numerous to mention, the greatest Exposition ever held, and last but not least, California hospitality.

ANGELO J. ROSSI.

On motion of Harry A. Bunyard, the communication was received and spread upon the record.

The next business in order was the report of the Committee on School Gardens, by Benj. Hammond.

Report of the Committee on School Gardening.

Within twenty years the new idea of School Gardening has spread from Boston to the Pacific Ocean and to the Philippine Islands. The economic value of this work, as is realized today, is of much importance in every town where it takes root. A taste cultivated in the direction of making things grow in a small way, tends at once to improve the appearance of a neighborhood. The florist's shop never causes a detriment to a neighborhood, but is the example of what will make the houses of a community look better.

During the past year the committee on school gardens has followed up its limited work of suggestion to school trustees and others in every city, town or village where a member of the Society of American Florists is located, by mailing to each official school body a well illustrated circular letter calling attention to this work, and appreciation of this call is answered by many.

One of the manufacturing towns which was built on the sand dunes or waste places at the south side of Lake Michigan, is Garry, and the leading men of the cosmopolitan city of New York have been out there and come back home to tell among other things, what school gardening and flower growing does to break up the old-time barrenness of a manufacturing city. This work over the country, especially in the larger cities like Cincinnati, St. Louis, Cleveland, Chicago, Los An-

THE CONVENTION GARDEN
Formal Bedding in the Farquhar Exhibit.

geles, Bellingham, Worcester, Toronto, Baltimore, Pittsburgh, Buffalo, Syracuse, Minneapolis, Atlanta, Louisville, Indianapolis, Grand Rapids, Kalamazoo and so on, gives merely an idea of what is being done in centers of large population. The work is aided by seedsmen in many places. Roses, dahlias, asters, gladioli, cannas, coleus, geraniums, sweet peas, etc., are in evidence to show the increasing appreciation by the mass of American families of flowering plants in the odd corners and waste places. Example and training are the effective ways which lead and elevate home taste. The development in the use and growth of flowers is nowhere more apparent than on the roofs of the great tenement buildings or apartment houses on Manhattan Island—the boxes of flowers tell their own story of yearning in human hearts for pretty things, and the florists and seedsmen of the world are the trades that help uplift humanity.

Your committee's advice to all the people is—keep right on the job.

Benjamin Hammond, Michael Barker, Irwin Bertermann, Gust. X. Amrhyn, Leonard Barron, *Committee.*

The report of the Committee on the Recommendations in the President's Address was next read by the Secretary.

Results of Balloting.

The report of the tellers on the result of the balloting for officers was then presented showing results as briefly recorded in our issue of last week. The whole number of ballots cast was 401, the largest on record where there was any contest, exceeding the record at Baltimore by 16 votes. The vote in favor of "Affiliation" was 354 in favor and 35 opposed. Prof. George E. Stone then read his paper on the Adaptation of Plants to Soil. This paper was briefly discussed after which the society adjourned. We shall present Dr. Stone's interesting paper in full in a later issue.

A DAY OF ENTERTAINMENT.

Excursion and Games.

Friday was Boston's own day—the day when even the latch-string was to be discarded and the doors of community hospitality thrown wide open. The morning started with a dubious weather outlook and many of the participants in the harbor trip which was the central feature of the day's entertainment, prudently provided themselves with umbrellas, mackintoshes and similar protective material. Despite the menace of low-hanging clouds, however, eleven hundred happy excursionists undaunted by the outlook were on board the flower decked steamer *Rose Standish* when she glided from her dock at 9.45 Friday morning. Landing was made at Fort Warren where the sporting events were scheduled to take place and soon the baseball diamond within the old fortification was the scene of activity. It was the All-Stars of the S. A. F. against the All-Bostons and they put up fun and excitement galore for the spectators who were ranged by hundreds around on the ramparts and at every vantage point doled out applause without stint when a good play was made and gave it in double measure whenever some luckless player performed some unpremeditated stunt in the slippery mud puddles which went by the name of bases and with which every part of

THE CONVENTION GARDEN
Bed of Geraniums by A. F. Coolidge.

the diamond was plentifully supplied. Following the baseball game, which the All-Stars won by a score of 9 to 8, came the minor sporting events. The thunder was rumbling and the wise ones were making their way to the protection of the boat. The "sack race" was on and the racers hopping and tumbling over the course when down came the rain in bucketfuls—the climax of a week long to be remembered for electrical disturbance. And the games stopped then and there and a series of other foot races not down on the program were put in execution. The downpour soon ceased and the rest of the trip to Nantasket landing was a glorious good time, with refreshments, music and choruses.

Banquet.

But at Nantasket all plans had been turned topsy-turvy; the big tent in which the banquet was to have taken place was blown entirely out of commission and this feature had to be relegated to the dining halls and verandas of the New Rockland House, necessitating two relays before all had been served. The house did all that anyone could ask in such an emergency and the best of philosophical good nature prevailed on all sides.

The landing at Nantasket is on the inner or harbor side of the long promontory on the outside or ocean front of which the famous Nantasket Beach stretches for a distance of five miles. So the visitors got not a glimpse of this noted attraction, for the storm set in again and all had to stay indoors or make their way to the boat for Boston. It was a sad disappointment to the local people who had worked so hard for this event, and the chagrin was further intensified when the following day, Saturday, came in with a cloudless sky and proved to be an ideal summer day.

Presentation to President Wirth.

A pleasant event at the hotel was the presentation to President Wirth of a casket of silverware in token of the regard and esteem of the members. The presentation was made by Ex-president Farquhar in a speech full of the eloquence of sincerity. Being introduced by Mr. Welch, Mr. Farquhar mounted a table and told how pleasurable was the duty he was about to perform in recognizing an honored official who has done so much to bring about this most successful convention. He recalled what Mr. Wirth had done as vice-president for the convention in Minneapolis and in making possible the grand Convention Garden in that city; how he had allied the whole interests of his section with the work of the S. A. F. and had now by his fidelity to duty and to every branch of horticultural industry reached the highest pinnacle of honor in his profession. The speaker declared that if any man in the whole land is worthy to be the successor to J. A. Pettigrew as the dean of American Park Superintendents it is the man who now fills the chair of president of the S. A. F. He knew when Theodore Wirth was elected he would prove one of the best presidents the society ever had. "We gardeners, florists, seedsmen, nurserymen all know the worth of Theodore Wirth."

Mr. Wirth's response was appreciative and full of the sanguine spirit

which has been such a factor in his career. He pleaded lack of words to express his gratitude for all the kindness shown him by the members and by his associates in office. On behalf of the visitors he expressed sympathy with the Boston people over the unfortunate weather and assured them of his belief that the Convention now coming to a close was the best ever held. "The S. A. F. is on the right road."

Park Commissioner J. H. Dillon and President-elect P. Welch followed with brief remarks.

COVER ILLUSTRATION.

The cover page group picture shows the S. A. F. Executive Board for 1914 all of whom were present at Boston, excepting August Poehlmann of Chicago and who consequently does not appear in the picture. The gentlemen in the top row, standing, from left to right, are Charles H. Totty, John A. Evans, J. A. Peterson, J. J. Hess and Thomas Roland. Seated—J. K. M. L. Farquhar, Theodore Wirth, John Young, P. Welch and W. F. Kasting.

GET YOUR PRIZE.

All prize winners who did not receive their prizes before leaving Boston will kindly send in their address to W. R. Nicholson, Framingham, Mass., chairman of the Local Sports Committee and same will be forwarded to them.

NOTES.

Exhibitors in the trade display section were generally well pleased with the business done. Fred Lantenschlager, who represented Kroeschell Bros., said that they found it to be one of the best conventions for business in every particular that they had ever participated in.

W. J. Kennedy worked like a beaver in the management of the sporting events and proved himself a most indispensable factor in bringing this important feature of Friday's entertainment to so successful a conclusion. The boys presented him with a handsome stick pin which was richly deserved.

There was plenty of entertainment going on continuously which did not appear on the regular programme and many instructive trips as well to places of trade interest. R. & J. Farquhar & Co. entertained a big delegation of gardeners at their Dedham nurseries on Wednesday afternoon. On Thursday afternoon large parties were lavishly received at Thomas Roland's establishment and at Montrose Greenhouses.

Penn the Florist devoted his space in the trade exhibition to a demonstration of the value of newspaper advertising in the florist trade. The walls of his booth were hung with framed clippings of large advertisements that he has had from time to time in the various Boston dailies. It was an unique and very impressive lesson in practical business enterprise and Mr. Penn's rapid advancement to a position in the foremost rank of successful florists is the best sort of evidence that he has adopted a winning policy. His booth had many interested visitors.

GINGER SNAPS.

Denny (stranger to Boston): "Gee, but I'm tired! D'ye know, I walked all the way from the Metropolitan wharf right here to the Parker House!"

Sophisticated Friend: "Why, that's nothing! That isn't far."

Denny: "It was; the way I came."

Appreciative Edward: "This Boston

STANDARDIZE THE JARDINIERES.

Rumors of a movement on hand to have the standard flower pots changed from the present standard shape adopted at the convention of the Society of American Florists, at Boston, Mass., on August 21, 1890, having reached the ears of the pottery trade their immediate reply is "Standardize the Jardinieres." Our product was standardized in 1890. Rumor has it that some few retailers object to the present style of standard rimmed pots and they suggest a return to the smaller rim, similar in design to the old style hand-made pots of uncertain dimension, simply because one or more of their customers may have a pet jardiniere which they find hard or impossible to insert a standard rimmed pot in without the rim showing.

The jardiniere makers are continually at work designing and making new patterns in regular and odd shapes in limited quantities which are soon discarded, and seemingly pay little attention to the size of the opening in its relation to the depth of the vessel while a few thoughts directed to that end in view would clear up at once any objection to the use of standard flower pots as made at present. The potteries, to keep up with the newest design of jardinieres, would have to be continually changing the size and shape of their pots to correspond to the changing designs of jardinieres, and there would soon be no use for standard shapes as there would be none made.

To return to the old style would not remove the objections made by the retailers and the same difficulty would occur as the old style pot was proportionally thicker at the top and possibly thicker around the rim than the present pot with rim and would still bind before reaching the bottom of the jardinieres.

In olden days, long before the adoption of the present standard pots, the pottery salesman would sell pots to one florist for five-inch and possibly the next customer would buy the same pot for a six-inch; then again a florist would advertise six-inch stock, which upon arrival to destination would go into the buyers' five-inch pots. These conditions were the same in every section of the country, and the year the Society of American Florists adopted and standardized the flower pots, they did more for the trade in general than any other convention up to that time. (and possibly since).

Practical potters tell us they would prefer a smaller rim as then they could place more pots in their kilns and less room would be occupied in storage per thousand pots, but, this would necessitate a smaller diameter bottom and therefore less room for the soil so much desired by the grower and it is only by the present system of "nesting" or "stacking" pots, that the price is kept at the present low price.

The basket maker gets a standard pot, azalea or bulb pan, whichever he wants to make, if a new design, and his baskets are formed over the size pot or pan to be used, thereby preventing the use of those words so apt to spring from our lips, when things go wrong. The supply houses have on hand figures or samples of the most used sizes of standard flower pots and whenever a novelty is offered to them

LET us tell you exactly what Hicks' guarantee means. It means that we guarantee all Hicks' nursery grown stock to thrive. This applies to all our trees, big or little; all our shrubs; all hardy plants.

If anything you buy doesn't live and thrive, we will replace it, and do it cheerfully and willingly. We not only want to replace it, but we insist on doing it.

All we ask of our customers is to let us know the way the planting was done; the kind of soil and whether the watering was done freely or sparingly. Our only reason in asking for even this much information is to find out if the planting and handling has been done right; and if not, make suggestions for the proper care of the replaced stock.

Of course we know full well that every once in a while we will be

imposed upon, and that our stock will be blamed when the fault is entirely due to wrong handling or neglect.

But, on the other hand, our stock is so well grown and so strong; and our packing methods so careful and so thorough, that Hicks' stock thrives under many cases of poor conditions and neglect, where other stock would be a complete failure. Because of this fact, we can afford to make such a sweeping guarantee.

Our replacements each year are very few. So few it would surprise you.

Our stock may sometimes cost a bit more than others, but that's to be expected with anything and everything that is superior. Don't you want some of these fine White Spruce for planting in September? Every one of them to be sold with Hicks' guarantee.

Prices—White Spruce

3	ft. high, 22 in. spr.	\$9.00 per 10; \$80.00 per 100; \$600.00 per 1000
3½	ft. high, 2 ft. spr.	17.50 per 10; 150.00 per 100; 1,000.00 per 1000
4	ft. high, 2½ ft. spr., 8 years old.	22.50 per 10; 200.00 per 100
5	ft. high	30.00 per 10; 250.00 per 100

Can you use a White Spruce hedge, 3 ft. high, at \$22.50 per 100 feet?

Don't hesitate because of distance—we recently shipped to Detroit, Michigan, four carloads of big evergreens to the famous automobile maker, Henry Ford.

Hicks Trees
Isaac Hicks & Son
Westbury, Long Island

their first inquiry is "Does it fit the standard flower pot?"

The potters' cry of "standardize the jardinieres" should also apply to the fern dishes and every retailer knows his troubles in the past, when with hammer, chisel and saw he has tried to cut down a pot or pan to fit a liner to some odd size fern dish, or has called upon some tinsmith to make the liner of zinc or tin.

Any standard flower pot manufacturer would gladly furnish the jardiniere and fern dish makers any information regarding dimensions, etc. of their product.

J. G. WHILDEN,
Philadelphia.

PATENTS GRANTED.

BUDDLEIA AND BOUGAINVILLEA.

Will you please tell me through HORTICULTURE the proper way to grow Buddleia so as to have it in bloom in winter, and also how to manage some large old plants of Bougainvillea.

Yours respectfully,
A SUBSCRIBER.

For Buddleia asiatica take soft wood cuttings in March. Grow them along in pots not too large, and pinch frequently to keep them in bounds. These will make good flowering plants filling 6-inch pots or larger if desired and

should bloom freely from November or December on until April.

For the other Buddleias, such as variabilis and its varieties the same general plan may be followed but they are of more robust growth and will take a little longer time. Cuttings taken in March will flower in fall if not pinched, but if pinched back they will be later in blooming according to the amount of pinching given. They will require pots twice as large as for the asiatica.

The best course with Bougainvilleas

is to prune out all the old superfluous wood and thus encourage new growth, saving the new wood now present. Repot in good turfy loam to which should be added sand, well-rotted cow manure and a little ground bone. As the young wood grows it should be carefully trained to stakes or trellis so as to allow the flowering shoots to get plenty of light and air. One very important thing in the management of Bougainvilleas is to keep the plants thoroughly syringed against the attacks of mealy bug and green fly.

WM. ELLIOTT & SONS, 42 Vesey Street, NEW YORK

NATIONAL ASSOCIATION OF GARDENERS.

In spite of the "double header" at the baseball grounds and other attractions to lure the gardeners away from the meeting of the National Association of Gardeners, held at Paul Revere Hall, Boston, on August 19, it was one of the most successful summer meetings ever held by the organization.

President William J. Kennedy, of the Gardeners' and Florists' Club in welcoming the gathering to Boston, spoke in glowing terms of the wonderful strides the profession of gardening has made in this country during the past decade and he predicted that the future will witness even greater progress. He referred to the importance of strong organization to protect the interests of the profession and stated that he believed the National Association of Gardeners, if properly supported by the gardeners, can materially aid the profession and increase the opportunities for those engaged in it.

President Wm. H. Waite, of the National Association of Gardeners, responded to Mr. Kennedy's address of welcome and spoke of the benefits the gardener may derive as a member of the national association; following which he introduced Daniel MacRorie of San Francisco, Cal.

Mr. MacRorie presented an invitation from the Panama-Pacific Exposition and also from the Pacific Coast Horticultural Society to the National Association of Gardeners to convene at San Francisco during the time of the exposition next year. He spoke of the interest the exposition will hold out to horticulturists, as it is intended to make it a great horticultural show. After listening to Mr. MacRorie's word picture of all that will be in store for those who will visit the Pacific Coast next year and how a meeting on the Coast will benefit the N. A. G., the association voted to accept the invitation and hold its summer meeting in San Francisco in 1915.

President Theodore Wirth, of the Society of American Florists, and a director of the National Association of Gardeners, was next introduced and spoke of the opportunities which are presented themselves in the West for the ambitious and efficient gardener. Mr. Wirth expressed it as his opinion

that while still in the development stage, the western private estates are beginning to compare favorably with those of the East. He said Western people are becoming interested in country estates in their own territories and the capable gardener will be more in demand in the West than he has been heretofore. In concluding Mr. Wirth made some remarks on affiliation and urged closer co-operation between the two national societies for the general good of horticulture.

Wm. F. Gude of Washington, D. C., the next speaker, made an appeal for the William R. Smith memorial and explained the work his committee is doing to secure funds to provide a suitable memorial for the late William R. Smith. In response to Mr. Gude's appeal, it was voted that the N. A. G. open a subscription list to enable members and others who might desire to contribute to this fund to do so and in this way aid the committee of the S. A. F. in securing a suitable memorial for Mr. Smith.

Prof. Edward A. White, professor of floriculture, College of Agriculture, Cornell University, spoke of the opportunities that now offer to young men in different colleges to secure a training in horticulture and floriculture and gave a brief outline of the work the New York College of Agriculture is now engaged in.

John Young, secretary of the S. A. F., read a paper on "What the S. A. F. Should Do for the Private Gardener," written by Arthur E. Thatcher, of Bar Harbor, Me., and who was to deliver it before the meeting but was suddenly called away from the convention. A general discussion followed.

Arthur Smith, of Reading, Pa., contributed an interesting paper to the meeting on "The Profession of Gardening," relating the history of the profession and discussing in detail the "ups and downs" that are encountered within the profession. The paper, which was read by Secretary Ebel, was acknowledged to be a

strong document on the many phases that enter into the profession of gardening. A hearty vote of thanks was tendered Mr. Smith for his able paper.

On a motion by W. N. Craig, President Waite appointed Mr. Craig and Duncan Finlayson of Brookline, Mass., and M. C. Ebel of Madison, N. J., a committee to draft a resolution conveying to the brother horticulturists abroad the sympathy of the members of the association on the terrible calamity that surrounds the European horticulturists at the present time. Following a general discussion of various problems with which gardeners are confronted from time to time, in which a number present participated, the meeting adjourned.

At the meeting of the executive board held in the forenoon it was voted to invite all florists clubs having private gardeners enrolled in their membership, to join in the cooperative movement of the N. A. G. to arouse a greater public interest in horticulture. The Cooperative Committee reported twenty-two organizations enrolled in the movement to date which include two from as far distant as California, one from Texas and one from Louisiana. It was also voted to hold the next annual convention in Philadelphia during the first week in December, to which exhibits of novelties and rare plants will be invited in competition for the associations' certificate of merit.

The Ninth Annual Dahlia, Gladiolus, Fruit and Vegetable Show of the New Jersey Floricultural Society will take place at Orange, N. J., on Monday, October 5th. The schedule of classes and premiums has been issued. There are 48 liberal classes. Copies may be had on application to George W. Strange, Secretary, 216 Main street, Orange, N. J.

"Enclosed find check for renewal of your paper, which I enjoy very much."

Boddington's Gigantic Pansies

Can be produced only from the giant strains. Our CHALLENGE PANSY seed contains in it the giant self-colors, the giant striped and variegated and the giant blotched, etc., all carefully mixed in proportion. You could not buy better seed if you paid \$100 per ounce. Our Challenge Pansy seed during the past season gave unprecedented satisfaction, and every order booked last year was duplicated and increased this year. All the testimonials received mentioned specially the high grade of flowers—color, form and also of the individual blossoms. This year, by adding improved types, intending customers can absolutely rely on a duplication of this season's success with increased satisfaction. Our "mark" for this strain is "Challenge," and it is all the word denotes.

Pansy—Boddington's "Challenge"—All Giants

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said: "Why don't you call it Defiance?"

½ trade pkt. 25 cts., trade pkt. 50 cts., ¼ oz. 75 cts.,
¼ oz. \$1.50, ½ oz., \$2.75, oz. \$5.00.

1914 NOVELTY PANSY SIM'S GOLD MEDAL MIXTURE

Was awarded the First Prize and Gold Medal at the International Horticultural Exhibition, held at the Grand Central Palace, New York City, April, 1913. This splendid mixture is the result of years of painstaking selecting on the part of Mr. William Sim (renowned for Sweet Peas), Cliftondale, Mass., and we are offering seed from the originator for the first time. Trade pkt. 75 cts., 3 pkts. for \$2.00, ¼ oz. \$3.50.

Boddington's Quality "English" Pansy

A superb strain of highly-colored flowers in great variety and immense size.

Our Mr. Bunyard, while visiting the Royal International Exhibition in London, was much impressed with these blooms, and strongly recommends this mixture to florists.

Trade pkt. (500 seeds), \$1.00; ½ trade pkt. (250 seeds), 50c.
¼ oz., \$2.25; ½ oz., \$4.25; oz., \$8.00.

SEED TRADE

The catalogue men are having their own troubles just now. First sections of the December editions usually go to press in August, but while all was ready as in former years the war in Europe came along and the question arose whether to re-arrange the pages—omitting impossible items—or to make an errata insert. The latter seems to have most advocates; but in large editions the reductions in number of pages counts a good deal when the matter of postage is considered.

Another puzzler is the zone system. Whether to make a flat rate as in the old days of the eight-cents-a-pound; or quote according to distance. The main objection to the latter course seems to be that prospective buyers do not enjoy doing a lot of figuring to get at the cost, consequently the house that quotes a flat rate would be likely to get the business. There might be a loss in a few cases, but the gain in other directions would more than make up for that. The mail-order business owes its success very largely to the ease and simplicity of ordering with the all important proviso of price delivered. Firms like Sears, Roebuck & Co., never could have built up their wonderful business without that feature.

Latest advices from the fancy grass-seed districts in Holland give a rather gloomy view of the situation owing to the transportation difficulties in moving the seed in the rough from the fields to the warehouses for cleaning and putting in marketable shape. Some items will undoubtedly be very short and this combined with the no supply at all from Germany sources is sure to put an abnormal strain on the Holland supplies. Messrs. Barenbrug, Burgers & Co., writing under date of August 14 state that things are all upset, but that they are straining every nerve to meet the situation and will do everything humanly possible to satisfy all demands. Naturally they may be expected to give the preference to their old and steady customers first; but without prejudice to any. As is already well known the financial situation over there is very acute and bankers have curtailed their usual accommodations. Business is being done on an absolutely cash basis. This means a great curtailment unless the credit system can be again established and there seems little hope of that at present.

GEORGE C. WATSON.

In sustaining a protest by Henry & Lee, the Board of General Appraisers holds that fern balls are not to be regarded as nursery or greenhouse stock as assessed by the Collector, but are entitled to enter at the rate of 20 per cent. ad valorem as unenumerated manufactured articles. The Collector's assessment at the rate of 25 per cent. ad valorem is reversed.

WATER HYACINTH AS A FIBER PRODUCER.

(Consul General George E. Anderson, Hongkong, China.)

As a result of the usual spread of the water hyacinth (*Eichornia cras-*

sipes) in the waters of Cambodia and other portions of Indo-China there has been considerable investigation in that colony as to possible uses the plants could be put to as a means of clearing the rivers for navigation.

In connection with the discussion a French professor named Perrot has announced to the Chamber of Commerce at Saigon the results of experiments he has made with the plant as a fiber producer. He has extracted the fiber from the stock by means of a Ducheman machine and finds that after drying, preferably by gradual process, it can be made into serviceable rope and twine as well as coarse thread suitable for matting and sailcloth, and its use in Indo-China particularly is possible in bags for rice and other grain exports in place of the jute bags now imported. On a native loom it affords a strong flexible cloth of about the same quality as jute. The fiber takes dyes readily and has high tenacity. Its weight is about the same as that of jute, but can be reduced by treatment with chrome alum, which makes the product waterproof. By the process followed and carried out by native workers 100 kilos (220 pounds avoirdupois) of green stems yields 4.5 kilos (9.9 pounds) of fiber, as compared with from 3.5 to 4 per cent of fiber from sisal.

LOOKS LIKE A RASCAL.

New Brunswick, Aug. 14.—A term of three months in the county jail and a fine of \$200 was the sentence imposed yesterday afternoon upon Oliver J. Rise by Judge Peter F. Daly on a charge of selling bad seed to farmers. There were two indictments against him. The State Agricultural Experiment Station assisted in preparing the case against him.

Farmers throughout Mercer, Hunterdon, Bergen, Somerset and Middlesex counties were interested in this case. It was alleged by the state that Rice had sold millet and clover seed for No 1 red clover. He had paid \$1.75 a bushel for the millet and had sold it as red clover for \$10 a bushel, it was said. Harvey S. Clayton and Harvey S. Dey of Dayton testified yesterday to buying the seed. Neither had planted it after it had been analyzed.

The testimony showed that Rice had been operating in Middlesex County at Jamesburg, Rhode Hall, Spotswood, Cranbury, Plainsboro and Monmouth Junction. Rice did not take the stand, his counsel, August C. Streitwolf, declaring that he did not want his client to give any information to the State seed analyst.—*Newark, N. J., Evening News.*

A FRAUD.

We have been notified that a young man has been operating in Massachusetts, claiming to be a grandson of Peter Henderson, and has succeeded in obtaining money from some florists. He is a fraud pure and simple and the trade should be warned against him.

When writing to advertisers kindly
mention HORTICULTURE.

Of Interest to Retail Florists

Penn, the Florist, purchased from F. R. Pierson Co., their entire exhibit of specimen nephrolepis displayed at Mechanics Building.

Frank M. Ross, Philadelphia, has purchased the 52nd street flower store of the Century Flower Shop from H. H. Battles, and will open same about Sept. 5th and run it under his own name as store number three of "Ross the Florist." This marks another step forward for one of Philadelphia's most enterprising retailers.

In the haste of Convention week we overlooked mention of the floral design sent from Knoxville, Tenn., to Rome, Ga., for the Wilson funeral, to the effect that it was 8 feet high by 4 feet wide and composed of America and Niagara gladioli, lily of the valley, White Killarney and Golden Gate roses, lilies, white and lavender asters. It was the work of Chas. L. Baum.

Chicago—John Mangel opened his new store in the New Marshall-Field Annex Bldg., last week.

H. C. Rowe is to open a wholesale and retail store at 160 North Wabash Ave., about September 15.

On August 22, Mrs. Lindon opened her new store at 828 East 47th St., to be known as the Drexel Floral Shop.

Marshall-Field & Co., will open a floral department early in September. They are fitting up a department extending fifty-five feet and facing the reception room on the third floor, and which will no doubt cut quite a feature in the floral trade in Chicago.

Mamaroneck, N. Y.—Thomas Skinner has purchased land on Post Road, on which he will erect houses. For the last three years he has been employed on the Hallet place.

"The Convention Number of HORTICULTURE is well and attractively arranged and certainly is a most creditable edition."

CLUBS AND SOCIETIES

THE LANCASTER COUNTY FLORISTS CLUB.

On account of the S. A. F. meeting conflicting our regular meeting was held on the 13th, one week earlier than usual. At the home and farm of our president, B. F. Barr, a very attractive hour was spent inspecting his nurseries, large in every respect, in the number of varieties of trees and shrubs and in the quantity of each. His farm is a model all the way through.

About 4 P. M. games were started, in which George Dickel and John Schoenberger were the champions at quoit pitching, T. J. Nolan in croquet and Jacob Fleer in the bowling on the green. Mr. Fleer not only was champion but outclassed every one by his brilliant delivery of the ball.

A lunch was served by Mrs. Barr, assisted by Mrs. Charlie Eichler and Mrs. Chas. Edgar on the veranda.

At 7.30 the meeting was called to order and a motion was carried unanimously that we send \$10 toward the Smith Memorial and \$5 toward a bowling prize at the S. A. F. meeting in Boston. Considerable discussion was had over a letter received, asking the club's definition of an amateur, the writer of the letter claiming that while he sold about \$50 worth of stock during a season he was an amateur because he did not get the greater part of his income from it. The final decision was the dictionary definition of the word, that "an amateur is one who follows an art or profession for the love of it and without gain" so that a man who grows flowers for the love of them and sells them is neither an amateur nor a florist but a distinct species of his own as yet unnamed. Harry Rohrer read a delightfully descriptive paper on his recent trip to Europe and the British Isles.

Visitors present were T. J. Nolan of Tonawanda, N. Y., and A. H. Schaffer of York, Pa. Just before time for the car back to the city the writer presented Mrs. B. F. Barr a book as a gift from those present and as a memento of the occasion which was so delightful that it will likely be an annual occurrence.

The next meeting of the Club will be on Sept. 17th, and a review of the S. A. F. meeting given by the writer and a paper on the florist business from a retailer's point of view by Chas. Edgar.

AMERICAN ASSOCIATION OF NURSERYMEN.

At the June convention of this association, Secretary John Hall tendered his resignation, and after considerable discussion, during which regret was expressed that the secretary felt it his duty to sever his connection with the association, the selection of his successor was vested in the Executive Committee, Mr. Hall being re-elected to serve until advised that his successor was appointed. The committee, consisting of Messrs. J. H. Dayton, Painesville, Ohio; Thomas B. Meehan, Dresher, Pa., and J. B. Pilkington, Portland, Oregon, subsequently inter-

viewed Mr. Hall, who agreed to continue if the association could see its way clear to make such addition to the compensation as will enable him to employ clerical help for detail work, &c. The Executive Committee, through its chairman, Mr. Dayton, has advised Mr. Hall of their unanimous agreement to his request, and of his selection to succeed himself.

1915 Convention June 23-25.

At the Cleveland Convention Secretary Hall was instructed to submit a referendum to the members as to choice of date for the holding of the annual meeting, to be held at Detroit, Mich., in 1915. Out of 436 postals sent out 250 were returned up to August 25th, the count showing that 190 prefer the fourth Wednesday in June. The postals were sent out August 5th and the count made August 25th.

AMERICAN GLADIOLUS SOCIETY.

As briefly reported in our last issue the fifth annual meeting of the American Gladiolus Society was held at the Copley Square Hotel, Boston, Mass, at 2 o'clock, Aug. 19th. The meeting was opened by President Chamberlain. The minutes of the Minneapolis meeting were read by the secretary and approved. The report of Treasurer Cropp showed receipts of \$785.46 and expenditures of \$314.50, leaving cash on hand \$470.96.

Mr. Cowee reported that the appropriations for the work of the investigation of diseases at Cornell had been discontinued by the state of New York but that the work was, however, being carried on satisfactorily. Prof. Beal reported that the work at the trial grounds was now in charge of Mr. Hoddis, his assistant, who was very competent and thorough in this work and urged all members to visit the grounds.

Resolutions presented by A. Cowee for revision of the by-laws and pledging support to the publication known as the Modern Gladiolus Grower were referred to a committee of three with Montague Chamberlain, chairman. It was voted that the executive committee consider the advisability of holding a midsummer exhibition during next year. Following a lengthy discussion regarding the status of amateur and professional exhibitors it was voted to refer this question to the committee on by-laws. For list of officers elected see issue of August 22.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The monthly meeting of the W. and F. Society was held Friday evening, August 14. A resolution of thanks was extended to all those who in various ways helped to make the outing so enjoyable. Several substantial additions were again received at this meeting for the premium lists of the fall show. The schedule will be issued in September and will be much the same as that of last year, with but few alterations in the classes. There will be several additional classes for which special prizes are offered. A. L. Mar-

shall was highly commended for a display of choice named varieties of gladioli consisting largely of the new imported sorts. Fred. Lagerstam was accorded a vote of thanks for pink phlox and heliopsis, Statice latifolia and asters that were remarkable for size and length of stem. A vote of thanks was extended to P. W. Popp for a display of pansies. The next meeting will be held September 11.

P. W. POPP.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The monthly meeting of the Nassau County Horticultural Society was held at Pembroke Hall, Glen Cove, N. Y., on Aug. 12th. Special prizes for the fall shows were received from Weeber & Don, Bon Arbor Co., H. A. Dreer, H. S. Ladew and Mrs. Bucknall. Monthly awards were as follows: Vegetables, 1st F. Honeyman, 2nd W. Noonan. Hon. mention to F. Titus for globe artichokes, Jos. Robinson for Ailsa Craig onions, and John Lewis Childs for gladiolus. Owing to shortness of time for preparation it was decided not to exhibit as a society at the N. Y. State Fair at Syracuse. Exhibits for next meeting Sept. 9th, 12 asters, 12 gladioli, 1 musk melon.

HARRY JONES, Cor. Sec'y.

The St. Louis County Growers' Association will hold its regular monthly meeting Wednesday, September 29.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The exhibition which this society put up in Horticultural Hall, as a happy after thought, in honor of the visiting horticulturists filled all three halls in the building with a glowing display that was beautiful in the extreme and gave much pleasure to hundreds of the S. A. F. visitors as well as thousands of the local public.

The leading feature was the sensational display of gladioli by William Sim which was declared by all to be the finest in quality and effect they had ever seen. The collection almost completely filled the large lecture hall and comprised the best of the modern varieties. It proved impracticable for James Marlborough to duplicate his gorgeous display of fancy leaved caladiums of the previous week but R. & J. Farquhar stepped into the gap with a collection of fine varieties which were effectively arranged around the fountain basin. The aconitums from Mt. Desert Nurseries made a grand show. The rest of the story may be drawn from the list of awards which follows:

Gold Medal—William Sim, for excellence in display of gladioli.

Silver Medals—B. Hammond Tracy, artistic display of gladioli; John Lewis Childs, display of named gladioli.

First Class Certificate of Merit—Jackson Dawson, display of hardy heaths.

Cultural Certificate—William Sim, for gladioli.

Honorable Mention: Old Town Nurseries, display of gladioli and herbaceous flowers; Miss Mary Flood, display of China asters; R. & J. Farquhar & Co., display of herbaceous flowers; Mrs. Frederick Ayer, display of fuchsias; Walter Hunnewell, display of *Buddleia variabilis* manifica; Mt. Desert Nurseries, display of aconitum; Eastern Nurseries, display of herbaceous flowers; T. C. Thurlow's Sons Co., display of phloxes; W. W. Edgar Co., display of commercial decorative plants; F. J. Ren, display of phloxes; William Whitman, display of China asters and herbaceous flowers; E. B. Dane, display of orchids; A. W. Preston, display of hybrid tea roses; William Nicholson, display of *Buddleia* varieties; Faulkner Farm, collection of new gladioli originated by Wm. Pfitzer, Stuttgart, Germany; Miss Isabelle Miller, sweet peas; Mrs. Frank Merriam, geraniums; Wilbur D. Moon, display of cut dahlias; Mrs. E. M. Gill, display of cut flowers.

NEWPORT FLOWER SHOW.

The flower show of the Newport Garden Club and Newport Horticultural Society, which was held August 13, 14 and 15 at "Belcourt," was a decided social success and goes on record as being the best conducted affair of its kind ever held in Newport.

"Belcourt" is the residence of Mrs. O. H. P. Belmont, and its spacious carriage house, court yards, and the lawn with its shady nooks, proved to be an ideal place for the affair. The Garden Club, which is composed of the elite of the summer colony, financed the layout of the grounds and employed experts for the various branches of the work, with Arthur Herrington, of Madison, N. J., as manager, aided by a committee from the Horticultural Society. In the evening the grounds were illuminated and dancing was indulged in in a specially prepared pavilion.

Among the many things included in the premium list, gladioli were most extensively exhibited, B. Hammond Tracy making a grand exhibit, which was judged the best feature of the

THE JOHN C. MEYER THREAD CO., LOWELL, MASS.

In writing advertisers kindly mention HORTICULTURE.

Do not be deceived into using cheap inferior green threads which other parties claim are the MEYER GREEN SILKLINE. Be sure you get the real MEYER GREEN SILKLINE, and do not get any bluffs. MEYER GREEN SILKLINE is full measure and weight to the spool, and will go twice as far as the ordinary cheap green threads on the market. The price on the MEYER GREEN SILKLINE is \$1.25 per lb., discounts in case lots of 100 lbs. and upwards. If you cannot obtain the MEYER GREEN SILKLINE from your jobber, order direct, and we will see that you get the real, genuine MEYER GREEN SILKLINE.

show and winning a handsome silver cup from the Garden Club, also a silver medal from the Horticultural Society.

A valuable silver cup for the second best exhibit was awarded to J. Lewis Childs for an unusually attractive display of gladioli arranged by A. T. Bunyard, of New York and Newport.

The Stumpp & Walter Co. cup, for a collection of vegetables, was won by J. B. Urquhart, gardener for R. L. Beekman. Another cup, offered by R. & J. Farquhar & Co., for best display of hardy perennials, went to the Palisades Nurseries.

The best competed class was one for six vases of outdoor flowers tastefully arranged, there being nine competitors making an excellent showing. James Bond, gardener for Mrs. H. M. Brooks, was the first in this class, and Daniel Hay, gardener for Mrs. French Vanderbilt, was second.

In other important classes the following were the most successful exhibitors:

James Boyd, gardener for Vincent Astor, specimen greenhouse plants; William McGilvery, gardener for Stewart Duncan, hydrangeas; Edward Jenkins, Lenox, Mass., campanula pyramidalis; Paul DeNave, Fall River, Mass., orchids; Fred E. Lewis, Ridgefield, Conn., grapes, peaches and nectarines; Arthur Griffin, Marion, Mass., gladioli; David Roy, Marion, Mass., fuchsias; R. & J. Farquhar & Co., Chinese and Japanese lilies; Mrs. John, New Bedford, Mass., dahlias; George L. Stillman, Westbury, R. I., dahlias; H. A. Dreer, water lilies; Wilson's Nurseries, conifers; F. R. Pierson, evergreens; J. Robertson, palms and dahlias; Gibson Bros., yellow flowers; Sisson & Thurston, dahlias; J. B. Urquhart, ferns, gardenias and roses; James Watt, tuberous begonias and glorias; Oscar Schultz, bay trees; Daniel Hay, geraniums and gladioli; James Bond, groups of greenhouse plants; Hugh Williamson, miniature garden for which he received a silver medal.

The judges of the show were John T. Allen, A. S. Meikle and Bruce Butterton, of Newport; Robert Johnston, of Southboro, Mass.; Maurice Fuld, New York, and Mr. Cruikshank, of the R. & J. Farquhar Co.

On the evening of the second day of the show Mrs. C. H. Hoffman, who is the leader of the Garden Club, provided a dinner at the Bellevue Hotel for the workers at the show, visitors and officers of the society. After an excellent dinner had been fully enjoyed, President MacKay called on the following gentlemen for remarks: Col. A. K. McMahon, A. Herrington, John Hay, Alexander MacLellan, Maurice Fuld, John B. Sullivan and B. Hammond Tracy. All speakers had praise for the show and its management and predicted a still more successful one of its kind for next year.

JAMES ROBERTSON

GLADIOLUS SOCIETY OF OHIO.

List of Awards at the Cleveland Show, Aug. 14-15, 1914.

Flower Market Reports

BOSTON Still a very dull market, with the lightest demand ever experienced in August. The wholesale marts are literally swamped with roses. Asters are coming in plentifully and of splendid quality. Gladioli are also still abundant and good. Sweet peas are quite scarce. The best demand is enjoyed by American Beauty roses, lily of the valley, adiantum and orchids. The new crop of carnations has commenced to come in, short-stemmed but good, White Perfection showing particularly fine form and fully justifying its name.

Trade has improved
BUFFALO slightly the past week, though there was a demand last week for good asters and double white Killarney roses. Weddings are beginning to come on and floral work has been more in evidence, calling for lily of the valley and other good flowers. Gladioli have been overflooding the market but it now seems as if the heaviest crops are over. The market is in much better condition and things have brightened up somewhat. There are plenty of short roses, lilies and other stock.

The hot weather which
CHICAGO has prevailed the entire week has had a very discouraging effect on the market. Stock in all lines has accumulated to such an extent that it is impossible to move

it at almost any price. Beauties and other roses have suffered severely—quality deteriorated to a marked degree, most of the stock received being open and soft. At the present writing the weather has turned much cooler and it is hoped that this may continue. Carnations are more in evidence each day; length of stem is increasing somewhat, but the great bulk of the stock is still short-stemmed, however. Gladioli are back in the rut again, receipts being very heavy and demand slow. Asters are plentiful but really first-class stock is short of demand; the inferior grades move slowly. Lilies and lily of the valley are fairly active, supply being about equal to demand.

Gladioli and asters
CINCINNATI are at their best. The first cosmos and dahlias are in the market. With the cooler nights the roses have improved greatly. The first of the cuts from the young carnations are on hand. It is just the overlapping of the flowers for the respective seasons. Business is on the whole rather poor. There is plenty of stock of all kinds, but the demand is rather weak. A few flowers such as choice asters sell readily, but the great bulk of the week's offering moves slowly if at all. Prices are low, so that with the limited call for stock the aggregate sales do not run into large figures.

Flower Market Reports

(Continued from page 1)

NEW YORK We are sorry to have to tell again the thread-bare tale of congested wholesale market and utter absence of demand for anything in the line of flowers, but it cannot be helped. The same conditions exist as regards choice quality goods as in the low grade. Nothing is exempt. American Beauty, lily of the valley, roses, asters, gladioli, everything—in the same predicament. It is really a very serious situation, with no apparent rift in the cloud as regards the future. We hope to be able to say something more encouraging next week.

PHILADELPHIA Business is as good as last year for same period but a much larger quantity of stock is arriving—the increase being especially in asters and gladioli. All the good asters are easily sold but there is an immense lot so poor that they can not be disposed of at any price. The gladiolus situation is not so bad although here also there is a large percentage of only fair quality. Beauties are improving right along, with the new crop locals showing up in good form. Roses of all kinds are plentiful. Lilies are very good and more than can readily be used to good advantage. Orchids scarce. Lily of the valley plentiful. Lots of outdoor subjects such as tuberose, hydrangeas, tritomas, sunflowers, etc.

ST. LOUIS The week opens quite cheerfully with rain falling which is badly needed. The wholesalers have had another dull week and the receipts seem even heavier than the week previous, especially so in roses. In these the price is so low in big lots that hardly express charges are paid. Low prices prevail in all grades. Stock is very heavy in asters and gladioli with the demand light. Good quality in carnations is scarce, no over-supply coming in. There is an abundance of lilies but lily of the valley and sweet peas are scarce.

CHICAGO NOTES.

The store windows are still gay with water lily blooms. With the banks of garden grown flowers and an occasional vase of some of the new roses, these are the chief feature of window displays.

Many of the Chicago visitors to the Boston Convention are enjoying side trips to New York, Philadelphia and other points of interest in the East and will not return home until later. But so far as heard from, those who have returned are unanimous in pronouncing this year's convention "the best ever" and can not say too much in praise of Boston hospitality and are looking forward to a trip to the far West next year, with San Francisco as the objective point and the special rate of \$55 from Chicago to San Francisco is an additional attraction.

"The Convention Number is a wonder. I congratulate you."

New York.

Aphine Manufacturing Co.

Manufacturers of Agricultural Chemicals
 MADISON, N. J.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

CAMBRIDGE, MASS.
LONG ISLAND CITY, N. Y.**"RED DEVIL" CIRCULAR GLASS
CUTTERS.**

Since the advent of the automobile with its numerous and varied headlamps of all sizes, the demand for circular glass lights for these has increased to a surprising degree. For the enterprising and economical motorist who wishes to replace his broken lights himself, the Smith & Hemenway Co., Inc., makers of the widely known "Red Devil" glass cutters and electrical hand tools, have just brought out a most effective and handy circular cutter at the popular price of 50c. It will cut cleanly and neatly from 2-inches to 20-inches in diameter. A larger size will cut up to 40-inch, and sells at 75c. The illustration shown below will give a general idea of this practical little cutter.

033

To meet the demand for a better tool of this class, Smith & Hemenway are offering a circular cutter, style 263, with hand-honed wheels which

263

will cut sharp, clean circles from 2-inches to 22-inches in diameter. The strong metal base around which the cutter revolves, is lined with rubber to prevent slipping and no unusual deftness is required to cut perfect circles with this tool. Both cutters are supplied, of course with "Red Devil" cutting wheels, on the wonderful cutting powers of which, the Smith & Hemenway Co., have largely based the business success which is theirs today.

NEWS NOTES.

WHEN YOU BUY—GET A KROESCHELL
"THE BOILER OF GENUINE EFFICIENCY"

Expressions from Men Who Know Boilers

Get the Kroeschell First

"We like the Kroeschell Boiler very much. It gives entire satisfaction and it is so easy to fire. I will trade you the two cast iron sectional boilers for another like the Kroeschell I have."

(Signed) FRED PONTING,
July 16, 1913, Cleveland, Ohio.

Kroeschell Best of All

The Kroeschell Boiler I installed last year usually runs from 10 p. m. to 6 a. m. without attention. I do not have the least trouble to keep temperatures in the coldest weather. The boiler has given entire satisfaction.

The Kroeschell is the best boiler we have ever handled.

(Signed) CHARLES TOTT,
Madison, N. J., June 30, 1913.

Kroeschell Replaces Cast Iron

The Kroeschell has replaced three cast iron sectional boilers, and it certainly has given entire satisfaction.

It only takes a few words to express the good quality of your boilers, and they are as follows: "Of all firms handling boilers and advertising them truthfully, the party buying a boiler would have to get the Kroeschell, as you are certainly advertising nothing but facts."

(Signed) ALEXANDER A. LAUB,
July 18, 1913, New Hamburg, N. Y.

Kroeschell Replaces Cast Iron

We are heating 6,000 sq. ft. of glass with the Kroeschell House Boiler you furnished last fall, and we think it can take care of more.

We maintain a temperature of 60 degrees in the greenhouses and have no trouble keeping temperatures, even in the coldest weather.

The boiler does not require attention after 9.00 p. m., except in the coldest weather, when we bank at 11.00 p. m.

The boiler has given entire satisfaction. We doubt if your boiler could be improved upon, it is by far the best we have ever used, and we've been using heating system for the past 10 years.

(Signed)
THE AVENUE FLORAL CO.,
E. W. Eichling, Sec'y,
New Orleans, La., March 3, 1913.

Kroeschell Replaces Cast Iron

I am heating between 17,000 and 18,000 sq. ft. of glass with the No. 12 Kroeschell, maintaining 50 to 54 degrees in the greenhouses.

I have night fireman and we fire about every hour in extreme cold weather, but in ordinary weather only two or three times a day. I have been using the Kroeschell for the last firing.

I have used three different makes of sectional cast iron boilers, but I have come to the conclusion that under any consideration,

GREENHOUSE GLASS

OUR PRICES WILL PROVE THIS.

CHICAGO, ILL.

The portion of our houses shown by the dark is entirely self-sustaining and entirely independent of the side posts for its support

Vital Points in Safe Framing

WHEN we first began building the big, wide iron frame houses many of the growers felt that in proportion as the house was made wider that the eaves and posts should be made heavier to stand the "side thrust" that would come from the weight of all that big roof. On first thought it did look so. But we are using the same sized angle iron eave plates on our 80 foot houses as we first did on our 40 footers. It is a happy happening that greenhouse engineering mathematics proved that it could be so. To have increased the eave shade would have been a serious objection to wide houses.

The truth of the matter is—one of our houses would stand rigid and entirely self-sustaining if that part of the house between, and including the columns, were standing entirely by itself as shown by dark colored portion of above section.

Framed as we frame and mathematically truss them, there is only a *direct down pressure* on the columns, so far as the weight of the frame is concerned.

That portion of the house on either side of the columns as shown in light in the above section, is simply a leanto.

The side posts you can now see, support only a portion of the weight of the roof from the columns to the eave.

The posts do, however, have an important part to do in taking a share of the strain in case of high wind pressures. So you see it's one thing to think a construction "looks good," but it's quite another to know it's good as it looks *before it's built*. Our engineering experts can't tell by looking at a construction design whether it will stand the snows and blows. But after hours and days figuring, they *can tell to a certainty*.

If you want a house that's surely safe and sure, then let's get together and talk it over.

Say when and where and we'll be there.

DREER'S ARAUCARIAS

The chances are that there will be no imports of Araucarias from Belgium this fall which is certain to result in a scarcity of this plant for the holidays. We are carrying our usual large stock of spring imported plants, and we would advise you to cover your requirements. There has been no advance in price, and the plants are of the usual good quality.

Araucaria Excelsa

4 inch pots, 5 to 6 inches high, 2 tiers....	\$.30 each
5 inch pots, 10 to 12 inches high, 3 tiers....	.60 "
6 inch pots, 12 to 15 inches high, 3 to 4 tiers	.75 "
6 inch pots, 14 to 16 inches high, 4 tiers....	1.00 "
7 inch pots, 18 to 20 inches high, 4 to 5 tiers	1.25 "

Araucaria Excelsa Glauca

6 inch pots, 8 inches high, 2 tiers.....	\$.75 each
6 inch pots, 12 inches high, 3 tiers.....	1.00 "

Araucaria Robusta Compacta

5 inch pots, 10 inches high, 2 tiers.....	\$.75 each
6 inch pots, 12 to 14 inches high, 3 tiers....	1.25 "
7 inch pots, 14 to 16 inches high, 3 tiers....	1.50 "

Ficus Elastica

A splendid lot of 4 inch pots, 10 to 12 inches high, \$3.50 per dozen; \$25.00 per 100.

Pandanus Veitchi

A grand lot of well colored plants, 6 inch pots, exceptional good values.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Primulas

Watering must be done once, twice or perhaps thrice a day, unless the pots are plunged, as they seldom are. The sashes should be removed after four in the afternoon; in fact, they are not needed at all, except during heavy rains so long as lath shading are used and frost keeps away. The night dews greatly benefit the plants, and during hot days they should be sprayed over several times. Pick off any flowers which appear and do not allow the plants to become pot-bound. There is more danger of this occurring with the robust growing *P. malacoides* and *P. Kewensis* than with the more moderate *P. sinensis*, *P. stellata* and *P. obconica*. Usually 5-inch and 6-inch pots are suitable for *obconica* and *sinensis*, but *Kewensis* and *malacoides*, while they will flower in these sizes, are better in 7-inch and 8-inch pots. Give them a compost of fibrous soil three parts, old cow manure two parts and the same of leaf mold with a little sand.

Cyclamen for Next Year

This seed should be sown now without delay as it takes from fourteen to fifteen months to bring them into flower. Be sure to procure fresh seed of the very best strain from a reliable seed-man. Mix up a compost of new loam two parts, peat or leaf mold two parts, and one part of sand. See that the pans are well drained with plenty of crocks. Upon the crocks spread some sphagnum moss and then fill the pans to within half an inch of the top, with the compost, but the last half an inch should be finely screened. Press the surface firm and absolutely level, water thoroughly and after they have drained out scatter seed all over the surface. I find it a better plan to sow the seed so that they stand about half an inch apart each way and a quarter of an inch deep. When the plants have made two or three leaves, transplant them into flats containing three inches of light compost. These seedlings should have a warmer house than the plants which are about to flower—58 to 60 degrees at night is about right. The little seedlings should be kept on a shelf well up to the glass.

Dutch Bulbs

It is not at all necessary to box all the bulbs you force as soon as received. Unlike the loose-scaled lily bulbs, these tulips, etc., take no harm from being kept out of the ground for a month or more, providing they are in a perfectly dry cool shed. To have good tulips as early as the latter part of January it is necessary to box some

bulbs at the earliest opportunity. They must be rooted or they will not force. After filling the flat quite lightly with the compost squeeze the bulbs into the soil until the top is about even with the top of the flat. A little soil thrown in to fill up between the bulbs and the job is done. Put the flats outdoors on the ground in beds of convenient size and, after a good soaking, cover them with three inches of soil.

Hydrangeas

Hydrangeas yet in the open field should now be lifted and potted. If left in the field much later the large branches are apt to grow to an undesirable length, the plants gaining in spread but losing in shapeliness. The soil most suitable for hydrangeas is a heavy loam, plentifully enriched with old manure. The pots should be well drained and a size or two larger than those the plants would seem to require. After being potted up, the plants can still stay outdoors. A place under a bench in a cool greenhouse will be all right for them during the winter, when but little attention need be given, and only enough water to keep them from drying out entirely. This period of rest should last at least ten weeks, which will put the wood in condition for forcing later on. You never can expect hydrangeas to force well where the wood has not had time to come to full ripeness. Those grown in pots all summer will want the same period of rest.

Sweet Peas

Do the thinning out while the plants are small and put up the supports in time. To allow the plants to lie all over the bench is wrong. Don't ever allow five to eight plants per string and expect good results; two to three is enough; and, again, two plants will have a chance to branch out, and it is these branches that will make the plants and furnish the flowers. Heavy wire across the bench and six feet above, with strings between, forms a good support for the vines. The specialists consider 45 degrees at night enough and, only too often, failure with peas is due to too warm a house. The largest flowers, longest stems and healthiest plants we get in cool weather, so see that they have plenty of ventilation at all times. They like plenty of moisture at the roots. Watch out for green fly and fumigate at least once a week.

Starting the Fires

All warm and intermediate houses will require some heat in the pipes, even if you have to keep on a little air. Warm and intermediate stock are more liable to feel the sudden changes than cooler grown stock, so do not be too long in getting these fires started.

Sowing the seed We receive at this season of the year many interesting notices of local flower shows, initiated and conducted by amateurs and occasionally aided by the participation and encouragement of the florists of the neighborhood. Abstractly these affairs have not sufficient interest for the readers of HORTICULTURE to justify our giving space to any mention of them in our columns but in a broad sense they fill a very useful function as feeders to the growing sentiment of the public gardenward and the ultimate upbuilding of the commercial floricultural interests through this salutary influence. Village Improvement Societies and Children's Garden campaigns act as an incentive to the people to improve their gardens, adorn their porches and windows with plants and to make beauty spots of the waste places and the seeds-

man and florist will profit by the increased demand thus occasioned. So, by all means, extend a helping hand to such movements and the good seed thus scattered broadcast will yield an abundant harvest in due time.

War's burden

We notice that our several British contemporaries are emphasizing the necessity of more home-production of food stuffs in the present emergency and the economizing with what is now available. Gardens that have heretofore been devoted to flower culture to gratify the esthetic taste may in this great emergency be wisely given up to the raising of vegetables and fruit to help out the food supply. Our friends across the water have for the present more serious business before them than the pursuit of floriculture and it is impossible that the adverse influences of the terrific struggle in which their country has become involved should not distract their attention from this, the most peaceful of all avocations followed by mankind. We extend sincere sympathy to our distressed co-laborers of whatever race, across the seas, and express the sincere hope that the conflict may be quickly over and that they all may be soon enabled to resume their occupation of making the world brighter and sweeter to live in. We, on this side, can realize how true it is that "there is nothing like a great war to emphasize the blessings of peace."

Distress and opportunity

The first shock of the European war calamity having passed we now begin gradually to realize the resultant possibilities and probabilities which must be taken into consideration in all lines of commercial horticulture. Doubtless, in some phases we have overimagined the dire effects of the confusion on production and transportation of materials we are accustomed to get from Europe; in some respects the effect may be exactly the reverse of what we, on first thought, figured out. But, as a general proposition, there can be no question that this sad conflict will have a tremendous bearing on the course of our business here in America regardless of its duration or its outcome politically. For some it will mean stress and perhaps disaster; for others it will spell opportunity. The transportation problem, which at first seemed a hopeless derangement, appears to have been partially straightened out with prospects of gradual improvement, particularly so far as Dutch and British goods are concerned. But it seems to be generally accepted now that we must get along without lily of the valley or azaleas for the coming season at least. It must be left to American growers as to what shall take the place of these staple commodities in our flower markets. The opening is certainly favorable for the exercise of good business judgment and resourceful foresight. If this emergency should operate to lay the foundations of some substantial home industries which will tend to make the American trade independent of foreign supply and divert into the pockets of home producers the money which has been going abroad every year for plants and bulbs the present check will prove to have been a most propitious opportunity for commercial horticulture in this country, tending to conditions which we have long been hoping for.

The present time—youngest born of Eternity, child and heir of all the Past Times with their good and evil, and parent of all the Future—is ever a "New Era" to the thinking man. . . . To know it, and what it bids us do, is ever the sum of knowledge for all of us.—Carlyle.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Old Soil

With the planting all done the big heaps of old soil that have been taken out of the benches had better be carted away as soon as a chance presents itself. This old soil is excellent material to put on gardens or fields as it contains a good deal of nourishment, and will make good soil for all crops save roses. It is best not to allow this old soil to remain in heaps along the green-houses, for not only does it look very bad but it should be taken away to make room for the new sod heaps that should be put up this fall so as to be in good shape for the planting time next spring. Many will let it wait until winter, but it will be frozen then, and the roads and fields will be muddy, and the soil even if not frozen will be soaked with water so that it will be about twice as heavy as it is now, and whatever is saved on cheaper teams in winter will be lost again on the cost of doing the work, for it cannot be done as quick or as well in the winter as now when the soil is loose and dry.

Manure for Mulching

Do not neglect this, but see that it is turned over at least once a week and kept wet enough to keep it from burning. Do not apply any water unless it is needed, for if water is applied it is bound to leach the manure and that would be waste, to say the least. Leave the heaps of manure nicely shaped, and about two and a half or three feet deep. In turning start on one end and take a strip across the whole heap, taking care to break up all the big lumps, and thus get the manure down as fine as possible. Any long straw that will not decay had better be taken right out, for it will only make a lot of trouble all along. Keep the manure under cover if possible, so that the heavy showers do not get into it. Where it is possible to have a concrete floor under it, have the liquid all drain into a cesspool, and then use this to wet the manure with, or else use it as liquid manure.

Potting Soil

If none too much of the soil heaps were left after all the houses were filled it would be advisable to look around for a nice piece of sod, and turn this into a compost at once, keeping it wet all the time to encourage decay. As soon as the sods and manure are fairly well decomposed, turn the whole heap over once or twice to break it up, and get it into shape for potting soil when the propagating season comes around again. Needless to say, all glass and other refuse which is quite plentiful in soil at times should be removed as soon as it is seen, for it will make trouble some time or another. Growers who have ever experienced a shortage of soil for potting will know that there is nothing like being right there.

Curled Foliage

As I am a reader of HORTICULTURE and see by it that you answer questions, I wish to ask if you can tell me what is the matter with some Double White Killarney roses which

are badly curling in the leaf. These have been planted since June and they look like healthy plants. Have tried several methods, but they seem to curl just the same, both the young and some of the old foliage, and more the front benches than those at the back. In regard to watering, they have never been neglected, and they get syringed two and sometimes three times daily. Our other roses don't seem to be affected at all, and we grow Shawyer, Russell, Pink Killarney, Sunburst and Richmond; only the whites curl, so if you could give me a remedy through your columns, I would be much obliged. We grow in four inches of soil.
NEW LONDON.

As near as we can tell from your letter, there is nothing the matter with your plants, and the curling can easily be remedied by treating them a little different. You say the plants have been syringed as often as three times a day. This is a mistake, and is probably the cause of all your trouble. Plants that are free from spider will do very nicely if syringed once or twice a week, and then only on a clear day. The amount of syringing you speak of doing, would be apt to keep the air far too moist to produce good hard growth on the plants, and the new foliage as well as the old would be bound to be very soft and will burn as soon as the sun hits it on a clear day. If you are experienced in roses you will know what mildew is, and would know if this was what makes your plants ail. We would advise you to leave off all syringing for two days, keeping the plants plenty wet enough at the roots, and then syringing on the third day if the weather was all right. Air the plants freely, beginning with little air on the first day, and then gradually increasing the amount as they get accustomed to it. Do not shut the houses down at night, but carry at least an inch of air, especially if the houses are new and almost air tight. Do not let the temperature drop below 64 degrees at night even though heat has to be used. When syringing make sure that the plants are wet enough. If your soil is heavy it is dry quite often, although it looks as though it were quite wet. Water the plants along the front rows if necessary, about an hour before syringing. If watered and syringed immediately afterward they are liable to burn just the same, for they will not have had time to draw the water into the leaves where it is needed. If you are feeding any fertilizer that is rich in nitrogen we would advise you to stop it for a while until your plants harden up enough to keep their leaves from burning. Do not change everything all of a sudden, for then the plants would likely receive a serious check, but work the change around gradually, and then keep the plants a little cooler than usual for a while. We could tell better if you had mailed a few branches of the curled leaves wrapped in damp moss, so that they would arrive in a natural condition. If the plants have not had any lime since they have been planted, a light dose would help harden them up a little. Apply just enough to whiten the benches nicely, and then water it in. Blow a little air-slacked lime around the houses at night after each watering or syringing, and on wet drizzly days. This will help keep the plants hard enough to resist the rays of the sun, and not hurt them in any way.

A VISIT TO THE BERKSHIRE HILLS

The garden committee of the Massachusetts Horticultural Society this year, instead of making a number of isolated visits to various gardens, merged its entire season's work into one trip to the western part of the State, spending two days in inspecting a number of the notable estates in Lenox, Stockbridge and Lee. Headquarters was at the Wendell Hotel, Pittsfield, and the members of the committee with three invited guests made the rounds in automobiles under the guidance of several of the representative gardeners of that section, Tuesday and Wednesday, August 25 and 26 being occupied in this delightful manner and fourteen places in all being visited.

A Glorious Country.

The country was at its best after the frequent rains and the effect of the clear cool mountain air on all vegetation was apparent in the brilliant coloring of the annual and hardy perennial flowers which have been so lavishly planted in the grounds and gardens. The mercury had dropped to 38 degrees on two recent nights and golden rods, Aster Novæ Angliæ, Japan anemones and other subjects that wait for autumn temperatures were blooming, while many of the wooded hills already showed traces of fall coloring.

There is no more attractive and picturesque section anywhere than these far-famed Berkshire Hills. From every vantage point one views miles upon miles of heavily wooded hills and deep sombre ravines with blue mountains far beyond. Each one of the great estates seems to overlook and dominate the entire landscape, all being on high eminences more or less widely separated. Each estate has its own individual attractions, different in the architecture of the buildings, in the layout of the grounds and the style of planting. Most of them have a setting of noble old pines, hemlocks and elms. The roadside elms and maples of this entire section are grand beyond description.

The Gardens.

Each flower garden also has its distinctive style and outstanding beauty, but there were certain things that were common to all and astonished the visitors by their rampant luxuriance and superb quality of bloom. Among these were the asters, the like of which cannot be found among the choicest products in any of the flower

markets anywhere, the phloxes which for brilliancy, size of truss and profusion of flowers made a picture rarely equalled, and physostegias and pentstemons both of which seemed to revel in their environment. Last winter made awful havoc among the flowering shrubs and herbaceous perennials and vast quantities of annuals were planted this year to fill in the gaps. Of these the cannas, dianthus, nicotianas, Phlox drummondii, petunias, etc., make a gorgeous display.

Expansive lawns, with springy velvety surface such as we have been told one must go to England to see in perfection, here come very close to the English standard. The motor mowers are kept constantly going. Hidden behind protecting tree belts are the kitchen gardens which by the quality of the vegetables produced have given Lenox an invincible reputation in the annual exhibitions. Only in one respect did the visitors observe

with the fragrance of this lovely flower, plants in large pots towering seven to nine feet and arching under their weight of thousands of pure white and pale blue flowers reaching from pot to tips. The methods of bringing these plants to such floral perfection is to pot them, one year old, in the fall and care for them outside during the following summer until the flowers are about to open, when they are then taken into the piazza or room where the bees cannot get at the flowers to fertilize them. This prevents the formation of seed and the flowers last a long time. Such results are impossible in the open.

Some of the Summer Estates.

A word as to some of the more noticeable features of each place may be interesting for our readers, taking them in order as visited. All are in Lenox except as otherwise mentioned.

Allen Winden Farm, the home of

Charles Lanier, is under the care of A. H. Wingett, and comprises 200 acres. Here may be seen some fine sub-tropical bedding. A group of Thuja pyramidalis 25 ft. tall was much admired. This is one of the older estates and it is maintained in admirable completeness.

Elm Court Farm, the W. D. Sloane estate, 1000 acres, is in charge of Fred Heeremans. Here are many acres of fine lawn, fringed with well-placed tree belts.

The white marble slabs which form a pergola floor have been set an inch or so apart and the grass allowed to grow between, making a very pretty sight and adding the effect of antiquity. A house of crotons here came in for much admiration. Sixteen of the regular force of employees left this place to go home and fight for France.

W. B. Osgood Field's place, Highlawn, is in Lee. George Foulsham is superintendent. This stately estate overlooking the Tyringham valley is still in the constructive stage, being only six years in existence. Mr. Field met and personally conducted the visitors about the grounds. There is already an atmosphere of solid dignity which impresses one. The only flowers seen were scarlet cannas and scarlet salvias. Two rows of elms 40 ft high, which had been successfully transplanted three years ago were particularly interesting. The central feature of the plateau where the mansion stands is a large curbed bathing pool and fountain. A large part of the estate is maintained in wild condition.

ENTRANCE TO WHEATLEIGH

any lack and that was in the comparatively small attention to fruit culture. From apples down to currants the general absence of fruit gardens was commented upon.

The Greenhouses.

Magnificent conservatories are found on all but one or two of the estates visited and the several greenhouse building concerns can each point with pride to one or more splendid examples of their structural ability. If fruit is lacking outside it is not at all so under glass for many houses of grapes, nectarines, peaches, melons and figs afford evidence of the cultural skill of the gardeners in charge in this exacting department. Rose houses, carnation houses, palm houses, chrysanthemum houses all contribute to the luxury which is apparent everywhere and superb displays of tuberous begonias, gloxinias and other indoor subjects are frequent. The visitors were all most profoundly impressed by the invariable use everywhere of Campanula pyramidalis. Halls and corridors were lavishly adorned and filled

The far-famed Westinghouse estate with its lagoons, fountains and winding drives of crushed marble has stood still since the death of Mrs. Westinghouse and it has been intimated that Mr. George Westinghouse thinks of closing it up this fall for an indefinite period. We hope he will not so decide. It would be a great loss to Lenox and the value of such an establishment would decrease if abandoned much more than the cost of keeping it up, say under the continued management of Ed. J. Norman, who has been in charge for the past 25 years. Mr. Norman has a very fine petunia which he has named Erskine Park Belle. As a bedder it is distinct from and a close rival for the popular Bar Harbor Beauty.

Everybody liked the beautiful gardens at White Lodge, the home of Mrs. A. R. Shattuck, gardener Alex. McLeod. One of the most impressive features is a "white garden" planted with white petunia, antirrhinum, drummond phlox, nicotiana and Hyacinthus candicans enclosed by ivy-clad stone walls on three sides and an arborvitae and hemlock grove on the other, with a circular pool and fountain in centre. The "old-fashioned flower garden" is a glorious spot and well-interspersed with plots of green lawn which afford rest for the eye from the great blaze of color in the flower beds. There are no greenhouses on this estate, but a fine rockery and great variety of alpine plants more than atones for the absence of exotic bloom.

Bellefontaine, the Giraud Foster place, under the management of HORTICULTURE'S versatile correspondent, Ed Jenkins, has an Italian garden of considerable extent. The mansion is a veritable marble palace and the formal planting of the contiguous garden fits in well with the pergolas and richly carved vases and statuary which adorn the courtyard and grounds. About 200 acres is the extent of Bellefontaine.

The John Sloane estate, now Mrs. W. E. S. Griswold, comprises over 400 acres of which 30 acres are smooth-clipped lawn and 40 acres are wild woods. The view takes in Greylock and October mountains and an incomparable landscape. The range of conservatories is very extensive and a house of hippeastrums of high degree was particularly admired. A. H. Loveless presides over this wide domain.

Blantyre, the establishment of R. W. Paterson, held much of interest for the visitors. Thomas Proctor is superintendent and the orchid houses are a feature. He showed over 3,000 seedling hybrid orchids potted off. A remarkable carnation house planted last May and now full of buds, was declared by Wm. Nicholson to be the finest he had ever seen at this season of the year. All the trees, planting and surroundings of this place impress one with its restful quiet and stately dignity. The great and rare art collection here was opened for inspection and the invitation was eagerly accepted. Tall specimens of the seldom seen *Humea elegans* are used by Mr. Proctor in combination with the *Campanula pyramidalis* with pleasing effect in the hall decorations.

Miss Ada Kneeland welcomed the

party in person and conducted them through the beautiful gardens which are her own designing and her constant delight. This place is a work of art, a wonderful garden in a wonderful setting, arranged in a series of pictures along the brow of the hill and backed by terraces of alpine plants. It is a garden rather than an estate and its flower loving owner has made the most of the possibilities. A. H. Hetherington is the present gardener, having been there only since last March.

Groton Place, formerly the W. R. Robeson estate, is now the home of Greenville L. Winthrop and has been in charge of William Henry for many years in company of whom Mr. Winthrop personally conducted the party over the place, which is remarkable in that absolutely no flowers are used. But there are noble pine and hemlock forests, wide rolling and terraced lawns; marble parapets and stairways, woodland borders and vistas, skilfully developed under the direction of its proprietor who takes an absorbing interest in it all.

For twenty years George H. Thompson has superintended Wheatleigh, the 240-acre estate of C. de Heredia in Stockbridge and he has brought it to a high condition of beauty. The flower gardens are extensive and present a kaleidoscopic revelry of colors rarely equalled. Serpentine walks wind in and around the enclosures and marble slabs set in the grass make unique paths. *Agapanthus umbellatus* in tubs have been cleverly placed about the fountain basin in the formal courtyard.

Tanglewood, 230 acres, is the country home of R. C. Dixey of Boston and A. MacConnachie is superintendent. A glorious view overlooks the waters of Stockbridge Bowl. Tanglewood was made famous by Hawthorne who here wrote *Tanglewood Tales* and *The House of Seven Gables* and the site of the "little red house" is pointed out to visitors.

One of the most famous places in Stockbridge is Hon. Joseph H. Choate's estate "Naumkeag." Considerable topiary work is seen here, clipped hedges of native hemlock and pyramidal thujas being largely in evidence. There are stately groves and towering conifers in profusion, with a great diversity of landscape and surroundings most picturesque. George Breed is the gardener.

Mrs. Oscar Iasagi's place of fifty acres, "Clovercroft" is adjoining. Here in a one-acre formal garden and an excellent rose garden. Hemlock hedges line the walks.

The Banquet.

The banquet at Pittsfield on Tuesday evening was a notable event of far-reaching possibilities, for its keynote was "affiliation and co-operation" between the active forces of the Eastern and Western extremities of the state and marked the beginning of a new era of associated horticultural activity in Massachusetts. J. K. M. L. Farquhar, president of the Massachusetts Horticultural Society presided. In his introductory remarks, Mr. Farquhar dwelt upon the dominating sentiment of co-operation and the possibilities in closer relations between the two sections in the matter of exhibitions and lectures. President MacConnachie of the Lenox Horticultural So-

cety followed with appreciative words on behalf of his society and called for a unifying vote of his associates in recognition of the visit and its purpose, which was enthusiastically given. Then followed a long list of speakers. For the visitors there were C. W. Parker, Jackson Dawson, who told of his traversing the Berkshire forests thirty years ago collecting wild plants; Wm. J. Stewart who applauded the attainments of the Lenox gardeners and their prowess in the exhibitions; Robert Cameron who asserted that Boston needs Lenox help more than Lenox needs Boston's help; T. D. Hatfield, A. H. Fewkes, Wm. Nicholson, M. H. Norton and D. R. Craig. Local speakers were A. H. Wingett who expressed his delight that the Lenox society had now come to feel the pulse of the mother society; Ed. Jenkins who dwelt glowingly upon the fertile field for horticultural development in Massachusetts and suggested some progressive changes in exhibition rules and management in the interests of greater efficiency; S. Carlquist, E. J. Norman, whose words were full of inspiration to high aims; Walter Jack, George Foulsham and D. McLeod. Jackson Dawson, A. MacConnachie and Walter Jack contributed to the pleasure of all by their musical abilities and the affair closed with the time-honored chorus *Auld Lang Syne*.

PUBLICATIONS RECEIVED.

The Peony Manual, by C. S. Harrison, York, Neb.—This is the third edition of this useful publication, enlarged, improved and up-to-date. It gives complete directions for the propagation and cultivation of the peony, with good practical advice as to planting and flower production for commercial purposes as well as for garden adornment. The list of varieties is a carefully selected and representative one of 13 pages, comprising those that in the experience of the author, have proved to be of superior merit. The old price of 25 cents has been retained.

Floriculture as a Profession. Issued by the Department of Floriculture, Massachusetts Agricultural College, Amherst, Massachusetts.

A pamphlet full of inspiration and practical advice for the young man seeking to make floriculture his life work. Tells of its possibilities and opportunities, and describes the courses of instruction offered by the college in this department.

The requirements for admission to the college are based on the satisfactory completion of a high school course.

Expenses vary considerably, running from \$300 to \$500 a year. There are numerous opportunities for competent men to earn part of the money required. Students who are residents of the State of Massachusetts pay no tuition.

Inquiries relating to college work may be addressed to Kenyon L. Butterfield, President of the College. Correspondence dealing specifically with work in horticulture and floriculture may be addressed to Professor F. A. Waugh or Professor A. H. Nehrling, Amherst, Mass.

THE BOSTON S. A. F. CONVENTION.

Report of Committee on Final Resolutions.

The delegates to the convention of the S. A. F., Boston, August 18th to 21st, 1914, having been the recipients of many courtesies, desire to express their thanks.

We admire the hearty and efficient co-operation of the Allied Horticultural Interests of Boston, which made possible the delightful succession of entertainments during our entire visit. It is gratifying to note the sympathy and co-operation of the municipal authorities, which made possible the Convention Garden, which was so desirable a feature that it should be, if possible, continued at all future conventions. We appreciate the presence of the Hon. James M. Curley, Mayor of Boston, whose hearty words of sympathy and welcome signalized the formal opening of the Convention Garden. We also thank His Excellency David I. Walsh, the Governor of the great Commonwealth of Massachusetts, who, leaving the pressing duties of his office, came to express his welcome and his high appreciation of the work in which the members of the Society are engaged.

Mr. Joseph J. Lannin, president of the Boston American Baseball team deserves the thanks of a very large number of the visitors, who availed themselves of the invitation to games in progress during our visit. The ladies of the S. A. F. are enthusiastic in expressing their delight at the results of the efforts made in their particular behalf. In summing up we may say that nothing was left undone to make our stay in Boston both profitable and enjoyable.

Robt. Craig, E. G. Hill, Olaf J. Olson, Committee.

Addition to Report of Judges of Trade Exhibit.

We have examined the bolted steel purlin clamp exhibited and used in the construction of John C. Moninger Company greenhouses, and after carefully considering the good features of this fitting, we do recommend that a certificate of award of the highest mention be given to the John C. Moninger Company, Chicago and New York, for this fitting. This fitting is made for any sized pipe, and is of steel, galvanized. This bolted clamp fitting takes the place of the old-style split tee, and is a great improvement. The pipe support is placed directly underneath the pipe purlin, and the split fitting goes around the pipe purlin and down on the sides of the support. A bolt then passes through the split fitting and the pipe support. When this bolt is tightened and considering that the pipe support is close to the purlin, there is no possibility of the support swaying. The fitting cannot loosen and thus makes a tight clamp.

W. H. Siebrecht, Frank H. Traendly, Joseph A. Manda, Judges.

Department of Plant Registration.

Public notice is hereby given that as no objection has been filed against the registration of the Sweet Pea, Selma Swenson, by Vaughan's Seed Store, New York and Chicago, same becomes complete.

JOHN YOUNG, Sec'y.

Aug. 22, 1914.

MYRIOPHYLLUM PROSERPINACOIDES.

For many years past the splendid specimen of *Myriophyllum proserpinacoides*, or parrot's feather, which grows in the bowl of a fountain at the North front of the Treasury Department, has attracted thousands of visitors. Great care is given it and it

responds with rapid and luxuriant growth. Although beautiful at the present time it will require about two months more before it reaches its zenith and covers the entire bowl, itself of large dimensions.

REPLANTING RASPBERRIES AND ASPARAGUS

Editor HORTICULTURE:

I have an old raspberry bed that I would like to lift this fall and replant in another part of the garden. By doing this will they fruit next year as well as if I did not move them? Would you advise laying the canes down and protecting them this winter?

We also have an old asparagus bed that is surrounded by trees. Can these old plants be lifted and successfully replanted in another place?

Any information you can give me on the above subjects will be greatly appreciated by

A SUBSCRIBER.

If the raspberry canes are not too weak and if "Subscriber" can lift them carefully with considerable earth on the roots and then give them very careful winter protection, I am sure he would get a fair crop, but not a full one, as so much depends upon how the moving is done and also upon what kind of a winter we have. I would risk it and expect a fair crop. Lay the canes down.

The old asparagus roots cannot be moved with any degree of success. "Subscriber" had better start a new bed with good healthy young roots. He should plant one-year roots.

WILFRID WHITLER.

Concord, Mass.

The Official Trade Register for 1914 of the New Zealand Association of Nurserymen has been received. This includes the Seventh Annual Report and Balance Sheet of the Association.

THE WHITE FLY PROBLEM.

Editor HORTICULTURE:

The many times that the question was put to me at the S. A. F. trade exhibit in Boston, "What can be done to destroy the white fly?" leads me to believe that many of our florists have not yet discovered that nothing short of a continuous warfare, until all vestige of the pest disappears from the house, is the only successful remedy for combating the white fly. This is necessary whether the method employed is spraying or fumigating.

The following facts may prove interesting to some of your readers: Both the adult and young white fly succumb readily to most insecticides recommended for sap-sucking insects, but when spraying careful application is requisite so as to come in contact with them. After such an application the white fly will disappear from the house for some days only to reappear in most instances; but this is another brood hatched from the eggs which seem immune even from the deadly cyanide gas. As the fly is hatched out, spraying or fumigating should immediately follow and this should be persistently kept up, until all signs of the presence of the fly disappear, at intervals of five or six days. To overcome this pest a half dozen sprayings or fumigations are sometimes necessary. Many growers seem to be under the impression that the remedies they use merely "dope" the fly and that the return of the insects in a short time is due to their surviving from the "dope." This is not so, for the growers have several generations to fight until the eggs present in the house are all hatched and the broods destroyed as they make their appearance.

A new formula for spraying has recently been introduced, in the form of using cyanide of potassium diluted in water. I am not aware whether its advocates have experimented to discover what the effects would be on human life if this were applied to fruits and vegetables, or even to flowers which are freely handled and at times reach the mouth. There would appear to be much damage if they were sprayed even with a much diluted form of liquid containing the deadly cyanide of potassium. There can be no doubt that for leaf-eating insects cyanide diluted in water would be most deadly; but a warning should be sounded through the trade papers to those who may attempt to use it in this form that there is no poison more dangerous to handle, and that even an infinitesimal part reaching the tongue will prove fatal.

M. C. EBEL.

RECORD PRICE FOR POTATOES.

There is always something new "under the sun" and the latest game has been played on Mr. Blakemore, owner of the greenhouses on Speen street, West Natick. Some ingenious rascal pulled up his potatoes and then put the vines back in the ground again, so as to give the appearance of being undisturbed.

The loss of a considerable portion of the crop was discovered last week, and at the same time a lady's gold watch was found in the potato patch. The owner of the watch, evidently, has no desire to recover his or her property in view of the fact that a prosecution for theft probably hangs over them.

Notwithstanding the rise in the price of

POEHLMANN'S 'MUMS

2½ inch Pompons and Standards now reduced for quick and

FINAL CLEARANCE

200,000 late propagated extra fine healthy stock all varieties listed by us

\$2.20 per 100; \$20.00 per 1000

and be convinced that our choice commercial varieties are the ones that will bring you the largest returns for the amount invested. We have a fine healthy lot of nice soft plants in splendid growing condition, but we need more room and in order to move this stock quickly we are making **A BIG REDUCTION IN PRICES**. You can now buy any variety listed by us, Pompons or Standards, for \$20.00 per 1000—a direct saving of from 25 per cent. to 75 per cent. on our regular prices. Better hurry your order as this stock will not last long at these **SPECIAL PRICES**. Note the price \$2.20 per 100, \$20.00 per 1000.

CHRYSANTHEMUMS

EARLY—White—Smith's Advance, Oct. Frost, Virginia Poehlmann, Alice Salomon. **Yellow**—Chrysolora. **Pink**—McNeice. **MIDSEASON—Yellow**—Bonnaillon, Crocus. **Pink**—Enguehardt. **LATE—White**—Timothy Eaton. **Crimson**—Schrimpton.

POMPONS and SINGLES

NEW ONES—Chieftain—Pink Alice Salomon. **POMPONS—Yellow**—Krut, Skibo, Madge, Klondyke, Baby, Big Baby, Quinola. **White**—Waco, Alva, Kommit. **Pink**—Nellie Bly, Fairy Queen, Alvina. **Bronze**—Madam Laporte, Mrs. Beu. **SINGLE POMPONS**—White—Mensa. **Bronze**—Pauline. **Single Pink**.

SUPREME QUALITY ROSE STOCK

BEST PLANTS THAT MONEY CAN BUY. Growers are always on the lookout for quality rose stock. They realize that the best at the start is the cheapest in the end. When buying plants it is always best to secure your stock from people that have a reputation for producing the best there is to be had. You cannot get any better stock than that which we are offering, for we always aim to give the purchaser the best that our long years of experience enable us to do.

GRAFTED ROSES

Manufacturers, Sales Managers, Advertising Men, Editors and Publishers, Bear in Mind

THE ANNUAL CONVENTION

Of the Federation of Trade Press Associations, at the CONGRESS HOTEL, CHICAGO

September 24, 25 and 26, 1914

Three days which will be given over to a discussion of questions vital to the publishers and advertisers of the country. Three days, during which there will be several big guns and a lot of grape fired at many existing advertising and publishing fallacies. Three days of united effort to furthering the efficiency of Business Building through the Business Press.

This convention will interest the manufacturer, sales manager and advertising manager, as well as the editor and publisher. Your interests are interwoven with those of the Business Building Press.

So come and bring several members of your sales force with you. It will be a profitable investment of time. The Federation of Trade Press Associations includes in its membership 250 of the leading class, trade and technical publications of the country.

Its publications are read by millions of subscribers constituting the bone and blood and sinew of our country's technical and commercial development.

It stands for Truth and Honesty in Circulation and Advertising and the Highest Ideals in Business and Publishing Ethics. For further information address

**E. R. SHAW, Chairman Committee on Arrangements
537 South Dearborn Street, Chicago**

CATALOGUES RECEIVED.

Sluis & Groot, Enkhuizen, Holland Seed Crop Report and Prospects for Season.

Leamon G. Tingle, Pittsville, Md.—Price-List of Strawberry Plants, 1914. A good berry-growers' guide.

J. J. Wilson Seed Co., Newark, N. J.—Autumn Catalogue of Bulbs, Hardy Herbaceous Perennial Plants, etc. Pocket size, illustrated.

D. W. C. Ruff, St. Paul, Minn.—Catalogue and Price List of Choice Herbaceous Peonies. An extensive list including the fancy novelties of leading American and European introducers.

Thos. J. Grey Co., Boston, Mass.—Autumn Catalogue 1914. Bulbs, Hardy Perennials, Seeds for fall sowing and a complete line of Garden Implements, make this a very timely and useful publication.

Orenco Nursery Company, Orenco, Ore.—"Orenco Roses." This 24-page illustrated catalogue is devoted to roses exclusively. The list of offerings is extensive including many promising novelties.

Peter Henderson & Co., New York City—Midsummer Catalogue for 1914, A luscious dish of Fall-fruited Strawberry American "with fixings," in na-

tural colors forms an appropriate cover illustration to this very complete catalogue of summer trade material.

H. A. Dreer, Philadelphia—Autumn Catalogue, 1914. Hyacinths and Giant Trumpet Narcissi have been selected as cover illustration. These are done in duotone green with pleasing effect. The offerings in this catalogue cover the entire field of seeds, bulbs, plants and sundries for late summer and autumn purposes; 84 pages.

Sutton & Sons, Reading, England—"Sutton's Bulbs for 1914." A superb publication on a par with Messrs. Sutton's annual seed catalogue and a model of perfection in arrangement and in beauty of typographical work. A department of plants and vegetable and flower seeds for Autumn sowing is included. The section devoted to narcissi is a leading feature, with beautiful flower portraits.

Peter Henderson & Co., New York—Autumn Catalogues, 1914. An elegant and impressive publication, covers adorned with Dutch bulb garden pictures in colors in panel on white enamel surface. The compact tabulated system followed in the contents allows of the condensing of a very large amount of information and illustration within the 80 pages of this publication.

VISITORS' REGISTER.

Cincinnati—Sam Seligman, New York, N. Y.; Mr. McCabe, representing A. L. Randall Co., Chicago; Chas. Baum and A. J. McNutt, Knoxville, Tenn. and Mr. Jensen of Buck Co., Washington C. H., Ohio.

BODDINGTON'S "QUALITY" CHRISTMAS-FLOWERING

SWEET PEAS

WE ARE SUPER-HEADQUARTERS

All true stocks of Winter-flowering Sweet Peas will again be scarce this season. The winter-flowering Spencer types are almost a total failure owing to the exceptional season in California this Spring, and through the ravages of Aphids.

We regret that our stocks of YARAWA and ANITA WEHRMAN are entirely exhausted, also many other good varieties, but we can still offer the following while stocks last. Order at once to avoid disappointment—remembering that our stocks are true to name and while a little higher in price, will save you money in the long run.

ROSE QUEEN "ROSE QUEEN" is Orchid-flowering, borne on long stems, extremely free and early and of pink color most attractive, is a decided acquisition, and like all meritorious novelties is sure to be in demand wherever grown. Prices: Trade pkt., \$1.00; 3 trade pkts. for \$2.75; 1 oz., \$12.00.

THIS ADVERTISEMENT CAN BE USED AS AN ORDER SHEET

Remember, you may deduct 5% if cash accompanies the order.

	Oz.	¼ lb.	½ lb.	Lb.
...BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOWBIRD. An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting	\$0.25	\$0.75	\$1.25	\$2.00
...BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in latter part of August, flowers can be cut from Thanksgiving on during the Winter months	.15	.50	.85	1.50

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Impton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

The Import Situation.

Writing to you one week ago, Mr. Editor, we did not use a very cheerful tone about the import situation in the seed trade. The advices received during the past few days do not relieve the gloom. In fact they rather accentuate it. We hear, for instance, of 60 per cent of the flower of the seed houses of Europe, being called to the front; of crops unharvested; of transportation stopped; of general collapse and stagnation.

This applies not only to the belligerents but to a large extent also to the neutral nations. We have got our French bulbs all right and a large part of our Dutch. But how many more will we get? The ocean lanes may be free but how about the other conditions? How about the transportation from field to warehouse and seaport. As far as can be seen now we are facing a situation that calls for patience, wisdom, philosophy, from everybody.

The Cheapest Commodity.

One distinguished Englishman writes that most of his men have gone and that nearly all his horses were commandeered. He was allowed three hundred dollars a head for the horses, but nothing for the men. Another thing that seemed to loom large in his mind was that there would be no pheasant shooting this year. The situation over there seems to be like what the old fishwife described in the "Antiquary": "Herrings are dearer than men's lives." And the price of a pound of *Agrostis stolonifera* will be more considered than two hundred pounds of human being. Such is the madness of a mad world!

The Deluge.

The tremendous cost to every nation, neutral or combatant, both in the destruction of commerce and the feeding of fighting men is so great at this stage of the world's civilization and the nations are so interdependent on each other that it looks to an unprejudiced onlooker that the whole ghastly calamity must collapse in short order for lack of provender—or as Dugald Dalgethy put it "Provant." The very bigness of it must tend to bust it.

Humanity.

In the meantime we all suffer, whether engaged in export or import, for we all gain by both operations and not on one only as many suppose. This is a time to try men's souls and it behooves everybody to keep their heads level and their emotions under control; also to be willing to forget self-interest for a while and be for once real men in the brotherhood of men—"each for all and all for each."

GEORGE C. WALSON.

European Seed Outlook.

In a recent issue of HORTICULTURE we called attention to the possibility of American seedsmen receiving no seeds from Europe for the coming season's trade. It seemed a practical certainty that we would get nothing from Germany or Austria-Hungary, but there did seem a fair prospect of getting these stocks usually supplied by Great Britain, and possibly from France, Denmark and Holland. During a war waged with the savage energy characterizing the one now raging in Europe, changes are of kaleidoscopic rapidity, and it now looks extremely doubtful of getting any stock from France, and only a little less doubtful from Holland and Denmark. Up to within two weeks, Mr. Dicks, of Cooper-Taber Co., was very optimistic as to shipments from Great Britain, assuring his customers that there was scarcely a doubt of our seedsmen getting their usual supplies from the British Isles. Mr. Dicks generally extends his American tour into late autumn, but he is already about to sail for home, and before going expressed his conviction that some seeds may get through from Great Britain, but that anything approaching the quantities ordered will be received, looks like the long end of a good betting proposition. Under such conditions we repeat what we said in our issue of two weeks ago, that anyone who has to buy, should act on any quotations named now by a reliable dealer, as few if any of us fully appreciate the gravity of the situation. Should we have to rely wholly on stocks on hand, values of many items are likely to reach a higher level than ever known before, for it will surely dawn on every wholesaler that not only for the season of 1914-15, but for 1915-16 there will be little or nothing from Europe and particularly in biennials, as few if any stocks for 1915 seedling will be saved. This country has but a small quantity of stocks for seedling in 1915, and but few items at that, and it will require from two to four years to meet the requirements. About the only biennials produced in this country in sufficient quantities to be a factor in the general situation, are garden beets, carrots, salsify, onions and perhaps turnips and celery. What percentage of these go to make up the grand total we are unable to say at this time. We are advised that Mr. Dicks and the representative of David Sachs & Co. booked orders for considerable quantities of garden peas as also field peas. These will not be shipped and should New Zealand follow the lead of the mother country, there will be a considerable vacuum for American seed growers to fill in the line of peas. Inability to get any of the German grown field peas, will cause what are known as "Canada Field" to reach almost prohibitive prices.

Local Conditions.

There have been no material changes in crop conditions since our last report, but the very warm weather of the past week will greatly benefit late corn and in fact most late crops.

Most of the seedsmen are home from more or less restful vacations, and are carefully studying their inventories to learn what shorts they must

¼ Natural Size.

Michell's Mignonette "COLOSSAL"

A strain which cannot be surpassed for forcing; a robust grower, and produces immense flower spikes. Our seeds are saved from greenhouse grown specimens and give splendid results. Trade pkt., 40c.; \$4.00 per oz.

CLUBS AND SOCIETIES

FLORISTS' CLUB OF PHILADELPHIA.

Nomination of officers and a review of the convention were the features of the monthly meeting of this club held on the 1st inst. The nominations were: For president, George Burton; vice-president, C. H. Grakelow; secretary, David Rust; treasurer, George Craig. As there is no opposition, these nominations are equivalent to election. Fred Hahman and others discussed the convention; and all seemed to be highly pleased with their experiences. The secretary was instructed to express the thanks of our club to the Boston brethren for the many courtesies extended. A similar motion was made in regard to the New York Club for their hospitality on the steamer from New York to Boston. Edward Reid gave a graphic account of his experiences in Europe; many of them tragic, some of them highly humorous. He said he finally got passage back for himself and family on the St. Paul, via the steerage. He was not disappointed in the steerage. It was worse than he expected. No more beautiful image ever appeared to mortal eyes than to him when the Goddess of Liberty statue loomed up in the offing. Adolph Farenwald spoke on affiliation and the National Flower Show of 1916. Charles Henry Fox is scheduled as the essayist for the October meeting. Subject: My European experiences.

CONNECTICUT HORTICULTURAL SOCIETY.

The Society held its first meeting succeeding the usual two-months' vacation at the County Building, Hartford, August 28. As President Huss was out of town attending the Park Superintendents' Convention, Mr. Hunt acted as chairman. The matter of appointing a committee of three to work in conjunction with the Gardeners' Co-operative Movement was postponed until the next meeting. Spikes of the gladioluses, four feet long having two dozen blooms to a spike, and asters were exhibited by William H. MacKenzie, Bristol, and a first-class certificate was awarded. Alfred Cebelius, also received a first-class certificate for asters, and G. Ogren for asters and Shirley poppies. Francis Roulier gave a most interesting account of his trip to Switzerland, giving his experiences there after war was declared. The meeting was well attended.

ALFRED DIXON, Sec'y.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

This association had a record meeting last week at Newburgh, N. Y. The sessions opened Monday, August 24 and continued till Thursday, August 27, the Thursday meeting being in New York City. The convention opened on Monday afternoon at the Palatine Hotel with a stirring address by Hon. John B. Corwin, mayor of Newburgh, followed by words of welcome by the park commissioners. A sketch of the life and work of A. J. Downing was read by Prof. F. A.

Waugh and there was an illustrated lecture by Oglesby Paul on the Preservation of Natural Woodlands Under Park Conditions, which was read by Mr. Merkel of Bronx Park, N. Y., Mr. Paul not being present.

Tuesday was devoted to visiting points of interest in and around Newburgh and Fishkill, including Mt. Beacon, Downing Park, the home of Mrs. E. H. Harriman in the Ramapo Mountains, where they were entertained at luncheon by Mrs. Harriman, and Tuxedo Park.

Tuesday evening there was an entertainment, reception and dance at the show rooms of the Coldwell Lawn Mower Company. Wednesday the members were guests of George W. Perkins, president of the Interstate Park Commission, on a trip down the

G. X. AMRHYN

President-Elect, American Association of Park Superintendents

Hudson River, visiting West Point, Interstate Parks and other points on the way to New York, where Thursday was spent in sight-seeing.

The business sessions were held in Y. M. C. A. Hall, Newburgh. G. X. Amrhn of New Haven was elected president over George W. Burke, of Pittsburgh. For secretary-treasurer, R. Cotterill of Seattle, Wash., won out over the present incumbent, J. J. Levi-son. Dan. MacRorie was present and made a seductive speech on behalf of San Francisco for the 1915 convention and San Francisco won. The number present, including ladies, exceeded 200 and many new members were enrolled. An amendment to the constitution establishing a new classification of membership was unanimously adopted.

NORTH SHORE HORTICULTURAL SOCIETY.

The annual exhibition of the North Shore (Massachusetts) Horticultural Society, postponed earlier in the month because of unfavorable weather, opened Thursday, Aug. 27. A large

tent had been erected on the grounds of Mrs. Robert C. Winthrop, offered by her for the purpose, and an interested public thronged it during the afternoon as well as in the evening, when a band concert was given. The pretty effects and general arrangement which charmingly displayed the products of North Shore gardens and hothouses, fields and meadows, were mainly due to John Chapman, the president, and other officers of the society, and the advisory executive committee, which consisted of Mrs. W. Scott Fitz, Mrs. George E. Cabot and Miss Mary Bartlett.

Considering the backwardness of the season and the close competition resulting, the general show was most creditable and beautiful. The riot of color and the exquisite and artistic arrangement of all departments created most favorable comment from the representative people in attendance. The most gratified people present were the gardeners, who have labored so unceasingly to get results pleasing to their employers, who expend so much money each year on this department of their great estates.

INTERNATIONAL FLOWER SHOW.

The Preliminary Schedule for the "International" Flower Show to be held in New Grand Central Palace, New York City, March 17 to 23, 1915, has been published and copies can be had from the secretary, John Young, 53 West 28th street, New York. As heretofore the schedule of prizes is very extensive and diversified making ample provision for the recognition of the cultural abilities of private and commercial growers in separate sections. Section A and B are for plants in flower; C and D, palms and foliage plants; E, miscellaneous plants; F

and G. ferns; H and I, bulbous plants; J and K, orchid plants; L and M, cut orchids; N and O, roses in pots and tubs; P and Q, cut roses; R, S and T, carnations; U and V, sweet peas; W and X, miscellaneous cut flowers; Y, violets; Z, table decorations. Premier prizes in some of the large classes run \$100, \$200 and \$300. All the premiums offered are liberal.

CLUB AND SOCIETY NOTES.

The Lady Florists' Home Circle will meet Wednesday, Sept. 9th, at the home of Mrs. John L. Koenig, 3511 Clarence avenue, St. Louis.

The Paterson, N. J., Floricultural Society will conduct a floral show in the Second National Bank Building on September 12, and prizes will be awarded the first, second and third winners in dahlias, asters, gladioli and roses.

The St. Louis Florist Club will hold their installation meeting on Thursday afternoon, Sept. 10. This meeting will take place at the home of the Sanders' Nursery on the Hanley road. The new officers are going to make a record this year in membership and attendance.

The New London (Conn) Horticultural Society held their Summer Show on August 26th in Clifford's Pavilion, Ocean Beach. The weather turned out cold, but for all that there was a good show of asters and gladioli which were the leading flowers. There was good competition in most of the classes, but the children's classes were empty. The attendance was good. The next morning all flowers that were of any use were sent to the hospital including the exhibit of gladioli from W. J. Schooman of Norwich. H. E. L.

The annual exhibition of the products of children's gardens will be held at Horticultural Hall, Boston, Saturday and Sunday, September 5th and 6th. Indications point to an unusually large display this year as the interest of the children throughout the State in their school and home gardens is steadily increasing. Nearly all the gardens connected with the public schools in the eastern part of the State will be represented at this exhibition and there will be displays of flowers and vegetables grown in home gardens, window boxes, and roof gardens. The exhibition is free and will be open Saturday from 12 to 6 and Sunday from 2 to 6 o'clock. Wm. P. Rich, Sec'y.

The largest exhibition of flowers ever held in San Antonio, Texas, is planned by the San Antonio Florists' Society for the early part of November. The public will be invited to enter exhibits of cut flowers and growing pot-plants, in competition for cash prizes, and florists of the city will be allowed to place flowers of all kinds on exhibition. The purpose of the project is to encourage the growing of flowers in yards and in pots on porches, as a means of beautifying the city.

It is proposed to hold the exhibition in the down-town district and present plans call for the renting of two entire floors of some centrally located building.

THE JOHN C. MEYER THREAD CO., LOWELL, MASS.

In writing advertisers kindly mention HORTICULTURE.

If you did not receive a sample of the MEYER GREEN SILKALINE at the florists' convention held in Boston, Aug. 18th, 19th, 20th and 21st, we would be pleased to submit samples and prices free at any time. The price on the MEYER GREEN SILKALINE is \$1.25 per lb., liberal discounts in case lots of 100 lbs. and upwards.

The first annual exhibition of the Lewiston-Auburn Gardeners' Association was held in Auburn Hall, Auburn, Me., on August 27 and 28. This is a new society started only a few months ago. Since then meetings have been held weekly between the two cities, and a sentiment has been worked up that has resulted in the greatest exhibit of flowers ever seen in this section. In fact, Auburn Hall was one solid mass of flowers, fruits and vegetables, worth going a long distance to see the contributors are mainly amateurs and particularly the children. The local florists have, however, given their assistance and encouragement in every way. The judges were Ernest Saunders, Hugh Roak and Mayor Wiseman.

The Horticultural Club of Boston, held its first meeting of the season at the Parker House, on Wednesday evening, September 2. Charles Bradley, superintendent of the Farm and Trade School for Boys on Thompson's Island, Boston harbor, was an invited guest and spoke on the work being done there through the generous support of philanthropic citizens to train boys in agriculture. The floral decorations were lavish and beautiful. There were splendid specimens of Europa and other gladioli from Wm. Sim, choice asters from M. A. Patten and carnation Alice from Peter Fisher, the latter showing convincingly the fine qualities of form, color, fragrance and all-the-year productiveness of this popular novelty.

The flower show held at Lancaster, Mass. on Friday, August 28, was the best that has ever been shown in Lancaster, surpassing the one last year in many ways. A background of ivy was a display from the greenhouses of Bayard Thayer. The exhibit of gladioli by C. F. Fairbanks, Milton, was most beautiful. The windows were decorated with palms and campanula from Mrs. Nathaniel Thayer's estate. There were also tiger lilies from Mrs. John E. Thayer's. There were rare lilies in the lobbies, including *Gloriosa superba*, which were exhibited by Mrs. Nathaniel Thayer. There was a collection of native shrubs which were shown for educational purposes by Mrs. Bayard Thayer. Garden flowers were profusely shown by numerous exhibitors.

The seventeenth annual exhibition of the Monmouth County Horticultural Society, will be held at St. James's hall,

Red Bank, N. J., on Wednesday and Thursday, October 28 and 29. Prizes will be offered for exhibits of chrysanthemums, foliage plants, roses, cut flowers, carnations, fruits and vegetables. The exhibition committee is composed of George H. Hale, Philip Bonner, Wellington W. Kennedy, Harry A. Kettel, Percy A. Hicks, William Dowlen and Harry Collis. The judges will be William Turner of Mendham formerly of Oceanic; James Kennedy of Deal, Adam Patterson of Saugatuck, Connecticut; James Stuart of Mamaroneck, New York; Peter Duff of Orange and Mr. Burns of New Canaan, Connecticut. William Metzдорff is president of the society, Philip Bonner is vice-president, Harry A. Kettel, secretary, Percy A. Hicks, financial secretary and George H. Hale treasurer.

The announcement that our French contemporary, *The Revue Horticole*, has been obliged to suspend publication for an indefinite time because the entire staff of employees had been called to the front, brings out very impressively the conditions so suddenly forced upon the people of that country with which we have been horticulturally so closely in touch. General Sherman's characterization of war well fits the conflict now raging in Europe compared with which all others, terrible as they have been, seem insignificant.

Sept. 1, 1914.

Dear Sir:

Enclosed find a money order for one dollar for one year's subscription to HORTICULTURE. I think it is the best paper that I have ever seen.

Flower Market Reports

BOSTON Very little animation is apparent in the trade yet, either in wholesale or retail departments. Roses are plentiful, American Beauties included. The latter are selling quite freely but there is still a surplus. Carnations of the new crop are coming in; no great demand for them but they are moving satisfactorily. Gladioli are shortening up rapidly; neither as good nor as abundant as they were. Asters are a veritable nuisance as to quantity received and lack of demand and they are bedraggled by the frequent rains. A few chrysanthemums—October Frost and Golden Glow are seen. Sweet peas are in good demand and scarce. The same is true of lily of the valley.

BUFFALO Quite a satisfactory business was had during the past week. The supply is heavy on all lines except on fancy asters which are still on the scarce side. Some indoor grown asters are fine, but not enough to fill the demand for that quality. There are plenty of Beauties and other roses, also lilies. The Saturday cleanup was quite satisfactory for summer condition.

CHICAGO According to schedule, business should be awakening into new life this week and it really is on the gain. Not that anything like all the flowers are sold or that prices are what growers like to see them, but the tendency is to a strengthening of prices on the best grades of stock and a little better demand. Carnations are again a feature in the market, some very good ones coming from under the glass, and stems are lengthening. The chrysanthemum season is just opening and Golden Glow has all the honors so far, selling from eight to fifteen cents each. Supply of lily of the valley is shortening as is also the number of orchids. Daisies are gone and miscellaneous flowers are few. This makes it easier to sell a higher class of flowers and the demand runs strongly to roses, as usual. Beauties seemed shortening a little last week but are again plentiful, more than can be moved. Mrs. Russell is holding her own as queen of the summer with Mrs. Shawyer second. At Poehlmann Bros', the success of these as summer roses is considered sure. There is a good supply of Mrs. Ward, Sunburst and Killarney Brilliant among the newer roses, and when cooler weather comes the wholesaler predicts the usual swing back to Killarneys and Richmonds, as first choice of buyers again. All kinds of green can be had. Carnation Philadelphia is being seen in the market, but so far it looks sleepy. Possibly cooler weather will give better results.

CINCINNATI The demand for stock is very slow while the supply on the other hand continues large and good. The result of the combination of these two items is a rather poor week's business. The cut of roses continues heavy; quality much better. Carnations are fair for the first crop flowers. Lilium giganteum plentiful and good. Rubrum lilies do not sell very well. A few tuberose reach the wholesale market. Asters and gladioli together form the largest part of the week's

offerings and as far as aggregate total sales are concerned form the largest part of the week's business. They are, however, offered in such large quantities that it is impossible to realize a fair price for them while many go to waste.

NEW YORK Seasonal changes are noted in the stock offered in the wholesale markets and the window decorations of the stores. A hint that Autumn is not far away is seen in the display here and there of excellent blooms of Golden Glow chrysanthemums. Dahlias in abundance are now procurable if anybody wanted them. Gladioli are still in very heavy receipt but they will gradually recede

from now on. Asters are in varying quality, some of them being unprecedentedly fine. Roses are coming in heavily, some better than others, but, as a rule, showing up well considering the time of year. Carnations are not yet in much evidence, but those that are received are of fair quality. All the foregoing are in excess of demand which is the lightest ever experienced in this market. Lily of the valley is the one scarce article. There is a lively call for all that comes in and at very firm prices. No more cheap lily of the valley is likely to encumber the trade for some time to come. The stock of pips in storage will, no doubt, be carefully

Flower Market Reports

(Continued from page 370)

hoarded and made to go as far as possible. After January will come the pinch unless all signs fail. Of orchids there are not many but still enough to go around. A few very inferior gardenias are seen.

PHILADELPHIA There is little of interest to report on the flower market conditions here this week. Trade is very quiet indeed all along the line. Roses are very plentiful—more coming in this year than ever before. Last week-end it was impossible to clean up the surplus at any price. This does not apply to any one variety. The late flowering asters are now arriving and these are of much superior quality. It is a pity conditions are so unfavorable for them. Gladioli are not so plentiful—the flush of the crop being over. Lily of the valley is selling a little better. Orchids normal. Lilies are plentiful, but not so redundant as they were.

ST. LOUIS The market has not improved and the general opinion is that it will be the latter part of this month before any signs of returning life may be looked for. Last week we had the much-needed rain and cool weather which did a lot of good to outdoor flowers and an abundance of this is expected this week to help crowd up the market. Roses are selling cheap in the top grades and in the ordinary ones can't be given away. Same may be said of asters, tuberose stalks and gladioli.

CHICAGO NOTES.

Tim Waters' loss of his purse and return railway ticket from Boston was surely a matter of regret, but his friends can sympathize with him, for most of them found their pockets quite as empty before they reached home. Notwithstanding, all pronounce the convention a great success.

A letter from A. Henderson says that he expects to sail from Liverpool, Eng., on the Calgarian, Aug. 28th, and that he will be glad to be back again. He sailed from New York just as the war broke and has had his troubles, but accomplished the main object of his trip, a visit to his old father in Scotland. Leaving Rotterdam where he landed, he went with one of the Holland salesmen who visit Chicago, for a trip to Boskoop and they were both arrested as spies. Mr. Henderson was allowed to go free but his companion was pressed into service. Mr. Henderson has never taken full citizenship so he is fortunate in not having met more serious trouble. Four carloads of French bulbs have arrived at the Henderson store.

A very meagre report of the safety of E. F. Kurowski, president of the John C. Moninger Co., and Mrs. Kurowski, at Hotel Frederick, Berlin, has been received by their son, R. E. Kurowski, but he feels confident that his parents will arrive home in a few weeks. R. E. Kurowski says that his father is an American citizen and also exempt by age from war service, but some concern is felt for a sister living at Coblenz.

N. J. Rupp expressed himself as very much pleased with the Boston convention and its business opportunities. The various representatives of the J. C. Moninger Co. all think the outlook for greenhouse building will be brighter rather than otherwise, on account of the war. They reason, that more flowers will be grown, if less substitutes are imported.

The Lake County Fair and Horticultural Show opened Sept. 1st at Libertyville, Ill. As a trade enterprise the floral exhibitions are of little value, the flowers and plants being from the home gardens; but as a promotor of the love of flowers and the desire to grow them successfully, it is well worth while. Mrs. Ida Latshaw, formerly with the now disrupted Meredith Vegetable and Floral Co., of Libertyville, was one of the judges.

The opening of the Marshall Field floral department is an event which will make a change more or less marked in the Chicago retail market. Various conjectures have been rife for the past two years and whether all the forebodings of the retailers are to be realized or not, the truth remains that some must sell less flowers than heretofore. John F. Mangel, already one of the big downtown retailers, will be their buyer as well as operate the flower booth at the entrance to the store. The new department is on the third floor near the parlors, where thousands of their patrons rest and visit daily, and will be equipped to handle an immense amount of business.

Phil. Klingsporn made his first visit to his home city, Philadelphia, since he came to Chicago to become manager of the Chicago Flower Growers Association, a year ago. Following the convention he spent a week in meeting old friends but admits that he is now

thoroughly in love with the West, meaning Chicago.

Several florists here have brothers or other relatives participating in the European war.

PERSONAL.

Mr. and Mrs. C. L. Washburn returned to Chicago from California on August 28.

Prof. C. S. Sargent of the Arnold Arboretum arrived home from Europe on Sunday, Aug. 30, and looks at least ten years younger than he did when going away.

Alfred E. T. Rogers, who has been employed on the estate of the late Ex-Governor Draper at Hopedale, Mass., under A. J. Newell, has accepted the position of superintendent of Judge Moore's place at Pride's Crossing, Mass.

Among the Americans still stranded in Europe are L. T. Carrillo and Mrs. Carrillo, of Mamaroneck, New York. Also our Canadian friend S. S. Bain and his wife, of Montreal. The latter are in London now, having lost all their belongings in their escape from the continent.

The annual sale of stalls at Boston Co-operative Flower Market takes place on Saturday, Sept. 5, at 9.30 A. M.

POISON KIL - WORM POISON

Destroys Worms, Ants, etc., infesting Golf, Cricket Grounds, Parks and Lawns. Sure death to Snails. Does not injure Grass; causes the insects to come to the surface to die. (Must not come in contact with fine plants.)

One gallon Kil-Worm makes 50 gallons liquid when mixed with water.
1 qt., \$1.00; ½ gal., \$1.75; 1 gal., \$3.00; 5 gals., \$13.50.

POISON KIL - WEED POISON

A scientific Weed Destroyer—free from odor. An unsurpassed preparation for the removal of Grass, Weeds, Vines and Bushes from paths, etc. Saves expense of several men; can be applied with an ordinary sprinkling can.

One gallon Kil-Weed makes 30 to 35 gallons liquid when mixed with water.
1 qt., 35c.; ½ gal., 60c.; 1 gal., \$1.00; 5 gals., \$4.00; 10 gals., \$7.50; 1 barrel, per gal., 65c.

LEMON OIL COMPANY, Dept. E

420 W. Lexington St., Baltimore, Md.

Directions on every pkg.; write for circular.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

Stumpp & Walter Co.
30-32 Barclay Street, NEW YORK

Obituary

Mrs. J. M. Keller.

Mrs. J. M. Keller, wife of J. M. Keller, one of the pioneer florists of Brooklyn, N. Y., died August 21st, at Elka Park, Catskill Mountains. Funeral services were held August 24th in Brooklyn, at the home of her son-in-law, M. Jordan, 65th street.

Mrs. John F. Ward.

Word was received at Shelburne Falls, Mass., a few days ago of the death by drowning of Mrs. John F. Ward at Farmington, Ct. Mr. Ward was a florist at the original Fife greenhouses and left Shelburne Falls last spring. Much sympathy is felt for Mr. Ward and his young son among their many friends in Shelburne Falls in their affliction by the untimely death of the wife and mother.

P. R. Quinlan.

P. R. Quinlan, for many years the leading florist of Syracuse, N. Y., and a prosperous business man in other enterprises, died at his home on August 27, at the age of 68 years, after an illness of several weeks. Mr. Quinlan was born in Ireland and came here with his parents when 11 years of age. He was first connected with the William Brown Smith nursery and in 1878 bought half an interest in the business. In 1892 he became proprietor of the florist business of Smiths & Powell, and moved the greenhouses to Onondaga Valley. In late years most of his time has been devoted to the asphalt business. He leaves a widow and two married daughters.

PHILADELPHIA NOTES.

William Kleinheinz has at last been heard from. He has got out of Germany and sails from Rotterdam, Sept. 5th.

The market gardeners will hold a convention in Horticultural Hall early in October. This is a national society and promises to be well attended. The affair will last one week.

Two pilgrims about whom we have been anxious returned on the 30th: Edward Reid, wholesale florist, and Gus Doemling, rose grower of Lansdowne. Both gentlemen had remarkable experiences in Europe, from all accounts. Your correspondent has not been able to greet them personally at this writing. We may have something more to say later.

Extract from personal letter received September 1st showing that our trade is not the only one that is feeling the pinch of the present cataclysm:

"Everything and everybody seems absorbed by the present war conditions. Undoubtedly people are beginning to feel the pinch of unemployment. This is particularly prevalent amongst longshoremen, few cargos of any size coming west at present and a threatened lessening of East bound cargos also. The book-making industry is in a state of collapse, both in Boston and New York. Only a very limited number of books are being published, but it is hoped that the fall will improve matters a bit."

Visitors—Ferrari Bros., San Francisco, Cal.; H. Plath, San Francisco; D. MacRorie, San Francisco; Henry S. Pennock, Jupiter, Fla.; Harry Papworth New Orleans, La.; W. R. Cobb,

TWO BOSTON CONVENTION EXHIBITS.

EXHIBIT OF BENJ. HAMMOND

The accompanying picture is an excellent view of Benjamin Hammond's display of his various insecticides, greenhouse paints and putty and other specialties, at the S. A. F. Trade Exhibition in Boston.

Speaking of the trade exhibits, J. C. Meyer of Lowell Thread Mills, the

manufacturer of silkline, tells us that he got some good business at the Convention. It is only required that silkline be shown alongside the common green thread used by many to demonstrate its great superiority for stringing asparagus and other purposes, where strength and unfading color are essential.

70	8 in.	.30	3.50	28.00

Manufactured for us exclusively. The best tub ever introduced. The neatest, lightest and cheapest. Painted green, with electric welded hoops. The four largest sizes have drop handles.

HENRY A. DREER, Seeds, Plants, Bulbs, and Supplies, 714 Chestnut Street, Philadelphia, Pa.

TWO NEW LAWS IN GEORGIA. Garnishment Law.

Section 5298 of Vol. 1 of the Code of 1910, amended to read.

All persons shall be exempt from the process and liabilities of garnishment on one dollar and twenty-five cents per day of their daily, weekly or monthly wages, and on fifty per cent. of the excess thereof, whether in the hands of their employers or others. All wages above the exemption herein provided for shall be subject to garnishment, and garnishee in making answer shall state specifically when the wages therein referred to were earned by defendant, and whether same were earned as daily, weekly or monthly wages.

Fraudulent Check Law.

To be entitled an Act declaring it a misdemeanor to draw and utter any check, draft, or order where the drawer has not at the time sufficient funds to meet the same, provided such drawer does not deposit with the drawee sufficient funds to meet the same within thirty days, providing punishment therefor, and for other purposes.

Section 1. Be it enacted by the General Assembly of Georgia, and it is hereby enacted by authority of the same, That from and after the passage of this Act, any person who shall draw and utter any check, draft, or order upon a bank, person, firm, or corporation with which such drawee has not at the time sufficient funds to meet such check, draft or order, and shall thereby obtain from another money or other thing of value, or induce such person to postpone any remedy he may have against such drawer, shall be guilty of a misdemeanor and upon conviction shall be punished as prescribed in Section 1065 of the Code.

Provided, That if such drawer shall deposit with such drawee of such paper, within thirty days thereafter, funds sufficient to meet such check, draft, or order, together with interest which may have accrued there shall be no prosecution under the provision of this Act.

The foregoing new laws have been passed by the Legislature and signed by the Governor of Georgia. Business men who have had experience in trying to collect from slippery parties in that State and some other States where laws have been lax or as in some instances plainly framed to shield the debtor, will hail with satisfaction the enactments above quoted. The overdrawn check pest is common to most localities and a reasonable curb on his operations is timely.

IF YOU ONLY

KNEW what a

good save the

METROPOLITAN

PATENT-

ED is, you would

use no other. It

is made of cast

iron and will not

rust. That part

of your green-

house which in

other construc-

tions is the weak-

est becomes the

strongest. Not

this alone, it is

ice-clearing and

carries all the

water of con-

densation from the inside, and it is so

constructed that almost the entire end

of the bar is exposed to the air, there-

by preventing decay. Only one screw,

about two inches from the end, is all

that is necessary to secure the bars.

For side stationary glass, wood headers

are absolutely unnecessary, thereby

causing no shade. Zinc glass stops are

not necessary—the glass is made with

a lug to prevent the glass from slip-

ping. Let your next house be built

with a Metropolitan Patented Iron Wall

Construction. You will never regret it.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

In writing to Advertisers kindly mention Horticulture

We equip our ridge ventilating apparatus with a Tell-Tale device that indicates at any turn of the hand wheel the exact opening in inches of your sash.

In N. F. McCarthy's big house at Montrose, Mass., the entire run of 250 feet of side sash is operated by our traveling shaft apparatus with only the one gear placed at the extreme end.

When It Comes To Ventilation Come To Hitchings

CONSIDERING the great importance of an easy working, effective ventilating apparatus, it has long been a great reflection on greenhouse concerns that some form of apparatus has not been evolved, that would do the work more satisfactorily.

The main trouble seems to have been that each concern was endeavoring to make its own type of apparatus meet all kinds of problems. One that is entirely satisfactory on short or medium length runs is often a profanity provoker on long runs.

Every one of our salesmen is instructed not to advise runs of ridge sash longer than 50 or 60 feet, when operated from the end by the one revolving shaft gear. Beyond that length you have not only shifting of the shaft to contend with, but the friction in the bearers, which is no small item.

You and I can put our shoulders against a load and push it along, which we could not possibly lift.

This being so, why not apply the same principle to a vent apparatus? The revolving shaft apparatus has to lift the dead weight. So we developed one that moved back and forth instead of turning around. It takes advantage of the push and pull principle instead of the dead load lift.

As a result, we have an apparatus that will operate runs in lengths up to 250 feet or more of side sash and do it with perfect ease. No matter whether the gear is placed at the extreme end or the middle of the run.

We believe you will find that Hitchings have the right answer to a lot of ventilation troubles. One thing sure, if we say our apparatus will do a certain thing a certain way, it will do it, or it doesn't cost you a cent; which only gets right back to the point that you can depend on depending on Hitchings. And remember "we go anywhere for business. Or to talk business."

NEW SWEET PEA

MARGARET ATLEE

THE SPENCER SUPREME

The largest and finest Sweet Pea yet introduced.

First Prize American Sweet Pea Society.
Silver Medal, National Sweet Pea Society
of Great Britain, London, July, 1914.

MARGARET ATLEE

Life Size as Grown by Ordinary Culture

MARGARET ATLEE is a rosy-salmon pink on a creamy buff ground; a rich, soft color, and extremely attractive, both as individual flowers and in the bunch. The standard is large and wavy and inclined to double under favorable conditions. The wings are equally large, wavy and well set. It runs almost uniformly four blossoms to the stem; well poised and graceful. In all respects, it is the grandest Sweet Pea we have ever grown, either from foreign introductions or American varieties.

MARGARET ATLEE has finally yielded us sufficient seed to warrant our adopting a unique method of exploiting it. We are confident that America does not half appreciate real SPENCER SWEET PEAS, and we propose to use **MARGARET ATLEE** as a missionary in the hope that it will invade every home garden where Sweet Peas can be grown.

MARGARET ATLEE was introduced in 1912, but a short crop that year and the year following prevented our offering it to the Trade, and it has not yet appeared in our Contract Lists.

Messrs. Lowe & Shawyer, the largest flower growers in Great Britain, simply insisted on having some of it last season and we let them have a pound out of our planting stock, to be used for growing cut flowers for the Covent Garden Market. They had a packet of it the year previous and considered it the very finest thing they had ever seen in Sweet Peas. With them it is a leader as a florist flower.

Ever so many people who have seen bouquets of Margaret Atlee have exclaimed, "Are those really Sweet Peas?"

Under ordinary culture they are delicate and refined to a degree. Under special culture for exhibition flowers they produce unusually large thick petals and enormous stems and leaves. It is not uncommon to see stems 22 inches long, $\frac{1}{4}$ inch thick and leaves $5\frac{1}{2}$ inches across.

MARGARET ATLEE will be put up in inside white packets, $2 \times 3\frac{1}{2}$ inches, simply printed thus:

SWEET PEA

MARGARET ATLEE

There will also be an outside packet in salmon pink, $2\frac{7}{8} \times 4\frac{1}{2}$ inches, printed thus:

40 Seeds

SWEET PEA

25 Cents

MARGARET ATLEE

New Giant Flowered Spencer.

Rich rosy salmon-pink on creamy buff. Immense wavy standard, inclined to double. Large wavy wings.

These outside packets may be left off if required or they can be supplied empty, so that the dealer's name may be printed at the bottom.

PRICES net to the Seed Trade:—

\$3.50 for 25 pkts.

12.50 per 100, up to 500 pkts.

10.00 per 100 for 500 pkts. and over.

NOTE—The name was chosen as an appreciation to Mr. Burpee,—Mrs. Margaret Atlee being his aunt.

We are issuing a circular offering several other Sweet Pea Novelties and will mail it to the Trade in a few days.

When Writing to Advertisers Kindly Mention Horticulture

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be promptly received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the editor of HORTICULTURE.

Chrysanthemums

Conditions are very different from what they were a month ago, when plants would dry in a few minutes after they had been sprayed. Now we have cooler weather and less evaporation. As the days grow cooler, less spraying is necessary, and one good syringing on bright days is sufficient. After the bud is taken and the stem is thickening, the latter should begin to "bark up" at the base, and get away from the green, soft appearance that characterizes the plants during their summer growth. If your plants are very soft and gross, less water both at the root and in the atmosphere is the quickest way to harden them up. Blackfly and greenfly will be quite troublesome so keep them in check by a systematic spraying with some insecticide or fumigation once a week.

Planting Peonies

There is no better time than from now and up to the first of October for planting peonies. Good peonies may be grown in almost any soil that has an open sunny position, but above all other perennials they like a deeply dug and rich soil. The best way to prepare is to plow or dig deeply and mix plenty of well rotten manure, bone and wood ashes. Be sure to have the soil in a fine pulverized condition before you start to plant. They should be planted no closer than four feet apart each way and about four inches deep. Get good varieties as they do not cost one cent more to grow than poorer ones.

Prepare for Frost

Take in all palms and foliage plants in pots and tubs that have been standing around for decoration. See that greenhouses, frames and sash to be used for storing such material are thoroughly overhauled and put in order. There are some sections where it may not be cold enough for a month yet to harm anything; still, even there prevention is better than cure, and all plants of doubtful hardiness should be placed where they can be speedily put under cover when necessary. A little frost will not damage genistas, azaleas, ericas, acacias, camellias and others of the hard-wooded section, but bouvardias, heliotropes and scented geraniums go almost as quickly as alternantheras, or coleus. Frames that are holding such stock as cinerarias, calceolarias, cyclamen,

primulas, etc., should have their sashes in readiness now for immediate service. Frost may be expected at any time now, so prepare by lifting all stock of a tender nature from the field rows and have them potted or boxed up.

Planting a Perennial Border

Where a florist is near a large city he should endeavor to make a show border. First of all make a drawing of the proposed border, giving each plant its proper position on the drawing. Mingle the colors so as to harmonize, and select such a variety of plants as will provide an equal amount of bloom continuously through the season. Do not plant too closely and for a background plant something in the evergreen line. These show borders are to stand for some years so the soil should be trenched deep and lots of well rotted barnyard manure mixed well in. See that every one is well firmed at the root. If the weather happens to be dry they can be watered occasionally to give them a start.

Orchids

In the cattleya house nearly all the plants will need quite a supply of water at the roots, but with the cooler nights and heavy dews the house should be kept less damp at night. Some fire heat from now on with ventilation will be advisable. Remove some of the shade now; it may make the foliage paler, but it is bound to make them more floriferous. Always allow the plants to dry out between waterings, as they must not be kept in a soaked condition all the time. Give liquid feeding to all that are making bulbs, but when the bulbs are well made up and the buds ready to show in the sheaths, feeding should be discontinued. See that they are kept clean of scale, etc. Keep the temperature from 55 to 58 degrees at night.

Genistas

These should be placed where they can have some protection during frosty nights. It is in keeping to have these plants as cool as possible without danger from frost. If protection cannot be given outside they should be placed in the coolest house and even during the winter the temperature should never be higher than 45 degrees at night.

Mr. Farrell's next notes will be on the following: Mignonette; Freesias; Liquid Lead; Chrysanthemums; Summer Flowering Bulbs; Violets; Salvia.

BOOM YOUR BUSINESS

Publicity among the kind of readers reached
by this paper is THE SORT OF PUBLI-
CITY THAT PAYS.

The Silvery Lavender Phlox

The accompanying photograph shows an interesting little phlox which was recently discovered among the sand dunes along Lake Michigan, and has since found its way into cultivation. It appears to be a distinct species and has been named *Phlox argillacea*. Until a few years ago, it was regarded as an albino form of some of the early phloxes. In general appearance it resembles *Phlox pilosa* but it is later, taller, more floriferous and the flowers are of a different color.

As it grows in the wild the flowers are of medium size but further cultivation may be expected to change this. In color they are pale lavender or white and when the plant is in bloom the whole upper parts are a mass of flowers. In the vicinity of Chicago the first flowers open a week before Decoration Day and the plant continues in full bloom for six weeks or more. Even after that there are some flowers to be found until frost.

The fact that the plant grows naturally in dry and sterile soil shows it to be practically ironclad, while the color of the flowers and its time of blooming, bridging as

PHLOX ARGILLACEA

it does the gap between spring and late summer species, makes it a very desirable addition to our list of perennial plants.

William H. Chute
Joliet, Ill.

Eleagnus longipes

It is to be deplored that this handsome shrub is not more commonly found in the plantings of the landscape architects. For foliage effect or grown as a bright-fruited shrub it is among the best we have. The oleaster, as it is commonly called, is a member of the family Eleagnaceae, which derives its name from the Greek, meaning Olive. Some of the members of this family are called the Tea-olive.

Eleagnus longipes is a shrub attaining six feet in height and of rather broad and spreading habit. The young stems are of a reddish brown and the leaves are covered on the upper surface with stellate hairs, which in spring render a silvery tinge to the foliage which is not at all displeasing. The under surface of the leaves is of a lighter green than the upper surface and is covered with scattered groups of brown hairs which give it an almost scurfy appearance. The flowers are axillary and almost solitary, yellowish-white, with tubes as long as the limb and are fragrant.

The fruits appear immediately after the flowers, in June and July, and are pendulous on slender stems much longer than the fruits themselves, which are oblong and about $\frac{3}{4}$ inch long. When young these fruits are covered with brown scales so that they also appear a bit scurfy. The flavor is slightly acid, but is found by some to be very agreeable. The birds also are fond of it. These fruits hang on the plant until late summer and if not picked off, fall naturally at that time.

The oleaster makes a very desirable shrub for general planting or for specimen work on the lawn, and can be grown in almost any well drained soil, even limestone. It prefers a sunny situation. There are several methods of propagation, the first of which is by seeds, which take two seasons to germinate and should be stratified the second spring and sown again. The second method, and the best and easiest, is by cuttings of the mature or half-ripened wood. Layering and root cuttings are sometimes used, but are not as quick or satisfactory.

Hubert H. Canning

SUBTROPICAL BED.

At Entrance to Perennial Gardens, Lincoln Park, Chicago.

This elegant group, consisting of *Ricinus*, *Alocasias*, *Caladiums*, *Cyperus*, *Cannas*, etc., bordered with *Funkias*, was planted in the bed of an abandoned fountain and made a very fine effect.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur C. Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Worms and Ants in Compost

In cutting down my compost pile, I notice that it is filled with young wire worms, white ants (possibly black ones just hatched out), and common earth worms. Please advise through your columns how I can rid the soil of these pests.

If you are going to use the soil for potting, or for some tender crop that would likely be damaged by the worms and other insects you mention, we would recommend using carbon bisulphide, making holes in the heap with a crowbar, about eight inches apart, and then pouring about a tablespoonful of the bisulphide into these holes and stopping them up at once with earth. The gas issuing from the liquid will work through the soil, and do away with the greater portion of the insects. This gas is very inflammable, and great care should be taken to keep all lights or fire away. "Vermine" advertised in another section of this paper will kill the worms and insects you mention, but the soil must be saturated with the solution as directed on the package. We as a rule seldom bother about the insects or worms unless they happen to be in great numbers, or else when we intend to use the soil for potting or some such purpose. If the soil contains only a limited amount of vermin we trust to our ability to get rid of this after the soil is in the benches. Of course where tender crops are grown this could not be worked so well, but with roses or carnations lime can be applied for the benefit of the plants, and this will kill all the worms, or at least reduce their number so that they will not be able to do harm. Ants always disappear as the season goes on, for they have no protection against water that is applied regularly to the benches. Wire worms are hard to kill, but these, too, will disappear, unless they are not the real wire worm but the brown gray centipede. We have had these in rose houses by the hundreds, but they never did any visible damage, possibly because they had plenty of manure to work in. If you are on a small place and could have the soil sterilized, it would be about the best way to clean out all the insects as well as germs. This would also kill all weed seeds, and leave the soil all clean. To explain the sterilizing: any air tight box or bin with steam pipes in it into which tiny holes have been drilled every foot or so. The soil is piled into this bin, and then the steam is turned on, subjecting the soil to a pressure of about 15 lbs., for at least fifteen minutes, after which it is ready for use as soon as it cools off.

Packing

No matter how low the prices are in the market, you will not gain anything at all by packing the cut roses

carelessly or in too much of a hurry. Use all the paper that is necessary to keep the roses comfortable and insure their carrying safely to the market. If it must be that two layers of roses are packed to the box, never pack anything over white roses. Put some pink or any other color in the bottom layer. The very slightest bruise will show on a white rose, while the colored ones will not show the bruise so much if at all. It is also advisable not to pack any roses over the better grades, for the slightest bruise on these will decrease the price, and the buyers will have a good excuse for not paying the full value for these.

Cutting

As the weather grows cooler, the buds can be allowed to remain on the plants a little longer, so that they will be of a little larger size. This will make them a better quality, and coax better prices. All blooms should be well graded, and all weak stuff or poor buds put into the seconds, regardless of the length of the stem. With Beauties we always cut two eyes above the bottom wire, unless it happens to be in the front row, where the plants get a little more sun. Then we sometimes cut the roses off two or three eyes above the surface of the soil. This of course must not be done where the plants are suffering from lack of wood. It would be ruinous to cut them down as low as that, to gain a few inches of stem, if the plants could not afford to lose the wood. A little judgment will tell where to cut and where not to cut.

Keeping the Plants Clean

Never allow the plants to become covered with dead leaves, for there is nothing more harmful. Leaves will get broken here and there when syringing or tying, and these should be picked off. Some leaves will naturally turn yellow, and if allowed to remain on the plants or on the benches will make excellent material for bugs and diseases to breed in. While the leaves are being picked keep an eye open for blackspot, and see that it is all picked off and destroyed along with the leaves.

The Walks in the Houses

Now that all the planting is done see that the walks are fixed up wherever they need it, and in the wide houses where all of the walks are earth or ashes, see that these are dry. A coat of sand will put them into nice shape, although it is rather hard on the hose, yet with care the wear on this will hardly be noticeable. We have seen walks in houses so slippery that they were real dangerous. Better keep the walks dry and safe to walk on.

The wisest course

It may not be out of place here and now to warn our readers against any stray European bulb stock that may be dumped on the American market through one intermedium or another, on account of the hysterical conditions now existing abroad. Our advice is to let such stuff alone and stick by regular sources of supply wherever possible. American importing houses have done all that could be done to secure their usual quantity and customary quality of goods with which to supply the trade upon whom they depend and who, in turn, have been accustomed to depend upon them and, as a rule,

they have managed to get their stock all right. It is due to these enterprising houses that the trade should stand by them in these troublous times and turn a deaf ear to the blandishments of strangers who will never come again after this year.

Convention garden possibilities

Mr. Hahman's comments on the Boston Convention Garden in his remarks before the Florists' Club of Philadelphia, of which we give an abstract in this issue, are interesting especially in his suggestion of the possibilities in the general arrangement of such an undertaking. It is easy to see that the planning and planting of a garden such as Mr. Hahman advocates, with each exhibit placed so as to fit in as part of a general scheme and contributing to a well balanced whole as a garden picture would be quite a formidable undertaking, calling for methods and management quite distinct from anything heretofore attempted. It is far from being an impracticability, however, and we hope it will be seriously considered and discussed. If such a work is to be undertaken as a regular convention feature for each year, it may become necessary for the S. A. F. to decide upon its meeting place two years in advance. This will not be too much time in which to lay out grounds and get the required tree and shrub plantations in and established. We understand that at least two places are already in the running for the Convention of 1916. Assuming that either one of these cities were now settled upon for that year many preliminaries on the part of the Society and the local people could be taken up at once and next spring would see the greater part of the heavier planting completed. Until some such system is put in operation the Convention Garden must invariably fall far short of its possibilities.

To develop home industries

Correspondence and circulars received at this office disclose symptoms of an encouraging awakening on the part of wholesale growers and dealers in this country to the opportunity now presented for establishing the culture here of many things we have been accustomed to import from abroad. There is really no sound reason why the greater part, if not all, of the plant and bulb material we have been buying in Europe cannot be profitably grown somewhere in this broad land, with its great diversity of climate and soil. We have been eminently successful with the tuberose and the gladiolus, not to mention certain seeds which have come to be a very large item in our horticultural exporting. Our ruling passion for working on the lines of least resistance seems to be the only apparent reason for our failure to take the lead in many other specialties. Referring to our enormous annual importation of young seedling trees and shrubs from abroad, the National Nurseryman in an editorial in its September issue can only see ultimate good to the nursery business in this country in the effects of the war, if the opportunity is taken advantage of, and offers as a slogan, "Propagate! Propagate!" Even florists' azaleas and lily of the valley pips are easily within the possibilities in this country. Conceded that the price of labor is much higher here than it is in Europe, that factor is offset largely by the resourcefulness and higher intelligence of our laboring classes and the many contingent costs and uncertainties with which importers are well familiar. It is a hopeful augury that the situation and the outlook in all its bearings on our home industries is receiving already so much attention. Such an opportunity for an auspicious start is not likely ever to come again.

THE BOSTON CONVENTION FROM A PHILADELPHIAN'S POINT OF VIEW.

Extracts for an address by Fred Hahman before the Florists' Club of Philadelphia, Sept. 1, 1914.

In reviewing events that are past, the Florists' Club of Philadelphia can feel well repaid for having elected to go to the Boston Convention via the Metropolitan Line steamer. The trip was one long to be held in pleasant memory by the participants, for its expedition, comfort and enjoyment. I do not intend to go into detail of this never to be forgotten journey, but, during the social on the boat our fellow member Mr. Grakelow, in a well chosen and well timed speech voiced the appreciation of the Philadelphia boys and girls, for the open-handed friendship extended to them by the New York Florists' Club.

The opening session of the convention was held at the Convention Garden and the exercises were most interesting. Especially noteworthy was the address of welcome by Mayor Curley of Boston. The florists and gardeners of Boston can feel proud to have a mayor of their city who is so thoroughly in accord with their chosen profession. He dwelt upon the lasting benefit and ennobling influence for the good of all the citizens as exemplified in the beautiful surroundings about him made possible by the efforts of the S. A. F. He told of the patriotism of Boston's citizens in endowing the Art Gallery which flanked the Garden on one side and other benefactions grouped about the grounds in the way of museums and other public institutions for the elevation and advancement in knowledge of Boston. After several other speeches and a reply from President Wirth, we (Mr. Logan and myself) took a stroll around the Garden to view the exhibits. The majority of the plantings were very fine and the exhibitors deserve no end of praise for their work. One of the most attractive displays which appeared to interest the general visitor was the exhibit of aquatics by the Dreer firm. The croton beds did not show up well in coloring, possibly

on account of the cool and rainy season, but the recently planted croton beds of the Craig Co., were resplendent in colors and made a most striking hit. The one poor feature about the garden was in the lawn effects; however, one of the Boston craft who had joined us told us that the garden had been planted on what was a swamp last spring and to make the grass grow in the brief time since finishing the filling had resulted in partial failure.

I was greatly impressed with the possibilities of this Convention Garden. It was the first I had seen and believe it can be made a drawing card and trade advertisement in the convention city. Instead of having the various exhibitors plant beds to show their wares ad libitum it ought to be planted with a view of producing an harmonious effect. The florists and gardeners of the city should bring to bear the best skill and art at their command, with a liberal expenditure of cash, to bring about results. A garden of that kind would make a profound impression on the citizens and would boom the trade and make the convention itself a popular event in the city chosen for its sessions.

Affiliation.

At the last meeting of our club, a committee was appointed to co-operate with the National Gardeners' Association of which committee I was made chairman. As I was the only member of this committee present in Boston I thought it incumbent to attend the joint meeting of this association on Wednesday afternoon. The attendance was large. The papers read were very well written and the one by A. E. Thatcher on the subject of What the S. A. F. has done for the Private Gardener, was well received and the discussion which followed clearly showed that the foremost minds among the gardeners fully appreciate the value of the S. A. F. to them. Much of the discussion centered around the proper way to train young men for the gardening profession and also the relations existing between the gardener and his employer, and the value of genuinely good men. President Wirth who had addressed the meeting, dwelt upon the good remuneration accorded to men able to properly fill the requirements of taking care of the estates of the wealthy and pointed out that such opportunities were fast increasing in our western country. The association voted to hold its December meeting in Philadelphia. I would bespeak for them a generous welcome by our club. Let us extend to them the hand of good fellowship and also for the sake of our fellow members who are private gardeners, let us show their National Association in what high esteem we hold the private gardeners of our club.

One other matter I wish to allude to, is the pleasure I feel that San Francisco captured the convention for 1915. They certainly were entitled to it, and I feel joyful in that they came out ahead, even if the margin was narrow. "All's well that ends well."

In our notes on the Lenox and Stockbridge estates in last week's issue we inadvertently omitted to mention that William Donaldson is the gardener in charge of the beautiful place of Mrs. Oscar Iasigi. Here was the best rose garden we saw in the Berkshire region.

WHAT SHOULD THE SOCIETY OF AMERICAN FLORISTS DO FOR THE PRIVATE GARDENER?

A Paper by Arthur E. Thatcher Read before the S. A. F., at Boston.

When we consider the comparatively short time the S. A. F. has been in existence, it is remarkable what an immense growth it has made, and what a power for good it has become.

Its growth has been almost unprecedented among American societies, and today, from a commercial point of view, it is undoubtedly the largest trade organization of its kind in the world. I have never regarded this as altogether surprising, when one considers the calibre of the men who have, since its inception, been instrumental in guiding its policies, and every horticulturist, whether employed in a business or private capacity, owes a debt of gratitude, directly or indirectly, to those who have worked unceasingly for the betterment of the profession in general.

It is true one only hears of the good which accrues to the various branches of the trade, owing, perhaps to the fact that the news and reports of the Society are largely confined to the trade papers, and what good is obtained for the profession at large is seldom heard of. Is this as it should be?

Since I became a member of the S. A. F. some years ago I have had the good fortune to be associated with many of the men who are, or have been, most prominent in the Society, and have had an opportunity of becoming acquainted with much of their work.

On the other hand it is possible to hear much adverse criticism, which is, of course, very natural, and I do not know of any Society which is free from this. So far as I have been able to learn the principal criticism is that the Society is of little use to the private gardener, and does little or nothing for him. Is this criticism fair?

While it is a very true saying that "The evil men do lives after them," it is also equally true that much of the good done by members of this Society is never heard of; but if it were, I ven-

Two carloads of White Pines 20-26 feet high. They all lived.

ABOUT HICKS' GUARANTEED EVERGREENS

MR. FLORIST: Do you have inquiries for **all-the-year screens twelve feet high?** Have you had to decline them because you could not get evergreens root-pruned, with large balls of earth, that would make a sure growth, and give satisfaction? We have been growing such trees for fifteen years. They are now ready. We will ship more trees if any fail to grow or die in two years. You merely take the order and mail it to us. The trees are grown and shipped in a way that is most nearly neglect proof but we follow it up with reminders as to

This is the way we lash the balls of earth, holding them as solid as a plant in a tub.

testing the soil for moisture, watering and manuring. You can build up a new class of trade by saving people 5 to 10 years waiting. Two acres with the objectional features screened out will give as much privacy as several times the area without tall evergreen screens.

You, Mr. Florist, have an intimate knowledge of your customers. You know who is anxious for tall groups of evergreens for a screen and windbreak this Winter. You know how to present the proposition. You have the confidence of your customers.

You know how to compose such a group: how to mix 'n' Laurel, Rhododendrons, Vinca, Barberry, to hold the mulch around the roots of the trees and make a permanently successful planting. You know your customers would like to make a permanent investment that will add to the hospitality of their home landscape. **Why not make a profit** by convincing your

customers that Hicks evergreens planted in September or October will succeed and that their guarantee is backed by several thousand evergreens from six to thirty feet high that have been moved in September or midwinter during the past three years.

Don't forget our 20 year old Norway Maples, 15 ft wide. Special price \$45.00. Replaced if they fail.

An effective screen for all out buildings, laundry yards, etc.

A group taller than the one shown can be made of

	Special Price
5 White Pines 12-14 ft. 10 yrs. \$18	\$90.00
5 White Pines 8-10 ft. 10	\$0.00

Westbury, Long Island

ture to think one would hear much praise and little criticism.

Although we are at the moment chiefly concerned with what the S. A. F. can do for the private gardener, we might also for a moment see what the Society has done for him. There can be no doubt that the exhibitions held by the S. A. F. in various parts of the country during the last few years have been the finest the country has ever seen; and these have been produced by the co-operation of the commercial and private growers. How much finer they could have been had the private gardeners been more enthusiastic can only be imagined. Certain it is that they have been of great educational value, and are yearly growing more so. Cannot the private gardener learn much from them? Where shall we see anything finer than the exhibits from the Farquhar Nurseries, the acacias from Nahant and the roses and carnations, to mention only a few of the magnificent productions brought together?

Our President, though he may be the foremost park superintendent in the country, will not be offended if I class him as a private gardener. What shall we say of the rose garden he has constructed at Hartford? Is it not the finest example of its kind in the world? And what of the out-door garden he made at Minneapolis? Are such things not of the highest educational value,

and calculated to be of the greatest assistance to the private gardener, if he will only profit by them? Are not the reports from the Botanist, the Pathologist and the Entomologist of great benefit to us all, and is not the parcel post system, so ably advocated by my friend, Mr. Welch, of great benefit to the country at large?

It may seem strange to some; but it is nevertheless true, that some of the men who have been most prominent in the Society's affairs are, or have been, private gardeners. I have only to mention such names as Farquhar, Roland, Fisher, or Totty, who are well able to tell us what advantages have accrued to them by their association with this Society. No one will imagine for a minute that the Society has made them what they are today. This has been accomplished entirely by their own efforts; and I believe this is the crux of the whole question regarding the private gardener. For the Society to be of use to him he must endeavor to become an important factor in the Society.

Finally, I cannot help thinking that the question of helping the private gardener very largely depends upon the private gardener himself; and to be of any assistance to him, any small feeling which may exist must be forgotten so that we may all, commercial and private gardeners alike, pull together for the common good.

It seems to me this powerful organization is fully equipped and fully capable of looking after all classes of the profession if we all work harmoniously together. Can we not do this and help forward the good work of this Society and the grand old profession of Horticulture?

Quincy, Mass.—The Council chamber in City Hall resembled a great market when the annual exhibit of flowers and vegetables raised by children was opened to the public on Saturday, September 5. The children worked under the direction of the civic committee of the Quincy Women's Club. At the beginning of the season 2000 children bought seeds from the committee for a cent a package, and while about 500 children lost interest the rest produced fine gardens, and in some instances produced enough vegetables to supply entire families. The judges were Supt. James Nicol of Mt. Wollaston Cemetery, William Patterson and Charles J. Anderson.

Clubs and Societies

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

Refreshed and ready for business after their August intermission the members of this club turned out in goodly numbers at the September meeting. In the matter of delinquent members, quite drastic action was taken, some 45 being dropped from membership, while several others were held in abeyance, awaiting the result of interviews with certain members, who thought they could be induced to retain their membership.

Members who had made the trip to the S. A. F. Convention in Boston by boat from Baltimore, were greatly delighted with the water trip, which was made in perfect weather with no sea sickness. The Pittsburgh delegation was entertained in Baltimore by the members of the Baltimore Club and the impression made was so deep that the secretary was instructed to send the Baltimore Club a letter of thanks and appreciation.

It was Gladiolus night and P. S. Randolph & Sons made a display of the standard varieties. They seem to find Niagara about the best seller, and Mrs. Francis King the best among the red-colored varieties. They have not yet found a perfectly satisfactory white. T. Tyler, gardener for C. D. Armstrong, showed giant cockscombs grown from seed procured in Spain. The combs were 12 inches in length, and the spikes were fine and six feet tall. A cultural certificate was awarded this exhibit. Neil McCallum the president, made an interesting exhibit of gourds. A. H. Austin & Co., Wayland, O., sent an exhibit of seedling gladioli which was sent to the Fort Pitt Hotel, marked for the Florists' Club. Unfortunately the box was detained in the hotel and not delivered. Next day, the box was secured and the flowers put on view at the Pittsburgh Cut Flower Co.'s rooms. The seedlings were good. Perhaps the leader was Bertrix, a fine white, which has twice been a cup winner. Easter Bells was a yellow which looked as though it might give Niagara quite a run. Blu-vista is hard to describe. It was a curious shade of white with lavender-purple feathering. I do not know how it would do commercially, but as a

novelty at least every gardener should grow it. No. 52 is a good white after the style of Peace.

H. P. JOSLIN, Sec'y.

HORTICULTURAL SOCIETY OF NEW YORK.

The Horticultural Society of New York, in cooperation with the New York Botanical Garden, will hold a dahlia exhibition on Saturday and Sunday, Sept. 26th and 27th, in the Museum building, New York Botanical Garden, Bronx Park, N. Y. City. Schedules of classes and premiums are now ready and will be sent on application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City. A symposium on the dahlia will be held on Saturday, Sept. 26th, at 2.30 P. M., in the lecture hall, Museum building. Dr. H. H. Rusby, who has traveled extensively in the country where the dahlia is native, will make a short address on the home and surroundings of the dahlia. This will be followed by a discussion of the methods of present day cultivation of this flower, led by specialists in this line.

All, both amateur and professional, are invited to contribute exhibits and to take part in the discussion. Let us make this a notable gathering of dahlia enthusiasts. Certainly the dahlia is a very popular flower and has hosts of admirers who can do justice to the presentation of their favorite.

GEORGE V. NASH, Sec'y.

CLUB AND SOCIETY NOTES.

The St. Louis Retailers' Association will hold a meeting on Monday, Sept. 21, at Washington Hotel, 8 P. M.

The Cincinnati Florists Society's regular meeting will be held Monday, Sept. 14. A large attendance is expected at this meeting for it is the first one after the summer vacations.

The regular monthly meetings of the Gardeners' and Florists' Club of Boston, will be resumed on Tuesday evening, September 15, at Horticultural Hall, Boston.

The New York Florists' Club will hold its first regular meeting for the season of 1914-15, in Grand Opera House club room, 23rd street and 8th avenue, on Monday evening, September 14. Convention views and experiences will be the topic.
